CIVILS ATLAS / RESEARCH EDITION 19

May 2025

Understand the news.
Retain what matters.

46 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Parliamentary agenda & representation

Private Members’ Bills: legislative initiative beyond ministers

MY25-026 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The magazine discussed declining space for non-government legislation. Editorial coverage month is not an event date.

• A private member is an MP who is not a minister.

• Private Members’ Bills create opportunities to propose legislation and debate neglected questions.

• Introduction, debate and passage are separate stages.

STATIC CONNECTION · ORIGINAL Government/private-member classification depends on the sponsor, not whether a bill concerns private interests.

ANALYSIS · ORIGINAL GUIDANCE

• Low passage does not mean zero policy influence: debates can shape subsequent government proposals.

• Adequate parliamentary time and research assistance can improve scrutiny without guaranteeing adoption.

PRELIMS CAUTION There is no blanket exemption from party whips or the Tenth Schedule merely because a vote concerns a Private Member’s Bill.

MAINS PROMPT How can Parliament make non-government legislative initiative more meaningful?

Sources: [V2505-01]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

03 · Land records & registration

Draft Registration Bill 2025: digital submission and expanded coverage

MY25-008 · P1 · 2025-05 (month-level index) · AP-linked

WHY IN THE NEWS The government invited comments on a proposed replacement for the 1908 Act.

• The draft expands specified documents requiring compulsory registration.

• It provides for electronic submission and consent-based Aadhaar authentication.

• It proposes additional registration supervisory offices that states may appoint.

STATIC CONNECTION · ORIGINAL Registration records documents; it is not automatically conclusive state-guaranteed title to every parcel.

ANALYSIS · ORIGINAL GUIDANCE

• Digitisation can reduce transaction friction if fraud prevention, accessible alternatives and grievance remedies are built in.

• AP applications need reliable legacy records and verification, not simply moving a flawed process online.

PRELIMS CAUTION This is a draft consultation, not proof that the Registration Act, 1908 was already repealed in May.

MAINS PROMPT How can land-registration reform improve access without overstating title security?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Economy

01 · National accounts & growth

FY2024–25 provisional GDP: 6.5% real growth

MY25-001 · P1 · 2025-05-30 · National / other

WHY IN THE NEWS NSO released provisional annual and fourth-quarter estimates.

• Real GDP growth was estimated at 6.5% for FY2024–25, using the 2011–12 price base.

• Q4 growth was estimated at 7.4% year-on-year.

• FY2024–25 GVA growth was estimated at 6.4%; construction grew 9.4% in this vintage.

STATIC CONNECTION · ORIGINAL GDP equals GVA plus product taxes minus product subsidies; real growth removes the chosen price effect rather than measuring nominal rupee expansion.

ANALYSIS · ORIGINAL GUIDANCE

• Sectoral growth helps identify investment and employment patterns but does not directly measure distribution or job quality.

• Use the release vintage: subsequent revisions can change historical values without making the original release misreported.

PRELIMS CAUTION FY2024–25 is not calendar year 2025, and a high quarterly rate is not the annual growth rate.

MAINS PROMPT How should growth estimates be assessed alongside employment and household welfare?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

02 · Employment statistics & definitions

Revamped PLFS: first monthly bulletin and comparable denominators

MY25-027 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The magazine examined the redesign effective from January 2025. Editorial coverage month is not an event date.

• The first monthly bulletin was released on 15 May for April 2025.

• It reported 5.1% CWS unemployment for persons aged 15 and above.

• The redesigned survey extends short-interval indicators across rural and urban areas.

STATIC CONNECTION · ORIGINAL UR uses the labour force as denominator; WPR and LFPR use population. Current weekly status and usual status use different reference periods.

ANALYSIS · ORIGINAL GUIDANCE

• High-frequency estimates help detect shifts when seasonal patterns, sampling uncertainty and redesign breaks are understood.

• Unemployment alone misses low earnings, irregular work and withdrawal from job search.

PRELIMS CAUTION The April reference month is not the May publication month; do not directly mix CWS and usual-status estimates.

MAINS PROMPT How can labour statistics reveal job quality as well as unemployment?

Sources: [V2505-09], [MY-PLFS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

04 · Export taxes & competitiveness

RoDTEP benefits restored for specified export categories

MY25-004 · P2 · 2025-05-27 · AP-linked

WHY IN THE NEWS The government announced restoration from 1 June 2025.

• The decision covered eligible exports from Advance Authorisation, SEZ and EOU categories.

• RoDTEP remits specified embedded duties and taxes not refunded elsewhere.

• Announcement in May and eligibility from June are separate dates.

STATIC CONNECTION · ORIGINAL Tax remission aims to avoid exporting embedded taxes; it differs conceptually from paying exporters simply for selling abroad.

ANALYSIS · ORIGINAL GUIDANCE

• Predictable remission supports costing and working-capital planning.

