CIVILS ATLAS / RESEARCH EDITION 19

June 2026

Understand the news.
Retain what matters.

62 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

Subject guide

Andhra Pradesh — 14 notes

Culture & History — 3 notes

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Federal river governance

Tungabhadra disputes: negotiation, adjudication and basin data

E13-2606-001 · P1 · Magazine coverage: 2026-06 · web posted: 2026-07-31 · event date varies · National / other

WHY IN THE NEWS Vision’s June editorial article reports a proposed high-level mechanism for Andhra Pradesh, Telangana and Karnataka. Posting 31 July is not itself the event date.

• Tungabhadra is formed by the Tunga and Bhadra and joins the Krishna as a right-bank tributary.

• Upper Bhadra objections and Rajolibanda canal delivery problems concern different projects and cannot be reduced to one disputed reservoir.

• Article 262 empowers parliamentary adjudication legislation; State List 17 is subject to Union List 56.

STATIC CONNECTION · ORIGINAL The 1956 inter-state disputes law and River Boards Act have different institutional functions. Article 263 consultation does not itself replace adjudication.

ANALYSIS · ORIGINAL GUIDANCE

• An AP answer should separate agreed allocation, measured inflows, sedimentation, operational releases and actual canal delivery.

• Shared gauges, drought protocols, transparent accounts and ecological flow checks can reduce conflicts without prejudging legal shares.

READ ACROSS MONTHS · NOTE IDS E5-2508-018, VM2503-011, E11-2604-002, E10-2603-041, E5-2508-021, E7-2511-011, E8-2601-006, E9-2602-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The article’s recommendation to implement a 2019 Bill is not proof of enactment. Do not call the Cauvery authority a newly-created Tungabhadra board or certify pending court outcomes.

MAINS PROMPT How can basin-level cooperation complement lawful water-dispute adjudication?

Sources: [E13-VISION]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Equal access to justice

DISHA 2.0: four components, one access-to-justice objective

E13-2606-002 · P1 · 2026-06-22 · National / other

WHY IN THE NEWS The 22 June approval restructures a central-sector scheme for 2026–31.

• The approved outlay is ₹255 crore, entirely through Union budgetary support.

• Four components are Tele-Law, Nyaya Bandhu, legal literacy/awareness and the new VIDHI-Sanjeevani.

• VIDHI-Sanjeevani envisages an integrated dashboard and multilingual Nyaya Setu chatbot; cumulative outreach target is three crore.

STATIC CONNECTION · ORIGINAL Article 39A concerns equal justice and free legal aid; legal information, pre-litigation advice and court representation are not identical services.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, assisted access in Telugu, confidentiality and referral to qualified counsel matter more than chatbot interactions alone.

• Audit resolved problems, representation and accessibility; avoid treating repeated programme contacts as three crore distinct people receiving final remedies.

READ ACROSS MONTHS · NOTE IDS E5-2507-035, E7-2511-020, E10-2603-042, E5-2508-044, E9-2602-032, APR25-006, JAN25-035, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Tele-Law’s broad access to advice is not the same eligibility rule as representation under section 12 of the Legal Services Authorities Act.

MAINS PROMPT Design a technology-assisted legal-aid system that remains accessible and accountable.

Sources: [E13-DISHA]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Civil society regulation

FCRA amendments: utilisation, disclosure and proportionality

E13-2606-003 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS PRS reports the June amendments; the primary FCRA PDF could not be retrieved in this batch.

• The review describes approved-purpose lists under religious, cultural, economic, educational and social categories.

• Subsequent instalments require activity-wise disclosure, 75% utilisation of the previous instalment and field inquiry.

• The reviewed definition of reasonable activity uses at least ₹10 lakh foreign-contribution utilisation over the last two financial years.

STATIC CONNECTION · ORIGINAL FCRA registration/prior permission regulates foreign contribution; it is not a general licence required for every domestic charitable donation.

ANALYSIS · ORIGINAL GUIDANCE

• AP organisations need clear activity classification, timely records and proportionate compliance support.

• For Mains, weigh transparency and prevention of diversion against administrative delays, small-organisation burdens and procedural fairness.

READ ACROSS MONTHS · NOTE IDS E10-2603-008, VM2501-003, E7-2512-027, JAN25-004, MAR25-006, E5-2506-022, E5-2506-031, E5-2508-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These details follow PRS, not independently read Gazette text. Do not treat a threshold as a guaranteed automatic cancellation without statutory process or review.

MAINS PROMPT How can foreign-contribution oversight preserve both accountability and legitimate civic activity?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Economy

01 · National accounts — release and reference period

GDP provisional estimates: 7.7% annual growth on the new base

E13-2606-004 · P1 · 2026-06-05 · National / other

WHY IN THE NEWS MoSPI published the FY 2025–26 provisional estimates on 5 June.

• Real GDP growth is 7.7%; nominal GDP growth is 8.9%, using base 2022–23.

• Real GVA growth is 7.9%; Q4 real GDP growth is 7.8%. These are different aggregates/periods.

• Manufacturing GVA grew 10.7%; the trade/transport-related grouping 11.0%; financial/real-estate/professional services 10.4%.

STATIC CONNECTION · ORIGINAL GDP at market prices equals GVA plus product taxes minus product subsidies. Real and nominal growth use different price treatments.

ANALYSIS · ORIGINAL GUIDANCE

• Use the June release to update earlier advance estimates, not relabel the whole financial year as June output.

• For AP, national growth does not establish the state’s growth rate; state accounts need their own release, base and revision vintage.

READ ACROSS MONTHS · NOTE IDS MY25-001, E7-2511-001, E5-2508-002, CA-002, E11-2604-003, E11-2604-020, E8-2601-031, E6-2510-021 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A higher sectoral growth rate does not imply the largest absolute contribution. Do not splice old-base GDP levels into the rebased series.

MAINS PROMPT What do GDP revisions reveal about both economic performance and statistical uncertainty?

Sources: [E13-GDP]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Monetary policy — decision versus minutes

June MPC: unchanged rates, weaker growth and inflation risks

E13-2606-005 · P1 · 2026-06-05 · National / other

WHY IN THE NEWS The meeting ran 3–5 June; the inspected document is its 19 June minutes, not a second meeting.

• Repo remains 5.25%, SDF 5.00%, MSF and Bank Rate 5.50%; the decision was unanimous.

• The MPC retained a neutral stance; that is not a promise of the next rate cut.

• FY 2026–27 real GDP growth is projected at 6.6%, CPI inflation 5.1%, coreinflation 4.7%.

STATIC CONNECTION · ORIGINAL Repo is a policy rate; SDF absorbs liquidity without collateral. The statutory Bank Rate is not best defined simply as an ordinary long-term lending rate.

ANALYSIS · ORIGINAL GUIDANCE

• Energy-price pass-through and a deficient-monsoon risk create a supply-shock trade-off: raising rates cannot produce rain or oil.

• Assess expectations, second-round effects and credit transmission; AP food exposure and irrigation conditions can differ from national averages.

READ ACROSS MONTHS · NOTE IDS E11-2604-004, E5-2508-001, E5-2508-006, E9-2602-005, E5-2506-001, E6-2510-001, E7-2512-001, APR25-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Forecasts are not realised annual outcomes. Publication 19 June should not overwrite the 5 June decision date.

MAINS PROMPT Why can a neutral MPC hold rates during simultaneous growth and inflation risks?

Sources: [E13-MPC]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · External accounts — net and gross flows

Q4 current-account surplus despite a goods deficit

E13-2606-006 · P1 · 2026-06-08 · National / other

WHY IN THE NEWS RBI’s 8 June preliminary balance-of-payments release covers January–March 2026.

• Q4 current-account surplus is US$7.1 billion, 0.7% of GDP; goods balance is−US$83.4 billion.

• Net services are+ US$60.4 billion, primary income−US$11.1 billion and secondary income+ US$41.3 billion.

• Gross personal-transfer receipts are US$43.5 billion; the full-year current account remains in deficit at US$25.2 billion, 0.6% of GDP.

STATIC CONNECTION · ORIGINAL Current account includes goods, services, primary and secondary income; remittances are not simply the entire net secondary-income balance.

ANALYSIS · ORIGINAL GUIDANCE

• The rounded components reconcile to about US$7.2 billion, with the published 7.1 difference explained by rounding.

• AP migration analysis should distinguish household remittances from portfolio flows and evaluate concentration and exchange-rate exposure.

READ ACROSS MONTHS · NOTE IDS E6-2509-001, E5-2506-002, MAR25-001, E7-2512-002, E8-2601-031, E10-2603-002, JAN25-018, E5-2506-018 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not reproduce PRS’s US$30.1 billion transfer shorthand or call a quarterly surplus a full-year surplus. FDI/FPI belong in financial-account analysis.

MAINS PROMPT How do services and remittances cushion India’s external vulnerability?

Sources: [E13-BOP]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

04 · Tax law — ordinance and deemed effect

Government-security tax exemption for FIIs and BIS

E13-2606-007 · P1 · 2026-06-05 · National / other

WHY IN THE NEWS The 5 June Income-tax Amendment Ordinance is deemed effective from 1 April 2026.

• Ordinance 2 of 2026 amends Schedule IV of the Income-tax Act, 2025.

• New entries cover government-security interest and capital gains on sale, exchange or transfer for a Foreign Institutional Investor and the Bank for International Settlements.

• The exemption remains subject to furnishing prescribed information.

STATIC CONNECTION · ORIGINAL Article 123 ordinances have statutory force subject to constitutional legislative control. Deemed commencement can precede promulgation.

ANALYSIS · ORIGINAL GUIDANCE

• Assess how tax treatment may attract debt-market participation, while interest-rate, currency and exit risks remain.

• For exam use distinguish FII/BIS eligibility from a universal exemption for every person or all securities.

READ ACROSS MONTHS · NOTE IDS E11-2604-041, APR25-019, E12-2605-001, E6-2509-003, E6-2509-005, FEB25-050, E12-2605-029, CA-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The reviewed text concerns Government securities as defined by the 2006 Act, not all corporate bonds. Later replacement or lapse is not certified here.

MAINS PROMPT Evaluate the benefits and risks of tax incentives for sovereign-debt investment.

Sources: [E13-TAX]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

05 · Foreign portfolio investment

FEMA opens the individual route beyond NRI/OCI status

E13-2606-008 · P1 · 2026-06-12 · National / other

WHY IN THE NEWS The 12 June non-debt-instrument amendment extends the specified listed-equity route to individuals resident outside India.

• The residence-based category includes but is not limited to NRIs and OCIs.

• The reviewed portfolio ceiling is below 10% for an individual; aggregate holdings under the route are capped at 24%.

• Government-approval safeguards remain where a transaction transfers ownership/control to relevant land-border-country entities/citizens or covered beneficial owners.

STATIC CONNECTION · ORIGINAL FEMA residence, citizenship and OCI status are distinct legal concepts. FPI and FDI cannot be differentiated solely by a buyer’s nationality.

ANALYSIS · ORIGINAL GUIDANCE

• Broader participation may deepen markets, but beneficial-owner identification and consistent investor-group aggregation matter.

• AP firms seeking finance should separate an overseas individual’s exchange purchase from greenfield investment or an industrial project commitment.

READ ACROSS MONTHS · NOTE IDS E12-2605-009, MY25-011, E5-2507-005, JAN25-003, E6-2509-005, E5-2501-001, E10-2603-008, E5-2508-038 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Exactly 10% is not below 10%. Do not read the reform as eliminating all sectoral, reporting or ownership-control safeguards.

MAINS PROMPT How can India deepen foreign participation while preserving transparent ownership?

Sources: [E13-PRS], [E13-FEMA]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

06 · Financial consumers — consent and suitability

Mis-selling rules: consent alone is insufficient

E13-2606-009 · P1 · 2026-06-15 · National / other

WHY IN THE NEWS RBI issued 15 June directions with effect from 1 January 2027.

• Commercial-bank definitions treat a sale as mis-selling if unsuitable or inappropriate even where the customer explicitly consents.

• Explicit consent must be informed and recorded; an interface’s default choice must be No/I do not agree.

• Banks must distinguish third-party sellers from staff and preserve consent records; the framework addresses deceptive designs and compulsory bundling.

STATIC CONNECTION · ORIGINAL Consumer autonomy includes suitability, truthful disclosure and a genuine ability to refuse, not merely an OTP or signed form.

ANALYSIS · ORIGINAL GUIDANCE

• AP financial-literacy programmes should train customers to separate deposits, insurance and investment products and identify the provider and risk.

• Supervision should test incentive structures, complaint outcomes and accessible cancellation, not only consent-box completion.

READ ACROSS MONTHS · NOTE IDS E6-2509-014, MY25-028, E10-2603-028, VM2501-007, JAN25-013, JAN25-014, FEB25-005, FEB25-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Issued in June does not mean these new directions were operative in June. Other bank/NBFC categories have separate companion instruments.

MAINS PROMPT Why is explicit consent necessary but not sufficient for fair financial selling?

Sources: [E13-SALE]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

07 · Digital fraud — liability allocation

Digital-fraud liability: bank burden and a calendar-day clock

E13-2606-010 · P1 · 2026-06-24 · National / other

WHY IN THE NEWS The 24 June directions apply to electronic transactions undertaken on or after 1 January 2027.

• The bank bears the burden of proving customer liability; bank negligence attracts zero customer liability.

• Third-party breach attracts zero liability if reported to the bank within five calendar days from occurrence.

