CIVILS ATLAS / RESEARCH EDITION 19

April 2026

Understand the news.
Retain what matters.

49 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Parliament and legislative stages

Budget-session closure: extension and scrutiny

E11-2604-001 · P1 · 2026-04-18 · National / other

WHY IN THE NEWS The session was adjourned sine die on 18 April after extra sittings.

• The session ran 28 January–18 April 2026 and recorded 31 sittings.

• The review reports 10 introduced and six passed bills in its substantive legislative tally; Budget/appropriation business is separately discussed.

• Additional sittings 16–18 April considered a linked delimitation package; the Constitution amendment was defeated.

STATIC CONNECTION · ORIGINAL Adjournment sine die ends sittings without fixing a further date; prorogation is a distinct presidential act.

ANALYSIS · ORIGINAL GUIDANCE

• The March resumption was not the start of the session; a chronology prevents a false 1 February commencement date.

• Committee referral, House passage and statutory commencement remain separate study fields.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate adjournment with dissolution or assume every introduced bill passed.

MAINS PROMPT How should legislative output be assessed alongside deliberation and scrutiny?

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Delimitation and federal representation

Defeated delimitation package: proposals are not constitutional changes

E11-2604-002 · P1 · 2026-04-17 · National / other

WHY IN THE NEWS Three linked bills were introduced 16 April; the Constitution amendment was negatived.

• The proposed 131st amendment would raise the maximum Lok Sabha size from 550 to 850 and alter census/delimitation provisions.

• The package would change the census linkage governing commencement of women’s reservation; it did not itself implement reservation.

• After the Constitution bill failed, the dependent Delimitation and UT-law bills were not taken up in the reviewed account.

STATIC CONNECTION · ORIGINAL An Article 368 special majority requires a majority of the House’s total membership plus at least two-thirds present and voting; ratification additionally applies where constitutionally required.

ANALYSIS · ORIGINAL GUIDANCE

• Population equality interacts with federal concerns about states that reduced fertility; distinguish equal constituency populations from equal state representation.

• Rejection preserves the existing constitutional position; a proposed ceiling is not an actual elected membership.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not write that the Constitution now allows 850 seats or that the rejected bill was the 131st enacted amendment.

MAINS PROMPT Evaluate representation, demographic change and federal fairness without treating a defeated bill as law.

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · Proportionate compliance

Jan Vishwas: trust requires credible enforcement

E11-2604-035 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS April’s issue reviews the 2026 legislative reform. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The primary revised scope is 79 Central Acts and 784 provisions, including 717 decriminalisation and 67 ease-of-living amendments.

• Graded warnings, civil penalties and adjudication seek more proportionate treatment of specified lapses.

• The March volume’s earlier 80 Actcount is corrected from the primary 27 March introduction release.

STATIC CONNECTION · ORIGINAL Decriminalisation does not abolish the regulatory duty; an administrative penalty still needs lawful procedure and review.

ANALYSIS · ORIGINAL GUIDANCE

• Credible trust combines easier compliance with predictable detection and proportionate enforcement.

• Small businesses need understandable obligations and accessible appeals, not merely lower formal penalties.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe all offences as abolished or count Acts, provisions and offences as interchangeable. Detailed commencement remains separately unchecked.

MAINS PROMPT What makes trust-based regulation effective rather than permissive?

Sources: [E11-JAN], [E11-JANAPR], [E11-V28]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

04 · Census phases and safeguards

Census 2027: April rollout is not completed population enumeration

E11-2604-036 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The first-phase programme is discussed in April’s magazine. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The exercise is governed by the Census Act 1948 and Census Rules 1990 under the Union framework.

• Houselisting/housing data and population enumeration are separate phases, with state-specific schedules.

• Digital capture and optional self-enumeration supplement field verification; they do not mean only smartphone owners are counted.

STATIC CONNECTION · ORIGINAL Census confidentiality, complete coverage and comparable definitions are essential to a statistical baseline.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s schedule must be read separately from the national operating window.

• Caste enumeration plans must distinguish comprehensive enumeration from SC/ST information collected in past censuses.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say every state began household visits on 1 April, that the census is complete, or that no caste-related data were collected after 1931.

MAINS PROMPT How can a digital census improve coverage while protecting confidentiality and inclusion?

Sources: [E11-V29]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

05 · Ethics and business responsibility

Conscious capitalism: purpose needs verifiable conduct

E11-2604-040 · P2 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The issue’s ethics essay contrasts narrow profit metrics with stakeholder responsibility. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The approach emphasises purpose, stakeholder value and long-term responsibility alongside financial viability.

• Gandhian trusteeship offers a normative connection, not a substitute for enforceable law.

• Employees, consumers, communities and ecosystems can bear costs not captured in short-term accounts.

STATIC CONNECTION · ORIGINAL Legal compliance is a minimum; ethical responsibility also asks who bears harm and whether affected people can challenge decisions.

ANALYSIS · ORIGINAL GUIDANCE

• Test purpose statements through wages, safety, supply-chain practice, grievance systems and environmental outcomes.

• Counterpoint: vague stakeholder promises can mask concentrated discretion unless board accountability and measurable commitments exist.

PRELIMS CAUTION A CSR budget or ethical slogan alone does not prove a firm meets stakeholder obligations.

MAINS PROMPT Develop an ethical assessment of a profitable firm whose contractors expose workers to avoidable harm.

Sources: [E11-V15]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Economy

01 · Inflation release vintage

13 April CPI: March provisional versus February final

E11-2604-003 · P1 · 2026-04-13 · National / other

WHY IN THE NEWS MoSPI’s 13 April release uses the 2024=100 CPI series.

• March 2026 provisional combined CPI inflation is 3.40%; food inflation is 3.87%.

• February final combined CPI inflation is 3.21%; March’s index level is 104.84, not 3.40.

• PRS separately reports Q 4 average CPI inflation 3.12%; a quarter average is not the March rate.

STATIC CONNECTION · ORIGINAL An index level, year-on-year rate and quarterly average answer different questions; publication month differs from reference month.

ANALYSIS · ORIGINAL GUIDANCE

• Disaggregated food/rural/urban evidence can explain household experience better than one national rate.

• New-base and earlier-series comparisons require consistent baskets, weights and revision labels.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are not April inflation data; April’s release was scheduled for May. Provisional values may be revised.

MAINS PROMPT Why should inflation analysis preserve reference period, basket and revision status?

Sources: [E11-CPI], [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Monetary-policy decisions

April MPC hold and later publication of minutes

E11-2604-004 · P1 · 2026-04-08 · National / other

WHY IN THE NEWS The 6–8 April meeting’s minutes were published 22 April.

• The MPC unanimously retained the repo rate at 5.25%.

• SDF remained 5.00%, with MSF and Bank Rate 5.50%; the stance remained neutral.

• The primary minutes identify global supply/energy and financial-market risks alongside domestic resilience.

STATIC CONNECTION · ORIGINAL The policy repo rate is an instrument, not a direct administrative price for every retail loan; minutes explain the earlier decision.

ANALYSIS · ORIGINAL GUIDANCE

• Supply shocks create a growth–inflation trade-off rather than a simple mechanical response to one CPI number.

• Neutral preserves flexibility; transmission to lending/deposit rates depends on benchmarks, liquidity and bank decisions.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 22 April is the minutes date, not a second repo decision. Neutral does not guarantee the next move is a cut.

MAINS PROMPT Discuss monetary-policy choices when external supply shocks affect both growth and inflation.

Sources: [E11-MPC], [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · PPI consultation

Prepaid-payment draft: categories and proposed limits

E11-2604-005 · P2 · 2026-04-22 · National / other

WHY IN THE NEWS RBI issued draft PPI Master Directions in April.

• The draft proposes general-purpose and special-purpose categories and a cross-border-use prohibition under its framework.

• For full-KYC PPIs, the proposed monthly cash-loading limit is ₹10,000, compared with ₹50,000 in the reviewed earlier framework.

• The draft introduces a ₹25,000 monthly person-to-person transfer limit for full-KYC PPIs.

STATIC CONNECTION · ORIGINAL A wallet’s stored value differs from a bank deposit account; cash loading, outstanding balance and transfers are different limits.

ANALYSIS · ORIGINAL GUIDANCE

• Tighter controls may reduce misuse but can constrain legitimate cash-dependent users; accessibility and proportionate KYC matter.

• A redesign must be assessed against fraud risk, interoperability and merchant/user costs.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A consultation draft is not the operative rulebook; ₹10,000 is not a universal limit on every UPI or bank-account transaction.

MAINS PROMPT How can wallet regulation balance financial inclusion with risk management?

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

04 · Social-impact finance

AIF social-impact entry threshold and investor protection

E11-2604-006 · P2 · 2026-04-18 · National / other

WHY IN THE NEWS SEBI’s 18 April amendment is covered by the review.

• PRS reports reduction of the individual minimum for a social-impact fund from ₹2 lakh to ₹1,000.

• These funds are linked to eligible not-for-profit securities on the social-stock-exchange framework.

• The amendment also provides for identifying an AIF as inoperative; category-specific conditions remain relevant.

STATIC CONNECTION · ORIGINAL Social-impact funds are a specified segment of the AIF framework, not ordinary bank deposits; the parent AIF regulations date to 2012.

ANALYSIS · ORIGINAL GUIDANCE

• Lower entry sizes can widen participation, but investors need clear information on instruments, outcomes and risks.

• Social purpose does not remove governance, disclosure or verification needs.

PRELIMS CAUTION ₹1,000 is not the new minimum for every AIF or a guarantee of commercial returns. PRS’s 2016 parent-regulation label is not reused.

MAINS PROMPT What safeguards make small-ticket social finance credible?

Sources: [E11-AIF], [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

05 · SEZ domestic clearances

Conditional SEZ–DTA concessions: check the denominator

E11-2604-007 · P1 · 2026-04-01 · National / other

WHY IN THE NEWS The notified concession framework applies 1 April 2026–31 March 2027.

• Eligible units must have commenced production on/before 31 March 2025 and meet at least 20% value addition.

• The DTA-sale cap is 30% of the highest annual FOB export value in any of the immediately preceding three financial years.

• Certification, audit, excluded products/units and prevention of double benefits are part of the design.

STATIC CONNECTION · ORIGINAL SEZ-to-DTA clearance attracts the applicable customs treatment; concessional does not mean blanket duty-free domestic sale.

ANALYSIS · ORIGINAL GUIDANCE

• Capacity utilisation may improve during weak export demand, while the cap preserves export orientation.

• A unit needs its own product classification and compliance evidence; not every SEZ activity qualifies.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The cap is not 30% of current-year total production, and value addition is not identical to the duty rate.

MAINS PROMPT Assess temporary SEZ flexibility against export incentives and competition in the domestic market.

Sources: [E11-SEZ], [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

06 · Export-risk protection

RELIEF extension: geographic insurance coverage

E11-2604-008 · P2 · 2026-04-17 · National / other

WHY IN THE NEWS The April review records expanded export-risk support.