• Evaluate claim rules, rates and timeliness rather than assuming a headline restoration reimburses every domestic tax.

PRELIMS CAUTION Restoration is not retroactive coverage of every shipment in a previously excluded interval unless explicitly provided.

MAINS PROMPT Why does predictable tax-remission administration matter for export competitiveness?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

05 · Startup finance & guarantees

CGSS ceiling raised: guarantee is not a grant

MY25-005 · P1 · 2025-05-09 · AP-linked

WHY IN THE NEWS DPIIT notified revised startup credit-guarantee provisions.

• The maximum guarantee cover per borrower was raised from ₹10 crore to ₹20 crore.

• The reported default coverage is 85% for loans up to ₹10 crore and 75% above that amount.

• The annual fee for 27 specified champion sectors was reduced to 1%.

STATIC CONNECTION · ORIGINAL A credit guarantee shares eligible lender loss; it does not cancel borrower repayment obligations or replace credit appraisal.

ANALYSIS · ORIGINAL GUIDANCE

• Guarantees can address collateral constraints for viable firms but expose public resources if appraisal is weak.

• AP startup support should link innovation assistance with cash-flow assessment and transparent eligibility.

PRELIMS CAUTION ₹20 crore is not a ₹20 crore cash grant for each recognised startup.

MAINS PROMPT How can credit guarantees expand startup finance without encouraging poor underwriting?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

06 · Payment-system governance

Payments Regulatory Board Regulations 2025

MY25-010 · P2 · 2025-05-20 · National / other

WHY IN THE NEWS RBI issued a revised institutional framework.

• The RBI Governor remains chairperson.

• The board includes the deputy governor responsible for payment systems, an RBI officer and three central-government nominees.

• The regulations replace the earlier 2008 board regulations.

STATIC CONNECTION · ORIGINAL Institutional governance, operational payment infrastructure and settlement finality are different aspects of the payments system.

ANALYSIS · ORIGINAL GUIDANCE

• Diverse technical expertise can improve oversight where mandates and accountability are clear.

• Assess coordination and conflict-management safeguards alongside changes in composition.

PRELIMS CAUTION The Payments Regulatory Board is not the Monetary Policy Committee and does not set the repo rate.

MAINS PROMPT What governance capacities are needed as payment networks become critical public infrastructure?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

07 · Portfolio flows & debt markets

FPI corporate-debt relaxation: identify the limits removed

MY25-011 · P2 · 2025-05-08 · National / other

WHY IN THE NEWS RBI relaxed specified general-route constraints.

• The relaxation removed the short-term corporate-debt investment limit described in the review.

• It also removed specified investor concentration limits under the general route.

• General route, voluntary retention route and fully accessible route remain distinct frameworks.

STATIC CONNECTION · ORIGINAL An investor-level sublimit is not the same as every aggregate regulatory ceiling, instrument condition or reporting rule.

ANALYSIS · ORIGINAL GUIDANCE

• Easier participation can deepen corporate-debt markets but also requires liquidity and macroprudential monitoring.

• Firms' financing benefits depend on actual demand, credit quality and currency-risk management.

PRELIMS CAUTION Do not infer the abolition of every limit on all foreign investment in Indian debt.

MAINS PROMPT How can debt-market opening balance depth with resilience to volatile flows?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

08 · Coal linkages & electricity

Revised SHAKTI: coal allocation is not electricity-market deregulation

MY25-012 · P1 · 2025-05-07 · National / other

WHY IN THE NEWS The Cabinet approved changes to coal allocation for the power sector.

• Government-owned generation allocations at notified prices are retained.

• For private generators, revised linkage auctions use a premium above the notified price.

• Linkage duration can be up to 12 months or between one and 25 years.

STATIC CONNECTION · ORIGINAL A coal linkage supplies fuel; a power purchase agreement governs electricity sales. They are not interchangeable contracts.

ANALYSIS · ORIGINAL GUIDANCE

• Flexible sales and fuel availability can improve utilisation but must be assessed alongside transport, emissions and demand.

• Fuel-security decisions should not crowd out transparent comparison with clean generation and storage.

PRELIMS CAUTION A linkage is not an assurance that the plant runs profitably or that every electricity tariff is unregulated.

MAINS PROMPT How should fuel-allocation reform fit a reliable and lower-emission power transition?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

09 · Mineral auctions & execution

Draft mineral-auction timelines: speed with statutory safeguards

MY25-013 · P2 · 2025-05-01 · National / other

WHY IN THE NEWS The Mines Ministry consulted on intermediary milestones.

• The proposal sets steps between a Letter of Intent and execution/operationalisation.

• The draft covers mining-plan approval, environmental clearance and lease execution stages.

• Specified delays can lead to appropriation and replenishment of performance security.

STATIC CONNECTION · ORIGINAL An LoI is not an operating mine or a substitute for environmental and other statutory permissions.

