CIVILS ATLAS / RESEARCH EDITION 19

July 2025

Understand the news.
Retain what matters.

44 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

Subject guide

Culture & History — 1 notes

Awards & Sports — 4 notes

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

03 · Media measurement & conflicts

TV-rating consultation: entry barriers versus independence

E5-2507-012 · P2 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS Draft amendments revisited restrictions on rating-agency ownership/boards.

• The 2014 framework regulated registration of television rating agencies.

• The draft proposed removing specified cross-business restrictions.

• Ratings influence advertising and programming decisions.

STATIC CONNECTION · ORIGINAL Measurement credibility depends on sample design, auditability and independence, not registration alone.

ANALYSIS · ORIGINAL GUIDANCE

• Easing entry can encourage competition while increasing conflicts if advertisers/broadcasters control measurement.

• Transparent methods and conflict safeguards should accompany regulatory simplification.

PRELIMS CAUTION A draft relaxation is not proof every ownership restriction was removed or ratings became unbiased.

MAINS PROMPT How should media measurement balance competition with institutional independence?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

04 · Digital sovereignty & market power

Digital colonialism: examine dependency, not a legal slogan

E5-2507-029 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · National / other

WHY IN THE NEWS The issue used the framework to discuss foreign digital dependence. Magazine coverage is an editorial index, not the event date.

• Data concentration and control of infrastructure can shape market power.

• Proprietary ecosystems can increase switching barriers.

• The term is an analytical framework, not a defined offence in itself.

STATIC CONNECTION · ORIGINAL State sovereignty, individual privacy and competitive market access are related but may require different remedies.

ANALYSIS · ORIGINAL GUIDANCE

• Open standards, portability and diversified capability can reduce lock-in.

• Blanket localisation or exclusion can create new domestic concentrations unless rights and competition remain central.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013, E6-2510-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not assume every foreign service is unlawful or every domestically hosted service respects user autonomy.

MAINS PROMPT How can digital sovereignty policy avoid replacing one concentration of power with another?

Sources: [E5-V2507-01]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

05 · Panchayat finances & devolution

PRI finances: the three Fs must move together

E5-2507-030 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed parliamentary scrutiny of fiscal devolution. Magazine coverage is an editorial index, not the event date.

• Functions, funds and functionaries are complementary dimensions.

• State Finance Commissions and State action matter to local resources.

• Tied and untied grants give different spending discretion.

STATIC CONNECTION · ORIGINAL The 73rd Amendment does not itself automatically transfer every Eleventh Schedule subject with adequate staff and money.

ANALYSIS · ORIGINAL GUIDANCE

• Local accountability needs predictable transfers, own revenue and usable accounts.

• AP analysis should test actual assigned functions and service capacity, not the constitutional subject list alone.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028, E8-2601-031 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate a grant allocation with timely release, local autonomy or verified expenditure.

MAINS PROMPT Why has formal decentralisation not always produced effective local self-government?

Sources: [E5-V2507-03]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

06 · Waqf records & subordinate rules

UMEED Rules: digital records after the amendment

E5-2507-042 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The ministry notified portal/database rules.

• The system covers property registration and account/audit records.

• Specified authorities have access roles.

• Existing and newly created properties have different filing frameworks.

STATIC CONNECTION · ORIGINAL Subordinate rules administer a parent statute; they do not eliminate constitutional review or independently settle every ownership dispute.

ANALYSIS · ORIGINAL GUIDANCE

• Digital records can improve access while needing accuracy, correction and fair procedures.

• Connect January committee scrutiny, April amendment and July rules without skipping subsequent court/current-law checks.

PRELIMS CAUTION Do not treat a portal entry as conclusive adjudication of every title dispute or a summary of rules as the latest binding court position.

MAINS PROMPT How can digitisation of endowment records improve transparency while preserving due process?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Economy

01 · Inflation & reference periods

Q1 inflation: disinflation does not mean all prices fell

E5-2507-001 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The July review compared April–June price indicators.

• CPI inflation averaged 2.7% in Q1 FY2025–26.

• Food inflation averaged 0.57% in that quarter.

• WPI and CPI measure different baskets and stages of price formation.

STATIC CONNECTION · ORIGINAL A lower positive inflation rate means slower price increases, not necessarily a fall in the price level.

ANALYSIS · ORIGINAL GUIDANCE

• Household experience differs by expenditure mix and location.

• Connect disinflation with policy space, but separate supply-driven food movements from persistent underlying pressures.

PRELIMS CAUTION The quarterly average is not automatically the July monthly reading or identical across states.

MAINS PROMPT How should disinflation be interpreted alongside household purchasing power?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Tax drafting & legislative scrutiny

Income-Tax Bill committee report: simplification requires precision

E5-2507-002 · P1 · 2025-07-21 · National / other

WHY IN THE NEWS The Select Committee reported on the February Bill.

• The report was tabled on 21 July.

• It identified drafting, reference and omission problems.

• It sought consistency with intended provisions of the existing framework.

STATIC CONNECTION · ORIGINAL An editorial change can alter legal effect; simplifying words is not sufficient unless obligations remain precise.

ANALYSIS · ORIGINAL GUIDANCE

• Committee scrutiny can prevent ambiguity and compliance disputes.

• Read February introduction, July recommendations and August replacement/passage as successive milestones, not one event.

READ ACROSS MONTHS · NOTE IDS FEB25-004, E5-2508-003, E13-2606-007

PRELIMS CAUTION A committee recommendation is not enacted text or a July commencement of the replacement law.

MAINS PROMPT Why is parliamentary scrutiny important even for legislation labelled simplification?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · Consumer lending & prepayment

Prepayment directions: floating-rate scope and future applicability

E5-2507-003 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS RBI issued directions on charges for early loan repayment.

• The framework addresses specified floating-rate loans.

• Conditions vary by lender and borrower/loan category.

• It applies to relevant loans sanctioned or renewed from 1 January 2026.

STATIC CONNECTION · ORIGINAL A floating interest rate can reset with a benchmark; fixed-rate loans and different borrower purposes require separate rules.

ANALYSIS · ORIGINAL GUIDANCE

• Lower switching costs can improve competition if borrowers understand repricing and total charges.

• Read the operative circular before assuming every business loan from every lender has identical treatment.

PRELIMS CAUTION Do not turn July issuance into immediate universal abolition of all foreclosure charges.

MAINS PROMPT How can prepayment safeguards improve credit-market competition?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

04 · Digital banking & customer choice

Draft digital-banking directions: consent and risk capacity

E5-2507-004 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS RBI consulted on requirements for digital banking channels.

• The draft covers commercial and cooperative banks offering digital channels.

• It proposes approval/capacity and risk-management conditions.

• Consent and optional use of digital services are important elements.

STATIC CONNECTION · ORIGINAL An app interface is a delivery channel; the regulated financial service and customer liabilities remain substantive obligations.

ANALYSIS · ORIGINAL GUIDANCE

• Fraud controls, accessible alternatives and effective complaints matter as much as convenience.

• AP inclusion efforts should avoid digital-only exclusion of people needing assisted service.

PRELIMS CAUTION The draft is not evidence that every proposed restriction or permission was already final.

MAINS PROMPT How should digital-banking regulation combine innovation with customer autonomy?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

05 · Mutual funds & product transparency

Mutual-fund categorisation consultation: portfolio overlap matters

E5-2507-005 · P2 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS SEBI sought comments on scheme classification.