• RELIEF was launched 19 March under the Export Promotion Mission amid war-related trade risks.

• April expansion added Egypt and Jordan to reviewed coverage.

• Insurance eligibility, covered loss and claim terms remain distinct from shipment value and general export incentives.

STATIC CONNECTION · ORIGINAL Export credit/risk insurance transfers specified risks; it does not prevent disruption or guarantee payment for every commercial loss.

ANALYSIS · ORIGINAL GUIDANCE

• Risk support can keep viable trade moving, but exporters still need route, buyer and contract due diligence.

• Geographic coverage should not be confused with a tariff preference or unrestricted sovereign guarantee.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Expansion does not mean every shipment’s entire value is automatically reimbursed.

MAINS PROMPT How can trade-risk support complement, rather than replace, exporter risk management?

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

07 · Garment-export remission

RoSCTL extension: embedded taxes, not all export costs

E11-2604-012 · P2 · 2026-04-01 · National / other

WHY IN THE NEWS The textile-export rebate scheme was extended in April.

• The reviewed extension runs up to 30 September 2026 or earlier approval for the 16th Finance Commission period.

• RoSCTL covers eligible apparel and made-ups under its prescribed framework.

• It rebates embedded central/state taxes not otherwise reimbursed rather than duplicate refunds.

STATIC CONNECTION · ORIGINAL RoSCTL and RoDTEP are distinct remission arrangements; product coverage and notified schedules matter.

ANALYSIS · ORIGINAL GUIDANCE

• Tax neutrality can support MSME competitiveness but cannot alone offset logistics, energy or market-demand shocks.

• Monitor actual claim access and payment delays rather than equate scheme extension with increased export orders.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call this a uniform subsidy on every textile item or an unconditional extension beyond the stated endpoint.

MAINS PROMPT Assess remission schemes as part of a broader textile-export strategy.

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

08 · Highway fees and loading

Overload fee tiers are not permission to overload

E11-2604-014 · P2 · 2026-04-13 · National / other

WHY IN THE NEWS April amendments revise national-highway fee treatment of overloaded vehicles.

• The reviewed fee tiers are no overload fee up to 10% excess, twice the base fee above 10% through 40%, and four times above 40%.

• Certified weighing facilities underpin assessment.

• PRS reports no overload fee if the fee plaza lacks the prescribed weighing facility.

STATIC CONNECTION · ORIGINAL A toll-fee rule and vehicle weight/safety law regulate different legal questions.

ANALYSIS · ORIGINAL GUIDANCE

• Calibrated fees may reduce arbitrary charging, but enforcement must not make dangerous loading commercially attractive.

• Reliable measurement, receipts and grievance handling are necessary for fair administration.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2507-022, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E6-2510-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No additional overload fee is not a legal exemption from every permissible-weight or road-safety requirement.

MAINS PROMPT How can freight enforcement protect roads and safety without arbitrary penalties?

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

09 · Insolvency reform

IBC 2026: assent and provision-specific commencement

E11-2604-018 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The Gazette records Presidential assent on 6 April. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The amendment’s opening section allows different notified commencement dates for different provisions.

• The reviewed reform includes creditor-initiated resolution and enabling group/cross-border frameworks; details require the applicable text/rules.

• The primary opening clarifies agreement-based security interest and requires written reasons for specified admission delays.

STATIC CONNECTION · ORIGINAL Resolving a viable debtor, selling assets and liquidating a company are different outcomes; creditor recovery needs a stated denominator.

ANALYSIS · ORIGINAL GUIDANCE

• Faster processes can preserve going-concern value, but tribunal capacity and fair treatment of stakeholder classes still matter.

• An enabling framework is not proof every new procedure was usable immediately on assent.

PRELIMS CAUTION Do not backdate later commencement to 6 April or copy recovery percentages without distinguishing admitted claims from liquidation value.

MAINS PROMPT How can insolvency reform improve speed while retaining fairness and value preservation?

Sources: [E11-IBC], [E11-V04]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

10 · Labour statistics — dated carry-forward

Annual PLFS 2025: March release in April’s magazine

E11-2604-020 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The primary release is 27 March and measures January–December 2025; April is a revision index. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• For age 15+ in usual status, LFPR is 59.3%, WPR 57.4% and UR 3.1%.

• Male/female LFPR are 79.1% and 40.0%; regular wage/salaried work accounts for 23.6% of workers.

• Youth 15–29 usual-status unemployment is 9.9%; it is not interchangeable with the all-age 15+ rate.

STATIC CONNECTION · ORIGINAL LFPR uses population as denominator, while unemployment uses the labour force; usual status and current-weekly status differ.

ANALYSIS · ORIGINAL GUIDANCE

• Low unemployment can coexist with low participation, insecure work and low earnings; employment quality needs separate evidence.

• The primary describes gender gaps in hours worked; it does not label the quoted male–female differences as unpaid-work hours.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call this April’s monthly survey, mix status/age groups or treat nominal wage growth as real wage growth.

MAINS PROMPT Explain why headline unemployment alone is an incomplete labour-market diagnosis.

Sources: [E11-PLFS], [E11-V06]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

11 · Industrial incentives

PLI: incremental sales versus domestic value addition

E11-2604-022 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS April’s magazine reviews PLI performance, including food processing. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The PLI umbrella covers 14 sectors with a stated ₹1.97 lakhcrore outlay.

• Incentives generally link to eligible incremental production/sales under sector-specific conditions.

• Investment committed, realised investment, approved claims and actual incentive payments measure different stages.

STATIC CONNECTION · ORIGINAL Gross output, assembly activity and domestic value added are not identical indicators of industrial capability.

ANALYSIS · ORIGINAL GUIDANCE

• Supplier development and technology learning determine whether scale persists after incentives decline.

• For AP food-processing opportunities, assess raw-material supply, cold chains and market demand rather than assume all firms qualify.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION An aggregate success claim does not establish equal performance across all 14 sectors or completed payment of the total outlay.

MAINS PROMPT How should PLI be evaluated for additionality and durable domestic capability?

Sources: [E11-V08]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

12 · Payments strategy

Payments Vision 2028: roadmap is not an immediate liability rule

E11-2604-026 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS April’s magazine discusses RBI’s payments roadmap and UPI’s first decade. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The roadmap includes user controls, fraud-risk response, wider oversight and cross-border authorisation simplification.

• TReDS interoperability concerns receivables-finance platforms, not a universal cancellation of trade credit.

• Proposed shared fraud responsibility needs applicable directions before being treated as a settled entitlement.

STATIC CONNECTION · ORIGINAL A vision document sets priorities; binding implementation arises through the relevant laws, directions and systems.

ANALYSIS · ORIGINAL GUIDANCE

• Interoperability can reduce switching frictions, while resilience needs competition, security and accessible redress.

• A user switch-off facility must be usable in practice without excluding people who need assisted access.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim every roadmap feature is already universally available or every loss is automatically jointly reimbursed.

MAINS PROMPT How should a payments roadmap balance scale, competition and consumer trust?

Sources: [E11-V12]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

13 · Fraud safeguards — discussion

Cooling-off proposals: fraud prevention versus payment speed

E11-2604-027 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The magazine covers RBI’s discussion of additional digital-fraud safeguards. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Ideas include a one-hour delay for specified transfers above ₹10,000, with proposed trusted/whitelisted exceptions.

• Other options include user-controlled limits, extra safeguards for vulnerable users and scrutiny of mule accounts.

• An authorised push-payment fraud can involve a deceived user authenticating the transaction.

STATIC CONNECTION · ORIGINAL Authentication verifies an action/credential; it does not prove that consent was free from deception.

ANALYSIS · ORIGINAL GUIDANCE

• A delay may enable cancellation but can impede genuine time-sensitive transfers; design should use evidence and calibrated exceptions.

• Trusted-person safeguards must preserve autonomy and not become an automatic barrier for all older or disabled users.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are discussion-paper options, not a universal current one-hour delay on every UPI transfer.

MAINS PROMPT Evaluate proportionate anti-fraud friction in an instant-payments system.

Sources: [E11-V13]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Agriculture

01 · Oilseed value chains

Edible-oil self-reliance: production, processing and incentives

E11-2604-021 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The April issue revisits the March parliamentary report on oilseeds and pulses. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The article cites approximately 56% import dependence and 15.66 MMT imports for 2023–24; these are dated secondary report figures.

• Rainfed production, yield variability, seed systems and processing affect domestic supply.

• Expanded procurement and trade measures discussed in the report are recommendations, not automatic universal purchases.

STATIC CONNECTION · ORIGINAL Oilseed output and edible-oil availability differ because oil recovery, processing and consumption patterns matter.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, compare agronomic suitability, water demand, mill access and farmer returns before expanding a particular crop.

• Import protection may help growers but can raise consumer costs; predictable policy and productivity improvements must work together.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate an import-share estimate for 2023–24 with April 2026’s final balance or presume every GM/seed claim in commentary is established evidence.

MAINS PROMPT How can edible-oil self-reliance reconcile farmer incomes, water use and consumer affordability?

Sources: [E11-V07]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Resilient production systems

Record foodgrain output is not proof of resilient livelihoods

E11-2604-025 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The issue uses reported 2024–25 production to examine agricultural resilience. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The article cites 357.73 MMT foodgrain output for 2024–25; it is a dated source figure, not April 2026’s harvest outcome.

• Resilience requires input efficiency, diverse production, risk protection, storage and markets.

• Output, farm income and nutritional diversity should be assessed separately.

STATIC CONNECTION · ORIGINAL A national production record can coexist with local crop losses and financially vulnerable smallholders.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, connect climate-resilient varieties, water budgeting, extension and FPO/market access.

• Stability depends on institutions that absorb weather and price shocks rather than only increasing aggregate tonnage.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not conclude every farmer benefited equally or use a secondary production estimate as an undated current final statistic.

MAINS PROMPT What makes a production system resilient rather than merely high-yielding?

Sources: [E11-V11]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Society & Welfare

01 · Rural connectivity

PMGSY-III: different deadlines for hill bridges

E11-2604-013 · P1 · 2026-04-18 · National / other

WHY IN THE NEWS Cabinet continued PMGSY-III on 18 April with revised outlay.

• The revised outlay is ₹83,977 crore, up from ₹80,250 crore.

• Roads/bridges in plains and roads in hills have a March 2028 deadline; hill bridges extend to March 2029.

• The scheme consolidates through routes and major rural links to markets, higher-secondary schools and hospitals.

STATIC CONNECTION · ORIGINAL Road connectivity is a service network: construction, maintenance, all-weather reliability and access to destinations all matter.

ANALYSIS · ORIGINAL GUIDANCE

• Tendering eligible older sanctioned works can address backlog, but execution quality and lifecycle maintenance remain essential.