• Where customer negligence is established, the customer normally bears pre-reporting loss subject to eligible compensation; post-reporting unauthorised loss is borne by the bank.

STATIC CONNECTION · ORIGINAL Bank deficiency, third-party breach and customer negligence are distinct categories. Approval under coercion can still fall within the reviewed fraudulent-transaction definition.

ANALYSIS · ORIGINAL GUIDANCE

• Grievance systems need 24×7 reporting, immediate acknowledgement and rapid prevention of further fraud.

• The directions set maximum examination/response timelines of 45 calendar days for domestic complaints and 60 for cross-border complaints.

READ ACROSS MONTHS · NOTE IDS E10-2603-016, E8-2601-001, E11-2604-027, E7-2511-013, E10-2603-038, E9-2602-014, E10-2603-015, E12-2605-035 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The five-day clock is from occurrence, not five working days after reading an SMS. A complaint does not automatically establish negligence or guarantee full reimbursement.

MAINS PROMPT Design a liability framework that protects victims without rewarding weak security.

Sources: [E13-FRAUD]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

08 · Small-fraud compensation — eligibility and arithmetic

Fraud compensation: gross threshold, net-loss calculation and sunset

E13-2606-011 · P1 · 2026-06-24 · National / other

WHY IN THE NEWS The same 24 June directions create a limited compensation mechanism for specified bona fide victims.

• Eligible complaints involve gross loss up to ₹50,000; compensation is the lower of 85% of net loss and ₹25,000.

• The victim must report to both the bank and 1930/cybercrime portal within five calendar days; eligibility includes a bona fide determination.

• The benefit is once in a lifetime; the mechanism covers qualifying losses occurring up to one year from the directions' effective date.

STATIC CONNECTION · ORIGINAL Gross loss determines the threshold, while net loss deducts recoveries. This mechanism addresses specified customer-negligence cases, not a universal replacement for zero-liability rules.

ANALYSIS · ORIGINAL GUIDANCE

• Example: ₹40,000 gross loss with ₹15,000 recovered leaves ₹25,000 net loss; eligible compensation is ₹21,250.

• Public messaging in AP should preserve reporting duties, one-time use and the limited time window rather than promise an automatic ₹25,000 payment.

READ ACROSS MONTHS · NOTE IDS E10-2603-016, E5-2506-006, E5-2506-018, E11-2604-027, E7-2512-006, E11-2604-031, JAN25-013, E5-2508-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Neither every ₹50,000 loss gets 85% nor every fraud qualifies. Do not omit the one-year loss window or confuse it with the lifetime claim limit.

MAINS PROMPT How should temporary fraud relief balance financial inclusion, incentives and fiscal exposure?

Sources: [E13-FRAUD]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

09 · Insolvency — liquidation supervision

Liquidation reform: creditor oversight and shorter clocks

E13-2606-012 · P1 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The amendment is dated 1 June; the inspected Gazette bears 2 June and publication-based commencement.

• The committee of creditors supervises liquidation with prescribed prior-approval requirements.

• The amended liquidation timeline is 180 days instead of one year; distribution after receipt is shortened from 90 to 15 days.

• Selected English provisions require at least 66% voting share for specified recommendations/actions; the Adjudicating Authority remains relevant.

STATIC CONNECTION · ORIGINAL Corporate resolution seeks a viable plan; liquidation realises/distributes assets. Committee oversight does not make all creditors equally ranked.

ANALYSIS · ORIGINAL GUIDANCE

• Faster distribution can limit value erosion, but rushed sales and poor valuations can reduce recoveries.

• AP MSME suppliers need clear claims assistance and realistic recovery expectations; a statutory clock does not guarantee full payment.

READ ACROSS MONTHS · NOTE IDS E5-2508-005, E11-2604-018, E7-2512-017, E10-2603-006, E6-2510-008, E7-2512-014, E9-2602-018, E10-2603-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not date every provision’s operation 1 June solely from the signature or say the liquidator’s duties vanish while an extension application is undecided.

MAINS PROMPT Can creditor-led liquidation improve speed without sacrificing fairness?

Sources: [E13-PRS], [E13-IBBI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

10 · Aviation — recoverable stabilisation finance

ATF stabilisation: ₹10,000 crore is an advance, not a permanent grant

E13-2606-013 · P1 · 2026-06-03 · National / other

WHY IN THE NEWS The 3 June Cabinet decision supports willing scheduled Indian airlines through OMCs.

• Interest-free advances up to ₹10,000 crore compensate OMCs under the benchmark-price mechanism.

• As international prices moderate, the differential is recovered and returned to the Consolidated Fund of India.

• Participating airlines procure ATF only from OMCs under the arrangement; normal duration is 36 months with annual review or earlier full recovery.

STATIC CONNECTION · ORIGINAL Price smoothing redistributes volatility across time and actors; it does not remove the underlying import cost or automatically fix every airfare.

ANALYSIS · ORIGINAL GUIDANCE

• For AP aviation expansion, distinguish airport infrastructure and route viability from temporary national fuel support.

• Audit benchmark setting, claims, recoveries and competitive effects; competent-authority extension is possible if the corpus remains untrued-up.

READ ACROSS MONTHS · NOTE IDS E5-2507-020, MY25-005, E8-2601-043, E5-2506-031, E5-2508-040, E5-2507-008, E5-2505-001, E7-2512-036 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call this debt forgiveness for airlines or an unconditional ₹10,000 crore fare subsidy. International as well as domestic operations are covered.

MAINS PROMPT Evaluate temporary fuel-price smoothing as a response to external shocks.

Sources: [E13-ATF]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

11 · Industrial statistics — launch chronology

IIP rebasing: actual launch on 1 June, not a May calendar slot

E13-2606-014 · P1 · 2026-06-01 · National / other

WHY IN THE NEWS The later MoSPI 29 June release explicitly identifies the initial new-series release as 1 June.

• The revised IIP series uses base 2022–23; the earlier calendar’s 28 May date was a schedule, not the actual launch.

• A release date differs from the reference month whose production is measured.

• Rebasing changes basket, weights and methods; compare growth within a consistent series and vintage.

STATIC CONNECTION · ORIGINAL IIP measures industrial production rather than the whole economy; GDP/GVA include services and other sectors with different coverage.

ANALYSIS · ORIGINAL GUIDANCE

• AP industrial analysis should compare sector composition and physical/value-based measurement rather than infer state output from an all-India index.

• Keep a revision log so a newer series replaces rather than silently mixes with an older chart.

READ ACROSS MONTHS · NOTE IDS E12-2605-032, E7-2512-003, E5-2506-025, E10-2603-003, FEB25-003, MY25-023, E6-2510-019, E6-2510-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not present June actual-release evidence as a May outcome or assume identical index levels across different base years.

MAINS PROMPT Why does a statistical rebase require careful communication as well as new data?

Sources: [E13-IIP]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

12 · Industrial statistics — price deflation

29 June IIP: PPI-based supersession is a second milestone

E13-2606-015 · P1 · 2026-06-29 · National / other

WHY IN THE NEWS The 29 June release supersedes the first new-series estimates with the revised price treatment.

• The inspected release identifies 234 of 463 value-based item groups with 36.02% weight for the relevant deflation treatment.

• Value-based observations need price adjustment to infer volume; an observed rise in sales value need not equal real output growth.

• A later methodological revision differs from routine inclusion of late factory returns.

STATIC CONNECTION · ORIGINAL A producer-price measure and consumer inflation represent different stages and baskets; they are not interchangeable simply because both are price indices.

ANALYSIS · ORIGINAL GUIDANCE

• For answers, connect better producer-price deflation to more credible industrial volume estimates.

• Flag breaks in comparability and preserve the release vintage; do not add physical-output series and nominal turnover without common units.

READ ACROSS MONTHS · NOTE IDS JAN25-032, FEB25-002, E7-2512-003, E10-2603-003, JAN25-011, APR25-004, FEB25-003, E11-2604-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not date PPI-based supersession 1 June or mistake 36.02% weight for 36.02% industrial growth.

MAINS PROMPT How can improved price deflation change interpretation of industrial performance?

Sources: [E13-IIP]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

13 · Mining adjudication — decriminalisation and process

Draft mining inquiries: civil penalties still need due process

E13-2606-059 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS PRS records a Juneproposal for inquiry/penalty procedures linked to Jan Vishwas changes.

• The draft concerns prescribed adjudicatory procedures under the mining-law framework.

• Replacing selected criminal sanctions with monetary penalties does not legalise the underlying contravention.

• Notice, hearing, reasoned findings and appeal are central to fair administrative enforcement.

STATIC CONNECTION · ORIGINAL Decriminalisation, depenalisation and deregulation are different reforms. A civil penalty can remain substantial and enforceable.

ANALYSIS · ORIGINAL GUIDANCE

• AP mining administration should prevent selective enforcement and maintain ecological/royalty compliance while simplifying procedure.

• Track violation correction and repeat offences; lower criminal exposure should not become a licence for profitable non-compliance.

READ ACROSS MONTHS · NOTE IDS E10-2603-008, E8-2601-022, E8-2601-015, E5-2507-010, E5-2508-005, FEB25-052, E5-2508-011, E8-2601-017 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No final notification, current penalty schedule or automatic immunity for every mining offence is certified by this draft note.

MAINS PROMPT How can decriminalisation improve business certainty without weakening enforcement?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

14 · Coal market design — governance and settlement

Coal Exchange Rules: demutualisation and delivery discipline

E13-2606-061 · P1 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The rules are dated 4 June; effect is tied to Gazettepublication, not the 9 June website filename.

• Coal Controller Organisation is the defined authority under the reviewed framework.

• An exchange applicant must be a company limited by shares and demutualised, separating ownership/management from trading interests.

• Registration lasts 25 years unless revoked/cancelled; a settlement-guarantee fund addresses specified participant defaults.

STATIC CONNECTION · ORIGINAL Market-price discovery requires credible coal quality, sampling, delivery and settlement, not merely an electronic order book. This is not an unrestricted financial-derivatives authorisation.

ANALYSIS · ORIGINAL GUIDANCE

• AP thermal-power procurement should assess fuel grade, transport, delivery performance and market concentration.

• Governance and conflict-of-interest controls can improve trust; a guarantee fund does not eliminate every commercial or counterparty risk.

READ ACROSS MONTHS · NOTE IDS E5-2506-013, E7-2512-008, MY25-012, E12-2605-017, E10-2603-024, E5-2508-023, E5-2506-024, E10-2603-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate a rulebook with a fully functioning high-volume exchange or assume 25 years meansirrevocable registration.

MAINS PROMPT How can coal-exchange design improve transparency without creating new market abuse?

Sources: [E13-PRS], [E13-COAL]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Agriculture

01 · Food entitlement — consultation,not enactment

Draft AAY formula: 7 kg per person with a 35 kg household ceiling

E13-2606-016 · P1 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS DFPD’s public consultation sought comments until 13 July 2026.

• The existing reviewed AAY entitlement is 35 kg per household per month; priority households use 5 kg per person.

• The draft proposes 7 kg per AAY person per month but retains a maximum 35 kg per household.

• A three-person AAY household would receive 21 kg under the draft formula; five persons reach 35 kg and larger families remain capped.

STATIC CONNECTION · ORIGINAL The NFSA 2013 is distinct from the Food Safety and Standards Act. A draft’s enactment wording is standard drafting, not proof Parliament passed it.

ANALYSIS · ORIGINAL GUIDANCE

• The cap weakens any claim that per-capita equalisation solves deprivation in large households; small households can lose grain relative to 35 kg.

• AP evaluation needs household-size distribution, appeals and nutrition evidence rather than announcing increased grain for every AAY family.

READ ACROSS MONTHS · NOTE IDS E10-2603-045, FEB25-004, E7-2511-020, E8-2601-015, E10-2603-028, E11-2604-005, E12-2605-020, MY25-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not omit the 35 kg cap or treat consultation as a changed current entitlement. Later enactment/notification remains unchecked.

MAINS PROMPT Critically examine household caps in a proposed per-person food entitlement.

Sources: [E13-NFSA]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Plant breeding and herbicide stewardship

IMI-resistant mustard: breeding method is not a safety verdict

E13-2606-037 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The public compilation discusses proposed Rabi 2026–27 cultivation of mutation-bred herbicide-tolerant mustard.

• Mutation breeding induces variation and then selects useful traits; it differs from insertion of a transgene.

• The discussed IMI resistance concerns herbicide tolerance and the ALS pathway; resistance does not mean every weed is controlled forever.

• The cultivation schedule and varietal approvals remain primary-source unchecked in this batch.

STATIC CONNECTION · ORIGINAL Herbicide-tolerant crop traits and drought tolerance are different. Mutation breeding, transgenesis and genome editing are not a simple two-box classification of all biotechnology.

ANALYSIS · ORIGINAL GUIDANCE

• Assess resistant-weed evolution, residue management, extension advice and non-chemical options before scaling.

• AP oilseed strategy must evaluate agronomic suitability rather than transplant a northern India weed-management claim to every district.

READ ACROSS MONTHS · NOTE IDS VM2502-008, E5-2506-024, E5-2508-040, E8-2601-030, E5-2506-029, E7-2511-024, E8-2601-029, JAN25-067 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate non-transgenic with risk-free or claim all genetic modification necessarily inserts DNA from another species.

MAINS PROMPT How should agricultural innovation be paired with responsible herbicide use?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Society & Welfare

01 · Medical devices — risk-based regulation

Draft device licensing: speed should not dilute risk scrutiny

E13-2606-017 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS PRS records a 23 June consultation on the Medical Devices Rules 2017.