• The proposal revisits value/contra and thematic-fund arrangements.

• It discusses portfolio overlap and rebalancing.

• It proposes conditions for additional schemes in existing categories.

STATIC CONNECTION · ORIGINAL Two differently named schemes may expose an investor to largely the same underlying securities.

ANALYSIS · ORIGINAL GUIDANCE

• Clear categories improve comparability only if disclosures show actual risks and holdings.

• More product choice can confuse retail investors unless suitability and costs remain visible.

PRELIMS CAUTION A consultation is not a final guarantee of new product availability or investment returns.

MAINS PROMPT How can fund classification support meaningful rather than cosmetic diversification?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

06 · Fiscal responsibility & audit vintages

CAG’s FRBM audit: report year differs from accounts audited

E5-2507-006 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The review discussed compliance findings for FY2022–23.

• The audit considered debt/deficit reporting and rolling fiscal targets.

• It flagged tax revenue raised but unrealised.

• It distinguished general-government debt from Union debt.

STATIC CONNECTION · ORIGINAL General government includes Centre and states; debt stocks, annual deficits and tax arrears are different aggregates.

ANALYSIS · ORIGINAL GUIDANCE

• Transparent medium-term assumptions help markets and legislatures evaluate fiscal credibility.

• Tax claims are not cash receipts, and not all arrears can be assumed fully collectible.

PRELIMS CAUTION Do not present FY2022–23 findings as measured July 2025 debt or equate all tax arrears with recoverable revenue.

MAINS PROMPT How can fiscal audits improve credible medium-term budgeting?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

07 · Cooperative governance & policy

National Cooperative Policy 2025: enabling framework, not automatic legal amendment

E5-2507-013 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The policy replaces the 2002 policy.

• It promotes accessible finance, research and marketing support.

• It encourages inclusive membership, skills and cooperative-led clusters.

• Implementation and monitoring mechanisms are proposed within the cooperation framework.

STATIC CONNECTION · ORIGINAL Cooperative principles, a national policy and state/multi-state society laws operate at different levels.

ANALYSIS · ORIGINAL GUIDANCE

• Better management should reinforce rather than displace member control.

• Connect the International Year theme in January with July policy, testing elections, audits and member benefits in AP societies.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033, E10-2603-021 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The policy does not itself amend the Constitution or automatically harmonise every state cooperative law.

MAINS PROMPT How can cooperative modernisation preserve democratic member ownership?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

08 · NCDC finance & leverage

NCDC support: grants can underpin further borrowing

E5-2507-014 · P2 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved ₹2,000 crore support over four years.

• The grant schedule discussed is ₹500 crore annually for FY2025–26 to FY2028–29.

• NCDC expects to mobilise additional market resources.

• The onward support to cooperatives is through loans for eligible purposes.

STATIC CONNECTION · ORIGINAL A grant to a development institution, its market borrowing and loans to final users are distinct transactions.

ANALYSIS · ORIGINAL GUIDANCE

• Leverage can expand reach if project appraisal and repayment are robust.

• AP cooperative beneficiaries need viable cash flows and governance, not an assumption that every onward loan is free assistance.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033, E10-2603-021 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not label expected ₹20,000 crore borrowing as money already disbursed or a grant to every cooperative.

MAINS PROMPT How can development-finance leverage expand access without hiding credit risk?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

09 · Shipping documents & commercial law

Bills of Lading replacement: document roles matter

E5-2507-022 · P2 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS Parliament passed the replacement Bill.

• A bill of lading records shipment details issued by a carrier.

• It can perform receipt, contract-evidence and document-of-title functions depending on form/law.

• The replacement broadly retains earlier provisions while updating the framework.

STATIC CONNECTION · ORIGINAL A bill of lading is not a bill introduced in Parliament; identical English words can refer to different legal objects.

ANALYSIS · ORIGINAL GUIDANCE

• Predictable carriage documentation supports trade finance and claims.

• AP exporters need correct shipping paperwork in addition to port capacity.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E6-2510-028, E7-2511-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse this law with the separate Carriage of Goods by Sea, Coastal Shipping or Ports legislation.

MAINS PROMPT Why does commercial-document clarity matter to trade logistics?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

10 · Ride aggregation & state implementation

Motor Vehicle Aggregator Guidelines: conditional state choices

E5-2507-023 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS Revised guidelines replaced the 2020 model.

• They address licensing, driver training and passenger insurance.

• State-notified fares underpin the dynamic-pricing framework.

• States may allow aggregation of non-transport motorcycles under the stated approach.

STATIC CONNECTION · ORIGINAL Central model guidance and state licensing/implementation are distinct stages in transport regulation.

ANALYSIS · ORIGINAL GUIDANCE

• Safety, accessible services and driver welfare need enforceable processes.

• AP implementation should check operative state rules before assuming every platform practice is authorised.

PRELIMS CAUTION Do not treat model permission as an automatic nationwide legalisation of all private-motorcycle taxi operations.

MAINS PROMPT How should aggregator regulation balance access, safety and worker protection?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

12 · Offshore atomic minerals & thresholds

Offshore atomic-mineral rules: grade determines operating-right constraints

E5-2507-041 · P2 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The Mines Ministry notified rules under offshore-mineral legislation.

• Specified atomic-mineral grades/thresholds determine applicability.

• Discovery during operations carries reporting duties.

• Above-threshold cases have government-entity eligibility conditions.

STATIC CONNECTION · ORIGINAL A mineral occurrence, an exploration right, a composite licence and a production lease are different stages.

ANALYSIS · ORIGINAL GUIDANCE

• Strategic-resource oversight requires reliable assays and transparent reporting.

• Marine ecology and other permissions remain relevant beyond the operating-right framework.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009, E8-2601-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not infer that all private exploration licences authorise extraction of above-threshold atomic minerals.

MAINS PROMPT Why does strategic-mineral regulation distinguish geological discovery from production eligibility?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

13 · Regional transit & last-mile value

RRTS committee report: regional planning before rail kilometres

E5-2507-043 · P2 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The committee examined transit outside individual city boundaries.

• It recommends integrated regional development/transport plans.

• It considers wider institutional roles and private participation.

• Last-mile and multimodal links are explicit concerns.

STATIC CONNECTION · ORIGINAL A regional commuter railway and a city metro can serve different trip lengths and catchments.

ANALYSIS · ORIGINAL GUIDANCE

• Infrastructure delivers value when stations connect people to actual destinations.

• AP regional planning should evaluate demand, affordability and operating finance before borrowing a particular corridor model.

PRELIMS CAUTION A committee proposal to expand an institution’s mandate is not evidence that AP received an approved RRTS project.

MAINS PROMPT Why should regional transit be evaluated as a mobility system rather than a construction target?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Agriculture

01 · District development & scheme convergence

PM Dhan Dhaanya approval: targeted district planning

E5-2507-015 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved the scheme following its Budget announcement.

• It targets 100 districts with low productivity, cropping intensity and credit disbursement.

• The review records six years of implementation from FY2025–26.

• Convergence and district plans are central to implementation.

• The official explainer specifies ₹24,000 crore annual outlay, not a single six-year total.

STATIC CONNECTION · ORIGINAL Aspirational district-style targeting differs from a universal cash transfer or a single new crop MSP.

ANALYSIS · ORIGINAL GUIDANCE

• Convergence needs clear accountability so existing schemes do not merely acquire a new label.