• For AP, use travel-time, seasonal access and service-use outcomes rather than assume every village gets a newly sanctioned road.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION March 2028 is not the deadline for every hill bridge, and revised outlay is not spending already incurred.

MAINS PROMPT How should rural-road programmes be evaluated beyond kilometres constructed?

Sources: [E11-PMGSY], [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Platform work and protections

Gig-work welfare: a neighbouring-state comparison, not AP law

E11-2604-019 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS April’s magazine examines Telangana’s platform-worker legislation and broader gig-work issues. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Platform work can sit outside the conventional employer–employee relationship while still involving substantial economic dependence.

• The article describes registration, a welfare board/fund and grievance/algorithmic-transparency mechanisms in Telangana’s framework.

• National Social Security Code financing and a state transaction-based levy are different designs; neither should be silently attributed to AP.

STATIC CONNECTION · ORIGINAL Worker status, social-security entitlement and actual benefit delivery are separate questions.

ANALYSIS · ORIGINAL GUIDANCE

• Portable benefits can support multi-platform workers, but registration, contribution collection and grievance access determine reach.

• For AP answers, evaluate possible lessons without inventing a newly enacted equivalent state statute.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The selected state-Act account is secondary evidence; commencement/levy notifications were not independently read. Forecast worker totals are not observed employment.

MAINS PROMPT Design portable protection for platform workers while preserving flexible work opportunities.

Sources: [E11-V05]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · Wages and industrial relations

Worker protests: formal rules and lived insecurity

E11-2604-024 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS April’s magazine discusses protests in several industrial hubs. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Contracting chains, wage pressure, working conditions and weak grievance channels feature in the account.

• The four labour codes consolidate a legal framework, but provision-specific operation and state rules need separate checks.

• The central floor wage and minimum wages set by appropriate governments are distinct legal concepts.

STATIC CONNECTION · ORIGINAL A statutory protection is not the same as effective coverage, payment or accessible enforcement.

ANALYSIS · ORIGINAL GUIDANCE

• Transparent payslips, credible worker representation and timely wage-dispute resolution can reduce avoidable conflict.

• AP applications should examine industrial compliance and welfare delivery rather than import another state’s local protest facts.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not invent two identical nationally fixed wage rates from the magazine’s wording or assume registration alone delivers social security.

MAINS PROMPT How can labour reform combine industrial competitiveness with credible worker protections?

Sources: [E11-V10]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

04 · OneHealth coordination

One Health: linking human, animal and ecosystem health

E11-2604-033 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The April issue discusses a One Health summit in Lyon. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• One Health integrates human, animal, plant and environmental health rather than treating zoonoses solely as hospital problems.

• The Quadripartite partners are WHO, FAO, UNEP and WOAH.

• The article describes strengthened scientific advice, practical networks and attention to rabies and avian influenza.

STATIC CONNECTION · ORIGINAL Surveillance, prevention and response must connect veterinary, public-health and environmental information.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, livestock/poultry surveillance, laboratories and risk communication should share actionable protocols.

• Data sharing needs clear responsibilities and capacity; a summit announcement is not proof of district-level integrated response.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION One Health is not the merger of all agencies into WHO or a promise that every zoonosis can be eliminated by one intervention.

MAINS PROMPT Design an implementable One Health response to zoonotic risk.

Sources: [E11-V25]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

05 · Rural housing

PMAY-G: sanctioned houses, assistance and service convergence

E11-2604-038 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The April issue revisits the rural housing programme introduced in 2016. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The reviewed target combines the earlier 2.95 crorehouses with another 2 crore through FY 2028–29.

• Standard unit assistance is ₹1.20 lakh in plains and ₹1.30 lakh in specified hill/difficult areas, with applicable conditions.

• Beneficiary identification, Gram Sabha verification, geotagging and convergence for amenities are distinct delivery steps.

STATIC CONNECTION · ORIGINAL A pucca structure is not automatically adequate housing without water, sanitation, energy, tenure security and accessibility.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, assess exclusions, instalment timeliness, local construction cost and actual occupancy.

• Construction sanctions and completed houses should not be counted as the same outcome.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not conflate PMAY-G with the urban scheme or treat 4.95 croreas houses already completed. The article’s incorrect 1996 start for Indira Awas Yojana is not reused.

MAINS PROMPT What makes rural housing support translate into dignified habitation?

Sources: [E11-V33]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

06 · Household vulnerability

Middle-class vulnerability: define the group before quoting rates

E11-2604-039 · P2 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS April’s article links employment, prices and household security. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• There is no single universally interchangeable income-based definition of India’s middle class.

• Income volatility, healthcare/education costs and debt service can affect resilience even above poverty thresholds.

• The article’s headline graduate-unemployment and double-digit cost claims are not adopted as current official statistics without matching period/cohort evidence.

STATIC CONNECTION · ORIGINAL Nominal income growth, real disposable income and household wealth measure different dimensions.

ANALYSIS · ORIGINAL GUIDANCE

• Use PLFS age/status definitions and the actual CPI release rather than combine incompatible estimates for an alarming headline.

• Policy can support public services, insurance and productive work without assuming all households face identical inflation.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not substitute an older subgroup unemployment rate for the 2025 PLFS headline or claim national health/education CPI is automatically double-digit.

MAINS PROMPT How can policy address household insecurity beyond a binary poor/non-poor classification?

Sources: [E11-PLFS], [E11-CPI], [E11-V34]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Environment

01 · Underground coal gasification

UCG mining plans: energy extraction and groundwater risk

E11-2604-011 · P1 · 2026-04-06 · National / other

WHY IN THE NEWS Coal-ministry guidelines were released 6 April.

• Coal/lignite blocks proposed for underground gasification require a mining plan approved by the Coal Controller Organisation before operations.

• The reviewed safety design includes subsidence/fire/groundwater controls and at least 500 metres between coexisting mining and gasification operations.

• Closure includes well sealing, cavity stabilisation and three-year post-closure groundwater monitoring in the reviewed guidelines.

STATIC CONNECTION · ORIGINAL Underground gasification converts coal in situ into usable gas; it differs from physically excavating coal for surface combustion.

ANALYSIS · ORIGINAL GUIDANCE

• Access to otherwise difficult resources must be weighed against hydrogeological uncertainty and monitoring capacity.

• Escrow-backed closure obligations help address liabilities that outlast production.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION An approved mining plan is not proof of zero contamination or exemption from all other permissions.

MAINS PROMPT Evaluate UCG through energy security, environmental risk and enforceable closure planning.

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Coastal oil pollution — draft

Tar-ball management: proposed lifecycle responsibility

E11-2604-015 · P1 · 2026-04-03 · National / other

WHY IN THE NEWS MoEFCC released draft rules 3 April for consultation.

• Tar balls are weathered oil residues; potential sources include spills, leakages and natural seepage.

• The draft covers collection, storage, transport, treatment and disposal, with proposed SPCB authorisation.

• It assigns district/state/pollution-board roles and proposes response capacity and environmental compensation.

STATIC CONNECTION · ORIGINAL Weathering can change oil’s form without making it ecologically harmless; source attribution needs evidence.

ANALYSIS · ORIGINAL GUIDANCE

• For AP’s coast, planning should link shoreline reporting, trained collection, worker protection and authorised waste handling.

• Preparedness benefits fisheries and tourism, but declaring responsibility does not establish that a specific operator caused every incident.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The draft does not itself prove final statewide duties are in force. Do not infer blanket environmental-clearance exemptions from a secondary summary.

MAINS PROMPT Design a coastal oil-residue response that connects pollution control with local livelihoods.

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · Renewable-energy measurement

Renewables: capacity rankings do not establish generation share

E11-2604-030 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The issue reviews renewable-capacity and electricity-transition reports. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Installed capacity measures rated potential; generation measures actual electricity over time.

• Non-fossil capacity includes nuclear, while renewable capacity is a narrower category.

• The article’s 51.5% demand statement is not adopted as a verified generation statistic; its capacity/generation measures are inconsistent.

STATIC CONNECTION · ORIGINAL GW measures power capacity; GWh/TWh or billion units measure energy produced over a period.

ANALYSIS · ORIGINAL GUIDANCE

• Grid integration, storage and flexible resources determine how capacity additions translate into reliable supply.

• AP policy should evaluate evacuation, curtailment, land and distribution finances, not only project announcements.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call a capacity ranking the same thing as global renewable electricity production rank or equate 51.5% capacity with energy demand met.

MAINS PROMPT How should clean-energy progress be measured beyond installed gigawatts?

Sources: [E11-V21]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

04 · Water systems and irreversible loss

Water bankruptcy: a diagnostic metaphor, not a court status

E11-2604-031 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The magazine discusses UNU-INWEH’s water-bankruptcy framework. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The concept concerns long-run use beyond renewable inflows and safe depletion limits, with lasting damage.

• It distinguishes an acute water crisis from persistent depletion and effectively irreversible loss.

• Surface flows, groundwater, wetlands and glaciers have different storage/replenishment dynamics.

STATIC CONNECTION · ORIGINAL A water balance compares inflows, withdrawals and storage changes; economic extraction limits differ from sustainable ecological limits.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, basin-wide groundwater budgeting should connect irrigation, urban demand and ecosystem needs.

• Demand reform and crop choice can be more durable than supplying a new source to sustain unsustainable use.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This is an analytical framework, not a formal declaration that every aquifer or all water everywhere is physically exhausted.

MAINS PROMPT How can water governance respond when overuse has eroded natural buffers?

Sources: [E11-V22]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Science & Technology

01 · Online-game regulation

Gaming Rules: notification in April, commencement in May

E11-2604-010 · P1 · 2026-04-22 · National / other

WHY IN THE NEWS The reviewed rules were notified 22 April; the inspected legal summary identifies 1 May commencement.

• The framework distinguishes online money games, e-sports and other online games under the parent 2025 Act.

• Determination examines fees/stakes, expectations of gains and monetisation of rewards/assets.

• PRS describes registration for e-sports or notified categories and ten-year registration validity, not a requirement that every casual game register identically.

STATIC CONNECTION · ORIGINAL Rule notification and legal commencement can occur on different dates; a game’s label does not conclusively determine its legal category.

ANALYSIS · ORIGINAL GUIDANCE

• Classification needs predictable criteria and appeal/redress, while payment controls and child protection require practical coordination.

• Gaming policy also intersects with data protection and consumer transparency.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not present the rules as operative on 22 April merely because published then, or equate all online games with prohibited money games.

MAINS PROMPT How can game classification protect users without indiscriminate prohibition?

Sources: [E11-PRS], [E11-GAMING]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · AI and internal security

AI-assisted policing: assistance is not a substitute for proof

E11-2604-028 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The article carries forward the March 30 parliamentary AI-impact report. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Discussed uses include entity resolution, multilingual assistance, crime-pattern analysis and fraud detection.

• CCTNS-related upgrades and agency applications are described at different deployment stages.

• Predictive outputs need validation and lawful human decision-making; a risk score is not proof of guilt.