• The proposal shortens licensing and intermediate-stage timelines for Classes B, Cand D.

• Risk classes progress from low-risk Ato high-risk D; product-specific classification matters.

• The consultation deadline was 23 July 2026; this batch has not verified a final notification.

STATIC CONNECTION · ORIGINAL Devices and medicines both involve health regulation but their risk classifications and licensing pathways are not identical.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s medical-device manufacturing ecosystem needs predictable timelines alongside testing, quality management and post-market surveillance.

• Shorter administrative processing can help investment; it does not establish the safety of every product or remove regulator accountability.

READ ACROSS MONTHS · NOTE IDS E8-2601-013, E6-2510-004, MY25-013, JAN25-064, E5-2505-001, E6-2509-016, VM2504-002, E8-2601-024 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe a draft as an operative exemption or assume all devices, including Class A, share the same revised schedule.

MAINS PROMPT How should risk-based licensing reconcile timely access and patient safety?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Drug imports — remaining shelf life

Draft drug rule: one-year residual life with explicit exceptions

E13-2606-018 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The June consultation proposes a change to import shelf-life requirements.

• The reviewed existing rule uses more than 60% remaining shelf life at import.

• The draft proposes a minimum one-year residual life for drugs generally.

• Biological products and radiopharmaceuticals retain the 60% criterion; comments were invited until 22 July.

STATIC CONNECTION · ORIGINAL A percentage-of-original-life threshold and an absolute-time threshold can produce different results depending on the product’s total shelf life.

ANALYSIS · ORIGINAL GUIDANCE

• Procurement in AP should consider cold chain, expiry risk, clinical demand and stock rotation, not only purchase price.

• Short-lived imaging agents and vaccines illustrate why exceptions matter; neither rule alone ensures quality after poor storage.

READ ACROSS MONTHS · NOTE IDS E8-2601-023, E10-2603-025, E7-2511-016, E8-2601-013, E10-2603-030, MY25-039, E5-2505-002, E5-2505-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the one-year proposal applies without exception or that remaining life is measured from patient use rather than the specified import stage.

MAINS PROMPT What safeguards should accompany changes in drug-import shelf-life rules?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Emergency medicine — dispatch and outcomes

National Ambulance Services: transport plus pre-hospital care

E13-2606-019 · P1 · 2026-06-29 · National / other

WHY IN THE NEWS The 29 June guidelines release emphasises standardisation, triage and integrated dispatch.

• The framework covers ambulance categories, staffing, medicines, equipment, maintenance and training.

• Ambulances are to conform to AIS-125; GPS-based tracking and Integrated Command and Dispatch Centres support coordination.

• GIS planning includes referral capacity, bed readiness, accident hotspots and geographic constraints; 112 integration is progressive.

STATIC CONNECTION · ORIGINAL The nearest hospital is not always the nearest appropriate facility. Response time, stabilisation and handover all influence survival.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, analyse hill/tribal access and highway trauma with fleet availability, trained EMTs and receiving-hospital readiness.

• Report call-to-dispatch, arrival, referral completion and patient outcomes; vehicle purchases alone do not establish equitable service.

READ ACROSS MONTHS · NOTE IDS MY25-018, FEB25-049, E9-2602-025, MY25-037, E6-2510-031, E5-2506-022, VM2502-009, E9-2602-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Guidelines and proposed integration are not proof every state fleet already meets every norm or every call routes through 112.

MAINS PROMPT Design an equitable, data-informed emergency transport network.

Sources: [E13-NAS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

04 · Climate and household vulnerability

Climate shocks are also a cost-of-living problem

E13-2606-020 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS Selected June-compilation passages connect heat, food, water and household costs.

• Heat can increase cooling expenditure while reducing safe working hours.

• Rainfall shocks can affect farm output, food logistics and household purchasing power.

• Water scarcity and illness can add tanker, healthcare and lost-wage costs beyond a headline consumer basket.

STATIC CONNECTION · ORIGINAL Distribution matters: the same price rise imposes a larger burden on a household spending most income on essentials.

ANALYSIS · ORIGINAL GUIDANCE

• AP responses can combine cool roofs, drinking water, work-rest protocols, public health surveillance and drought-resilient agriculture.

• Separate magazine recommendations for new authorities/laws from existing institutions; assess fiscal incidence and service quality.

READ ACROSS MONTHS · NOTE IDS E11-2604-039, E5-2508-031, E12-2605-013, E7-2512-034, E8-2601-036, VM2503-006, E7-2512-011, E9-2602-031 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not copy the compilation’s older 45.86% CPI food weight into the rebased 2024 series or attribute all food inflation to climate alone.

MAINS PROMPT How should climate adaptation protect household real incomes?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

05 · Prisons — capacity and constitutional rights

Prison overcrowding: national averages conceal local stress

E13-2606-044 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The compilation reports NCRB Prison Statistics India 2024; the primary report remains unread.

• Occupancy compares inmates with sanctioned capacity; it differs from a conviction rate.

• Undertrials have not been convicted in the pending case; detention is not a finding of guilt.

• Staffing, medical care, legal aid and release-order execution affect conditions alongside prison buildings.

STATIC CONNECTION · ORIGINAL Articles 21 and 39 Aanchor dignity and access to justice. BNSS bail provisions have eligibility conditions and exceptions, not unconditional release for every undertrial.

ANALYSIS · ORIGINAL GUIDANCE

• AP analysis should combine jail-wise capacity, legal aid, healthcare and timely court coordination.

• Assess bail affordability and rehabilitation; adding beds alone can leave unnecessary detention and medical vacancies unaddressed.

READ ACROSS MONTHS · NOTE IDS E7-2512-030, E6-2510-019, CA-031, E5-2508-034, JAN25-002, JAN25-003, JAN25-008, VM2501-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The compilation’s 112.7% national occupancy figure is secondary-reporting only; no primary-certified current prison table is claimed.

MAINS PROMPT Why should prison decongestion be treated as a justice-system reform?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

06 · Language and education — practical federalism

Three-language policy: local capacity and minority rights

E13-2606-045 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS Selected June passages describe implementation concerns in multilingual Nagaland.

• NEP 2020 supports multilingualism and flexibility; at least two of the three languages are to be native to India.

• Mother-tongue instruction and a particular three-language subject combination are separate policy questions.

• Teacher supply, textbooks, script diversity and learning continuity shape feasibility.

STATIC CONNECTION · ORIGINAL Article 350 Aconcerns primary-stage mother-tongue instruction for linguistic minority children; the Eighth Schedule is not a list of every language entitled to cultural protection.

ANALYSIS · ORIGINAL GUIDANCE

• AP schools should consider Telugu, minority and tribal-language needs with genuine parental information and trained teachers.

• Consultation and phased capacity building can protect learning without portraying every multilingual choice as a threat to integration.

READ ACROSS MONTHS · NOTE IDS VM2502-006, E6-2509-004, CA-031, E7-2511-022, JAN25-040, VM2502-005, MY25-032, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A policy framework is not proof a particular CBSE circular applies identically to every state-school board or mandates Hindiin all circumstances.

MAINS PROMPT How can language policy reconcile integration, choice and educational inclusion?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Environment

01 · Biochar — mitigation with conditions

Biochar: soil benefits need feedstock and lifecycle scrutiny

E13-2606-028 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS Selected June passages revisit crop-residue pyrolysis as an alternative to open burning.

• Biochar is a carbon-rich porous material produced by heating biomass with limited oxygen.

• Potential benefits include water/nutrient retention and a more persistent soil-carbon pool.

• Outcomes depend on feedstock, production conditions, soil, crop and application rate; generic percentage yield gains are not universal.

STATIC CONNECTION · ORIGINAL Pyrolysis is not complete combustion or anaerobic digestion. Carbon storage requires attention to stability, additionality and lifecycle emissions.

ANALYSIS · ORIGINAL GUIDANCE

• AP paddy-residue and horticultural systems need field trials, contaminant testing, safe emissions control and viable collection costs.

• Do not divert residues from essential fodder/soil uses or assume every biomass input is sustainably sourced.

READ ACROSS MONTHS · NOTE IDS E12-2605-003, E11-2604-015, VM2502-010, E5-2508-007, E10-2603-036, E5-2507-024, E7-2512-009, MY25-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Biochar is not automatically zero-emission, permanent or equally beneficial in every soil. Avoid universalising selected trial percentages.

MAINS PROMPT What safeguards make biochar a credible circular-agriculture intervention?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Coral stress and resilience

Bleached coral is stressed, not necessarily dead

E13-2606-029 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The compilation discusses climate-resilient reef identification and restoration priorities.

• Coral bleaching involves loss of symbiotic algae or pigments and can follow thermal or other stress.

• Corals are animals; many reef-building corals rely on photosynthetic symbionts.

• Recovery is possible if conditions improve, but prolonged stress can cause mortality.

STATIC CONNECTION · ORIGINAL Resilience means a relative capacity to resist/recover, not immunity to warming, acidification, pollution or repeated marine heatwaves.

ANALYSIS · ORIGINAL GUIDANCE

• Conservation should combine local water quality, fishery management and climate mitigation with monitoring.

• For AP coastal comparison, do not relocate Lakshadweepor Andamanreef systems to the mainland merely to manufacture a state connection.

READ ACROSS MONTHS · NOTE IDS E5-2506-002, E7-2512-030, JAN25-052, JAN25-053, JAN25-054, FEB25-047, APR25-038, VM2502-012 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Bleaching and mortality are not synonymous; an identified resilient reef does not prove all corals there tolerate any future temperature.

MAINS PROMPT Why is local reef conservation necessary but insufficient under ocean warming?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Desertification and watershed governance

17 June: land restoration is more than planting trees

E13-2606-030 · P2 · 2026-06-17 · National / other

WHY IN THE NEWS The June compilation links the observance with watershed-development activities.

• Desertification is land degradation in arid, semi-arid and dry sub-humid areas, not simply expansion of sandy deserts.

• Watershed measures can reduce erosion, improve infiltration and support farming/livelihoods.

• Restoration needs community maintenance, water budgeting and suitable vegetation rather than plantation counts alone.

STATIC CONNECTION · ORIGINAL UNCCD land-degradation neutrality concerns balancing losses with restoration while avoiding degradation first. Watersheds follow drainage, not necessarily district borders.

ANALYSIS · ORIGINAL GUIDANCE

• For Rayalaseema, combine crop choice, soil moisture, commons restoration and groundwater demand management.

• Recharge works cannot sustain unlimited extraction; evaluate downstream flows and the distribution of benefits to landless households.

READ ACROSS MONTHS · NOTE IDS VM2502-005, E12-2605-021, FEB25-013, FEB25-024, MAR25-023, E10-2603-044, E5-2506-015, E5-2508-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat every degraded hectare as a desert or infer higher groundwater levels from the number of structures sanctioned.

MAINS PROMPT How can watershed governance support both ecological restoration and rural incomes?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

04 · Climate research capacity

Climate instruments: calibration is part of scientific self-reliance

E13-2606-031 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS Selected passages discuss the Mega Science Vision 2035 climate-research review.

• Measurement instruments, calibration and maintenance determine the quality of climate observations.

• Earth-system models require regional data and validation; imported instruments alone do not guarantee accurate local forecasts.

• The compilation reports concerns and recommendations, not a law that all imported instruments are prohibited.

STATIC CONNECTION · ORIGINAL Scientific independence is reproducibility and capability, not isolation from international research or a ban on collaboration.

ANALYSIS · ORIGINAL GUIDANCE

• AP universities can link reliable coastal/weather observations to agriculture, cyclone preparedness and heat-health planning.

• Support procurement flexibility with quality controls, reference standards, open metadata and trained technicians.

READ ACROSS MONTHS · NOTE IDS CA-005, E6-2510-009, E11-2604-021, FEB25-050, VM2504-004, E10-2603-027, E8-2601-034, E10-2603-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A model adapted from another country is not automatically invalid; performance must be evaluated. Do not present a recommendation as an operating procurement exemption.

MAINS PROMPT Why should climate resilience include investment in measurement science?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

05 · Sand mining and river habitats

Chambal scrutiny: extraction needs replenishment evidence

E13-2606-032 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS June’s compilation reports judicial concern over illegal mining in the tri-state Chambalsanctuary.

• The riverine protected area spans Rajasthan, Madhya Pradesh and Uttar Pradesh.

• Sand extraction can alter riverbeds, bank stability, nesting sites and groundwater interactions.

• Gharials, dolphins, turtles and riverine birds depend on habitat conditions; protected status is not evidence that illegal activity is absent.

STATIC CONNECTION · ORIGINAL Minor-mineral administration, environmental clearance and wildlife protection are separate obligations. A lease is not a blanket exemption from the other safeguards.

ANALYSIS · ORIGINAL GUIDANCE

• AP river-sand governance can combine credible district surveys, replenishment studies, transport traceability and independent enforcement.

• Manufactured sand can reduce some pressure, but quarrying, energy use and quality standards still require scrutiny.

READ ACROSS MONTHS · NOTE IDS E11-2604-011, E6-2510-015, VM2503-011, E5-2507-033, E8-2601-017, E7-2512-009, JAN25-063, MY25-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original court order was not read; no exact directions, current-case status or universal mining ban is certified.

MAINS PROMPT How should construction demand be reconciled with river-system protection?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

06 · Biodiversity evidence and species rediscovery

Dragonfly rediscovery: observation is not population recovery

E13-2606-033 · P3 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS Selected June passages describe the long-tailed duskhawker and regional Odonatarecords.