• AP assessment should identify selected districts through official orders rather than assume every district is included.

READ ACROSS MONTHS · NOTE IDS E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E6-2510-011, E7-2511-016, E7-2511-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION July approval does not mean all target-district outcomes were delivered or that the Budget announcement itself began field implementation.

MAINS PROMPT What makes district-focused agricultural convergence effective?

Sources: [E5-PRS07], [E5-DHAN]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Food processing, irradiation & quality

PM Kisan Sampada outlay: post-harvest infrastructure and labs

E5-2507-016 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved additional support for food-processing infrastructure.

• The additional outlay discussed was ₹1,920 crore.

• Food-irradiation units and accredited testing laboratories are part of the package.

• Other components concern storage, processing and preservation.

STATIC CONNECTION · ORIGINAL Food irradiation is a controlled processing technique, not nuclear contamination of food.

ANALYSIS · ORIGINAL GUIDANCE

• Infrastructure benefits depend on utilisation, maintenance, market links and testing credibility.

• AP’s perishable produce and seafood chains require quality assurance alongside storage capacity.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E6-2510-011, E7-2511-016, E7-2511-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse Kisan Sampada with Krishi Sinchayee merely because both are abbreviated PMKSY.

MAINS PROMPT How can post-harvest investment improve farmer returns and food safety?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Society & Welfare

01 · Employment incentives & additionality

ELI approval: incentives for formal first jobs and additional hiring

E5-2507-009 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The Cabinet approved the Employment Linked Incentive scheme.

• The announced outlay was ₹99,446 crore.

• The job-creation window discussed runs from 1 August 2025 to 31 July 2027.

• First-time EPF employees and additional employer hiring have distinct conditions and benefits.

STATIC CONNECTION · ORIGINAL Payroll registration, genuine net additional employment and durable job creation are different outcomes.

ANALYSIS · ORIGINAL GUIDANCE

• Incentives can reduce hiring costs but require safeguards against relabelling existing jobs or short-lived churn.

• Assess retention, wages and actual additionality rather than the scheme’s target as achieved employment.

READ ACROSS MONTHS · NOTE IDS E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023, E7-2511-024 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Targets for different components may overlap; do not simply add them as unique jobs already created.

MAINS PROMPT How should employment incentives be designed and evaluated to reward genuine additional jobs?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Skill policy & lifelong learning

Draft skill policy: credentials need labour-market relevance

E5-2507-010 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The skill ministry invited feedback on its new framework.

• It proposes digital lifelong-learning accounts and skill profiles.

• It discusses decentralised skilling and stronger labour-market information.

• Skill vouchers and support for women re-entering work are among proposals.

STATIC CONNECTION · ORIGINAL A credential records assessed learning; it is not itself proof of job placement or adequate wages.

ANALYSIS · ORIGINAL GUIDANCE

• Learner choice helps when provider quality and employment information are credible.

• AP skilling should connect local demand, accessible training and independent outcome monitoring.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023, E7-2511-024 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Consultation proposals are not already operational universal voucher entitlements.

MAINS PROMPT How can lifelong-skilling systems avoid counting credentials instead of capabilities?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · Student wellbeing & institutional responsibility

Student mental health: supportive systems, not blame

E5-2507-034 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · AP-linked

WHY IN THE NEWS The issue discussed Supreme Court directions in Sukdeb Saha v State of Andhra Pradesh. Magazine coverage is an editorial index, not the event date.

• Educational/coaching environments affect wellbeing.

• Ragging, discrimination and unsafe pressure can compound distress.

• Accessible counselling and trustworthy grievance routes form part of institutional prevention.

STATIC CONNECTION · ORIGINAL Population statistics cannot identify an individual’s motives; suicide has complex interacting factors.

ANALYSIS · ORIGINAL GUIDANCE

• Institutions should reduce barriers to help, protect confidentiality and respond promptly to warning signs.

• Avoid sensational description, methods or attributing deaths to one examination result.

READ ACROSS MONTHS · NOTE IDS E5-2502-002, E7-2512-029, E7-2512-032, E8-2601-011, E8-2601-012, E8-2601-037, E9-2602-038, E10-2603-043 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not label every stressed student at risk or treat counselling alone as a substitute for addressing harassment and structural pressures.

MAINS PROMPT How can educational institutions build accountable systems for student wellbeing?

Sources: [E5-V2507-33]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Environment

01 · Clean freight & scrappage incentives

E-truck support: upfront buyer relief with conditions

E5-2507-024 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The scheme guidelines detail incentives within PM E-DRIVE.

• The announced maximum is ₹9.6 lakh per vehicle, varying by category.

• Proof of eligible scrappage is a requirement.

• The programme targets specified vehicle-weight classes and a limited deployment count.

STATIC CONNECTION · ORIGINAL An upfront discount reimbursed to the OEM differs from a universal payment to every truck owner.

ANALYSIS · ORIGINAL GUIDANCE

• Freight electrification needs charging, duty-cycle suitability and viable total ownership cost.

• Grid emissions and battery supply must enter environmental evaluation.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014, E6-2510-008 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not assume the maximum incentive applies to every category or that every old diesel truck automatically receives a replacement.

MAINS PROMPT What determines whether e-truck incentives create viable low-emission freight?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Ethanol, energy & resource trade-offs

E20 progress: a blending milestone needs clear denominators

E5-2507-033 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · National / other

WHY IN THE NEWS The issue examined the announcement of 20% blending progress. Magazine coverage is an editorial index, not the event date.

• E20 denotes a petrol blend containing 20% ethanol by volume.

• First-generation ethanol commonly uses sugar/starch feedstocks.

• Residue-based pathways use different feedstock and processing routes.

STATIC CONNECTION · ORIGINAL A national average, monthly achievement and universal pump/vehicle compatibility are different claims.

ANALYSIS · ORIGINAL GUIDANCE

• Assess energy security alongside water use, land/food competition and lifecycle emissions.

• Vehicle compatibility and transparent consumer information matter alongside volume targets.

PRELIMS CAUTION Do not assume all ethanol is waste-based, zero-emission or that every vehicle has identical fuel-economy performance.

MAINS PROMPT How should biofuel policy balance import substitution with ecological and consumer safeguards?

Sources: [E5-V2507-28]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · MSME efficiency & measurement

ADEETIE launched: audits, finance and verified savings

E5-2507-038 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The Power Ministry launched assistance for energy-efficient MSME technologies.

• BEE implements the scheme through FY2027–28.

• The expected outlay is ₹1,000 crore.

• The reviewed subsidy rates are 5% for micro/small and 3% for medium enterprises.

STATIC CONNECTION · ORIGINAL An interest subsidy reduces a qualifying finance cost; it is not the same as a 5% reduction in energy use.

ANALYSIS · ORIGINAL GUIDANCE

• Investment-grade audits can identify appropriate technology, while post-installation verification tests actual gains.

• AP clusters need technical support, maintenance and measured savings rather than equipment purchases alone.

PRELIMS CAUTION Do not confuse a subsidy percentage with guaranteed energy savings or assume all industrial units are automatically eligible.

MAINS PROMPT How can efficiency finance overcome MSMEs’ capital and information constraints?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · Water & urban sustainability

Contaminated Sites Rules 2025

CA-026 · P1 · 2025-07-24 · National / other

WHY IN THE NEWS July notification created a dedicated framework for legacy contamination; the retained source review and legal account identify the formal rules.