STATIC CONNECTION · ORIGINAL Article 21 due process, privacy and non-arbitrariness apply to technology-assisted state action.

ANALYSIS · ORIGINAL GUIDANCE

• Biased or incomplete records can amplify profiling; independent audits and correction mechanisms are necessary.

• For AP, assess access controls, accuracy and accountability before assuming a tool’s national mention proves local deployment.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not turn a proposed capability into universally operational surveillance or treat algorithmic prediction as admissible proof by itself.

MAINS PROMPT What safeguards should govern AI in public-security decision-making?

Sources: [E11-V18]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · Crewed lunar exploration

Artemis II: completed flyby, not a lunar landing

E11-2604-032 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS NASA’s recap records 1 April launch and 10 April return. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Artemis II was the first crewed Orion flight, lasting nearly 10 days around the Moon.

• The crew comprised Reid Wiseman, Victor Glover, Christina Koch and Canada’s Jeremy Hansen.

• The crew splashed down in the Pacific near San Diego; testing crewed deep-space systems differs from landing on the lunar surface.

STATIC CONNECTION · ORIGINAL A flyby trajectory, lunar orbit and a surface landing are different mission profiles.

ANALYSIS · ORIGINAL GUIDANCE

• Mission success supplies evidence for particular crew/spacecraft operations; it does not guarantee all later lunar systems are ready.

• Compare mission objectives before judging different national programmes by a single distance or crew record.

READ ACROSS MONTHS · NOTE IDS VM2504-004, MY25-020, E5-2507-026, E5-2507-020, E5-2507-032, E6-2510-029, CA-038, E9-2602-018 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not write that Artemis II landed astronauts on the Moon or that its April completion means a permanent lunar base exists.

MAINS PROMPT How do incremental test missions reduce risk in human spaceflight?

Sources: [E11-NASA], [E11-V24]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Security

01 · Road safety and institutions

Phalodi-linked road-safety directions: legal claims need the order

E11-2604-023 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The magazine discusses Supreme Court directions following the Phalodi accident. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Its account links safe commuting with Article 21 and describes highway surveillance, emergency response and district coordination.

• The article reports road-side encroachment and heavy-vehicle management measures.

• The actual order was not independently read here; detailed deadlines/distances remain attributed secondary claims, not certified legal instructions.

STATIC CONNECTION · ORIGINAL The safe-system approach combines safe roads, vehicles, speeds, users and post-crash care.

ANALYSIS · ORIGINAL GUIDANCE

• Effective enforcement requires accountable agencies and working emergency services, not only cameras.

• For AP, connect highway engineering, trauma referral and district coordination without assuming every reported facility is installed.

READ ACROSS MONTHS · NOTE IDS E5-2502-002, E5-2507-034, E7-2512-029, E7-2512-032, E8-2601-011, E8-2601-012, E8-2601-037, E9-2602-038 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not generalise a summary into an unchecked universal ban on every roadside business or claim compliance with the Court’s full order.

MAINS PROMPT How can an integrated safe-system approach reduce road deaths more effectively than fines alone?

Sources: [E11-V09]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Defence-industry evidence

Defence exports: annual values and domestic capability

E11-2604-029 · P1 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The 2 April primary announcement reports FY 2025–26 exports. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Exports reached ₹38,424 crore versus ₹23,622 crore in FY 2024–25, a 62.66% increase.

• DPSUs contributed ₹21,071 crore and private firms ₹17,353 crore, approximately 54.84% and 45.16%.

• The primary states exports to more than 80 countries; the magazine’s broader undated 100-plus claim is not used as the same fiscal snapshot.

STATIC CONNECTION · ORIGINAL Defence exports, total defence production and indigenous content are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Sustained competitiveness depends on technology, reliability, export authorisation and lifecycle support.

• Record gross export value does not prove independence from imported components or equal growth in all firms.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add production/export totals as identical categories or present a draft procurement procedure as already operative.

MAINS PROMPT Assess export growth alongside technological depth and responsible defence trade.

Sources: [E11-DEF], [E11-V19]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

International Relations

01 · New Zealand treaty stages

India–New Zealand FTA: signing is not entry into force

E11-2604-009 · P1 · 2026-04-27 · National / other

WHY IN THE NEWS The primary PIB release records signing on 27 April.

• The announced agreement offers New Zealand duty-free access for 100% of India’s exports, subject to treaty operation and rules.

• India’s offer covers about 70% of tariff lines, not an identical reciprocal 100%; sensitive products remain excluded.

• Services access, temporary professional mobility and a US$20 billion investment commitment over 15 years are reported design elements.

STATIC CONNECTION · ORIGINAL Negotiation conclusion, signature, domestic procedures and entry into force are different treaty stages; tariff lines and trade-value coverage differ.

ANALYSIS · ORIGINAL GUIDANCE

• Labour-intensive exports may gain, but origin rules, standards and delivery capacity determine actual utilisation.

• For AP, examine eligible seafood/food-processing market access and standards without assuming all agricultural products receive symmetrical Indian concessions.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not certify current zero duties from signing alone, call the commitment completed investment, or use 28 April as the signing date.

MAINS PROMPT How should India translate an FTA’s market access into practical export capability?

Sources: [E11-NZ], [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Austria and sector cooperation

Austria visit: agreements, intent and implementation

E11-2604-016 · P2 · 2026-04-16 · National / other

WHY IN THE NEWS The Chancellor’s 14–17 April visit produced a reviewed outcomes list.

• Cooperation covered film/audio-visual work, food safety, roads and a space-industry seminar.

• Letters of intent addressed military cooperation, counter-terrorism and vocational training.

• Investment facilitation, startup links and cyber/education dialogue featured among announcements.

STATIC CONNECTION · ORIGINAL An MoU, a letter of intent and an implemented project need not create identical legal obligations.

ANALYSIS · ORIGINAL GUIDANCE

• Skills and industrial cooperation can be valuable where institutions convert intent into training places or research outputs.

• Evaluate milestones and counterpart institutions instead of counting all announcements as completed investment.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate the visit with an FTA or assume every MoU guarantees a funded project.

MAINS PROMPT What makes sectoral diplomacy translate into measurable cooperation?

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · Republic of Korea

Korea visit: CEPA-upgrade talks and wider partnerships

E11-2604-017 · P2 · 2026-04-20 · National / other

WHY IN THE NEWS The 19–21 April state visit produced agreements and announced initiatives.

• The review records 15 MoUs across ports, industry, trade, science and culture.

• The parties declared resumption of negotiations to upgrade their existing CEPA.

• Maritime/climate cooperation and participation in wider initiatives were among the announced outcomes.

STATIC CONNECTION · ORIGINAL Upgrading an existing agreement differs from concluding a replacement treaty or commencing a new tariff schedule.

ANALYSIS · ORIGINAL GUIDANCE

• Industrial and maritime cooperation can deepen supply chains, but local capability, standards and execution determine gains.

• Separate announced intent to join an institution from verified completed accession.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not label resumed CEPA talks a completed upgraded FTA or treat every announced institutional intention as final membership.

MAINS PROMPT Assess the economic and maritime dimensions of India–Korea engagement.

Sources: [E11-PRS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Andhra Pradesh

01 · Capital statute and chronology

Amaravati Act: assent 6 April, deemed effect 2 June 2024

E11-2604-041 · P1 · 2026-04-06 · AP-linked

WHY IN THE NEWS The full Gazette text advances the March resolution to enacted legislation.

• Act 7 of 2026 received assent on 6 April; Lok Sabha passed 1 April and Rajya Sabha 2 April in the inspected PRS track.

• Section 5(2)now names Amaravati as the new capital.

• The Act deems commencement from 2 June 2024 and includes capital-city areas notified under APCRDA Act 2014 in its explanation.

STATIC CONNECTION · ORIGINAL Retrospective statutory effect differs from the date of assent, House passage and physical project completion.

ANALYSIS · ORIGINAL GUIDANCE

• Central statutory recognition can reduce administrative uncertainty but does not itself finance or finish capital works.

• Link land pooling, service delivery, public finance and heritage safeguards to implementation rather than assume legal naming settles every policy issue.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the March Assembly resolution itself amended the central Act or that no future Parliament can amend the law again.

MAINS PROMPT Explain the significance and limits of statutory recognition for AP’s capital development.

Sources: [E11-APACT]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · State inflation evidence

AP March inflation in the 13 April national release

E11-2604-042 · P1 · 2026-04-13 · AP-linked

WHY IN THE NEWS MoSPI’s state table includes AP’s provisional March 2026 rates.

• AP combined CPI inflation is 4.05%, compared with national 3.40%.

• AP food inflation is 5.45%, compared with national 3.87%.

• The table’s highlighted-state universe is states over 50 lakhpopulation by 2011 Census; this is not a survey of every household’s actual price increase.

STATIC CONNECTION · ORIGINAL State indices are aggregates; district/item estimates can have thinner samples and different expenditure patterns.

ANALYSIS · ORIGINAL GUIDANCE

• The food headline suggests distributional pressure but cannot establish which commodity caused AP’s entire gap without detailed weights/data.

• Use targeted market/supply responses and household evidence rather than infer one universal cost increase.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are March provisional data released in April, not Aprilprices or a guarantee of later final values.

MAINS PROMPT How should AP use state inflation evidence without overinterpreting aggregate comparisons?

Sources: [E11-CPI]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

03 · Census field schedule

AP census: self-enumeration and later field validation

E11-2604-043 · P1 · 2026-04-16 · AP-linked

WHY IN THE NEWS The 15 Aprilreport gives AP’s first-phase schedule.

• Optional self-enumeration runs 16–30 April 2026.

• Houselisting/housing-census field visits are scheduled 1–30 May.

• Successful self-enumeration creates an SEID for enumerator validation; the reported phase uses 33 questions on housing/amenities/assets.

STATIC CONNECTION · ORIGINAL Self-entry is an additional collection route, not exemption from verification or a completed population count.

ANALYSIS · ORIGINAL GUIDANCE

• Telugu access and assisted field enumeration can reduce exclusion; privacy and secure handling must accompany participation.

• Maintain a state-specific schedule rather than copy a national date into every AP district note.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call 16 Aprilthe start of all door-to-door AP visits or say every household must own a smartphone.

MAINS PROMPT How can AP combine digital convenience with complete census coverage?

Sources: [E11-APCENSUS]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

04 · Budget execution and public financial management

AP CBRO: appropriation is not an unconditional spending release

E19-001 · P1 · 2026-04-09 · AP-linked

WHY IN THE NEWS Primary G.O.Ms.No.19 gives the machinery that turns AP's FY2026–27 budget into departmental spending authority. This backfills April; the date is not changed to November merely because the document was researched now.

• The 9 April order refers to AP Appropriation Act No.3 of 2026 and regulates expenditure for the financial year beginning 1 April 2026 against approved estimates. The Act itself was not independently read.