ANALYSIS · ORIGINAL GUIDANCE

• Time-bound procedures can reduce avoidable uncertainty if agency capacity and accountability improve.

• Clearance deadlines should not turn evidence-based appraisal into an automatic formality.

PRELIMS CAUTION These were draft amendments; the proposed timeline is not proof that every clearance has a deemed-approval rule.

MAINS PROMPT How can mining procedures become predictable without weakening safeguards?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

09 · Mining benefits & district governance

DMFs: mining-affected communities before generic district spending

MY25-029 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed parliamentary scrutiny of DMF implementation. Editorial coverage month is not an event date.

• DMFs arise under the MMDR Act framework amended in 2015.

• They are intended to benefit mining-affected persons and areas.

• State rules and the relevant mineral/lease framework shape governance and contributions.

STATIC CONNECTION · ORIGINAL Mining royalty and the DMF contribution are not the same levy or a substitute for compliance and rehabilitation duties.

ANALYSIS · ORIGINAL GUIDANCE

• Participatory planning and public reporting can connect collections with health, water and livelihood needs.

• AP mining districts need evidence on affected settlements and project outcomes, not only fund utilisation ratios.

PRELIMS CAUTION Do not assume every district is mining-affected or that any general infrastructure project automatically meets beneficiary priorities.

MAINS PROMPT How can DMF governance avoid replacing community benefit with spending targets?

Sources: [V2505-11]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

10 · Ports & maritime logistics

Vizhinjam: transshipment depends on networks, not depth alone

MY25-028 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue covered inauguration of the Kerala port. Editorial coverage month is not an event date.

• Vizhinjam is designed as a deepwater container transshipment hub.

• The project uses a PPP within a landlord-port framework.

• Transshipment transfers cargo between vessels en route to its final destination.

STATIC CONNECTION · ORIGINAL Container throughput, berth depth and ship size describe different aspects of port capability.

ANALYSIS · ORIGINAL GUIDANCE

• Competitive turnaround, customs, shipping-line connectivity and hinterland services influence actual cargo capture.

• AP ports should be evaluated in relation to their cargo mix and connectivity, not assumed to replicate a different hub’s commercial model.

PRELIMS CAUTION Do not treat inauguration or natural depth as evidence that all projected traffic and economic benefits have materialised.

MAINS PROMPT What determines whether port infrastructure becomes a competitive logistics network?

Sources: [V2505-10]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Agriculture

01 · MSP, procurement & price risk

Kharif MSP 2025–26: announced prices versus procurement

MY25-006 · P1 · 2025-05-28 · AP-linked

WHY IN THE NEWS The Cabinet approved MSPs for the coming marketing season.

• Common paddy MSP was fixed at ₹2,369 per quintal, against ₹2,300 previously.

• Ragi MSP was ₹4,886 and tur/arhar ₹8,000 per quintal.

• The announcement refers to the 2025–26 kharif marketing season.

STATIC CONNECTION · ORIGINAL An MSP announcement, physical procurement and a universal legally enforceable buying obligation are distinct.

ANALYSIS · ORIGINAL GUIDANCE

• AP assessment should consider eligible quality, procurement access, payment timeliness and market prices.

• Higher MSP alone cannot ensure diversification where water, extension, insurance and buyers are missing.

PRELIMS CAUTION Do not infer that every farmer sells all output to government at the MSP.

MAINS PROMPT How should price support be coordinated with sustainable cropping choices?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

02 · Credit & interest support

MISS continued unchanged: separate Budget ambition from May terms

MY25-007 · P1 · 2025-05-28 · AP-linked

WHY IN THE NEWS The Cabinet retained the interest-subvention component for FY2025–26.

• The May release described eligible short-term KCC loans up to ₹3 lakh at 7%.

• Eligible lenders receive 1.5% interest subvention; prompt repayment incentive can bring the borrower rate to 4%.

• For loans exclusively for animal husbandry or fisheries, the interest benefit applies up to ₹2 lakh in this release.

STATIC CONNECTION · ORIGINAL Lender subvention and borrower prompt-repayment benefit are different components. A Budget proposal is not sufficient evidence that every operational limit has changed.

ANALYSIS · ORIGINAL GUIDANCE

• Credit support can reduce seasonal financing costs, but access depends on documentation, lending and repayment conditions.

• Track the implementing circular and date before replacing operative thresholds with Budget announcements.

PRELIMS CAUTION The February Budget’s ₹5 lakh enhancement announcement must not be silently substituted for the explicit unchanged ₹3 lakh terms in the 28 May decision.

MAINS PROMPT Why must welfare-policy evaluation distinguish announcements from operational rules?

Sources: [MY-MISS], [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

04 · Crop biotechnology & field evidence

Genome-edited rice: Kamala and Pusa DST Rice 1

MY25-024 · P1 · 2025-05-04 · AP-linked

WHY IN THE NEWS ICAR announced two rice varieties.