• The Environment Protection (Management of Contaminated Sites) Rules, 2025 were notified on 24 July.

• Identification, assessment, listing and remediation are separate process stages.

• Responsible-party liability and monitoring matter beyond physical clean-up.

STATIC CONNECTION · ORIGINAL Polluter-pays addresses responsibility for harm; precaution addresses action under risk/uncertainty. Neither means the absence of evidence or due process.

ANALYSIS · ORIGINAL GUIDANCE

• Local identification and scientifically credible assessment need accountable state pollution-control oversight.

• AP industrial areas need transparent site records and affected-community participation; no specific site is declared contaminated by this note.

PRELIMS CAUTION Operational duties and liability must be studied from the Gazette; the review alone is not a complete legal brief.

MAINS PROMPT Apply polluter-pays and precautionary principles to legacy industrial contamination.

Sources: [ENV], [E5-CONTAM]

Evidence access: Ministry-review reference plus substantive legal search excerpts; complete Gazette review and operative procedural details remain pending

04 · Thermal pollution & regulatory differentiation

SO2 standards amended: categories and trade-offs matter

E5-2507-039 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The ministry changed compliance requirements for coal/lignite plants.

• Specified polluted-area plant cases move to case-by-case treatment.

• Other specified plants are exempted from SO2 compliance while retaining chimney-height requirements.

• The geographic category and applicable dates determine treatment.

STATIC CONNECTION · ORIGINAL A taller stack disperses pollution; it does not remove the same mass of sulphur emissions as an effective control device.

ANALYSIS · ORIGINAL GUIDANCE

• Assess health exposure, monitoring and cost evidence when evaluating flexibility.

• AP appraisal must identify an actual plant’s category and operative conditions before asserting exemption.

PRELIMS CAUTION Do not generalise selected exemptions into repeal of every thermal-plant pollution standard.

MAINS PROMPT How should emission regulation balance compliance costs with local and regional health protection?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

05 · Circular metals & certificate credibility

Non-ferrous scrap rules: recycling EPR extends beyond plastic

E5-2507-040 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS Amendments establish responsibilities for specified non-ferrous products.

- The framework covers metals such as aluminium, copper and zinc.
- Producers meet recycling obligations through the described certificate system.
- Collection, reporting and domestic recycled-content requirements involve different stakeholders.

STATIC CONNECTION · ORIGINAL A certificate records recognised recycling activity; traceability is needed to connect reported quantities with real material recovery.

ANALYSIS · ORIGINAL GUIDANCE

- Circular metals can reduce primary extraction pressures if collection and safe recycling function.
- Informal workers need safer inclusion, not displacement without alternatives.

PRELIMS CAUTION Do not conflate non-ferrous metals with iron/steel or assume a certificate alone proves safe physical recycling.

MAINS PROMPT What makes extended producer responsibility credible in metal recycling?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Science & Technology

01 · Human spaceflight & microgravity

Axiom-4 return: link June launch to July completion

E5-2507-028 · P1 · 2025-07-15 · National / other

WHY IN THE NEWS Shubhanshu Shukla returned to Earth on 15 July.

• The mission launched on 25 June.

• The ISS stay included microgravity research.

• The mission used an international private-flight framework, not an Indian launch vehicle.

STATIC CONNECTION · ORIGINAL Experience in microgravity supports research and procedures but does not automatically demonstrate indigenous crewed-launch readiness.

ANALYSIS · ORIGINAL GUIDANCE

• Evaluate experiments, trained personnel and transferable operational learning.

• Avoid merging a planned 14-day description with actual stay/total-flight durations without definitions.

READ ACROSS MONTHS · NOTE IDS E5-2506-025, E5-2507-027, E5-2506-026, E5-2508-033, E8-2601-034, E8-2601-045, E9-2602-011, E9-2602-036 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION July return must not be indexed as a June return simply because June’s magazine discussed it.

MAINS PROMPT How should India evaluate scientific returns from participation in international crewed missions?

Sources: [E5-AX]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

01 · Research finance & deep tech

₹1 lakh crore RDI corpus: patient finance, not universal grants

E5-2507-020 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved a framework for private-sector R&D support.

• The corpus is to operate through a two-tier structure with a special-purpose fund under ANRF.

• Concessional loans and specified startup equity routes are envisaged.

• DST implements the scheme within the stated governance structure.

STATIC CONNECTION · ORIGINAL Corpus size, commitments, disbursement and additional private R&D expenditure are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Patient capital helps long development cycles when technical appraisal and milestone discipline are credible.

• Connect April deep-tech discussion with AP Quantum Valley without assuming every startup qualifies.

READ ACROSS MONTHS · NOTE IDS VM2504-004, MY25-020, E5-2507-026, E5-2507-032, E6-2510-029, E5-2507-009, E5-2507-010, E5-2508-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe the entire corpus as spent in July or a grant available to every applicant.

MAINS PROMPT How can public R&D finance catalyse additional private innovation?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Radar Earth observation

NISAR launched: observation geometry and mission readiness

E5-2507-027 · P1 · 2025-07-30 · AP-linked

WHY IN THE NEWS The NASA–ISRO radar mission launched from Sriharikota on 30 July.

• NISAR combines L-band and S-band synthetic-aperture radar capabilities.

• Its exact repeat cycle is 12 days.

• Launch is followed by commissioning before routine science operations.

STATIC CONNECTION · ORIGINAL Radar can observe day/night and through many cloud conditions; radar products still require calibration and interpretation.

ANALYSIS · ORIGINAL GUIDANCE

• Repeated deformation and ecosystem measurements support disaster and environmental analysis.

• AP use cases include subsidence, floods and crop/wetland monitoring, subject to product suitability and validation.

READ ACROSS MONTHS · NOTE IDS E5-2506-025, E5-2507-028, E5-2506-026, E5-2508-033, E8-2601-034, E8-2601-045, E9-2602-011, E9-2602-036 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call NISAR an optical camera or treat launch day as proof of complete operational science readiness.

MAINS PROMPT How can radar Earth observation strengthen evidence-led disaster and land management?

Sources: [E5-NISAR], [E5-NSDATA]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · Telecom policy & infrastructure targets

Draft National Telecom Policy: distinguish coverage from adoption

E5-2507-011 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The proposed policy seeks to replace the 2018 framework.

• It sets connectivity and domestic-production ambitions for 2030.

• Tower fibre links and public access infrastructure are priorities.

• Security, research and lower-carbon operations are also proposed.

STATIC CONNECTION · ORIGINAL Population coverage, geographic coverage, subscribed users and affordable reliable service are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Connectivity targets need power, backhaul, quality monitoring and viable rural service economics.

• Technology sovereignty should support trusted interoperable systems rather than simply assume domestic branding means domestic capability.

PRELIMS CAUTION Draft 2030 targets are not 2025 achievements or proof of universal 5G access.

MAINS PROMPT How should telecom policy measure meaningful connectivity beyond coverage maps?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Security

01 · Cyber audits & organisational accountability

CERT-In audit guidelines: beyond tool-only compliance

E5-2507-021 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The guidelines standardise scope and responsibilities.

• The approach includes vulnerability, cloud and emerging-system assessment.

• It discourages reliance on tool-only audit checklists.

• Auditor competence and independent verification are important safeguards.

STATIC CONNECTION · ORIGINAL A penetration test is one technique; an organisation-wide security audit has wider governance and control scope.