• Dragonflies and damselflies belong to Odonata, with aquatic immature stages and terrestrial/aerial adults.

• A rediscovery establishes a verified observation after a recording gap, not necessarily that a species was extinct.

• Distribution, abundance, conservation assessment and survey effort measure different things.

STATIC CONNECTION · ORIGINAL Bioindicator value depends on species ecology and sampling methods; not every dragonfly tolerates the same water conditions.

ANALYSIS · ORIGINAL GUIDANCE

• AP wetland surveys can build seasonal baseline records, validate identifications and protect breeding habitat.

• Avoid turning one specimen or a national species total into proof of healthy ecosystems everywhere.

READ ACROSS MONTHS · NOTE IDS JAN25-022, VM2503-011, E10-2603-035, E6-2509-025, VM2504-008, E11-2604-036, E5-2506-030, E12-2605-018 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Global/species counts vary with taxonomy and date; the compilation’s exact totals are not treated as a current official checklist.

MAINS PROMPT Why should biodiversity reporting distinguish rediscovery, abundance and recovery?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

07 · Environmental mobilisation and outcomes

World Environment Day: assess survival, not only saplings

E13-2606-034 · P2 · 2026-06-05 · National / other

WHY IN THE NEWS The public June compilation links 5 June observance with a tree-planting campaign.

• World Environment Day is observed 5 June and coordinated by UNEP.

• The Ek Ped Maa Ke Naamcampaign was launched in 2024; later achievements are not a new campaign launch.

• Tree planting, restored natural forest and measured additional carbon storage are distinct indicators.

STATIC CONNECTION · ORIGINAL Articles 48 Aand 51 A(g)create environmental responsibilities at different constitutional levels; a campaign pledge is not itself an individual carbon credit.

ANALYSIS · ORIGINAL GUIDANCE

• AP programmes should select native species, protect grasslands and water budgets, and finance multi-year care.

• Report survival, biodiversity and land tenure alongside planting numbers; avoid replacing established ecosystems with inappropriate monocultures.

READ ACROSS MONTHS · NOTE IDS E5-2506-019, MAR25-032, FEB25-031, MAR25-037, E5-2506-012, E6-2509-002, MAR25-035, E7-2512-034 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The 2026th eme/host and specific plantation totals follow an unverified magazine lead and are omitted from factual recall questions.

MAINS PROMPT How can mass environmental campaigns produce durable ecological gains?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Science & Technology

01 · Particle physics — evidence and chronology

Jet quenching in light ions: a June result from 2025 collisions

E13-2606-035 · P2 · 2026-06-28 · National / other

WHY IN THE NEWS ATLAS’s 28 June briefing reports oxygen–oxygen and neon–neon observations.

• The analysed collisions were recorded in summer 2025; publication and experiment dates differ.

• Jet quenching means energetic partons lose energy while traversing the produced medium; dijet momentum imbalance is a measured signature.

• The briefing reports central-collision observations exceeding the five-standard-deviation threshold, with weaker effects in peripheral collisions.

STATIC CONNECTION · ORIGINAL Quark–gluon plasma contains deconfined quarks/gluons and can behave as a low-viscosity fluid; it is not an ordinary gas or nuclear-fusion fuel.

ANALYSIS · ORIGINAL GUIDANCE

• The result helps examine how medium effects change with system size; oxygen/neonbridge smaller and heavier systems.

• For science answers explain measurement, comparison and uncertainty rather than claiming researchers recreated the entire Big Bang.

READ ACROSS MONTHS · NOTE IDS E10-2603-037, VM2501-008, VM2503-013, E6-2510-029, E5-2506-025, CA-027, APR25-008, MY25-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The 2026 announcement is not the first oxygen collision; low viscosity is not proof of exactly zero viscosity or unlimited stability.

MAINS PROMPT What makes light-ion experiments useful for studying strongly interacting matter?

Sources: [E13-ATLAS], [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Outbreak surveillance and international health

Bundibugyo: June update, May emergency determination

E13-2606-036 · P1 · 2026-06-08 · National / other

WHY IN THE NEWS WHO’s 8 June report provides dated surveillance and response evidence.

• WHO records 534 confirmed cases and 93 deaths across DRC and Uganda as of 6 June; this is a historical snapshot.

• A 5 June Africa CDC–WHO response plan sought US$518 million; funding requested is not funding received.

• The PHEIC determination was 17 May, not a new June declaration; the update warns that testing backlogs affect reported case increases.

STATIC CONNECTION · ORIGINAL Case-fatality ratios among detected cases are not infection-fatality estimates; surveillance completeness and reporting delays affect comparisons.

ANALYSIS · ORIGINAL GUIDANCE

• For AP preparedness, focus on port-of-entry coordination, clinical recognition, protective care and trustworthy risk communication rather than implying local cases.

• Imported cases, linked secondary transmission and sustained community transmission are different epidemiological situations.

READ ACROSS MONTHS · NOTE IDS E7-2511-023, JAN25-023, FEB25-040, MY25-018, E5-2506-022, E9-2602-025, JAN25-031, E5-2502-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not label every newly confirmed case a newly acquired infection or present June counts as current November totals.

MAINS PROMPT How should outbreak communication balance vigilance with accurate risk assessment?

Sources: [E13-WHO], [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Digital capability — inputs versus outcomes

Technology ecosystems: compute is an input, not an adoption metric

E13-2606-038 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The June compilation surveys AI, quantum, cloud, biotechnology and skilling programmes.

• Compute capacity, datasets, trained researchers and secure connectivity are complementary inputs.

• Registration, enrolment, completion and job placement are different stages of a skills pipeline.

• An approved mission’s outlay is not the same as expenditure or independently evaluated economic impact.

STATIC CONNECTION · ORIGINAL A GPU count does not by itself describe usable compute: memory, networking, availability, price and task requirements matter.

ANALYSIS · ORIGINAL GUIDANCE

• AP quantum/deep-tech initiatives need trained teams, research access, power reliability and accountable procurement.

• Evaluate measurable public-use cases, model safety and local problem-solving rather than duplicate national headline commitment totals.

READ ACROSS MONTHS · NOTE IDS E12-2605-057, VM2502-004, VM2503-002, E7-2512-032, VM2502-008, E10-2603-032, E8-2601-035, E5-2507-011 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The compilation’s fast-changing programme counts are not reproduced as a verified current inventory or evidence of AP deployment.

MAINS PROMPT How should public technology investment be evaluated beyond capacity announcements?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Security

01 · Counter-drone preparedness

Rogue drones: layered detection and safe response

E13-2606-039 · P1 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS June’s public compilation revisits low-cost autonomous and remotely piloted threats.

• Drones can support surveillance, logistics and attacks; platform size and operating altitude affect detectability.

• RF detection, radar, electro-optical tracking and authorised countermeasures have different strengths/limitations.

• Jamming is not equally effective against all control modes and can interfere with legitimate systems.

STATIC CONNECTION · ORIGINAL Civilian drone regulation and military counter-drone operations have different authority, safety and proportionality requirements.

ANALYSIS · ORIGINAL GUIDANCE

• AP ports, airports and energy infrastructure need threat assessment, inter-agency command and tested response protocols.

• Plan for false alarms, collateral risks and forensic evidence; expensive interceptors alone may not be a scalable answer to cheap swarms.

READ ACROSS MONTHS · NOTE IDS E6-2509-009, E9-2602-034, MAR25-040, E9-2602-036, E8-2601-030, E12-2605-002, E5-2506-028, E8-2601-032 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No single detector provides guaranteed coverage or legal authority to jam anywhere. Public demonstrations are not proof of universal battlefield effectiveness.

MAINS PROMPT Design a proportionate layered defence against rogue-drone threats.

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Critical infrastructure — IT/OT dependencies

Critical infrastructure: cyber failure can become physical harm

E13-2606-040 · P1 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS Selected June passages examine interconnected IT, OT and Io Tnetworks.

• Operational technology controls physical processes such as grid switching, water treatment and industrial machinery.

• Remote connectivity can expose old industrial systems to new attack paths.

• Shared power, telecom and cloud dependencies can transmit disruption across sectors.

STATIC CONNECTION · ORIGINAL Critical information infrastructure is a legal/governance concept; not every connected device is automatically a formally notified protected system.

ANALYSIS · ORIGINAL GUIDANCE

• AP utilities need asset inventories, segmentation, secure remote access, vendor assurance and practised manual recovery.

• Balance continuity with patching and safety engineering; a checklist audit or air-gap claim does not establish resilience.

READ ACROSS MONTHS · NOTE IDS VM2502-012, APR25-018, E5-2507-014, E10-2603-038, MY25-038, E8-2601-037, E5-2507-021, E5-2507-032 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not repeat the compilation’s unverified national legacy-system percentages or imply commercially useful quantum computers already break all encryption.

MAINS PROMPT Why must infrastructure cybersecurity include engineering and recovery capacity?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

International Relations

01 · France — innovation and economic security

India–France: technology cooperation beyond procurement

E13-2606-021 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS PRS reports the June roadmap and associated initiatives.

• Areas include critical technologies, innovation, research and talent mobility.

• Initiatives include AI cooperation, aeronautics skilling, digital sciences and an Economic Security Dialogue.

• The review also records a classified-information security agreement and an ambition to double bilateral trade in five years.

STATIC CONNECTION · ORIGINAL A roadmap, MoU and a binding treaty have different legal effects; a trade target is not a realised flow.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s aerospace and university ecosystem can analyse skills, testing capacity and supplier linkages without claiming a national MoU already funds a state centre.

• Assess technology absorption, IP terms, export controls and research mobility rather than count announcements alone.

READ ACROSS MONTHS · NOTE IDS VM2503-004, APR25-031, E6-2510-033, E9-2602-020, VM2502-004, E5-2508-019, E7-2511-018, E10-2603-040 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No bilateral announcement guarantees unrestricted transfer of every sensitive technology or immediate doubling of trade.

MAINS PROMPT How can strategic partnerships build domestic technological capability?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

01 · Trade diplomacy

CETA: announced entry-into-force date

CA-034 · P1 · 2026-06-17 · National / other

• PIB’s 17 June 2026 release announced that CETA and the social-security contribution agreement were set to enter into force on 15 July 2026.

• It records the companion convention’s signing on 10 February 2026.

PRELIMS CAUTION This note verifies an advance announcement. Post-15 July implementation notification has not been checked here.

MAINS PROMPT Explain why social-security coordination matters for temporary professional mobility.

Sources: [CETA26]

Evidence access: First-edition source check; independent full-text provenance not retained

02 · Myanmar — security and neighbourhood

India–Myanmar talks: connectivity amid difficult political conditions

E13-2606-022 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The visit straddled late May and early June; June’s review records its outcomes.

• The two sides discussed trade, connectivity, defence and border security.

• India reiterated support for Myanmar’s sovereignty and cooperation against cross-border threats.

• Implementation faces conflict, displacement and security constraints distinct from the wording of a joint statement.

STATIC CONNECTION · ORIGINAL Neighbourhood diplomacy intersects humanitarian concerns, transnational crime and infrastructure reliability; engagement does not settle every domestic legitimacy question.

ANALYSIS · ORIGINAL GUIDANCE

• Analyse the Kaladan/Northeast connectivity context while distinguishing a corridor commitment from functioning end-to-end transit.

• AP ports’ wider Bayof Bengalcommercial interest is an analytical connection, not proof of a new June AP shipping service.

READ ACROSS MONTHS · NOTE IDS MAR25-040, JAN25-066, FEB25-052, E10-2603-010, E5-2506-017, JAN25-043, FEB25-010, VM2501-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not label a multi-day visit wholly June or infer announced connectivity is already safe, complete and routinely used.

MAINS PROMPT How should India balance security, humanitarian and connectivity interests in Myanmar?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Mauritius — partnership and delivery

India–Mauritius: judge a package by project outcomes

E13-2606-023 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS PRS records the June review of the enhanced strategic partnership.

• Leaders reviewed progress under an India-supported special economic package.

• Mauritius is an Indian Oceanpartner with maritime, development and people-to-people links.

• A package can contain multiple projects and financing arrangements whose terms need separate verification.

STATIC CONNECTION · ORIGINAL Development assistance, grants, concessional credit and commercial investment are different flows; a headline package is not immediate expenditure.

ANALYSIS · ORIGINAL GUIDANCE

• Study strategic partnership through project selection, local priorities, maintenance and transparent procurement.

• For AP comparative answers, connect maritime skills and blue-economy opportunity without inventing a signed state-level agreement.

READ ACROSS MONTHS · NOTE IDS MY25-019, MAR25-038, FEB25-027, E5-2507-037, E5-2508-019, E8-2601-009, E9-2602-020, E12-2605-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add a reviewed package to fresh commitments as though all amounts are new or treat diplomatic reassurance as completed implementation.

MAINS PROMPT How can development partnerships support resilient Indian Ocean cooperation?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

04 · Seychelles — multiple legal instruments

Seychelles: five MoUs are not the entire agreement set

E13-2606-024 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS PRS records digital, maritime, space and financing outcomes.

• The five MoUs cover diplomatic training, digital payments, agricultural research, recognition of seafarer certification and space.

• An extradition treaty and umbrella infrastructure line-of-credit agreement are separate instruments.

• Recognition of training can support mobility, but credential scope and domestic rules still matter.