• A Comprehensive Budget Release Order (CBRO) is a prerequisite to expenditure, with Chief Controlling Officers distributing budget to Sub-Controlling Officers and Drawing and Disbursing Officers through the CFMS Budget Module.

• For heads governed by paragraph 5, first-quarter distribution may not exceed 35% of annual BE; cumulative distribution through quarter two may not exceed 55%, and through quarter three 75%. The four-quarter total cannot exceed 100%. Relaxation needs a justified Finance proposal.

• Centrally Sponsored Scheme releases, with specified salary exceptions, require a specific BRO after receipt of central/funding-agency funds or mother sanction. New schemes require departmental proposals, detailed guidelines/work plans and specific BROs.

• Paragraph 6 separately lists BRO-controlled heads and heads operated in relaxation of budget control. Its salary, pension, disaster-relief and other exceptions make a blanket interpretation of the general quarterly limits unsafe.

• The order requires monthly, need-based adjustments to institutional PD accounts. It also restricts new-work commitments, including spillover liabilities, to three times the relevant BE, citing FRBM; this legal attribution is not an independent reading of the FRBM statute.

• The administrative schedule was CFMS upload by 13 April, HOD distribution submission by 17 April and FMU CBRO issue by 20 April. These deadlines are not evidence that each step was actually completed.

STATIC CONNECTION · ORIGINAL Legislative appropriation, administrative/financial sanction, budget distribution, treasury liquidity and actual expenditure are different stages. A budget estimate is not money already paid to a beneficiary.

ANALYSIS · ORIGINAL GUIDANCE

• Use the order to explain cash management rather than merely memorising percentages. Predictable quarterly ceilings can reduce year-end spending rush, but implementation must accommodate seasonal procurement, emergencies and clearly recorded exceptions.

• An APPSC answer can follow the accountability chain: legislature → Finance → CCO → SCO/DDO → treasury/payment → audit. Match each bill to the correct head, verify conditions and distinguish committed liabilities from a fresh sanction.

• For evaluation, compare budget distribution, actual releases, paid bills and outcomes by quarter. A digital portal entry does not itself prove funds reached an implementing agency, much less that service delivery improved.

READ ACROSS MONTHS · NOTE IDS CA-042

PRELIMS CAUTION 35%, 55% and 75% are not three separate quarterly allocations to add together. "Full budget release" does not waive the listed conditions, specific BRO controls or Finance approvals.

MAINS PROMPT Explain why legislative appropriation alone cannot ensure timely and accountable public expenditure, using AP's CBRO framework.

Sources: [E19-APCBRO]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

04 · Heat risk and public health

AP heatwave alerts: forecast versus observation

E11-2604-044 · P1 · 2026-04-15 · AP-linked

WHY IN THE NEWS The 15 Aprilreport attributes warnings and readings to APSDMA.

• Severe conditions were forecast for 46 mandals and heatwave conditions for 73 mandals in that dated alert.

• The report gives previous-day Ontimitta temperature 45°C; a reading and a forecast are different evidence.

• Heat exposure varies with humidity, work, housing, hydration and health; temperature alone does not measure every person’s risk.

STATIC CONNECTION · ORIGINAL Heatwave meteorological thresholds and physiological heat stress are related but distinct concepts.

ANALYSIS · ORIGINAL GUIDANCE

• Prioritise outdoor workers, older people and vulnerable settlements through shade, water, rest and accessible care.

• Forecast-led action should coordinate APSDMA, local bodies, schools, employers and health facilities; monitor response and heat illness, not only advisories.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not turn a forecast count into confirmed outcomes or give the historical alert as today’s weather advice.

MAINS PROMPT Design a locally accountable heat-action response for AP districts.

Sources: [E11-APHEAT]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

05 · Polavaram rehabilitation

Polavaram OTS: revised housing and site assistance

E11-2604-045 · P1 · 2026-04-30 · AP-linked

WHY IN THE NEWS The 30 April Cabinet decision is reported in The Hindu.

• Reported house-construction assistance rises from ₹2.85 lakh to ₹3.57 lakh.

• For eligible beneficiaries choosing outside-colony construction, reported house-site value rises from ₹1 lakh to ₹2 lakh.

• These are Cabinet-approved components under the OTS arrangement, not proof every displaced family has been paid.

STATIC CONNECTION · ORIGINAL Rehabilitation includes housing, livelihood restoration, social infrastructure and applicable rights, not cash alone.

ANALYSIS · ORIGINAL GUIDANCE

• Different options require informed choice, clear eligibility and accessible grievance mechanisms.

• For displaced tribal and other households, assess actual relocation conditions and access to land/services rather than only a unit-cost increase.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe these amounts as universal compensation for every loss or as proof all rehabilitation obligations are fulfilled.

MAINS PROMPT What makes rehabilitation adequate beyond a higher cash assistance figure?

Sources: [E11-APCAB]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

06 · Defence-manufacturing land

Puttaparthi DRDO allotment: land approval is not production

E11-2604-046 · P2 · 2026-04-30 · AP-linked

WHY IN THE NEWS The 30 April Cabinet report includes a 350-acre allotment.

• The report identifies 350 acres at Puttaparthi for a defence-manufacturing unit under DRDO.

• The decision concerns land allocation, not a certified commissioned factory.

• Project design, environmental/other permissions, financing and construction milestones require separate records.

STATIC CONNECTION · ORIGINAL Defence R&D, manufacturing capacity and actual production are different parts of a capability chain.

ANALYSIS · ORIGINAL GUIDANCE

• Local benefits depend on skills, supplier linkages and execution rather than acreage alone.

• Track employment and procurement claims against actual project documents; do not invent a weapon system or production deadline.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the allotment proof AP already manufactures a specified system or earns a fixed defence-export share.

MAINS PROMPT How can AP turn strategic industrial land allocations into durable local capability?

Sources: [E11-APCAB]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

07 · Fishing-harbour infrastructure

Three fishing harbours: revised approval and livelihood outcomes

E11-2604-047 · P1 · 2026-04-30 · AP-linked

WHY IN THE NEWS The 30 Aprilreport records revised coastal-infrastructure approval.

• The reported revised approval is ₹1,586.69 crore for Budagatlapalem, Pudimadaka and Kothapatnam.

• The report estimates benefits for over 12,700 fishers and support for more than 2,500 vessels.

• Expected beneficiaries are projections, not evidence that all facilities are complete or outcomes realised.

STATIC CONNECTION · ORIGINAL A fishing harbour links landing, auctioning, ice/cold chain, sanitation, navigation and environmental management.

ANALYSIS · ORIGINAL GUIDANCE

• Safer landings and reduced post-harvest losses depend on effective operations and fair market access.

• Assess coastal impacts, waste treatment, maintenance and small-fisher inclusion rather than only harbour construction costs.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Revised approval is not a completed-spending figure, and potential beneficiaries must not be presented as verified realised gains.

MAINS PROMPT How should AP measure fishing-infrastructure success through livelihoods and ecology?

Sources: [E11-APCAB]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

08 · Canal modernisation

Punganur branch canal: revised estimate versus delivered water

E11-2604-048 · P1 · 2026-04-30 · AP-linked

WHY IN THE NEWS The 30 April Cabinet report concerns HNSS Phase-II works.

• The reported revised estimate is ₹309.92 crore for modernising the Punganur branch canal.

• The report places these Phase-II Handri-Neeva Sujala Sravanthiworks in Sri Sathya Sai district.

• A financial approval is distinct from a work award, physical completion and actual reliable delivery to farms.

STATIC CONNECTION · ORIGINAL Conveyance capacity, source-water availability, pumping energy and on-farm use jointly determine irrigation service.

ANALYSIS · ORIGINAL GUIDANCE

• Appraise revised costs with engineering need, procurement readiness and long-term O&Mfinance.

• Measure seasonal delivery, tail-end access and water productivity rather than assume canal works automatically solve basin scarcity.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim ₹309.92 croreis already spent or infer newly irrigated acreage without a dated project record.

MAINS PROMPT How can AP combine irrigation modernisation with transparent costs and water-use efficiency?

Sources: [E11-APCAB]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

Culture & History

01 · Social reform and anniversaries

Jyotiba Phule: 199 years, education and social equality

E11-2604-034 · P2 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · National / other

WHY IN THE NEWS The 11 April 1827 birth date makes April 2026 the 199th anniversary. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• The 200th birth anniversary falls in 2027; a bicentenary-year programme beginning in 2026 is a different description.

• Jyotiba and Savitribai Phule worked for girls' education and anti-caste social reform.

• Satyashodhak Samaj was founded in 1873; Gulamgiri also dates to 1873.

STATIC CONNECTION · ORIGINAL Education can challenge inherited social exclusion; reform movements and later constitutional safeguards belong to different historical periods.

ANALYSIS · ORIGINAL GUIDANCE

• Link educational access with dignity, gender equality and peasant concerns, rather than reduce the movement to one school's date.

• For APPSC comparison, examine social-reform strategies without conflating different regional movements.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not repeat the magazine's "this year 200th anniversary" as completed arithmetic or attribute all work solely to Jyotiba without Savitribai's role.

MAINS PROMPT How did educational reform become a strategy for social emancipation?

Sources: [E11-V27]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

02 · Amaravati heritage

Amaravati heritage is not the same geographic object as the capital region

E11-2604-037 · P2 · Magazine coverage: 2026-04 · web posted: 2026-05-22 · event date varies · AP-linked

WHY IN THE NEWS April’s capital legislation provides a linkage to Buddhist heritage. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

• Amaravati’s Mahachaitya is associated with Buddhist narrative sculpture and the Satavahana-era artistic tradition.

• The inspected ASI extract describes locally available light-green limestone, not blanket white-marble construction.

• Jataka/Buddha-life scenes, circumambulation and surviving fragments support art-history study; the statutory capital area has its own definition.

STATIC CONNECTION · ORIGINAL A stupa’s drum, anda, harmika, chhatra and pradakshinapatha have distinct structural/ritual functions.

ANALYSIS · ORIGINAL GUIDANCE

• Heritage planning should protect archaeological context while supporting interpretation and local livelihoods.

• Distinguish the ancient settlement/monument and modern APCRDA-notified capital geography; avoid stale district labels.

PRELIMS CAUTION Do not say the modern capital’s full boundary is identical to the ancient stupa site or that nothing survives because the full dome is lost.

MAINS PROMPT How can capital-region growth accommodate archaeological conservation?

Sources: [E11-ASI], [E11-V31]

Evidence access: Registry records actual reading/access scope. Static links, analysis and exam guidance are original.

April 2026 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

APR26-01. Adjournment sine die is best distinguished from dissolution because it:

A. Ends sittings without fixing a further sitting date, without itself ending the House’s existence.

B. Automatically ends the Lok Sabha’s legal existence.

C. Requires every pending bill to have passed.

D. Is identical to the President’s prorogation in every respect.

APR26-02. An Article 368 special majority in a House requires:

A. Only two-thirds of the members who happen to attend, regardless of total membership.

B. A majority of total membership and at least two-thirds of members present and voting.

C. A simple majority of members present and voting in every case.

D. Unanimity of all members including absentees.

APR26-03. After the Constitution amendment in April’s delimitation package was defeated, which inference is valid?