ANALYSIS · ORIGINAL GUIDANCE

• Finding vulnerabilities matters when ownership, remediation and verification follow.

• Avoid treating a clean automated scan as proof against every compromise.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013, E6-2510-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION An audit or empanelled firm is not a guarantee that the audited organisation cannot be breached.

MAINS PROMPT How can cybersecurity audits shift from paperwork to risk reduction?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Post-quantum migration & data longevity

Quantum cyber-readiness: prepare without claiming today’s encryption is broken

E5-2507-032 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed the MeitY/CERT-In-linked whitepaper. Magazine coverage is an editorial index, not the event date.

• Large fault-tolerant quantum computers could threaten specified public-key schemes.

• Harvest-now/decrypt-later risk concerns long-lived confidential data.

• Cryptographic inventory and migration planning are early preparedness tasks.

STATIC CONNECTION · ORIGINAL Quantum computing does not accelerate every calculation or defeat every form of encryption by the same mechanism.

ANALYSIS · ORIGINAL GUIDANCE

• Crypto-agility and tested post-quantum standards can reduce transition risk.

• AP digital infrastructure should prioritise long-lived records and vendor dependencies, not panic-driven product claims.

READ ACROSS MONTHS · NOTE IDS VM2504-004, MY25-020, E5-2507-026, E5-2507-020, E6-2510-029, CA-038, E9-2602-018, E9-2602-026 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not state that current small experimental machines have already broken operational RSA at scale.

MAINS PROMPT How should governments prioritise post-quantum migration under technological uncertainty?

Sources: [E5-V2507-25]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

International Relations

01 · Trade-law milestones & market access

India–UK CETA signed: May conclusion followed by July signature

CA-033 · P1 · 2025-07-24 · AP-linked

WHY IN THE NEWS The countries signed the trade agreement.

• The agreement provides a framework for broad tariff concessions.

• Services access and the separate social-security contribution arrangement feature in the package.

• Signature still differs from entry into force and product-wise implementation.

STATIC CONNECTION · ORIGINAL Rules of origin and tariff schedules determine usable access; a coverage headline is not an immediate exemption for every shipment.

ANALYSIS · ORIGINAL GUIDANCE

• AP seafood/textile exporters need applicable product rules, standards and dates.

• Read this with May’s negotiation conclusion and later implementation checks, not as evidence that all benefits started in May.

READ ACROSS MONTHS · NOTE IDS MY25-002, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022, CA-035 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse CETA with a general visa-free regime or universal income-tax exemption.

MAINS PROMPT What determines utilisation of negotiated trade concessions?

Sources: [CETA], [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Maldives, development & maritime ties

India–Maldives engagement: credit is not a grant

E5-2507-008 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The PM’s visit covered development and maritime cooperation.

• The agenda included aquaculture, DPI and other sectoral MoUs.

• A new ₹4,850 crore line of credit was announced in the review.

• Debt-service changes under existing credit lines were separately discussed.

STATIC CONNECTION · ORIGINAL A concessional credit line remains finance with repayment terms, unlike an unconditional grant.

ANALYSIS · ORIGINAL GUIDANCE

• Project selection, repayment capacity and timely delivery determine development value.

• Regional partnerships need sensitivity to local priorities and credible maintenance capacity.

PRELIMS CAUTION An MoU or line of credit is not the same as disbursement or completion of every proposed project.

MAINS PROMPT How can neighbourhood development partnerships remain financially and politically sustainable?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · BRICS & Global South cooperation

Rio BRICS declaration: cooperation without assuming uniform alignment

E5-2507-031 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · National / other

WHY IN THE NEWS The issue reviewed the 17th summit’s declaration. Magazine coverage is an editorial index, not the event date.

• The agenda included global governance, climate finance and AI.

• Member and partner categories are distinct.

• Declarations set political priorities rather than automatically binding treaty obligations.

STATIC CONNECTION · ORIGINAL An expanded forum is not a customs union or a common-currency regime.

ANALYSIS · ORIGINAL GUIDANCE

• Coalition breadth can amplify developing-country concerns while making consensus difficult.

• Evaluate concrete institutional finance and implementation separately from summit language.

PRELIMS CAUTION Do not infer adoption of one BRICS currency or treat all partners/invitees as full members; membership snapshots need dated verification.

MAINS PROMPT How can diverse Global South forums turn shared concerns into workable cooperation?

Sources: [E5-V2507-13]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

04 · Transboundary rivers & hydropower

Medog project: evaluate downstream risk without speculative certainty

E5-2507-037 · P1 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · National / other

WHY IN THE NEWS The issue discussed China’s construction milestone on the Yarlung Tsangpo. Magazine coverage is an editorial index, not the event date.

• The project concerns the Great Bend region in Tibet.

• The river continues into India’s Siang/Brahmaputra system.

• Downstream concerns involve flows, sediment, ecology and disaster information.

STATIC CONNECTION · ORIGINAL A run-of-river label alone does not establish zero storage, zero diversion or zero cumulative impact.

ANALYSIS · ORIGINAL GUIDANCE

• Technical data sharing and credible impact assessment support diplomacy.

• Distinguish power-generation capacity from energy output and project claims from verified design details.

PRELIMS CAUTION Do not assert a guaranteed downstream catastrophe or precise diversion fraction without primary design evidence.

MAINS PROMPT How should lower-riparian states combine preparedness with data-based river diplomacy?

Sources: [E5-V2507-10]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Andhra Pradesh

01 · Water transfers & contested permissions

Polavaram–Banakacherla: proposal review is not final clearance

E5-2507-025 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS A July report described the EAC returning the proposal for clarification.

• The underlying EAC meeting was in June.

• The proposal sought Terms of Reference for appraisal.

• Interstate/legal and environmental issues required clarification and consultation.

STATIC CONNECTION · ORIGINAL Terms of Reference set the scope of EIA work; they are not environmental clearance, water allocation or construction completion.

ANALYSIS · ORIGINAL GUIDANCE

• Claims of surplus water require basin data, ecological flows and applicable tribunal/agreement analysis.

• Distinguish AP’s position from established entitlements and other states’ objections.

PRELIMS CAUTION July reporting of a returned proposal is not a final permanent ban, nor proof of approval or resolved interstate rights.

MAINS PROMPT How should proposed inter-basin transfers address hydrological uncertainty and federal trust?

Sources: [E5-PBLP]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Quantum institutions & capital delivery

AQCC Cabinet approval: the institutional step after May plans

E5-2507-026 · P1 · 2025-07-09 · AP-linked

WHY IN THE NEWS The AP Cabinet approved formation of the Amaravati Quantum Computing Centre company.

• Reporting dates the Cabinet meeting to 9 July.

• The proposed company supports the state quantum ecosystem.

• Formation approval is separate from hardware installation and service availability.

STATIC CONNECTION · ORIGINAL A government company, research programme and installed computing facility are different institutional/technical objects.

ANALYSIS · ORIGINAL GUIDANCE

• Track governance, procurement, partnerships and independent milestones.

• Link May’s conditional IBM plans and June’s workshop context rather than counting them as multiple completed computers.

READ ACROSS MONTHS · NOTE IDS VM2504-004, MY25-020, E5-2507-020, E5-2507-032, E6-2510-029, CA-038, E9-2602-018, E9-2602-026 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Cabinet approval to form a company is not proof of incorporation, commissioning or realised employment.

MAINS PROMPT What governance arrangements help a state technology initiative deliver useful research capability?