• DRR Dhan 100 (Kamala) was developed by ICAR-IIRR, Hyderabad, from Samba Mahsuri.

• Pusa DST Rice 1 was developed by ICAR-IARI from MTU 1010.

• The announcement concerns targeted genome editing rather than assuming every variety involves foreign-gene insertion.

STATIC CONNECTION · ORIGINAL Genome editing includes multiple techniques and outcomes; it is not universally synonymous with transgenesis or absence of regulatory obligations.

ANALYSIS · ORIGINAL GUIDANCE

• Benefits need location-specific agronomy, seed availability and independent performance evidence.

• AP’s rice systems make stress tolerance relevant, but trial averages cannot guarantee identical yields on every farm.

PRELIMS CAUTION Do not present a launch as universal seed availability or make a blanket world-first claim without historical verification.

MAINS PROMPT How should agricultural biotechnology combine innovation with transparent field evidence?

Sources: [MY-RICE]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Society & Welfare

01 · Human development & measurement

HDR 2025: publication year differs from HDI data year

MY25-034 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue discussed UNDP’s report on people and possibilities in the AI age. Editorial coverage month is not an event date.

• The 2025 report placed India at 130 of 193 with an HDI value of 0.685.

• The HDI figures refer to 2023, not development outcomes measured in May 2025.

• India remained in the medium human-development category in this release.

STATIC CONNECTION · ORIGINAL HDI combines health, education and income dimensions; inequality-adjusted HDI and MPI are distinct measures.

ANALYSIS · ORIGINAL GUIDANCE

• Aggregate improvement can coexist with uneven access and disparities across groups.

• AP planning needs disaggregated health and education evidence rather than treating a national rank as a state performance score.

PRELIMS CAUTION Do not compare ranks from different data vintages without checking revisions or confuse expected schooling with completed mean schooling.

MAINS PROMPT Why should development policy go beyond growth and aggregate HDI rank?

Sources: [V2505-28], [MY-HDI]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

02 · Functional literacy & inclusion

Mizoram’s literacy declaration: threshold is not 100%

MY25-036 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue covered the declaration under the contemporary functional-literacy framework. Editorial coverage month is not an event date.

• The declaration used the policy threshold associated with over 95% literacy.

• ULLAS links adult learning with foundational and functional skills.

• Historical Kerala and Ladakh declarations used different dates, administrative units and contexts.

STATIC CONNECTION · ORIGINAL A literacy threshold, a sampled literacy rate and universal demonstrated functional proficiency are different claims.

ANALYSIS · ORIGINAL GUIDANCE

• Post-declaration support matters for people still excluded and for retention of learning.

• Digital and financial skills should be assessed with accessible tasks rather than inferred from a state-level headline.

PRELIMS CAUTION Do not write that every resident is literate or erase Kerala’s earlier literacy movement by treating a contemporary designation as all-history first.

MAINS PROMPT How should functional-literacy success be assessed beyond threshold declarations?

Sources: [V2505-31]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

02 · Skills, ITIs & industry

ITI upgradation: shared funding and industry involvement

MY25-015 · P1 · 2025-05-07 · AP-linked

WHY IN THE NEWS The Cabinet approved the national scheme and five centres of excellence.

• The approved scheme targets 1,000 government ITIs and five National Centres of Excellence.

• The proposed ₹60,000 crore outlay comprises ₹30,000 crore central, ₹20,000 crore state and ₹10,000 crore industry shares.

• Industry involvement extends to planning and management of upgradation.

STATIC CONNECTION · ORIGINAL An approved multi-year outlay, annual expenditure and a completed training outcome are different metrics.

ANALYSIS · ORIGINAL GUIDANCE

• Equipment matters when instructors, curricula and employer demand are aligned.

• AP should measure completion, placement quality, wages and inclusion rather than training enrolment alone.

PRELIMS CAUTION Do not count every targeted ITI as already upgraded or all outlay as money spent in May.

MAINS PROMPT How can industry-linked skilling avoid becoming an infrastructure-only programme?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

03 · Emergency care & road safety

Cashless road-accident care: capped benefit and designated hospitals

MY25-018 · P1 · 2025-05-05 · AP-linked

WHY IN THE NEWS The Ministry notified the treatment scheme.

• The scheme provides up to ₹1.5 lakh per victim for a maximum of seven days from the accident.

• Cashless treatment is provided through designated hospitals.

• Funding uses the Motor Vehicle Accident Fund; states have implementation roles.

STATIC CONNECTION · ORIGINAL A treatment entitlement, a designated facility network and actual timely admission are separate requirements.

ANALYSIS · ORIGINAL GUIDANCE

• Reducing payment delays can support urgent care, but hospital availability, ambulance referral and claims administration determine access.

• AP should track treatment refusals, time-to-care and rehabilitation gaps in addition to enrolment/awareness.