A. The proposed 850-seat ceiling did not thereby become the Constitution’s operative ceiling.

B. Every dependent bill became law without further voting.

C. Women’s reservation automatically commenced solely because the proposal was introduced.

D. Lok Sabha automatically expanded to 850 elected seats.

APR26-04. The 3.40% figure in MoSPI’s 13 April release denotes:

A. The CPI index level of 3.40.

B. The quarterly food-inflation average.

C. March 2026 provisional combined year-on-year CPI inflation.

D. April 2026 final inflation.

APR26-05. Consider: 1. Repo remained 5.25%. 2. Neutral stance promises a cut at the next meeting. 3. The 22 April document records the earlier 6–8 April meeting. Which are correct?

A. 1 and 2 only.

B. 1, 2 and 3.

C. 1 and 3 only.

D. 2 and 3 only.

APR26-06. The proposed ₹10,000 monthly full-KYC PPI cash-loading limit should be read as:

A. A cash grant to every verified wallet holder.

B. An operative universal ceiling on all bank transactions.

C. A minimum wallet balance every user must maintain.

D. A draft limit on the specified wallet cash-loading activity, not every bank or UPI transfer.

APR26-07. The ₹1,000 social-impact fund entry threshold discussed in April applies to:

A. All AIF categories without distinction.

B. The specified social-impact segment, not every AIF investment.

C. Only bank fixed deposits.

D. A guarantee of positive commercial returns.

APR26-08. An otherwise eligible SEZ unit’s highest annual FOB export value in the preceding three years is ₹120 crore. Under the reviewed 30% cap, the relevant ceiling is:

A. ₹12 crore, because only the current year matters.

B. ₹30 crore for every unit irrespective of its exports.

C. ₹120 crore irrespective of conditions.

D. ₹36 crore, subject to the other conditions.

APR26-09. Which additional check is central to the reviewed SEZ concession?

A. Automatic refund of the same input taxes twice.

B. Unrestricted eligibility for every imported item passing through a warehousing zone.

C. Proof that domestic clearances are always entirely duty-free.

D. At least 20% value addition under the prescribed calculation, alongside other conditions.

APR26-10. April’s RELIEF expansion added which pair to the reviewed geographic coverage?

A. Japan and Mongolia.

B. Egypt and Jordan.

C. Brazil and Argentina.

D. Norway and Iceland.

APR26-11. Which statement accurately compares the announced New Zealand FTA offers?

A. New Zealand’s offer covers 100% of India’s exports, while India’s tariff-line liberalisation is about 70%, subject to the agreement.

B. India’s 70% tariff-line figure necessarily means exactly 70% of trade value.

C. Both sides immediately abolish every tariff on signature alone.

D. The investment commitment is evidence all US$20 billion had already arrived.

APR26-12. A rule notified on 22 April with stated commencement on 1 May should be indexed as:

A. Proof no preparation was possible before 1 May.

B. An April notification with a distinct later operative date.

C. A May parliamentary bill introduced by the regulator.

D. Fully operative from 22 April solely because it was published.

APR26-13. Underground coal gasification differs from surface combustion chiefly because it:

A. Necessarily leaves no cavity or well-closure liability.

B. Converts coal in situ into gas, creating distinct subsurface safety and closure concerns.

C. Eliminates every groundwater risk by definition.

D. Requires no mining-plan approval.

APR26-14. Which PMGSY-III deadline pairing matches the April approval?

A. Only new airports—March 2028.

B. Every road—March 2029; all bridges—March 2027.

C. Every road and bridge—March 2028 without exception.

D. Plains roads/bridges and hill roads—March 2028; hill bridges—March 2029.

APR26-15. A toll provision levying no overload fee up to a specified excess-load level necessarily means:

A. All other motor-vehicle weight restrictions are repealed.

B. Neither a general weight-law exemption nor proof the loading is safe.

C. The vehicle is mechanically safe under every condition.

D. The goods vehicle needs no registration.

APR26-16. Tar balls are most accurately understood as:

A. Only untreated household plastic pellets.

B. Weathered oil residues that can arise from different spill/leakage or seepage sources.

C. A harmless form of clean beach sand.

D. Proof that every incident came from the same identified operator.

APR26-17. The IBC amendment’s provision for different notified commencement dates implies:

A. All provisions must have commenced simultaneously on assent.

B. Every later rule can automatically be backdated by a textbook.

C. Assent does not by itself prove every new procedure was operational on 6 April.

D. No provision can ever commence.

APR26-18. LFPR and unemployment rate differ because:

A. LFPR necessarily equals the unemployment rate.

B. Neither depends on age or reference-status definitions.

C. Both use only people already employed as denominator.

D. LFPR uses the population denominator, while unemployment rate uses the labour-force denominator.

APR26-19. A usual-status unemployment estimate for age 15+ should be compared directly with a youth current-weekly-status estimate only after:

A. Treating every non-worker as unemployed.

B. Reconciling age, status, period and survey definitions.

C. Assuming every published unemployment number is the same concept.

D. Deleting the age labels to simplify revision.

APR26-20. PLI-linked incremental sales alone cannot establish:

A. That sector-specific eligibility matters.

B. That approved claims and payments can differ.

C. That policy evaluation needs a baseline.

D. The same amount of additional domestic value added or technological capability.

APR26-21. A proposed cooling-off period in a fraud discussion paper is best evaluated as:

A. A guarantee users can never be deceived after authentication.

B. A substitute for all account-level fraud controls.

C. A possible trade-off between cancellation opportunity and genuine payment speed, not a universal current delay.

D. Proof that every transfer above ₹10,000 already waits one hour.

APR26-22. The ₹38,424 crore defence-export figure concerns:

A. FY 2025–26 exports, distinct from total defence production and indigenous-content ratios.

B. The entire defence budget.

C. April 2026 exports alone.

D. A direct measure proving no exported product contains imported components.

APR26-23. Which comparison is dimensionally sound?

A. GW treated as identical to annual TWh.

B. A capacity share used automatically as the generation share.

C. Installed capacity in GW versus electricity generated in TWh, with their different meanings retained.

D. Non-fossil and renewable treated as identical because both exclude coal.

APR26-24. Artemis II’s April outcome was:

A. A mission that remained only an unlaunched proposal.

B. A completed crewed lunar flyby and Earth return, not a lunar surface landing.

C. A permanent crewed lunar base.

D. The first landing on Mars.

APR26-25. The One Health Quadripartite comprises:

A. FAO, NATO, OECD and OPEC.

B. WHO, FAO, UNEP and WOAH.

C. WHO, WTO, IMF and World Bank.

D. UNESCO, IAEA, ICAO and IMO.

APR26-26. With Jyotiba Phule’s birth on 11 April 1827, 11 April 2026 marks:

A. 200 completed years.

B. 100 completed years.

C. 199 completed years; the 200th anniversary falls in 2027.

D. The founding date of Satyashodhak Samaj.

APR26-27. For the revised Jan Vishwas proposal, which measures should remain distinct?

A. Civil penalties and absence of any enforceable duty, because they are identical.

B. 79 Acts, 784 provisions, and the number of offences rationalised.

C. Every proposal and every already commenced provision, because introduction implements both.

D. Acts and offences, because both always count the same thing.

APR26-28. The Amaravati amendment’s legal chronology is:

A. Amendment of the central Act solely by March’s Assembly resolution.

B. Assent on 2 June 2024 because that is the retrospective date.

C. A prohibition on any future parliamentary amendment.

D. Assent on 6 April 2026 with deemed effect from 2 June 2024.

APR26-29. In AP’s reported census schedule, the correct sequence is:

A. Completed population enumeration by 16 April.

B. Mandatory smartphone-only counting without field visits.

C. Self-enumeration 16–30 April, then field houselisting/housing census 1–30 May with validation.

D. All state-level field visits completed before self-enumeration began.

APR26-30. An increase in Polavaram OTS housing assistance supports which inference?

A. All displaced families were fully paid on the Cabinet date.

B. A revised assistance component, not proof all rehabilitation and livelihood obligations have been fulfilled.

C. Every family has identical losses and eligibility.

D. Cash assistance alone establishes adequate replacement services.

Explained answer key

APR26-01. A Adjournment sine die ends sittings without fixing a further date; prorogation is a distinct presidential act. The March resumption was not the start of the session; a chronology prevents a false 1 February commencement date. Caution: Do not equate adjournment with dissolution or assume every introduced bill passed. [E11-2604-001]

APR26-02. B An Article 368 special majority requires a majority of the House's total membership plus at least two-thirds present and voting; ratification additionally applies where constitutionally required. Population equality interacts with federal concerns about states that reduced fertility; distinguish equal constituency populations from equal state representation. Caution: Do not write that the Constitution now allows 850 seats or that the rejected bill was the 131st enacted amendment. [E11-2604-002]

APR26-03. A An Article 368 special majority requires a majority of the House's total membership plus at least two-thirds present and voting; ratification additionally applies where constitutionally required. Population equality interacts with federal concerns about states that reduced fertility; distinguish equal constituency populations from equal state representation. Caution: Do not write that the Constitution now allows 850 seats or that the rejected bill was the 131st enacted amendment. [E11-2604-002]

APR26-04. C An index level, year-on-year rate and quarterly average answer different questions; publication month differs from reference month. Disaggregated food/rural/urban evidence can explain household experience better than one national rate. Caution: These are not April inflation data; April's release was scheduled for May. Provisional values may be revised. [E11-2604-003]

APR26-05. C The policy repo rate is an instrument, not a direct administrative price for every retail loan; minutes explain the earlier decision. Supply shocks create a growth–inflation trade-off rather than a simple mechanical response to one CPI number. Caution: 22 April is the minutes date, not a second repo decision. Neutral does not guarantee the next move is a cut. [E11-2604-004]

APR26-06. D A wallet's stored value differs from a bank deposit account; cash loading, outstanding balance and transfers are different limits. Tighter controls may reduce misuse but can constrain legitimate cash-dependent users; accessibility and proportionate KYC matter. Caution: A consultation draft is not the operative rulebook; ₹10,000 is not a universal limit on every UPI or bank-account transaction. [E11-2604-005]

APR26-07. B Social-impact funds are a specified segment of the AIF framework, not ordinary bank deposits; the parent AIF regulations date to 2012. Lower entry sizes can widen participation, but investors need clear information on instruments, outcomes and risks. Caution: ₹1,000 is not the new minimum for every AIF or a guarantee of commercial returns. PRS's 2016 parent-regulation label is not reused. [E11-2604-006]