STATIC CONNECTION · ORIGINAL An MoU count does not equal the total number of instruments. A credit line is financing, not necessarily a grant or immediate disbursement.

ANALYSIS · ORIGINAL GUIDANCE

• For AP maritime training, consider standards, employment contracts, seafarer welfare and skills recognition as a complete chain.

• Assess project debt sustainability and local demand rather than assume every new credit commitment yields productive assets.

READ ACROSS MONTHS · NOTE IDS E10-2603-029, E6-2510-020, E8-2601-040, E7-2511-028, MY25-025, E9-2602-032, E9-2602-015, VM2504-008 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the extradition treaty one of the five MoUs or claim operational UPI acceptance everywhere from a digital-payments MoU alone.

MAINS PROMPT Why should maritime partnerships integrate skills, governance and infrastructure?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

05 · Slovakia — comprehensive partnership

India–Slovakia: a wider European partnership portfolio

E13-2606-025 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The June review records elevation to a comprehensive partnership.

• Six MoUs include labour migration, digital technologies, higher education, audio-visual creation, quantum communication/critical infrastructure and naturopathy.

• Other reviewed instruments address defence, student exchanges and tourism.

• A counter-terrorism working group and consular dialogue were announced.

STATIC CONNECTION · ORIGINAL A comprehensive partnership is a diplomatic framework, not automatic free movement or a free-trade agreement.

ANALYSIS · ORIGINAL GUIDANCE

• AP learners and firms should distinguish a mobility MoU from recognised qualifications, visas and enforceable employment protection.

• Technology collaboration needs research teams, IP arrangements and financing; an announced quantum link is not evidence a secure network is commissioned.

READ ACROSS MONTHS · NOTE IDS E5-2506-017, MY25-011, E5-2507-005, E5-2508-019, E8-2601-009, E9-2602-020, E12-2605-027, E11-2604-017 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not substitute Slovenia for Slovakiaor treat bilateral instruments as binding all EU member states.

MAINS PROMPT How can diversified European partnerships support India’s skills and technology goals?

Sources: [E13-PRS]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

06 · Antarctic governance — anniversary and treaty layers

Antarctic Treaty: 65 years since entry into force

E13-2606-026 · P2 · 2026-06-23 · National / other

WHY IN THE NEWS The public June compilation marks 23 June 1961 entry into force.

• The Treaty was signed 1 December 1959 and entered into force 23 June 1961.

• Its geographic scope is south of 60°S; peaceful purposes and scientific cooperation are central.

• Territorial claims are held in abeyance; the environmental protocol and marine-living-resources convention form separate layers of the broader system.

STATIC CONNECTION · ORIGINAL Treaty signature, entry into force and later protocols are different milestones. Military personnel/equipment for permitted peaceful purposes are not simply banned in every circumstance.

ANALYSIS · ORIGINAL GUIDANCE

• Analyse scientific freedom alongside tourism pressure, ecosystem protection and geopolitical competition.

• India’s polar research can strengthen climate knowledge, but Antarctica is not the Arctic and a station does not confer territorial sovereignty.

READ ACROSS MONTHS · NOTE IDS E11-2604-009, MY25-002, E5-2506-022, E6-2510-020, E6-2510-023, E12-2605-028, E12-2605-009, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the Treaty was signed in 1961 or that the environmental protocol automatically expires in 2048.

MAINS PROMPT How can science-based cooperation protect Antarctic governance?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

07 · Defence logistics and strategic autonomy

Logistics agreements: access does not equal permanent basing

E13-2606-027 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS June’s compilation revisits India’s logistics-support arrangements; this is a thematic supplement, not a newly signed June treaty claim.

• Logistics support can cover refuelling, replenishment, repairs and agreed services.

• Reciprocal arrangements can support exercises, port calls and humanitarian assistance.

• Actual access depends on agreed scope, consent and operational procedures; it is not a blanket alliance commitment.

STATIC CONNECTION · ORIGINAL Logistics endurance and combat authorisation are distinct. A facility visit does not transfer sovereignty over the host’s base.

ANALYSIS · ORIGINAL GUIDANCE

• AP maritime analysis can connect longer on-station endurance to eastern-seaboard logistics and disaster response.

• Assess reimbursement, information protection and partner reliability; no new Visakhapatnam basing commitment is established here.

READ ACROSS MONTHS · NOTE IDS E8-2601-007, E12-2605-025, MY25-002, E5-2508-020, E12-2605-028, MY25-028, E5-2506-026, E5-2507-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Country counts, personnel caps and the compilation’s January RELOS operationalisation claim remain primary-text unchecked and are not tested as settled facts.

MAINS PROMPT How can logistics cooperation expand reach while preserving strategic autonomy?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Andhra Pradesh

01 · Aviation policy — approval and ambition

AP Aviation Policy 2026–31: distinguish policy period from 2035 targets

E13-2606-046 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS PTI reports the 4 June Cabinet approval.

• The policy seeks airport/connectivity expansion and aerospace/MRO investment.

• Reported 2035 targets include passenger-handling capacity 30.38 million and cargo capacity 4.27 lakh tonnes.

• The report envisages nine new airports and ten waterdromes; these are plans, not commissioned assets.

STATIC CONNECTION · ORIGINAL Passenger capacity, actual annual passengers and route frequency are different indicators. MRO is maintenance, repair and overhaul, not airport ownership.

ANALYSIS · ORIGINAL GUIDANCE

• AP should evaluate demand, land, environment, airspace, skills and financial viability for each facility.

• Connect national ATF smoothing to airline costs without claiming it guarantees all proposed AP routes or eliminates state infrastructure costs.

READ ACROSS MONTHS · NOTE IDS E10-2603-003, E5-2507-011, MY25-007, E5-2508-019, APR25-031, E5-2506-031, E5-2508-040, E9-2602-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The policy’s 2026–31 title does not mean every 2035 target is due by 2031; do not count planned airports as operational.

MAINS PROMPT How should AP balance regional access and viability in aviation expansion?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Polavaram canals — sanction versus delivery

Polavaram Left Main Canal: revised sanction is not irrigation achieved

E13-2606-047 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS The 4 June Cabinetreport covers packages 5 and 5 A.

• Reported works include excavation, embankment formation, lining and related infrastructure.

• The described reach is roughlykm 93.7–111; it is not the entire Polavaramproject.

• Administrative sanction, contracts, physical completion and reliable delivered water are separate stages.

STATIC CONNECTION · ORIGINAL Irrigation outcomes depend on source availability, conveyance, distribution and farm-level access; a lined canal alone does not ensure equitable supply.

ANALYSIS · ORIGINAL GUIDANCE

• Assess land/access disputes, drainage, safety and tail-end delivery with transparent milestones.

• The PTI figure ₹796 crore differs from a Hindu ₹797 crore rounding lead; avoid exact recall until a primary sanction is reconciled.

READ ACROSS MONTHS · NOTE IDS E11-2604-048, JAN25-052, FEB25-047, E11-2604-045, APR25-013, E8-2601-044, E6-2509-002, E7-2512-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add a revised package sanction to its previous sanction as entirely new spending or call all command-area benefits realised.

MAINS PROMPT How can canal investments be evaluated by dependable and equitable water delivery?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Judicial infrastructure — complementary capacity

Amaravati High Court external works: buildings versus justice outcomes

E13-2606-048 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS The 4 June Cabinetreport records ₹547 crore administrative sanction.

• The reported scope includes roads, parking, security pavilions, substations, water bodies and related external infrastructure.

• External development is not the same scope as every court-building construction cost.

• An administrative sanction precedes procurement, construction and commissioning.

STATIC CONNECTION · ORIGINAL Judicial infrastructure supports access, but case disposal also depends on judges, staff, processes, legal aid and digital reliability.

ANALYSIS · ORIGINAL GUIDANCE

• AP should integrate public transport, barrier-free access, safety and maintenance into the complex.

• Measure accessibility and service continuity, not only capital expenditure; no causal fall in pendency is established by a sanction.

READ ACROSS MONTHS · NOTE IDS FEB25-027, E10-2603-042, E11-2604-047, E6-2509-022, E12-2605-001, CA-020, FEB25-046, MY25-019 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call ₹547 crore the entire judiciary budget or proof all facilities were completed in June.

MAINS PROMPT How can court infrastructure investment translate into better access to justice?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

04 · Public guarantees and digital infrastructure

FiberNet financing: ₹300 crore guarantee is a contingent liability

E13-2606-049 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS PTI reports the 4 June Cabinet’s financing decision.

• The guarantee is to AP Power Finance Corporation for a HUDCO special term loan.

• Funds are proposed to be transferred to AP State FiberNet Limited; borrowing entity, guarantor and intended user differ.

• A guarantee may create future budget exposure if repayment fails; it is not immediate revenue for all households.

STATIC CONNECTION · ORIGINAL Loan proceeds, government guarantee and grant expenditure are distinct fiscal categories. Digital connectivity requires both network operation and affordable uptake.

ANALYSIS · ORIGINAL GUIDANCE

• AP should disclose debt-service capacity, transfer terms, usage and service-quality improvements.

• Compare activated connections, uptime and affordability rather than treat the guaranteed amount as fibre already installed.

READ ACROSS MONTHS · NOTE IDS E8-2601-043, E10-2603-032, MY25-005, E12-2605-007, E9-2602-013, MAR25-024, E12-2605-056, E12-2605-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add the guarantee and underlying loan as two independent public cash grants or merge FiberNet with the separate Bharat Netagreement.

MAINS PROMPT What fiscal and service safeguards should accompany state-backed digital borrowing?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

05 · Organ donation — legal adoption and safeguards

Transplantation oversight: Cabinet approval before verified ordinance text

E13-2606-050 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS The 4 June report says AP approved implementation through an ordinance.

• India’s central framework originated in the Transplantation of Human Organs Act 1994 and was amended in 2011 to include tissues.

• The contemporary report’s THOTA 2011 label should not be mistaken for the original Act’s year.

• The stated purpose is stronger oversight and prevention of illegal organ trade; the AP ordinance Gazette was not read.

STATIC CONNECTION · ORIGINAL Consent, authorisation, brain-stem-death certification and protection against commercial dealing involve distinct safeguards; a clinical need does not legitimise trafficking.

ANALYSIS · ORIGINAL GUIDANCE

• AP needs transparent allocation, ethical counselling, regulated hospitals and accessible complaint mechanisms.

• Distinguish lawful deceased donation and regulated living donation; avoid inferring all transplants were previously unregulated.

READ ACROSS MONTHS · NOTE IDS E12-2605-062, E5-2507-026, E6-2509-031, E5-2508-038, E9-2602-038, APR25-019, E5-2507-011, E10-2603-006 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Cabinet approval is not verified promulgation, commencement or compliance at every hospital. Do not assume a patient automatically receives an organ.

MAINS PROMPT How can organ-transplant regulation protect donors while expanding ethical access?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

06 · Quantum Valley — land and capability

Quantum Valley: registration exemptions are not a working quantum computer

E13-2606-051 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS PTI reports the 4 June Cabinet’s land-related decision.

• The report concerns 49.66 acres allotted by APCRDA to the IT/Electronics/Communications Department.

• Exemptions cover stamp duty, registration fees and other specified registration charges.

• Land transfer and fiscal concessions support a project stage; they do not demonstrate research output or operational computing capacity.

STATIC CONNECTION · ORIGINAL Quantum hardware, secure communication, algorithms and workforce development are different capability areas. A project name does not identify a particular validated system.

ANALYSIS · ORIGINAL GUIDANCE

• AP should publish milestones, partner responsibilities, skills plans and access arrangements for universities/start-ups.

• Evaluate performance and additionality rather than sum all previously announced national and state commitments as fresh Juneinvestment.

READ ACROSS MONTHS · NOTE IDS APR25-022, MY25-020, E12-2605-059, MY25-008, E11-2604-046, E8-2601-040, VM2504-008, VM2504-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse 49.66 acres withfunding, qubits or completed jobs; the underlying exemption order remains unchecked.

MAINS PROMPT How should AP build an accountable quantum-technology ecosystem?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

07 · Agricultural energy — land lease and delivery

Chittoor PM-KUSUM proposal: 46.69 acres is an input, not generation

E13-2606-052 · P2 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS The 4 June report records a lease to NREDCAP for a solar plant.

• The reported land is 46.69 acres in Chittoor district.

• PM-KUSUM is a national agricultural-energy framework with different components; this report does not settle every project-specific component or benefit rule.

• Leasing, financial closure, grid connection and operation are distinct stages.

STATIC CONNECTION · ORIGINAL Acreage is not MW capacity or MWh generation. Farmer income effects depend on design, tariff, land rights and reliable payment.

ANALYSIS · ORIGINAL GUIDANCE

• AP evaluation should examine agricultural land use, evacuation infrastructure, distribution-company obligations and local consultation.

• Do not promise a pump subsidy to every farmer from a reported land-lease decision for a plant.

READ ACROSS MONTHS · NOTE IDS E11-2604-030, E8-2601-042, E10-2603-044, E8-2601-008, E8-2601-044, E8-2601-016, MY25-019, APR25-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The primary lease, component approval and project capacity were not read; no commissioned generation is claimed.

MAINS PROMPT What safeguards make agricultural solar investment financially and socially sustainable?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

08 · Tourism PPP — stages and risk allocation

Amaravati Eye: inviting bids under DBFOT does not award a concession

E13-2606-053 · P2 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS PTI reports a 4 June Cabinet decision to invite bids.

• The proposed observation-wheel project is on about six acres of APCRDA land along the Krishna.