PRELIMS CAUTION The cap is not unlimited lifetime treatment or reimbursement at any hospital under every circumstance.

MAINS PROMPT How can emergency-care financing be coordinated with prevention and trauma-system capacity?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

04 · Demographic data & mortality

SRS report: label reference years and denominators

MY25-035 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed the release of demographic estimates. Editorial coverage month is not an event date.

• SRS is administered through the Registrar General of India framework.

• It estimates birth, death and other demographic indicators from sample-based continuous recording and survey checks.

• The 2021 statistical report and the 2019–21 maternal-mortality estimate have different reference periods.

STATIC CONNECTION · ORIGINAL Crude birth/death rates use 1,000 population; IMR uses 1,000 live births and MMR uses 100,000 live births.

ANALYSIS · ORIGINAL GUIDANCE

• Trends help plan health services when methods, years and uncertainty are comparable.

• The same national improvement can coexist with local care gaps needing AP district-level investigation.

PRELIMS CAUTION The magazine’s crude-birth-rate formula showing ×100 is incorrect; use ×1,000. Publication in 2025 does not make the estimates 2025 observations.

MAINS PROMPT Why are correct denominators essential to demographic policy analysis?

Sources: [V2505-29]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

06 · End-of-life ethics & autonomy

Dignity at the end of life: consent and safeguarding differ

MY25-039 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue contrasted terminal illness, assisted dying and religious fasting debates. Editorial coverage month is not an event date.

• Indian jurisprudence recognises dignity in end-of-life decisions within safeguards.

• Withholding/withdrawing life-sustaining treatment is distinct from administering a lethal substance.

• Adult informed choice and a young child’s capacity for consent require fundamentally different assessment.

STATIC CONNECTION · ORIGINAL Autonomy, beneficence, non-maleficence and protection of vulnerable people must be considered together.

ANALYSIS · ORIGINAL GUIDANCE

• Palliative care and support can reduce suffering without treating financial or familial pressure as free choice.

• Advance directives and medical decision procedures require careful application of current binding safeguards.

PRELIMS CAUTION Do not equate the right to dignity with an unrestricted right to active euthanasia, or a foreign bill’s passage with operative Indian law.

MAINS PROMPT How should end-of-life policy protect autonomy without exposing vulnerable people to coercion?

Sources: [V2505-39]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

09 · Retirement inclusion & contributions

APY at ten: contribution-based pension, not a universal grant

E5-2505-001 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed the pension scheme launched in 2015. Magazine coverage is an editorial index, not the event date.

• The entry-age framework is 18–40.

• The pension options range from ₹1,000 to ₹5,000 monthly from age 60 subject to scheme terms.

• Contributions depend on entry age and selected pension.

STATIC CONNECTION · ORIGINAL A guaranteed nominal pension differs from inflation-indexed purchasing-power protection.

ANALYSIS · ORIGINAL GUIDANCE

• Informal workers need sustainable contributions and clear family-benefit information.

• Check current enrolment restrictions, including the rule affecting new income-tax-paying entrants, without assuming all existing subscribers were removed.

READ ACROSS MONTHS · NOTE IDS E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003, E7-2511-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not conflate APY with UPS or infer every citizen receives ₹5,000 without contributions.

MAINS PROMPT How should contributory pensions support informal workers with irregular incomes?

Sources: [E5-V2505-41]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

10 · Life cover & scheme distinctions

PMJJBY at ten: renewable life protection is not savings

E5-2505-002 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed the low-cost insurance scheme. Magazine coverage is an editorial index, not the event date.

• The scheme provides ₹2 lakh life cover under applicable conditions.

• The entry-age band discussed is 18–50 with renewal coverage subject to scheme rules.

• The annual premium cited is ₹436.

STATIC CONNECTION · ORIGINAL Term insurance provides risk cover; it does not necessarily return premiums at maturity.

ANALYSIS · ORIGINAL GUIDANCE

• Consent, funded auto-debit and accessible claims are essential to effective coverage.

• AP inclusion campaigns should explain conditions rather than equate account ownership with active cover.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003, E7-2511-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse it with accident-only PMSBY or promise automatic payment irrespective of exclusions and claim verification.

MAINS PROMPT How can low-cost insurance become effective protection rather than nominal enrolment?

Sources: [E5-V2505-42]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

11 · Accident insurance & claims literacy

PMSBY at ten: accident cover differs from all-cause life insurance

E5-2505-003 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue reviewed the accident insurance scheme. Magazine coverage is an editorial index, not the event date.

• The cited age range is 18–70.

• The cited annual premium is ₹20.

• The benefit distinguishes accidental death/total permanent disability from specified partial permanent disability.

STATIC CONNECTION · ORIGINAL A disability benefit depends on defined conditions; any temporary injury is not automatically a covered permanent-disability event.

ANALYSIS · ORIGINAL GUIDANCE

• Explain claims, documentation and annual renewal along with the low premium.