APR26-08. D 30% × ₹120 crore = ₹36 crore. The base is the highest annual FOB export value in the immediately preceding three years, not present production. Minimum value addition, unit/product eligibility and other conditions still apply. [E11-2604-007]

APR26-09. D SEZ-to-DTA clearance attracts the applicable customs treatment; concessional does not mean blanket duty-free domestic sale. Capacity utilisation may improve during weak export demand, while the cap preserves export orientation. Caution: The cap is not 30% of current-year total production, and value addition is not identical to the duty rate. [E11-2604-007]

APR26-10. B Export credit/risk insurance transfers specified risks; it does not prevent disruption or guarantee payment for every commercial loss. Risk support can keep viable trade moving, but exporters still need route, buyer and contract due diligence. Caution: Expansion does not mean every shipment's entire value is automatically reimbursed. [E11-2604-008]

APR26-11. A Negotiation conclusion, signature, domestic procedures and entry into force are different treaty stages; tariff lines and trade-value coverage differ. Labour-intensive exports may gain, but origin rules, standards and delivery capacity determine actual utilisation. Caution: Do not certify current zero duties from signing alone, call the commitment completed investment, or use 28 April as the signing date. [E11-2604-009]

APR26-12. B Rule notification and legal commencement can occur on different dates; a game’s label does not conclusively determine its legal category. Classification needs predictable criteria and appeal/redress, while payment controls and child protection require practical coordination. Caution: Do not present the rules as operative on 22 April merely because published then, or equate all online games with prohibited money games. [E11-2604-010]

APR26-13. B Underground gasification converts coal in situ into usable gas; it differs from physically excavating coal for surface combustion. Access to otherwise difficult resources must be weighed against hydrogeological uncertainty and monitoring capacity. Caution: An approved mining plan is not proof of zero contamination or exemption from all other permissions. [E11-2604-011]

APR26-14. D Road connectivity is a service network: construction, maintenance, all-weather reliability and access to destinations all matter. Tendering eligible older sanctioned works can address backlog, but execution quality and lifecycle maintenance remain essential. Caution: March 2028 is not the deadline for every hill bridge, and revised outlay is not spending already incurred. [E11-2604-013]

APR26-15. B A toll-fee rule and vehicle weight/safety law regulate different legal questions. Calibrated fees may reduce arbitrary charging, but enforcement must not make dangerous loading commercially attractive. Caution: No additional overload fee is not a legal exemption from every permissible-weight or road-safety requirement. [E11-2604-014]

APR26-16. B Weathering can change oil’s form without making it ecologically harmless; source attribution needs evidence. For AP’s coast, planning should link shoreline reporting, trained collection, worker protection and authorised waste handling. Caution: The draft does not itself prove final statewide duties are in force. Do not infer blanket environmental-clearance exemptions from a secondary summary. [E11-2604-015]

APR26-17. C Resolving a viable debtor, selling assets and liquidating a company are different outcomes; creditor recovery needs a stated denominator. Faster processes can preserve going-concern value, but tribunal capacity and fair treatment of stakeholder classes still matter. Caution: Do not backdate later commencement to 6 April or copy recovery percentages without distinguishing admitted claims from liquidation value. [E11-2604-018]

APR26-18. D LFPR uses population as denominator, while unemployment uses the labour force; usual status and current-weekly status differ. Low unemployment can coexist with low participation, insecure work and low earnings; employment quality needs separate evidence. Caution: Do not call this April’s monthly survey, mix status/age groups or treat nominal wage growth as real wage growth. [E11-2604-020]

APR26-19. B LFPR uses population as denominator, while unemployment uses the labour force; usual status and current-weekly status differ. Low unemployment can coexist with low participation, insecure work and low earnings; employment quality needs separate evidence. Caution: Do not call this April’s monthly survey, mix status/age groups or treat nominal wage growth as real wage growth. [E11-2604-020]

APR26-20. D Gross output, assembly activity and domestic value added are not identical indicators of industrial capability. Supplier development and technology learning determine whether scale persists after incentives decline. Caution: An aggregate success claim does not establish equal performance across all 14 sectors or completed payment of the total outlay. [E11-2604-022]

APR26-21. C Authentication verifies an action/credential; it does not prove that consent was free from deception. A delay may enable cancellation but can impede genuine time-sensitive transfers; design should use evidence and calibrated exceptions. Caution: These are discussion-paper options, not a universal current one-hour delay on every UPI transfer. [E11-2604-027]

APR26-22. A Defence exports, total defence production and indigenous content are different measures. Sustained competitiveness depends on technology, reliability, export authorisation and lifecycle support. Caution: Do not add production/export totals as identical categories or present a draft procurement procedure as already operative. [E11-2604-029]

APR26-23. C GW measures power capacity; GWh/TWh or billion units measure energy produced over a period. Grid integration, storage and flexible resources determine how capacity additions translate into

reliable supply. Caution: Do not call a capacity ranking the same thing as global renewable electricity production rank or equate 51.5% capacity with energy demand met. [E11-2604-030]

APR26-24. B A flyby trajectory, lunar orbit and a surface landing are different mission profiles. Mission success supplies evidence for particular crew/spacecraft operations; it does not guarantee all later lunar systems are ready. Caution: Do not write that Artemis II landed astronauts on the Moon or that its April completion means a permanent lunar base exists. [E11-2604-032]

APR26-25. B Surveillance, prevention and response must connect veterinary, public-health and environmental information. For AP, livestock/poultry surveillance, laboratories and risk communication should share actionable protocols. Caution: One Health is not the merger of all agencies into WHO or a promise that every zoonosis can be eliminated by one intervention. [E11-2604-033]

APR26-26. C Education can challenge inherited social exclusion; reform movements and later constitutional safeguards belong to different historical periods. Link educational access with dignity, gender equality and peasant concerns, rather than reduce the movement to one school’s date. Caution: Do not repeat the magazine’s “this year 200th anniversary” as completed arithmetic or attribute all work solely to Jyotiba without Savitribai’s role. [E11-2604-034]

APR26-27. B Decriminalisation does not abolish the regulatory duty; an administrative penalty still needs lawful procedure and review. Credible trust combines easier compliance with predictable detection and proportionate enforcement. Caution: Do not describe all offences as abolished or count Acts, provisions and offences as interchangeable. Detailed commencement remains separately unchecked. [E11-2604-035]

APR26-28. D Retrospective statutory effect differs from the date of assent, House passage and physical project completion. Central statutory recognition can reduce administrative uncertainty but does not itself finance or finish capital works. Caution: Do not say the March Assembly resolution itself amended the central Act or that no future Parliament can amend the law again. [E11-2604-041]

APR26-29. C Self-entry is an additional collection route, not exemption from verification or a completed population count. Telugu access and assisted field enumeration can reduce exclusion; privacy and secure handling must accompany participation. Caution: Do not call 16 Aprilthe start of all door-to-door AP visits or say every household must own a smartphone. [E11-2604-043]

APR26-30. B Rehabilitation includes housing, livelihood restoration, social infrastructure and applicable rights, not cash alone. Different options require informed choice, clear eligibility and accessible grievance mechanisms. Caution: Do not describe these amounts as universal compensation for every loss or as proof all rehabilitation obligations are fulfilled. [E11-2604-045]

Mains answer laboratory

Original answer-planning aids, not official model answers or predictions. Preserve legal stages, data vintages and source limitations.

Evaluate delimitation through population equality and federal fairness.

Study reference: E11-2604-002

Dated anchor: Three linked bills were introduced 16 April; the Constitution amendment was negatived.

1. Anchor the April package as defeated, not an enacted increase to 850 seats.

2. Explain constituency-population equality, inter-state allocation and the separate question of women’s representation.

3. Analyse concerns of states that achieved population stabilisation alongside the democratic case for updating representation.

4. Explain Article 368 majority requirements; distinguish constitutional proposal, ordinary legislation and implementation.

5. Recommend transparent data, public reasoning and institutionally credible consultation without inventing a single settled formula.

Evidence caution: Do not write that the Constitution now allows 850 seats or that the rejected bill was the 131st enacted amendment.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

Can temporary SEZ–DTA concessions support manufacturing without distorting competition?

Study reference: E11-2604-007

Dated anchor: The notified concession framework applies 1 April 2026–31 March 2027.

1. Anchor 1 April 2026–31 March 2027, the 20% value-addition condition and the 30% cap with its historical FOB-export denominator.

2. Explain the benefit: capacity utilisation, employment continuity and lower unit costs during external disruption.

3. Counterpoint: DTA producers may face uneven conditions; export benefits must not be claimed twice.

4. Assess eligibility certification, audit, product exclusions and the difference between a concession and duty-free clearance.

5. Recommend transparent temporary review using additional production, jobs and genuine compliance, not only domestic sales volume.

Evidence caution: The cap is not 30% of current-year total production, and value addition is not identical to the duty rate.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

How can India turn the New Zealand FTA’s announced access into export gains?

Study reference: E11-2604-009

Dated anchor: The primary PIB release records signing on 27 April.

1. Anchor 27 April signing; distinguish conclusion/signature from entry into force and applicable origin rules.

2. Explain asymmetry: New Zealand 100% export access versus India’s roughly 70% tariff-line liberalisation and sensitive exclusions.

3. Link opportunities to standards, logistics, services capability and professional-mobility eligibility.

4. For AP, assess eligible food/seafood supply chains and certification; do not assume mirrored concessions for every farm product.

5. Treat US$20 billion as a forward-looking commitment. Recommend utilisation monitoring and exporter assistance rather than counting promised flows as realised.

Evidence caution: Do not certify current zero duties from signing alone, call the commitment completed investment, or use 28 April as the signing date.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

How should insolvency reform balance timely recovery and stakeholder fairness?

Study reference: E11-2604-018

Dated anchor: The Gazette records Presidential assent on 6 April. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

1. Anchor the 6 AprilAct and its express provision-specific notified commencement.

2. Explain value preservation, admission discipline and the difference between rescue and liquidation.

3. Discuss creditor-led and cross-border/group frameworks as institutional designs needing operative rules and capacity.

4. Counterpoint: concentrating creditor power without transparency can disadvantage other claimants; deadlines alone cannot supply tribunal capacity.

5. Recommend reasoned decisions, professional quality, predictable implementation and recovery statistics with explicit denominators.

Evidence caution: Do not backdate later commencement to 6 April or copy recovery percentages without distinguishing admitted claims from liquidation value.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

Why does a low unemployment rate not settle the question of employment quality?

Study reference: E11-2604-020

Dated anchor: The primary release is 27 March and measures January–December 2025; April is a revision index. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

1. Anchor PLFS 2025 usual-status age 15+: LFPR 59.3%, WPR 57.4%, UR 3.1%; preserve 27 March release and 2025 reference year.

2. Explain population versus labour-force denominators and usual status versus current weekly status.

3. Analyse gender participation, informal/insecure work, hours and earnings; nominal wage gains do not prove real gains.

4. Use the 23.6% regular-wage/salaried share as one composition measure, not proof all jobs are formal or protected.

5. Recommend matched data, skills, care infrastructure and productive-job creation. Avoid substituting older graduate subgroups for current national figures.