• DBFOT stands for Design, Build, Finance, Operate and Transfer.

• Bidding, selection, concession agreement, construction, safety certification and operation are separate milestones.

STATIC CONNECTION · ORIGINAL Private financing does not remove public exposure where land, revenue guarantees or termination payments are involved. Demand risk must be allocated explicitly.

ANALYSIS · ORIGINAL GUIDANCE

• AP should test visitor demand, riverbank/floodplain conditions, transport, accessibility and long-term maintenance.

• Assess independent structural/operational safety and contract disclosure rather than claim a landmark is already earning tourism revenue.

READ ACROSS MONTHS · NOTE IDS MY25-019, E10-2603-018, E6-2510-003, E8-2601-014, E12-2605-052, E7-2512-033, E8-2601-044, E12-2605-058 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No selected concessionaire, completed attraction or guaranteed return is established by an invitation to bid.

MAINS PROMPT How should tourism PPPs allocate commercial risk while protecting public land and safety?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

09 · Depositor protection — adjudication and recovery

Agri Gold cases: 21 special-court posts are institutional support

E13-2606-054 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS The 4 June report records creation of posts for a Vijayawadaspecial court.

• The reported court handles cases under the AP Protection of Depositors of Financial Establishments framework and Agri Gold-related matters.

• Staffing is intended to support speedier disposal; sanctioned posts need actual recruitment and functioning processes.

• Case disposal, asset realisation and money returned to depositors are different outcomes.

STATIC CONNECTION · ORIGINAL Attachment secures assets pending lawful process; it is not automatically final confiscation or immediate reimbursement to every claimant.

ANALYSIS · ORIGINAL GUIDANCE

• AP should combine claimant records, transparent asset management and accessible legal assistance.

• Measure recovery net of costs, distribution time and inclusion of vulnerable depositors instead of equating staff sanctions with settled claims.

READ ACROSS MONTHS · NOTE IDS MAR25-005, E5-2506-007, E5-2506-012, JAN25-020, VM2503-002, FEB25-049, E10-2603-042, JAN25-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not infer all claims have been adjudicated or all investors repaid; no new total recovery figure was verified.

MAINS PROMPT How can special-court capacity strengthen depositor protection without bypassing due process?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

10 · Capital development — Union office project

Amaravati CGGPOA: ₹1,299.08 crore Union office approval

E13-2606-055 · P1 · 2026-06-10 (reporting date) · AP-linked

WHY IN THE NEWS PIB’s Julypublication retrospectively reports the 10 June Union Cabinet/CCEA decision.

• The proposal concerns Central Government General Pool Office Accommodationin Amaravati.

• The reported approved cost is ₹1,299.08 crore; the aim is consolidating central offices and improving coordination.

• Construction employment is estimated at seven lakh man-days per year; this is not seven lakh permanent jobs.

STATIC CONNECTION · ORIGINAL Capital approval, annual expenditure and completed office occupation are different milestones. Consolidation can reduce fragmentation but needs access and maintenance planning.

ANALYSIS · ORIGINAL GUIDANCE

• AP urban analysis should test transport, digital service delivery, water/flood resilience and the opportunity cost of land.

• Use the actual 10 June decision date while acknowledging the inspected official narrative was published in July.

READ ACROSS MONTHS · NOTE IDS MY25-019, E9-2602-040, FEB25-046, E10-2603-041, E11-2604-041, E11-2604-037, E5-2507-026, E5-2507-015 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not mistake a Union decision for a state Cabinetgrant or add prospective man-days as an employee headcount.

MAINS PROMPT How can administrative-capital infrastructure improve public service rather than only real estate activity?

Sources: [E13-AMARAVATI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

11 · Capital development — staff housing

Amaravati GPRA: ₹1,234.91 crore is housing, not the office complex

E13-2606-056 · P1 · 2026-06-10 (reporting date) · AP-linked

WHY IN THE NEWS The same official account distinguishes a second 10 June approval.

• General Pool Residential Accommodation is separate from CGGPOA office space.

• The reported residential-project cost is ₹1,234.91 crore.

• Its stated objective is reducing staff housing burdens and supporting proximity to work; estimated construction employment is seven lakh man-days per year.

STATIC CONNECTION · ORIGINAL Office and residential projects can be complementary without being the same asset. Annual man-days cannot be converted to durable jobs without a duration assumption.

ANALYSIS · ORIGINAL GUIDANCE

• Assess inclusive access, transport, service charges and long-term maintenance alongside relocation goals.

• The two approved costs sum to ₹2,533.99 crore; that is a project-cost total, not necessarily Juneexpenditure.

READ ACROSS MONTHS · NOTE IDS MY25-019, E11-2604-037, E9-2602-040, FEB25-046, E10-2603-041, E11-2604-041, E5-2507-020, E7-2512-036 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not swap ₹1,234.91 crore housing with ₹1,299.08 crore offices or claim residents had already moved in on approval.

MAINS PROMPT What makes public employee housing efficient, accessible and fiscally accountable?

Sources: [E13-AMARAVATI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

12 · Rural employment — transition to new framework

June approval and 1 July start: preserve the transition date

E13-2606-057 · P1 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS PTI reports AP Cabinet approval of VB–GRAMG implementation from 1 July 2026.

• The reported framework raises the household employment guarantee from 100 to 125 days.

• June approval, planned Julystart and actualwork/wage delivery are distinct.

• The report mentions faster wages and delayed-payment compensation; detailed final state implementation instruments were not read.

STATIC CONNECTION · ORIGINAL Employment guarantees require demand registration, work allocation, measurement and payment; an annual entitlement is not days already worked.

ANALYSIS · ORIGINAL GUIDANCE

• AP should reconcile ongoing works, old wage liabilities, job cards and grievance channels across the transition.

• Evaluate participation, real wages, delay compensation and asset usefulness rather than assume the new title wipes out earlier claims.

READ ACROSS MONTHS · NOTE IDS E12-2605-006, E7-2511-003, E7-2512-011, E7-2512-012, E5-2507-009, MY25-014, APR25-022, E6-2510-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not report 125 days alreadyprovided in Juneor treat a consultation version of central rules as a final state operating rule.

MAINS PROMPT How should AP manage a rural-employment transition without disrupting worker rights?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

13 · Coastal tourism — pilot and regulation

Beach-shack pilot: tourism permission requires coastal safeguards

E13-2606-058 · P2 · 2026-06-04 (reporting date) · AP-linked

WHY IN THE NEWS The 4 June Cabinetreport records draft excise-policy guidelines for pilot beach shacks.

• The reported pilot locations are Chirala and Visakhapatnam.

• A draft policy/pilot decision differs from permits issued to individual operators.

• Excise, land use, coastal regulation, wastewater, safety and public access involve separate approvals.

STATIC CONNECTION · ORIGINAL A state tourism objective does not override coastal-zone restrictions or create unrestricted private rights over the beach.

ANALYSIS · ORIGINAL GUIDANCE

• AP should use transparent selection, seasonal safety plans, waste systems and protection of fishing access.

• Evaluate livelihoods, visitor safety and environmental condition; no verified operational shack count or state revenue total is available here.

READ ACROSS MONTHS · NOTE IDS E5-2508-038, MAR25-023, FEB25-013, E11-2604-014, VM2504-007, E5-2507-002, E11-2604-035, CA-019 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call every beach eligible or assume Cabinet approval alone authorises alcohol sales and construction at any coastal site.

MAINS PROMPT How can AP expand coastal tourism while protecting ecology and community access?

Sources: [E13-APCAB]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

14 · Reorganisation — anniversary and continuing obligations

2 June: statehood anniversary is not a new bifurcation

E13-2606-060 · P2 · 2026-06-02 · AP-linked

WHY IN THE NEWS The June compilation recalls Telangana formation under the AP Reorganisation Act 2014.

• The appointed day was 2 June 2014; 2026 marks 12 years since bifurcation.

• Andhra State’s 1953 formation, Andhra Pradesh’s 1956 reorganisation and 2014 bifurcation are different milestones.

• Water, institutions, assets, liabilities and administrative arrangements require issue-specific legal and implementation evidence.

STATIC CONNECTION · ORIGINAL Articles 3 and 4 govern formation/reorganisation procedures; an anniversary greeting does not amend statutory obligations or settle inter-state accounts.

ANALYSIS · ORIGINAL GUIDANCE

• APPSC answers should use a dated timeline and separate legal provisions from negotiated settlements and later litigation.

• Link contemporary Tungabhadra/cooperative-federalism discussion without claiming every dispute was settled by the 2014 Act.

READ ACROSS MONTHS · NOTE IDS E7-2512-035, MAR25-006, APR25-009, APR25-022, MY25-019, E5-2507-025, E7-2511-029, E7-2512-036 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call Telangana India’s 29th stateas though the current total must still be 29; formation-time numbering and current state counts differ.

MAINS PROMPT Why do post-reorganisation disputes require sustained cooperative institutions?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

Culture & History

01 · Conservation and public access

Heritage governance: visitor amenities are not ownership transfer

E13-2606-041 · P2 · 2026-06 (month-level index) · National / other

WHY IN THE NEWS The June compilation reviews conservation, tourism and digital documentation initiatives.

• Archaeological conservation, visitor facilities and tourism promotion have distinct objectives.

• CSR-supported amenities do not by themselves transfer title or archaeological authority to a sponsor.

• Digital archives improve access, but physical conservation, metadata and provenance remain necessary.

STATIC CONNECTION · ORIGINAL Monument protection, antiquities regulation, UNESCO listing and manuscript preservation are not a single interchangeable designation.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s Amaravati and Buddhist heritage can support education and livelihoods when site carrying capacity and local participation guide development.

• Evaluate accessibility, authenticity and conservation condition rather than only visitor footfall or commercial revenue.

READ ACROSS MONTHS · NOTE IDS MAR25-035, E7-2512-019, VM2504-011, E10-2603-023, E7-2511-018, E5-2508-039, E7-2512-034, E11-2604-037 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No exhaustive current monument count or newly approved AP heritage project is claimed from this retrospective overview.

MAINS PROMPT How can heritage-led development protect authenticity and community interests?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

02 · Yoga — annual observance and public health

International Day of Yoga: 12th observance on 21 June 2026

E13-2606-042 · P2 · 2026-06-21 · National / other

WHY IN THE NEWS The public compilation discusses the 2026 observance and nationwide participation initiatives.

• The UN General Assemblydeclared 21 June as the International Day of Yoga in 2014; the first observance was 2015.

• Counting 2015 as the first makes 2026th e 12th observance, not the 12th anniversary of the first event.

• Yoga encompasses physical, mental and philosophical traditions; a mass session is not a clinical efficacy trial.

STATIC CONNECTION · ORIGINAL Patanjali’s eight-limbed framework is not identical to every modern exercise routine. Cultural recognition and medical claims require different evidence.

ANALYSIS · ORIGINAL GUIDANCE

• AP public-health outreach should be inclusive, adapted to age/disability and clear that exercise complements rather than replaces necessary care.

• Distinguish registration, attendance and sustained practice; do not treat portal enrolments as audited participants.

READ ACROSS MONTHS · NOTE IDS MAR25-037, E5-2506-019, JAN25-023, JAN25-024, JAN25-050, FEB25-037, MAR25-024, VM2501-007 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The compilation’s 2026th eme and registration counts were not independently verified and are not included in tested recall.

MAINS PROMPT How can cultural wellness initiatives support inclusive, evidence-informed public health?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

03 · Freedom movement — regional personalities

V. V. S. Aiyar: revolutionary networks and Tamil writing

E13-2606-043 · P3 · 2026-06-03 · National / other

WHY IN THE NEWS June’s compilation notes his 3 June 1925 death anniversary.

• V. V. S. Aiyar was associated with India Houseand revolutionary networks in London.

• He later worked from French Pondicherry, linking nationalist activity and Tamil literary production.

• He died 3 June 1925; 2026 marks 101 years after his death, not a centenary.

STATIC CONNECTION · ORIGINAL The freedom struggle used transnational networks, regional-language journalism and multiple political methods; a single label cannot capture every phase of a person’s work.

ANALYSIS · ORIGINAL GUIDANCE

• For APPSC comparison, study networks and print culture across the southern presidencies without conflating Aiyarwith V.O.Chidambaram Pillai or other similarly named leaders.

• Separate documented biography from unverified claims about secret operations and precise authorship.

READ ACROSS MONTHS · NOTE IDS E5-2508-035, E6-2509-029, MY25-028, MY25-031, VM2501-008, FEB25-028, APR25-001, VM2503-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No complete primary biography or literary catalogue was read; avoid turning every magazine anecdote into a settled fact.

MAINS PROMPT How did regional-language writing and overseas networks interact in the freedom struggle?

Sources: [E13-DRISHTI]

Evidence access: Actual source reading and limits appear in the source-access registry. Static connections, analysis and exam guidance are original.

June 2026 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

JUN26-01. Which statement about a high-level river-dispute committee is sound?

A. It changes the Tungabhadra into a left-bank tributary of the Krishna.

B. Consultation can support cooperation without itself replacing lawful adjudication.

C. It automatically repeals Article 262.

D. It proves the 2019 amendment Bill has become law.

JUN26-02. Which is the newly added component in the reviewed DISHA 2.0 framework?