• Compare PMSBY with PMJJBY and APY to distinguish accident risk, life risk and retirement income.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003, E7-2511-004 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat PMSBY as general medical reimbursement or all-cause death cover.

MAINS PROMPT How can benefits literacy improve the usefulness of basic social insurance?

Sources: [E5-V2505-43]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

Environment

02 · Climate finance & classification

Draft climate-finance taxonomy: supportive and transition activities

MY25-009 · P1 · 2025-05 (month-level index) · National / other

WHY IN THE NEWS The Finance Ministry sought feedback on the proposed framework.

• The draft classifies climate-supportive activities separately from transition activities.

• It discusses emissions avoidance, intensity reduction and resilience.

• Transition categories address sectors with limited feasible low-emission alternatives.

STATIC CONNECTION · ORIGINAL A taxonomy classifies activities; it is not itself a loan sanction, carbon-credit issuance or binding national emissions cap.

ANALYSIS · ORIGINAL GUIDANCE

• Credible thresholds and disclosure can improve allocation and reduce greenwashing.

• Transition finance requires measurable progress and safeguards against locking in high-emission assets indefinitely.

READ ACROSS MONTHS · NOTE IDS MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014, E6-2510-008 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not present a draft framework as a final mandatory list already certifying every investment.

MAINS PROMPT How can transition finance remain credible while recognising development constraints?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

03 · Environmental clearance & legal chronology

Vanashakti May ruling: preserve the historical snapshot

MY25-014 · P1 · 2025-05-16 · National / other

WHY IN THE NEWS The Supreme Court rejected the retrospective-clearance mechanism in the May judgment.

• The May decision invalidated the challenged retrospective-EC mechanism.

• It linked prior appraisal to environmental-law and Article 21 protections.

• Already granted clearances were protected by that decision’s relief.

STATIC CONNECTION · ORIGINAL Prior environmental appraisal seeks to evaluate alternatives and impacts before irreversible action; ex post approval changes that incentive.

ANALYSIS · ORIGINAL GUIDANCE

• Effective enforcement requires credible consequences and administratively workable compliance systems.

• Later litigation matters: reporting reviewed for this edition records a November 2025 recall and subsequent 2026 proceedings.

PRELIMS CAUTION Do not cite the May judgment as a timeless final statement of current law. Full latest judgment/order review remains pending.

MAINS PROMPT Why does prior appraisal matter, and how should courts handle projects built without clearance?

Sources: [MY-PRS], [MY-EC-REVIEW]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

04 · Renewable contracts & certificates

Draft virtual PPAs: financial contracts, not a dedicated wire

MY25-016 · P2 · 2025-05-22 · National / other

WHY IN THE NEWS CERC invited comments on VPPA guidelines.

• The draft envisages long-term agreements between renewable generators and designated consumers.

• Electricity is not physically exchanged between the contracting parties under the VPPA.

• The proposed arrangement transfers relevant renewable energy certificates from earmarked generation.

STATIC CONNECTION · ORIGINAL Physical supply, financial settlement and environmental attributes are distinct transactions; claims must avoid double counting.

ANALYSIS · ORIGINAL GUIDANCE

• VPPAs may broaden access to renewable procurement where risks and certificate ownership are clear.

• Counterparty risk, price basis and dispute mechanisms require attention alongside sustainability claims.

READ ACROSS MONTHS · NOTE IDS MY25-009, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014, E6-2510-008 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A draft VPPA is not an already operative national contract standard or permission to claim identical renewable attributes twice.

MAINS PROMPT What governance safeguards make renewable-energy attribute claims credible?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

05 · Chemicals & international conventions

BRS COPs: three treaties, distinct legal functions

MY25-032 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue reviewed the Geneva chemicals-and-waste meetings. Editorial coverage month is not an event date.

• Basel addresses transboundary movements and management of hazardous wastes.

• Rotterdam’s listed chemicals are subject to prior informed consent procedures.

• Stockholm targets persistent organic pollutants through its annex-based controls.

STATIC CONNECTION · ORIGINAL Prior informed consent is not automatically a universal ban; treaty annex, exemption and implementation details matter.

ANALYSIS · ORIGINAL GUIDANCE

• Coordinated work can reduce chemical risks across production, trade, use and disposal.

• Domestic effectiveness requires inventories, enforcement, alternatives and environmentally sound waste handling.

PRELIMS CAUTION Do not confuse Stockholm chemical elimination restrictions with Rotterdam consent rules or the climate COP process.

MAINS PROMPT Why do chemicals and waste require linked but distinct international legal instruments?

Sources: [V2505-22]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

06 · Biodiversity, knowledge & benefit sharing

Access and benefit sharing: rights, institutions and traceability

MY25-033 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue covered the 2025 ABS regulatory framework. Editorial coverage month is not an event date.