Evidence caution: Do not call this April’s monthly survey, mix status/age groups or treat nominal wage growth as real wage growth.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

How should renewable-energy progress be measured beyond installed capacity?

Study reference: E11-2604-030

Dated anchor: The issue reviews renewable-capacity and electricity-transition reports. April is the editorial coverage index; public web posting was 22 May. Event/release dates can be earlier.

1. Define GWcapacity separately from period-specific electricity inTWh/billionunits.

2. Distinguish renewable from non-fossil and capacity share from generation share.

3. Map grid, storage, flexibility, forecasting and curtailment constraints that affect delivered energy.

4. For AP, add land, transmission, distribution-company finances and household affordability without inventing local output figures.

5. Recommend reporting reliable generation, emissions, cost and service outcomes alongside capacity. Reject unverified 51.5% demand claims derived from a capacity statistic.

Evidence caution: Do not call a capacity ranking the same thing as global renewable electricity production rank or equate 51.5% capacity with energy demand met.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

Explain the significance and limits of Amaravati’s statutory recognition.

Study reference: E11-2604-041

Dated anchor: The full Gazette text advances the March resolution to enacted legislation.

1. Anchor the Gazette: Act 7/2026, assent 6 April, deemed effect 2 June 2024, and APCRDA-notified-area explanation.

2. Trace the March Assembly request to 1 April Lok Sabha and 2 April Rajya Sabha passage without collapsing the stages.

3. Benefits: administrative clarity and a more stable legal reference for planning.

4. Limits: naming the capital does not complete works, settle every land/rehabilitation dispute or produce financing.

5. Recommend transparent project appraisal, land obligations, fiscal disclosure, service milestones and heritage safeguards. Parliament’s future amendment power is not extinguished.

Evidence caution: Do not say the March Assembly resolution itself amended the central Act or that no future Parliament can amend the law again.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

What makes Polavaram rehabilitation adequate beyond increased cash assistance?

Study reference: E11-2604-045

Dated anchor: The 30 April Cabinet decision is reported in The Hindu.

1. Anchor 30 April reported changes: house-construction assistance ₹2.85 lakh→₹3.57 lakh; eligible outside-colony site value ₹1 lakh→₹2 lakh.

2. Distinguish Cabinet approval, notified eligibility, payment and actual rehabilitation.

3. Examine housing quality, land/livelihood restoration, community services, access and applicable rights.

4. Counterpoint: a standard unit cost may not reflect varying losses or local construction costs; informed choice and grievances matter.

5. Recommend transparent beneficiary records, timely support and independent post-relocation outcomes. Do not infer all obligations were fulfilled on approval day.

Evidence caution: Do not describe these amounts as universal compensation for every loss or as proof all rehabilitation obligations are fulfilled.

Conclusion test: Identify the responsible institution, the financing/rights safeguard and a measurable outcome.

Source register

Evidence access is recorded explicitly. Most non-PRS references were inspected as source extracts; primary full-text review remains open for them.

[E11-PRS] PRS · April 2026 monthly policy review

https://prsindia.org/policy/monthly-policy-review/april-2026

All six chunks read, including substantive review and reference list. Referenced primary texts are not all independently read. RBI reference is minutes published 22 April for 6–8 April meeting; NZ signing release is dated 27 April, not the reference-list 28 April. AIF parent framework is 2012, not the review's 2016 label.

[E11-MPC] RBI · April 6–8 MPC minutes, published 22 April

https://rbidocs.rbi.org.in/rdocs/PressRelease/PDFs/PR121405ABA7B50F645B68B30FB90F609D8C2.PDF

fetch_page failed; direct requests recovered 11-page PDF. Opening roughly 5300 characters of PDF text read, covering minutes date, meeting, unanimous resolution, rate corridor, neutral stance and opening growth/risk assessment. Later individual member statements not read.

[E11-CPI] MoSPI · March CPI release,13 April

https://www.mospi.gov.in/uploads/latestreleasesfiles/1776078391571-Press_Release_of_CPI_March_2026.pdf

Chunk 0 of 2 read: national March provisional/February final indices, inflation, state high-inflation table including AP, response/method notes and opening annexures. Remaining detailed annexures not fully read.

[E11-NZ] PIB · India–New Zealand FTA signing,27 April

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2255914&reg=3&lang=1

Opening chunk 0 of 8 read: actual 27 April posting/signing, tariff/services/mobility highlights and forward-looking investment commitment. Complete treaty, schedules, entry-into-force record and later release text not independently read.

[E11-SEZ] PIB · Conditional SEZ domestic clearances,1 April

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2247993&reg=3&lang=1

Full substantive release in chunk 0 of 2 read: conditions,30% reference denominator,20% value addition, dates, audit and no double benefit. Detailed Customs notification not separately read. Sector enumeration is internally overlapping for vehicles; no definitive product classification is inferred from it.

[E11-PMGSY] PIB · PMGSY-III continuation,18 April

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2253248&reg=3&lang=1

Full substantive single-chunk release read: revised outlay, differing road/bridge deadlines and sanctioned-work treatment. Independent progress/maintenance records not read.

[E11-PLFS] PIB/MoSPI · Annual PLFS 2025,27 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2246009&lang=1&reg=3

Chunk 0 of 5 read: national headline estimates, sex/age/status definitions, hours-worked description, earnings and opening sectoral discussion. Report is a 27 March release carried forward by April magazine, not an April first release. Full statistical tables/design report not reviewed.

[E11-APACT] Gazette · AP Reorganisation amendment Act 2026

https://prsindia.org/files/bills_acts/bills_parliament/2026/Andhra_Pradesh_Reorganisation_(A)Act_2026.pdf

Full single-chunk, two-page Gazette text read: Act 7/2026, assent 6 April, deemed effect 2 June 2024, section 5 wording and APCRDA-area explanation. PRS track separately inspected for 1/2 April passage. No assertion that future Parliament cannot amend the Act.

[E11-IBC] IBBI-hosted Gazette · IBC amendment Act 2026

https://ibbi.gov.in/uploads/legalframwork/2026-04-07-115842-i5nsk-7ed69ef2a4d23a8b0d472cc0fcd55e79.pdf

IBBI Act index located primary PDF. Opening chunk 0 of 12 read: assent 6 April, provision-specific notified commencement, security-interest definition and admission/other opening amendments. Later CIIRP/group/cross-border provisions follow selected magazine passages, not full Act review. PRS older 2025 bill analysis chunk 1 inspected as background, not substituted for final Act.

[E11-DEF] PIB · FY 2025–26 defence exports,2 April

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2248124&reg=3&lang=1

Full substantive release in chunk 0 of 2 read: annual export values,54.84/45.16% shares,80-plus destinations and authorisation context. Does not independently audit indigenous content of all exported products.

[E11-NASA] NASA · Artemis II mission milestones

https://www.nasa.gov/centers-and-facilities/johnson/artemis-ii-mission-milestones-an-image-and-video-recap/

fetch_page chunk 0 mainly navigation; direct requests/BeautifulSoup recovered and inspected opening substantive recap: 1 April launch,10 April splashdown, four crew members, lunar flyby and greatest-distance record. Later gallery/technical mission data not fully reviewed.

[E11-ASI] ASI · Amaravati stupa description

https://asi.nic.in/ruined-buddhist-stupa-remains-amaravati/

Substantive official search extract read, including locally available light-green limestone, Jataka/life scenes and plinth remains. Direct fetch redirected to homepage, not a successful full article read. No white-marble claim retained.

[E11-APCENSUS] The Hindu · AP census schedule,15 April

https://www.thehindu.com/news/national/andhra-pradesh/census-2027-to-begin-in-ap-with-self-enumeration-exercise-on-april-16/article70865382.ece

Full substantive single-chunk report read despite subscription-interface/error clutter: self-enumeration 16–30 April, field HLO 1–30 May, SEID validation,33 questions and confidentiality. Primary state/Union notification not independently read.

[E11-APHEAT] TNIE · AP heatwave alert,15 April

https://www.newindianexpress.com/states/andhra-pradesh/2026/Apr/15/severe-heatwave-alert-issued-across-andhra-pradesh-temperatures-may-touch-44c

Chunk 0 of 2 substantive report read: APSDMA-attributed forecast and previous-day readings, including Ontimitta 45°C. Forecast is not an observed tally; no full APSDMA bulletin archive review.

[E11-APCAB] The Hindu · AP Cabinet decisions,30 April

https://www.thehindu.com/news/national/andhra-pradesh/andhra-pradesh-cabinet-approves-enhanced-benefits-for-polavaram-displaced-families/article70925133.ece

fetch_page failed; direct requests/BeautifulSoup recovered and inspected full substantive report, from Cabinet opening through energy guarantee and publication date. Includes OTS values, Punganur ₹309.92 crore,350-acre DRDO allotment, three fishing harbours ₹1586.69 crore. Primary GOs, DPRs and completed works not inspected.

[E11-JAN] PIB · Jan Vishwas introduction,27 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2246226&reg=3&lang=1

Full substantive release in chunk 0 of 2 read: 79 Acts,784 provisions,717 decriminalisation/67 ease-of-living. Corrects March note’s PRS-derived 80 Acts. Detailed final Gazette/commencement not read.

[E11-JANAPR] PIB · Jan Vishwas backgrounder,4 April

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2248925&reg=3&lang=1

Opening chunk 0 of 5 read: revised bill scope, graded enforcement, institutional design and opening examples. Not complete backgrounder or final commencement review.

[E11-GAMING] DSK Legal · Gaming Rules 2026 overview

https://dsklegal.com/promotion-and-regulation-of-online-gaming-rules-2026/

Contemporary substantive search extract read: notification 22 April and commencement 1 May, plus authority/classification context. Primary Gazette not independently read; PRS supplies other rule features. Not legal advice.

[E11-AIF] SEBI · AIF amendment landing,18 April

https://www.sebi.gov.in/legal/regulations/apr-2026/securities-and-exchange-board-of-india-alternative-investment-funds-amendment-regulations-2026_100989.html

Direct HTML landing title/date inspected; substantive linked instrument not recovered/read.₹1000 social-impact minimum follows PRS, not independently read regulation.

[E11-V04] Vision IAS · April 2026 · 2.1 IBC (Amendment) Act, 2026

[E19-APCBRO] AP Finance · G.O.Ms.No.19, CBRO budget-release guidelines, 9 April 2026

https://apfinance.gov.in/images/BE_2026-27_CBRO_Guidelines.pdf

Both extracted PDF chunks 0 and 1 read through the signature/addressees. All substantive numbered paragraphs inspected; full appropriation statute and consolidated FRBM legislation not independently read. The extraction boundary cut a few words in paragraph 8; no unsupported reconstruction is used.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