A. An ordinance replacing every court with a chatbot.

B. VIDHI-Sanjeevani.

C. A guarantee of a favourable judgment.

D. Abolition of all legal-aid eligibility rules.

JUN26-03. The 5 June GDP provisional release reports real growth of:

A. 7.7% only for the month of June.

B. 7.7% for FY 2025–26 on base 2022–23.

C. 8.9% real GDP because nominal means constant prices.

D. 7.9% for GDP because GDP and GVA are always identical.

JUN26-04. Why can one not infer a sector’s absolute growth contribution from its growth rate alone?

A. Every fast-growing sector must account for most output.

B. A 10.7% manufacturing rate means manufacturing is 10.7% of GDP.

C. The sector’s initial weight/size also matters.

D. All sectors have equal weights by definition.

JUN26-05. The 5 June policy decision and 19 June document are best described as:

A. A meeting beginning 19 June and ending 5 June.

B. Two separate rate cuts.

C. The MPC decision and its later-published minutes.

D. A state lending decision followed by a Union Budget.

JUN26-06. A neutral stance with a 5.25% repo means:

A. Inflation has necessarily fallen to zero.

B. Policy remains data-dependent without a predetermined next move.

C. SDF must be higher than MSF.

D. A compulsory cut at the next meeting.

JUN26-07. Which set correctly distinguishes Q4 FY 2025–26 external-account flows?

A. Both are US$30.1 billion by definition.

B. The current-account surplus proves goods exports exceeded imports.

C. Net secondary income+ US$41.3 billion; gross personal transfers US$43.5 billion.

D. Primary income+ US$41.3 billion and services−US$60.4 billion.

JUN26-08. A US$7.1 billion Q4 current-account surplus proves that:

A. That quarter had a surplus, not necessarily the financial year.

B. Merchandise trade was in surplus.

C. FY 2025–26 had no current-account deficit.

D. Foreign portfolio inflows were necessarily positive.

JUN26-09. The 5 June Income-tax Ordinance is deemed effective from:

A. 1 April 2026.

B. Only the first sale of a corporate bond by any citizen.

C. The next MPC meeting.

D. 1 January 2027 because all Juneinstruments share one commencement.

JUN26-10. Under the reviewed individual portfolio route, the relevant individual threshold is:

A. Below 10%.

B. 24% for every individual by right.

C. 100% without beneficial-owner scrutiny.

D. Exactly 10% without any reclassification consequence.

JUN26-11. Under the June financial-sales directions, signed consent:

A. Does not make an unsuitable sale appropriate.

B. Requires a customer to buy every product listed.

C. Eliminates all mis-selling risk by definition.

D. Allows a default Yeschoice online.

JUN26-12. The new June 24 digital-fraud rules apply to the specified transactions undertaken:

A. Only if Parliament holds an MPC meeting.

B. Only before the notification date.

C. Automatically from 1 June 2026.

D. On or after 1 January 2027.

JUN26-13. For reviewed third-party breaches, the five-day zero-liability reporting clock runs:

A. In working days after the victim reads an SMS.

B. In calendar days from occurrence.

C. Only after a criminal conviction.

D. From the next annual audit.

JUN26-14. An eligible victim loses ₹40,000 gross and recovers ₹15,000 before compensation. The amount is:

A. ₹21,250.

B. ₹34,000.

C. ₹25,000 always.

D. ₹40,000 plus ₹25,000.

JUN26-15. Which pair of limits is preserved in the reviewed small-fraud mechanism?

A. Unlimited claims if each is ₹50,000.

B. Once in a lifetime and qualifying losses within the specified one-year effective-date window.

C. A ₹50,000 minimum loss and compensation equal to 85% ofgross without recoveries.

D. One claim every day and no end date.

JUN26-16. The reviewed liquidation time limits are:

A. 180 days for liquidation and 15 days for distribution after receipt.

B. 180 years and 15 months.

C. One year and 90 days unchanged.

D. 15 days for all insolvency resolution and 180 days before acknowledging every payment.

JUN26-17. The ATF stabilisation corpus is primarily:

A. A recoverable interest-free advance to OMCs under a price-smoothing arrangement.

B. A new permanent state tax payable only in AP.

C. An unconditional cash grant to every airline passenger.

D. Cancellation of every airline loan.

JUN26-18. Which chronology is supported by the inspected later MoSPI release?

A. 1 June new IIP series; 29 June PPI-based supersession.

B. 28 May actual launch merely because it was scheduled.

C. 1 June and 29 June are the same release date.

D. 29 June first-ever industrial index in India.

JUN26-19. Under the draft AAY formula, a three-person household would receive:

A. 49 kg without a cap.

B. 35 kg plus 21 kg.

C. 21 kg per month, subject to the proposed scheme conditions.

D. 5 kg for the household.

JUN26-20. The draft AAY formula’s implication for a seven-person family is:

A. It proves Parliament enacted the draft.

B. The 35 kg household ceiling still applies.

C. The cap disappears above five persons.

D. 49 kg is guaranteed because 7 times 7 is 49.

JUN26-21. Why is GPS tracking alone insufficient for an ambulance system?

A. Triage, trained staff, appropriate destinations and clinical handover also matter.

B. The guidelines immediately certify all state fleets.

C. A vehicle location automatically proves patient survival.

D. Every nearest building is necessarily a trauma centre.

JUN26-22. The Antarctic Treaty’s 65-year milestone in 2026 marks:

A. Automatic expiry of the Madrid Protocol.

B. Creation of a territorial claim by India.

C. Entry into force on 23 June 1961.

D. Signature on 23 June 1961.

JUN26-23. A credible biochar assessment must consider:

A. A universal guaranteed 30% yield increase.

B. Feedstock, production emissions, soil response and carbon persistence.

C. Only the wordbioin its name.

D. Automatic permanent sequestration with no monitoring.

JUN26-24. Coral bleaching necessarily means:

A. The coral is a plant that has permanently died.

B. The reef has become immune to warming.

C. Stress and loss of symbionts/pigment, but not immediate inevitable death.

D. Ocean warming is the only possible stressor.

JUN26-25. The 28 June ATLAS briefing is based on:

A. Oxygen/neon collision data recorded in 2025.

B. Creation of stable room-temperature QGP fuel.

C. Proof every proton collision produces identical effects.

D. The first-ever oxygen collision conducted 28 June 2026.

JUN26-26. WHO’s June outbreak update cautions that newly reported cases:

A. Prove sustained community transmission in every country visited.

B. Always equal infections acquired the same day.

C. May reflect a testing backlog rather than newly acquired infections.

D. Make confirmed-case fatality identical to infection fatality.

JUN26-27. AP’s Aviation Policy 2026–31 and reported 2035 capacity targets are:

A. A guarantee all proposed routes are commercially viable.

B. A policy period and a separate target horizon.

C. Proof every target is achieved by 2031.

D. A record of airports already operating.

JUN26-28. A ₹300 crore state guarantee for the reviewed FiberNet financing is:

A. The same as two separate ₹300 crore cash grants.

B. A contingent fiscal exposure, not an immediate grant to every household.

C. A waiver of the borrower’s repayment duty.

D. Proof ₹300 crore of new fibre is already commissioned.

JUN26-29. An invitation to bid for the Amaravati Eye under DBFOT establishes:

A. A procurement stage, not an awarded operating concession.

B. That every public riverbank is available without clearance.

C. That private finance eliminates all public fiscal risk.

D. That construction and safety certification are complete.

JUN26-30. Seven lakh construction man-days per year means:

A. ₹7 lakh crore of wages.

B. An estimated amount of labour time, not seven lakh permanent jobs.

C. Seven lakh completed central offices.

D. Seven lakh persons guaranteed lifelong employment.

Explained answer key

JUN26-01. B Negotiation, tribunal jurisdiction and project operations are distinct. A magazine’s recommendation to implement a Billis not proof it was enacted. [E13-2606-001]

JUN26-02. B The fourth component adds digital monitoring and multilingual assistance; it does not replace courts, qualified counsel or the conditions for representation. [E13-2606-002]

JUN26-03. B Annual real GDP 7.7%, nominal 8.9%, real GVA 7.9% and Q4 real GDP 7.8% refer to different concepts or periods. [E13-2606-004]

JUN26-04. C A sector growing rapidly from a small base can contribute less absolute output than a larger slower-growing sector. [E13-2606-004]

JUN26-05. C The reviewed minutes explicitly describe the 3–5 June meeting and publish its unchanged-rate resolution on 19 June. [E13-2606-005]

JUN26-06. B The reviewed corridor remains SDF 5.00%, repo 5.25%, MSF 5.50%.Neutrality is not a promise of easing. [E13-2606-005]

JUN26-07. C The RBI primary table distinguishes net secondary income, gross personal-transfer receipts and primary-income outgo. Services/transfers cushion the goods deficit. [E13-2606-006]

JUN26-08. A The full-year preliminary current account was a US$25.2 billion deficit, 0.6% of GDP, despite the Q4 surplus. [E13-2606-006]

JUN26-09. A The full Gazette specifies deemed 1 April commencement and a government-security exemption for FIIs and BIS subject to prescribed information. [E13-2606-007]

JUN26-10. A The individual and aggregate thresholds differ: below 10% and 24% respectively. Ownership/control and other safeguards remain relevant. [E13-2606-008]

JUN26-11. A The inspected definition recognises mis-selling even with explicit consent where suitability/appropriateness is absent. The default consent choice must be No. [E13-2606-009]

JUN26-12. D Issue date and operative transaction date differ. The primary commercial-bank directions expressly use 1 January 2027. [E13-2606-010]

JUN26-13. B The customer must notify the bank within five calendar days of occurrence for that category; bank negligence has a distinct zero-liability rule. [E13-2606-010]

JUN26-14. A Net loss is ₹25,000; 85% is ₹21,250, below the ₹25,000 cap. Eligibility and reporting conditions still apply. [E13-2606-011]

JUN26-15. B The rule uses gross loss up to ₹50,000 for eligibility, net loss for calculation, and separate lifetime/window limits. [E13-2606-011]

JUN26-16. A The inspected English amendment changes the earlier one-year liquidation and 90-day distribution periods. These clocks do not guarantee full recovery or remove extension procedures. [E13-2606-012]

JUN26-17. A The mechanism supports willing scheduled carriers and recovers differential amounts as prices moderate, with monitoring and annual review. [E13-2606-013]

JUN26-18. A A scheduled date, actual new-series launch and later methodological supersession are different milestones. [E13-2606-014]

JUN26-19. C The draft uses 7 kg per person with maximum 35 kg per household; current reviewed AAY law remains household-based until valid amendment/commencement. [E13-2606-016]

JUN26-20. B The cap prevents a simple uncapped per-person entitlement. Consultation is not enactment; the potential distributional effect needs scrutiny. [E13-2606-016]

JUN26-21. A NAS includes standards, dispatch, GIS planning and pre-hospital care. Announcing a framework is not proof of universal compliance. [E13-2606-019]

JUN26-22. C The Treaty was signed 1 December 1959; entry into force was 23 June 1961. Treaty layers and claim rules must be distinguished. [E13-2606-026]

JUN26-23. B Potential benefits are context-dependent. Pyrolysis differs from full combustion and lifecycle accounting matters. [E13-2606-028]

JUN26-24. C Bleached corals may recover if conditions improve; prolonged stress can cause mortality. Resilience is not invulnerability. [E13-2606-029]

JUN26-25. A Publication date differs from data-taking. Jet quenching is inferred through measured particle-jet momentum imbalance and comparisons across centrality. [E13-2606-035]

JUN26-26. C Reporting, diagnosis and infection dates differ. The historical Juneupdate also must not be presented as current Novembercounts. [E13-2606-036]

JUN26-27. B Approval, planned capacity, actual traffic and operating viability require separate evidence. [E13-2606-046]

JUN26-28. B The reported borrower, guarantor and intended fund user differ. Loans, guarantees and grants should not be double-counted. [E13-2606-049]

JUN26-29. A Design, Build, Finance, Operate and Transferdescribes a contract model. Selection, agreement, construction and operation remain distinct. [E13-2606-053]

JUN26-30. B The official capital-project account uses man-days, an employment-time unit. Cost approvals and completed expenditure are also distinct. [E13-2606-055]

Mains answer laboratory

Original planning aids, not official answers or predictions. Use historical anchors and preserve all legal-stage and access cautions.

Shared river governance needs cooperation without prejudging legal allocations.

Study reference: E13-2606-001

1. Anchor the June-indexed Tungabhadradiscussion and note the 31 July editorial posting; the 2019 Billrecommendation is not law.

2. Separate allocation adjudication, project objections, siltation and actual canal delivery. Connect Article 262 and Union/State Listentries.

3. Analyse asymmetry in upstream control, unreliable hydrological data and incentives to exaggerate drought distress.

4. For AP, propose shared gauges, transparent release accounts, tail-end measurement and ecological-flow safeguards with affected communities.

5. Conclude with a negotiation/escalation protocol that complements tribunals and judicial processes rather than asserting a committee supersedes them.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

India’s external resilience depends on the composition, not only the sign, of its current account.

Study reference: E13-2606-006

1. Anchor 8 June RBI release: Q4 surplus US$7.1 billion but full-year deficit US$25.2 billion; both preliminary.

2. Decompose goods−83.4, services+60.4, primaryincome−11.1 and secondary+41.3 billion; allow rounding, not an invented residual.

3. Explain gross personal transfers 43.5 billion versus net secondary income; FDI/FPI are financial flows, not current-account remittances.

4. Consider services concentration, overseas employment cycles, energy prices and foreign-exchange valuation risks. For AP, consider migrant households without claiming a new state estimate.