Sources: [E5-AQCC]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Culture & History

01 · Serial heritage & landscape strategy

Maratha Military Landscapes: one serial property with twelve components

E5-2507-035 · P2 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · National / other

WHY IN THE NEWS The group was inscribed in July 2025. Magazine coverage is an editorial index, not the event date.

• Eleven component forts are in Maharashtra and Gingee is in Tamil Nadu.

• The network reflects adaptation to coastal, hill and plateau settings.

• It became India’s 44th World Heritage property in the dated announcement.

STATIC CONNECTION · ORIGINAL A serial inscription counts as one World Heritage property, not twelve additions to the national total.

ANALYSIS · ORIGINAL GUIDANCE

• Conservation must manage landscape, access and living communities along with structures.

• Tentative listing, nomination and inscription are different stages.

PRELIMS CAUTION Do not place Gingee in Maharashtra or treat every fort as identical in date, terrain and design.

MAINS PROMPT How does a landscape approach deepen understanding of military architecture?

Sources: [E5-V2507-40], [E5-MARATHA]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Awards & Sports

01 · Governance law & athlete rights

Sports Governance Bill introduced: institutions versus operational bodies

E5-2507-017 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The Bill was introduced in Lok Sabha.

• It proposes a National Sports Board for recognition/oversight.

• It proposes a National Sports Tribunal for defined disputes.

• Ethics, grievance redressal and elections feature in the design.

STATIC CONNECTION · ORIGINAL Sports governance, anti-doping and sports-development policy address different institutional problems.

ANALYSIS · ORIGINAL GUIDANCE

• Accountability should protect athletes without undermining legitimate sporting autonomy or international obligations.

• July introduction and August passage need separate date labels.

READ ACROSS MONTHS · NOTE IDS E5-2507-019, E5-2508-023, E5-2507-018, E5-2508-025, E8-2601-026, E8-2601-027

PRELIMS CAUTION A proposed board or tribunal is not proof that it was constituted and hearing cases in July.

MAINS PROMPT How can sports governance reconcile autonomy with athlete-centred accountability?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

02 · Anti-doping & institutional independence

Anti-Doping amendment introduced: appeals and independence

E5-2507-018 · P1 · 2025-07 (month-level index) · National / other

WHY IN THE NEWS The Bill sought changes to the 2022 law.

• It changes the proposed constitution of the Appeal Panel.

• It removes specified Board directions over adjudicatory panels.

• Operational independence is an explicit design concern.

STATIC CONNECTION · ORIGINAL Agency enforcement, disciplinary adjudication and appeals must not be conflated.

ANALYSIS · ORIGINAL GUIDANCE

• Credible anti-doping requires fair hearings, reliable testing and freedom from sporting or political conflicts.

• Education and proportionate procedures matter alongside penalties.

READ ACROSS MONTHS · NOTE IDS E5-2507-019, E5-2507-017, E5-2508-023, E5-2508-025, E8-2601-026, E8-2601-027

PRELIMS CAUTION Doping offences extend beyond taking a substance; do not present the introductory summary as an exhaustive legal definition.

MAINS PROMPT Why are independent adjudication and procedural fairness essential to anti-doping?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

03 · National Sports Policy & inclusion

National Sports Policy 2025: participation and sporting economy

E5-2507-019 · P1 · 2025-07 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved the policy replacing the 2001 policy.

• The policy promotes sporting culture from schools onward.

• It emphasises inclusive participation and para-sports.

• Infrastructure, industry, tourism and monitoring form parts of the agenda.

STATIC CONNECTION · ORIGINAL A policy vision differs from a statute and from a funded completed sports facility.

ANALYSIS · ORIGINAL GUIDANCE

• Elite pathways need broad access, safe coaching and competition exposure.

• AP’s sporting programmes should track participation retention and athlete welfare, not only medal promises.

READ ACROSS MONTHS · NOTE IDS E5-2507-017, E5-2508-023, E5-2507-018, E5-2508-025, E8-2601-026, E8-2601-027

PRELIMS CAUTION Do not infer that national policy approval gives every athlete an immediately enforceable scholarship entitlement.

MAINS PROMPT How can sports policy connect broad participation with excellence?

Sources: [E5-PRS07]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

04 · Chess formats & championship cycle

Divya Deshmukh wins Women’s World Cup; Humpy runner-up

E5-2507-036 · P2 · Magazine coverage: 2025-07 · web posted: 2025-08-19 · event date varies · AP-linked

WHY IN THE NEWS The final at Batumi concluded on 28 July. Magazine coverage is an editorial index, not the event date.

• Divya defeated fellow Indian Koneru Humpy in tiebreaks.

• The victory brought the Grandmaster title in the reported account.

• The Women’s World Cup is distinct from the Women’s World Championship match.

STATIC CONNECTION · ORIGINAL Grandmaster and Woman Grandmaster are different titles; World Cup, Candidates and championship stages should not be conflated.

ANALYSIS · ORIGINAL GUIDANCE

• The all-Indian final provides a specific link to AP’s Koneru Humpy.

• Use the result to study tournament pathways, not assume the winner immediately became reigning world champion.

PRELIMS CAUTION Do not call a World Cup title the classical world-championship crown.

MAINS PROMPT What institutional support helps broaden elite participation in women’s chess?

Sources: [E5-V2507-41], [E5-CHESS]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

July 2025 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

JUL-01. Positive inflation falling from a higher rate means:

A. The price level is zero.

B. Every price has fallen.

C. All households face identical inflation.

D. Prices are rising more slowly on that measure.

JUL-02. The July Income-Tax committee report was:

A. The commencement of the new Act in July.

B. A universal tax-rate exemption.

C. Parliamentary scrutiny before subsequent replacement/passage steps.

D. A court striking down every tax.

JUL-03. The prepayment directions apply to relevant loans sanctioned/renewed from:

A. 1 January 2026.

B. 1 January 2035.

C. Only the day the July report appeared.

D. Every loan immediately from 1 January 2020.

JUL-04. Which principle supports customer choice in digital banking?

A. Meaningful consent and access to appropriate alternatives.

B. Assuming technology removes all bank liabilities.

C. Treating app installation as unlimited consent.

D. Compulsory use of every optional service.

JUL-05. Differently named mutual-fund schemes may still have:

A. Guaranteed independent returns.

B. No investment risk.

C. Identical statutory tax exemption for every investor.

D. Substantial overlap in underlying securities.

JUL-06. CAG discussion of FY2022–23 tax arrears should not be treated as:

A. An issue relevant to revenue administration.

B. An aggregate requiring scrutiny of collectibility.

C. Cash actually received in July 2025.

D. A dated audit finding.

JUL-07. Regarding India–UK CETA: (1) Negotiations concluded before the July signature. (2) Signature automatically made every product duty-free that day. Which are correct?

A. 1 only

B. Both 1 and 2

C. Neither 1 nor 2

D. 2 only

JUL-08. A line of credit differs from an unconditional grant because:

A. Repayment and financing terms remain relevant.

B. It is always a total debt write-off.

C. It cannot fund development projects.

D. It transfers political sovereignty.

JUL-09. Regarding ELI: (1) Payroll registration necessarily means durable net job creation. (2) Component targets may overlap and should not be blindly added. Which are correct?