• ABS links access to biological resources/associated knowledge with fair benefit sharing.

• India’s institutions include NBA, State Biodiversity Boards and local Biodiversity Management Committees.

• The domestic framework operates under the Biological Diversity Act and applicable regulations.

STATIC CONNECTION · ORIGINAL The CBD and Nagoya Protocol provide related international context; domestic permissions depend on specific user and use categories.

ANALYSIS · ORIGINAL GUIDANCE

• Fair implementation needs identifiable beneficiaries, documentation and enforceable benefit arrangements.

• AP biodiversity governance should support local participation without assuming every biological transaction has identical permissions.

PRELIMS CAUTION Do not confuse NBA regulations with a constitutional amendment or assume a named traditional-knowledge example proves uniform benefit delivery.

MAINS PROMPT How can ABS reconcile research access with justice for resource and knowledge holders?

Sources: [V2505-23]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

07 · Urban floods & catchment planning

Urban flooding: drainage depends on the whole catchment

MY25-041 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · AP-linked

WHY IN THE NEWS The issue discussed Bengaluru’s pre-monsoon flooding. Editorial coverage month is not an event date.

• Impervious surfaces can increase runoff and reduce infiltration.

• Blocked drains, lost wetlands and construction in flow paths can amplify risk.

• Extreme rainfall interacts with exposure and institutional preparedness.

STATIC CONNECTION · ORIGINAL Pluvial flooding, river flooding and coastal storm surge are distinct mechanisms that can overlap.

ANALYSIS · ORIGINAL GUIDANCE

• AP cities need drainage maintenance, floodplain protection and locally suitable blue-green infrastructure.

• Design must address upstream/downstream effects and vulnerable settlements rather than merely shift water to another neighbourhood.

PRELIMS CAUTION Do not use one fixed multiplier for all urban flood peaks or claim climate change explains every drainage failure.

MAINS PROMPT How can urban flood management shift from reactive pumping to catchment-based risk reduction?

Sources: [V2505-25]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Science & Technology

01 · Launch systems & mission reliability

PSLV-C61/EOS-09: mission not accomplished

MY25-023 · P1 · 2025-05-18 · AP-linked

WHY IN THE NEWS The launch from Sriharikota encountered a third-stage anomaly.

• The first two stages were reported to perform normally.

• ISRO’s initial statement identified an observation in the third stage and said the mission was not accomplished.

• EOS-09 was intended as a radar Earth-observation mission.

STATIC CONNECTION · ORIGINAL A launch vehicle’s flight number, a spaceport launch count and a mission’s success are different descriptors.

ANALYSIS · ORIGINAL GUIDANCE

• Failure analysis and corrective qualification are essential to dependable operations.

• Radar payload capabilities should be taught as intended mission design, not data already being delivered by a successfully deployed satellite.

PRELIMS CAUTION Do not report EOS-09 as successfully operating in orbit or treat a preliminary suspected cause as a final investigation finding.

MAINS PROMPT Why is transparent failure analysis central to high-reliability space programmes?

Sources: [MY-PSLV]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

03 · Satellite communications & spectrum

TRAI satcom recommendations: policy advice versus allocation

MY25-017 · P1 · 2025-05-09 · AP-linked

WHY IN THE NEWS TRAI proposed terms for administratively assigned satellite spectrum.

• The reported recommendations include a 4% adjusted-gross-revenue charge subject to a minimum.

• They propose an additional annual urban subscriber charge for NGSO services.

• They recommend assignment for up to five years with possible extension.

STATIC CONNECTION · ORIGINAL GSO satellites appear fixed relative to the Earth; NGSO satellites do not. Administrative assignment is distinct from an auction.

ANALYSIS · ORIGINAL GUIDANCE

• Satellite connectivity can complement terrestrial networks in remote areas but affordability and capacity remain constraints.

• AP disaster planning should consider resilient combinations rather than assume satellites replace all fibre and mobile networks.

PRELIMS CAUTION TRAI recommendations are not proof that all suggested fees have already been adopted or that every operator is licensed.

MAINS PROMPT How should satellite-spectrum policy balance inclusion, investment and fair competition?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

04 · Personalised medicine & genome editing

Personalised CPS1 therapy: somatic editing, not a universal cure

MY25-037 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue discussed an infant treated with a customised gene-editing approach. Editorial coverage month is not an event date.

• CPS1 deficiency impairs ammonia handling in the urea-cycle pathway.

• The reported approach targeted the child’s specific genetic variant in liver cells.

• Somatic editing differs from editing reproductive cells or embryos with heritable implications.

STATIC CONNECTION · ORIGINAL Targeted base editing and conventional double-strand-break editing are related but technically distinct approaches.

ANALYSIS · ORIGINAL GUIDANCE

• Precision therapy raises questions of off-target effects, delivery, follow-up, cost and fair access.

• An encouraging individual case is important evidence but not proof of population-wide efficacy or long-term safety.