5. Recommend export diversification, skills, lower remittance costs and prudent external financing; a one-quarter surplus is not immunity to shocks.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

Financial consumer protection must move beyond the consent checkbox.

Study reference: E13-2606-009

1. Anchor 15 June issued directions, effective 1 January 2027; avoid applying them retrospectively to Juneas already operative.

2. Explain explicit/default No consent, correct disclosure and suitability even where a customer signs or gives an OTP.

3. Analyse sales commissions, bank–third-party confusion, low literacy and coercive bundling as incentive/choice problems.

4. For AP, propose assisted Telugu disclosure, staff/agent identification, accessible redress and audits of actual mis-selling outcomes.

5. Balance customer choice with proportionate conduct supervision; measure compensation and recurrence rather than paperwork compliance alone.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

Temporary fraud compensation should be clear about eligibility, incentives and the sunset.

Study reference: E13-2606-011

1. Anchor 24 June directions applying to specified transactions from 1 January 2027; distinguish liability rules from limited compensation.

2. Use gross≤₹50,000 eligibility, min(85% net loss, ₹25,000), timely reporting to bank+1930/portal, lifetime claim and one-yearloss window.

3. Illustrate ₹40,000 loss minus ₹15,000 recovery=₹25,000 net loss and ₹21,250 eligible compensation; later recoveries require recalculation.

4. Analyse inclusion and trust benefits alongside moral hazard, proof burdens, exclusion by reporting delays and administrative cost.

5. Recommend victim assistance, consistent bank reasoning, accessible appeals and independent monitoring; do not weaken prevention or promise every victim full repayment.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

A per-person food formula can retain household-size inequity when capped.

Study reference: E13-2606-016

1. Anchor DFPD consultation, draft 7 kg/person, max 35 kg/AAY household; existing reviewed law 35 kg/household and PHH 5 kg/person.

2. Illustrate three persons 21 kg, five 35 kg, sevenstill 35 kg. Smaller AAY households can lose versus the existing 35 kg.

3. Examine adequacy, diet diversity, household identification and the cap’s effect on large vulnerable families.

4. For AP, seek household-size distribution, appeal safeguards and transparent analysis before changing allocations; do not call consultation an enacted cut.

5. Conclude that a reform’s stated rationalisation objective must be tested against the exact formula, transition protection and nutrition outcomes.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

An ambulance system is a clinical referral network, not merely a vehicle fleet.

Study reference: E13-2606-019

1. Anchor 29 June NAS guidelines, AIS 125, integrated dispatch, GPS/GISand progressive 112 integration.

2. Map call triage, dispatch, onsite stabilisation, appropriate destination, handover and follow-up as a complete pathway.

3. For AP, consider tribal/hill access, highway trauma, flood constraints, EMTs kills and hospital bed/critical-care readiness.

4. Analyse maintenance, contract incentives, privacy and the risk of optimising average response time while remote patients remain underserved.

5. Recommend equity-sensitive performance measures, clinical audits, grievance access and interoperable dispatch; do not report guidelines as universal compliance.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

State guarantees should be judged by fiscal exposure and delivered services.

Study reference: E13-2606-049

1. Anchor 4 June AP Cabinetreport: ₹300 crore guarantee to AP Power Finance Corporation for HUDCOborrowing, proposed transfer to FiberNet.

2. Distinguish borrower, guarantor, user, loan proceeds and contingent liability; do not count one financing chain as several grants.

3. Analyse debt-service capacity, fees, transfer terms and the possibility public support crowds out higher-priority spending.

4. Connect financing to measurable uptime, affordable activated connections and inclusion rather than money sanctioned or fibre-route length alone.

5. Recommend disclosure, stress testing, milestone-linked release and independent service audits; Cabinet reporting is not the underlying contract or a repayment audit.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

Administrative-capital projects need service and fiscal outcomes, not only landmark costs.

Study reference: E13-2606-055

1. Anchor 10 June Union decisions using the inspected July PIBaccount; office ₹1,299.08 crore and housing ₹1,234.91 crore are separate.

2. Explain expected coordination and staff-proximity benefits while separating approval, tender, construction and occupation.

3. Assess transport, water, flood resilience, accessibility, maintenance and the land/resource opportunity cost.

4. Clarify each estimatedseven lakh construction man-days/yearis labour time, not permanent job headcount; combinedcost ₹2,533.99 crore is not Juneexpenditure.

5. Recommend transparent procurement, milestones and independent service-user measures; do not infer automatic city-wide growth from an administrative approval.

Conclusion test: Name a responsible institution, an implementation safeguard and a measurable outcome.

Source register

Evidence access is recorded explicitly. Most non-PRS references were inspected as source extracts; primary full-text review remains open for them.

[CETA26] PIB · CETA entry-into-force announcement, 17 June 2026

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2274280&reg=48&lang=2

Source check recorded in first edition; full-text access provenance not retained

[E13-PRS] PRS · June 2026 Monthly Policy Review

https://prsindia.org/policy/monthly-policy-review/june-2026

All six fetch chunks read. Review used for breadth; underlying instruments not all inspected. Corrected Bo P income/transfers, commencement and MPC minutes labels against primary sources.

[E13-VISION] Vision IAS · June editorial edition · river disputes

https://visionias.in/current-affairs/monthly-magazine/2026-07-31/polity-and-governance/inter-states-river-disputes

Both chunks read; substantive article inspected. Official archive independently confirms June issue at 31 July posting; public TOC exposes only this one article. Archive download opens authentication. No complete issue inventory/review claimed. Do not treat 2019 Bill recommendation as enacted law.

[E13-DRISHTI] Drishti IAS · Saraansh June 2026 public compilation

https://www.drishtiias.com/images/pdf/Saraansh%20June%202026%201.pdf

128-page public PDF retrieved/extracted; contents inspected and selected passages on PDF pages 26–28,39,50–51,66–82,88–91 read. Not full issue review. Coverage expressly 25 May–24 June; article dates often unspecified. Questionable NFHS figures withheld pending primary check; non-updated CPI weight and blanket GMO descriptions not copied. Extract is scratch material, not redistributed.

[E13-GDP] MoSPI · GDP provisional estimates, 5 June

https://www.mospi.gov.in/uploads/latestReleases/latest_release_1780655857536_5ac01869-ca4a-422d-b7a7-57b81da60932_Press_Note_on_GDP_Estimates_for_Q4_2025-26_and_PE_FY_2025-26_F.pdf

Opening chunk 0 of 6 read: release date, 2022–23 base, 7.7% annual/7.8% Q4 GDP, 7.9% GVA, sector and expenditure highlights. Detailed remaining tables not all read.

[E13-MPC] RBI · Minutes of June 3–5 MPC, published 19 June

https://rbidocs.rbi.org.in/rdocs/PressRelease/PDFs/PR497566069F4A9384411AA35701E2062F1B2.PDF

Opening chunk 0 of 6 read through resolution and growth/inflation projections.19 June is minutes publication, not new meeting date. Unanimous unchanged rates/neutral stance and FY 27 forecasts verified; remaining individual statements not read.

[E13-BOP] RBI · Q4 FY 2025–26 balance of payments, 8 June

https://rbidocs.rbi.org.in/rdocs/PressRelease/PDFs/PR41240BBD8F4D26044A4870F1BB7333DF7F9.PDF

Full single chunk read including table: goods−83.4, services+60.4, primary−11.1, secondary+41.3, current+7.1; personal-transfer gross 43.5, annual deficit 25.2. PRS 30.1 transfer shorthand not used.

[E13-TAX] Gazette · Income-tax Amendment Ordinance, 5 June

https://static.pib.gov.in/WriteReadData/specificdocs/documents/2026/jun/doc202665883801.pdf

Full single chunk read: Ordinance 2/2026, deemed 1 April commencement, Schedule IV 13 D/13 E, FII/BISG-sec interest/gains exemption with reporting condition.

[E13-FEMA] Gazette · Non-debt Instruments Third Amendment, 12 June

https://egazette.gov.in/WriteReadData/2026/273406.pdf

Chunks 0 and 1 of 3 read, including English commencement, extension to individuals resident outside India, border-country beneficial-owner safeguards. Threshold details follow PRS and Gazette opening; final English schedule continuation not fully reviewed.

[E13-SALE] RBI · Responsible Business Conduct Second Amendment, 15 June

https://www.rbi.org.in/Scripts/NotificationUser.aspx?Id=13485&Mode=0

Chunks 0 and 1 of 10 read: commercial-bank scope, 1 January 2027 effect, definitions, suitability notwithstanding consent, DSAs, explicit consent and default No. Remaining bundling clauses not fully read; broader summary cross-checked with RBI release 62938 and PRS.

[E13-FRAUD] RBI · Responsible Business Conduct Third Amendment, 24 June

https://www.rbi.org.in/Scripts/NotificationUser.aspx?Id=13543&Mode=0

Chunks 0–2 of 9 read: transactions on/after 1 January 2027, liability categories, five-calendar-day occurrence-based clock, reporting to bank+1930/portal, gross 50 k/net 85%/25 k cap, lifetime claim, one-year loss window, 45/60 day decisions. Forms/footer not read.

[E13-IBBI] IBBI · Fourth Liquidation Amendment, dated 1 June

https://ibbi.gov.in/uploads/legalframwork/f9eac3c017853796aa88325dccbea364.pdf

Opening fetch chunk 0 of 8 read; direct 22-page PDF extracted and selected English pages 14,20–21 inspected for 66% recommendation, 15 day distribution and 180 dayliquidation. Notification 1 June, Gazette bears 2 June/upload 3 June; publication commencement not silently dated 1 June.

[E13-ATF] PIB · Aviation fuel stabilisation fund, 3 June

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2268338&reg=3&lang=1

Full substantive release in chunk 0 of 2 read, including interest-free recoverable advances, willing scheduled carriers, exclusive supply arrangement, annual review and possible competent-authority extension.

[E13-NFSA] DFPD · draft National Food Security Amendment Bill

https://dfpd.gov.in/WriteReadData/Notices/87b4c79f-0200-4a16-b6c4-1b841d8cb1bb_Inviting%20comments%20on%20NFS%20(Amendment)%20Bill,%202026.pdf

Full single chunk read: cover rationale, draft and comparison table.7 kg/person/max 35 kg household verified. Consultation deadline 13 July. PRS footnote 18 mislinks Food Safety Act; not used.

[E13-NAS] PIB · National Ambulance Services guidelines, 29 June

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2279073&reg=3&lang=1

Full substantive release in opening chunk read: AIS 125, GPS/GIS, dispatch/triage, progressive 112 integration; underlying detailed operational manual not read.

[E13-DISHA] PIB · DISHA 2.0 approval, 22 June

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2276525&reg=3&lang=1

Full substantive release in opening chunk read: 255 crore, 2026–31,100% centralbudget, four components and three-crore outreach target. Target is not completed unique beneficiary count.

[E13-COAL] Gazette · Coal Exchange Rules, 4 June

https://www.coal.nic.in/sites/default/files/2026-06/09-06-2026a-wn.pdf

Opening fetch chunk 0 of 7 read; direct 67-page bilingual PDF extracted, selected English pages 39,41,43 inspected for guarantee fund, demutualisation and 25 yearregistration. Full instrument not read; publication-effect rule retained without equating signature/upload dates.

[E13-APCAB] PTI/The Print · AP Cabinet 34 proposals, 4 June

https://theprint.in/india/andhra-cabinet-gives-nod-to-34-proposals-boosts-aviation-irrigation-industrial-development/2950796/

Chunks 0 and 1 of 3 read including entire substantive report. Most AP topics rely on this contemporary secondary report; GO s/DPR s not read. Polavaram amount differs from Hindu rounding; exact sanction amount withheld. Report calls transplantation law THOTA 2011; original 1994 Act/2011 amendment distinguished in notes.

[E13-AMARAVATI] PIB/New India Samachar ·10 June Union Cabinet projects

https://newindiasamachar.pib.gov.in/WriteReadData/flipbook/2026/Jul/1st/English/files/basic-html/page15.html

Full page read: publication 1–15 July retrospectively reports 10 June CCEA/Cabinet decisions; CGGPOA 1299.08 crore, GPRA 1234.91 crore; each 7 lakh construction man-days/year estimate. Not completed works or permanent job counts.

[E13-WHO] WHO · Bundibugyo outbreak update, 8 June

https://www.who.int/emergencies/disease-outbreak-news/item/2026-DON606

Opening chunk 0 of 3 read: 6 June reference counts, 5 June jointresponseplan, backlog/testing warning, imported/secondary transmission versus no documented community transmission in Uganda. WHO search extracts independently place PHEIC 17 May; not misdated June.

[E13-ATLAS] ATLAS/CERN · oxygen/neon jet quenching, 28 June

https://www.atlas.cern/Updates/Briefing/OO-NeNe-Jet-Quenching

Entire substantive briefing in chunk 0 of 2 read; 28 June 2026 release uses summer 2025 collisions, dijet momentum balance, centrality and >5 sigma. Linked paper not read; no blanket zero-viscosity/complete early-Universe recreation claim.

[E13-IIP] MoSPI · May IIP release and PPI revision, 29 June

https://mospi.gov.in/uploads/latestreleasesfiles/1782729608698-IIP%20Press%20release%20May%202026.pdf

Opening chunk 0 of 4 read: confirms actual new-series release 1 June, subsequent PPI adoption 29 June, 234 of 463 value-based groups/36.02% weight and May reference-month estimates. Used to prevent treating scheduled 28 May as actual launch or June developments as known in May.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