A. 1 only

B. 2 only

C. Neither 1 nor 2

D. Both 1 and 2

JUL-10. A skill credential is not by itself proof of:

A. Some recorded assessed learning.

B. An identifiable training pathway.

C. A possible basis for further learning.

D. Employment at adequate wages.

JUL-11. Meaningful connectivity differs from coverage because it includes:

A. Only the number of towers announced.

B. A ban on quality measurement.

C. Affordability, adoption and reliable service.

D. A permanent guarantee of free devices.

JUL-12. Consider the Cooperative Policy: (1) It is distinct from state cooperative legislation. (2) Approval automatically amends every state cooperative Act. Which are correct?

A. 2 only

B. Neither 1 nor 2

C. Both 1 and 2

D. 1 only

JUL-13. Consider NCDC finance: (1) A grant to NCDC can support greater borrowing. (2) Expected borrowing is identical to money already disbursed as grants to societies. Which are correct?

A. 2 only

B. 1 only

C. Both 1 and 2

D. Neither 1 nor 2

JUL-14. Regarding PM Dhan Dhaanya: (1) It targets 100 districts. (2) ₹24,000 crore is the annual outlay in the official explainer. (3) The six-year approval proves every target was achieved in July. Which are correct?

A. 2 and 3 only

B. 1, 2 and 3

C. 1 only

D. 1 and 2 only

JUL-15. PM Kisan Sampada should be distinguished from:

A. The irrigation programme with a similar acronym.

B. Quality testing laboratories.

C. Food processing infrastructure.

D. Post-harvest investment.

JUL-16. A proposed National Sports Tribunal in July was:

A. Part of a Bill’s institutional design.

B. An international cricket championship.

C. Proof that a tribunal was already hearing every dispute.

D. The same institution as RBI’s MPC.

JUL-17. Anti-doping independence particularly concerns:

A. Replacing reliable tests with public opinion.

B. Immunity for every athlete.

C. Abolition of all hearings.

D. Separation of enforcement and fair adjudication/appeals.

JUL-18. A national sports policy is best distinguished from:

A. A framework for participation and excellence.

B. A basis for implementation evaluation.

C. An agenda potentially including para-sports.

D. A statute with every proposed benefit already funded and delivered.

JUL-19. The RDI corpus: (1) is distinct from actual disbursement; (2) consists only of unrestricted grants for every applicant. Which are correct?

A. Both 1 and 2

B. 1 only

C. Neither 1 nor 2

D. 2 only

JUL-20. A clean automated vulnerability scan is:

A. Evidence no remediation plan is needed.

B. Equivalent to every form of independent audit.

C. A permanent guarantee against breaches.

D. Not proof of complete organisational cyber security.

JUL-21. A bill of lading can serve as:

A. A constitutional amendment proposal.

B. A shipment receipt and evidence of a carriage contract.

C. A universal export-subsidy cheque.

D. A pension enrolment certificate.

JUL-22. Consider aggregator regulation: (1) A model central guideline can require state-level implementation decisions. (2) A state option necessarily legalises every private-motorcycle taxi nationwide. Which are correct?

A. Neither 1 nor 2

B. 1 only

C. Both 1 and 2

D. 2 only

JUL-23. The maximum e-truck incentive means:

A. All charging costs are permanently zero.

B. A category/condition-dependent ceiling, not a universal payment.

C. A replacement for every old vehicle already completed.

D. ₹9.6 lakh to every truck owner without eligibility checks.

JUL-24. Regarding environmental appraisal: (1) Terms of Reference define EIA study scope. (2) Their issuance alone constitutes final environmental clearance and interstate allocation of water. Which are correct?

A. 1 only

B. 2 only

C. Both 1 and 2

D. Neither 1 nor 2

JUL-25. AP Cabinet approval to form AQCC established:

A. Universal fault-tolerant computing capability.

B. Automatic employment for every graduate.

C. Completion of every project licence.

D. An institutional approval step, not proof of a commissioned quantum computer.

JUL-26. NISAR combines which instrument pairing?

A. Ku-band SAR and Ka-band SAR.

B. C-band SAR and X-band SAR.

C. L-band SAR and only a visible-light camera.

D. L-band SAR and S-band SAR.

JUL-27. Axiom-4’s 15 July milestone concerned:

A. Return to Earth following the June launch.

B. The date BharatFS was first adopted.

C. The launch of Gaganyaan on an Indian rocket.

D. A new lunar landing.

JUL-28. Effective local self-government needs:

A. Only a constitutional list with no resources.

B. All grants tied to one expenditure item.

C. The abolition of State Finance Commissions.

D. Functions, funds and functionaries aligned.

JUL-29. For the Maratha Military Landscapes inscription: (1) The twelve components count as one serial World Heritage property. (2) Gingee is in Tamil Nadu. Which are correct?

A. 2 only

B. Both 1 and 2

C. Neither 1 nor 2

D. 1 only

JUL-30. Winning the Women’s World Cup means:

A. Immediate universal FIDE presidency.

B. The World Cup and World Championship are identical events.

C. Only a Woman Grandmaster title can result.

D. A distinct tournament title, not automatically the reigning classical world-championship crown.

Explained answer key

JUL-01. D Disinflation differs from deflation, and aggregate baskets need not match each household’s experience. [E5-2507-001]

JUL-02. C Committee recommendations and enacted text are distinct; precise drafting can affect legal obligations. [E5-2507-002]

JUL-03. A The applicability date and lender/borrower/loan conditions defeat a blanket immediate-waiver interpretation. [E5-2507-003]

JUL-04. A Delivery channels do not eliminate regulatory duties, fraud controls or complaints obligations. [E5-2507-004]

JUL-05. D Product names alone do not establish diversification; classification proposals are not returns guarantees. [E5-2507-005]

JUL-06. C Amounts raised but unrealised differ from receipts, and the audited period differs from publication. [E5-2507-006]

JUL-07. A May conclusion, July signature and subsequent entry into force are distinct. Schedules, origin rules and domestic procedures shape usable access. [CA-033]

JUL-08. A New financing, disbursement, repayment relief and project completion must be separated. [E5-2507-008]

JUL-09. B Genuine additionality, retention and wages require evaluation. Formalisation can be valuable without being identical to a wholly new durable job. [E5-2507-009]

JUL-10. D Training completion and labour-market outcomes differ; draft policy tools remain proposals. [E5-2507-010]

JUL-11. C Population/geographic coverage and actual use have different denominators and constraints. [E5-2507-011]

JUL-12. D National policy and applicable society laws operate at different levels; member control, audit and elections still need institutional safeguards. [E5-2507-013]

JUL-13. B Institutional support, mobilisation and onward loans are distinct. Leverage introduces credit risk and repayment conditions rather than free money. [E5-2507-014]

JUL-14. D The annual amount must not be mistaken for a six-year aggregate. Convergence and district targeting are design features, not proof of completed outcomes. [E5-2507-015]

JUL-15. A Sampada and Krishi Sinchayee are different schemes despite the recurring PMKSY abbreviation. [E5-2507-016]

JUL-16. A Introduction, passage, commencement and constitution of a body require separate dates. [E5-2507-017]

JUL-17. D Operational autonomy and due process are necessary together; doping rules extend beyond a simplistic substance-only account. [E5-2507-018]

JUL-18. D Vision statements do not by themselves establish individual statutory entitlements or completed facilities. [E5-2507-019]

JUL-19. B A corpus finances specified channels including concessional loans and equity routes. Technical appraisal, governance and additionality remain necessary. [E5-2507-020]

JUL-20. D Audits include governance, context and follow-through beyond tool-generated findings. [E5-2507-021]

JUL-21. B Depending on form/law it can also function as a document of title; do not confuse it with a parliamentary Bill. [E5-2507-022]

JUL-22. B Guidance and operative state permission differ. Licensing, local rules and service conditions must be checked. [E5-2507-023]

JUL-23. B Scrappage and qualifying vehicle conditions matter, as do charging and utilisation. [E5-2507-024]

JUL-24. A Study terms, environmental clearance and water entitlements are different. The PBLP returned proposal requires stage-specific interpretation. [E5-2507-025]

JUL-25. D Company formation, incorporation, procurement and operations need separate evidence. [E5-2507-026]

JUL-26. D The mission combines L- and S-band synthetic-aperture radar. It supports day/night and many cloud-condition observations; data still need calibration and interpretation. [E5-2507-027]

JUL-27. A Launch, ISS stay and total mission duration must not be conflated. [E5-2507-028]

JUL-28. D Formal devolution does not automatically provide spending discretion, staffing or reliable finance. [E5-2507-030]

JUL-29. B Eleven components are in Maharashtra and one is Gingee in Tamil Nadu. Serial components do not each add a separate property to the national total. [E5-2507-035]

JUL-30. D Divya defeated Koneru Humpy in Batumi; competition stages and GM/WGM titles are distinct. [E5-2507-036]

Mains answer laboratory

Original practice outlines, not official questions or current legal advice. Distinguish targets from outcomes and Bills from functioning institutions. Read the cross-month journeys alongside the dated notes.

1. ELI and genuine employment additionality · 250 words

Prompt: Payroll incentives should reward durable additional employment, not formalisation statistics alone.

Opening: Identify July approval and the specified hiring window rather than treating targets as achieved jobs.

Mechanism: Lower marginal hiring cost → more eligible first jobs and net additional workers → retention and skill accumulation.

Balance: Relabelling, churn and windfall support can inflate counts. First-time-employee and employer components can overlap.

Design: Baseline verification, sensible retention tests, wage transparency, worker protection, proportionate audits and independent evaluation.

AP application: Connect skilling to actual local demand; distinguish EPF enrolment from sustained decent employment.

Conclusion: Assess additional retained jobs and wage quality per fiscal rupee.

Study references: E5-2507-009, E5-2507-010.

2. Dhan Dhaanya and district convergence · 250 words

Prompt: Convergence can overcome fragmented agricultural delivery only with local accountability.

Opening: Distinguish Budget announcement from July approval; the design targets 100 districts.

Mechanism: Local diagnosis → coordinated district plan → complementary irrigation, storage, credit and crop-diversification delivery.

Balance: Relabelling existing expenditure, weak staffing and poorly designed indicators can hide persistent gaps. Annual outlay is not a completed six-year spend.

AP application: Verify selected districts and involve tenant farmers, women and marginalised cultivators in needs assessment.

Evaluation: Productivity/resource-use measures, post-harvest losses, credit access, incomes and distribution of benefits.

Conclusion: Coherent responsibility and usable local evidence make convergence substantive.

Study references: E5-2507-015, E5-2507-016; Budget and August Swaminathan linkage.

3. RDI finance and deep-tech institutions · 250 words

Prompt: Large research funding commitments need patient capital and disciplined governance.

Opening: Identify the ₹1 lakh crore corpus as a financing framework, not money entirely disbursed as grants.

Mechanism: Technical appraisal → suitable concessional/equity support → milestone finance → research capability and commercial learning.

Balance: Technical uncertainty, private additionality, procurement bias and overpromised timelines need safeguards. Failure should be evaluated intelligently, not automatically equated with wrongdoing.

AP application: Track Quantum Valley agreements, AQCC formation, licences and installed capability separately.

Conclusion: Transparent selection, expert evaluation and learning metrics convert funding ambition into capability.

Study references: E5-2507-020, E5-2507-026; MY25-020.

4. Polavaram–Banakacherla and cooperative federalism · 250 words

Prompt: Inter-basin transfer proposals require hydrological credibility and procedural legitimacy.

Opening: The reported return of a Terms-of-Reference proposal is not final clearance or a permanent ban.

Mechanism: Basin assessment and applicable allocations → alternatives and cumulative impacts → consultation → lawful appraisal and implementation.

Balance: “Surplus” varies by season and uncertainty; ecological flows, flood variability, costs and downstream interests must be addressed. Political positions are not adjudicated entitlements.

Safeguards: Shared data, transparent assumptions, independent review and reasoned resolution of interstate concerns.

Conclusion: Durable water security comes from credible evidence and federal trust, not announcement scale.

Study reference: E5-2507-025.

5. Digital dependency and constitutional values · 250 words

Prompt: Digital sovereignty should advance autonomy without legitimising new concentrations of power.

Opening: Treat digital colonialism as an analytical framework, not a statutory offence.

Mechanism: Concentrated data, infrastructure and network effects can create dependency and switching barriers.

Balance: Blanket exclusion or localisation can raise costs or entrench domestic monopolies; domestic hosting does not by itself protect privacy.

Way forward: Portability, interoperable standards, competition, rights-based public infrastructure and effective remedies.

Linkage: Bring in February surveillance capitalism and August financial-AI governance to connect markets, rights and regulation.

Conclusion: Measure users’ meaningful control and trusted capability, not merely ownership labels.

Study references: E5-2507-029; E5-2502-001; E5-2508-007.

6. Panchayat finance and democratic decentralisation · 250 words

Prompt: Constitutional recognition needs aligned functions, funds and functionaries.

Opening: The Eleventh Schedule is not evidence that every listed function has been fully devolved.

Mechanism: Clear assignments + predictable transfers/own revenue + skilled staff → accountable local services.

Balance: Tied grants, delayed releases, weak accounts and dependence on parallel agencies can reduce discretion. Local capacity and inclusion need support, not a reason to indefinitely withhold powers.

AP application: Examine actual state assignments, State Finance Commission follow-up, staffing and public accounts.

Conclusion: Strengthen local decision space with transparent responsibility and participation.

Study reference: E5-2507-030.

7. Ethanol and the resource-security nexus · 250 words

Prompt: Biofuel progress should be measured through lifecycle and distributional outcomes as well as blending rates.

Opening: Define E20; distinguish a national average from universal pump availability or vehicle compatibility.

Mechanism: Domestic ethanol can substitute imports and create feedstock markets.

Balance: Water demand, land/food competition, feedstock mix, lifecycle emissions and consumer fuel-economy effects can change net benefits.

Design: Sustainable feedstock criteria, credible lifecycle accounting, consumer information and residue-based technology evaluation.

Conclusion: A blending milestone is a starting point for appraisal, not proof of a zero-carbon fuel system.

Study reference: E5-2507-033.

8. Student wellbeing and institutional ethics · 150 words

Prompt: Educational institutions owe students supportive environments, not merely access to counselling.

Opening: Distress has interacting causes; avoid assigning an individual death to one examination result.

Mechanism: Safe reporting, anti-ragging action, confidentiality, accessible support and appropriate referral reduce barriers to help.

Balance: Performance pressures, discrimination and fear of retaliation can undermine nominal services. Do not stigmatise students seeking assistance.

Action: Train staff, protect complainants, audit response times and involve qualified health professionals without exposing personal records.

Conclusion: Compassion becomes credible when institutions address harmful conditions and remain accountable.

Study references: E5-2507-034; E5-2502-002.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