PRELIMS CAUTION Do not describe a single treated patient as regulatory approval of a universal cure or as heritable germline editing.

MAINS PROMPT How can personalised genome therapies balance innovation, safety and equitable access?

Sources: [V2505-35]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

05 · Synthetic media & digital harm

Deepfakes: consent, evidence and proportionate remedies

MY25-038 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue discussed harmful synthetic media and US legislation. Editorial coverage month is not an event date.

• Deepfakes can manipulate or synthesise apparently authentic audio, images or video.

• Non-consensual intimate imagery and deceptive impersonation are major harm categories.

• India’s existing legal provisions may apply even without a single statute named a Deepfake Act.

STATIC CONNECTION · ORIGINAL Technical provenance and forensic detection support verification but do not determine lawful consent or harm on their own.

ANALYSIS · ORIGINAL GUIDANCE

• Timely remedies, victim support and evidence preservation should accompany enforcement.

• Broad restrictions must distinguish harmful deception from labelled satire, accessibility tools and legitimate expression.

PRELIMS CAUTION Do not repeat unverified universal prevalence percentages or assume every AI-generated image is criminal.

MAINS PROMPT How can digital governance address synthetic-media harms without suppressing legitimate expression?

Sources: [V2505-34]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Security

01 · Counterterrorism & escalation management

Operation Sindoor: attribute official claims and date each phase

MY25-030 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue analysed the response following the Pahalgam attack. Editorial coverage month is not an event date.

• India’s 7 May statement reported strikes on nine terrorist-infrastructure sites.

• The initial statement described the action as focused and non-escalatory and said it did not target Pakistani military facilities.

• The initial phase must be distinguished from subsequent military exchanges and diplomatic developments.

STATIC CONNECTION · ORIGINAL Deterrence, operational objectives, escalation control and political signalling are separate levels of analysis.

ANALYSIS · ORIGINAL GUIDANCE

• Use reliable dated statements and distinguish official battle-damage claims from independently established evidence.

• Civilian protection, information verification and disciplined communication remain important during security crises.

PRELIMS CAUTION Do not extend the initial no-military-target statement to every later phase or infer a formal change to nuclear doctrine from rhetorical framing.

MAINS PROMPT How can counterterrorism strategy combine credible deterrence with escalation control?

Sources: [V2505-13], [MY-SINDOOR]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

01 · Defence & strategy

Operation Sindoor: essential chronology

CA-027 · P1 · 2025-05-07 · National / other

WHY IN THE NEWS The Indian Armed Forces announced Operation Sindoor on 7 May, following the 22 April Pahalgam attack.

• The initial Ministry of Defence statement was issued on 7 May 2025.

• It reported action against nine terrorist-infrastructure sites in Pakistan and Pakistan-occupied Jammu and Kashmir.

• It described the initial action as focused and non-escalatory and said no Pakistani military facilities were targeted in that phase.

STATIC CONNECTION · ORIGINAL Operational chronology, strategic doctrine and diplomatic outcomes are separate analytical layers. See MY25-030 for a companion treatment of evidence and escalation.

ANALYSIS · ORIGINAL GUIDANCE

• Chronology should identify the dated phase rather than extend an initial statement to all later exchanges.

• Assess deterrence and civilian protection without assuming unverified casualty or equipment-loss claims are established.

PRELIMS CAUTION Operational claims are the Indian government’s account. Do not present contested casualty or battle-damage figures as independently established.

MAINS PROMPT Analyse deterrence, escalation control, counter-terror diplomacy and civilian protection without tactical speculation.

Sources: [DEF], [MY-SINDOOR]

Evidence access: Inherited retrospective reference supplemented by the initial official release excerpt inspected in this edition

02 · Integrated air defence & evidence

Air defence: sensors, networks and interceptors work together

MY25-031 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The magazine examined technologies discussed during Operation Sindoor. Editorial coverage month is not an event date.

• Air-defence systems connect detection, tracking, command decisions and response.

• IACCS integrates information to support air operations.

• Counter-drone measures can involve detection, electronic responses and kinetic interception.

STATIC CONNECTION · ORIGINAL An early-warning sensor, a command network and an interceptor are not interchangeable components.

ANALYSIS · ORIGINAL GUIDANCE

• Integrated systems need interoperability and resilient communications as well as individual platform performance.

• Avoid unverified success-rate claims and attribution of every engagement to one publicly named weapon.

PRELIMS CAUTION A platform’s presence in the national inventory is not proof of deployment or a particular kill in the operation.

MAINS PROMPT Why does network integration matter as much as individual hardware in air defence?

Sources: [V2505-14]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

International Relations

02 · Trade agreements & implementation

India–UK FTA talks concluded: not yet entry into force

MY25-002 · P1 · 2025-05-06 · AP-linked

WHY IN THE NEWS The governments announced conclusion of negotiations.

• The announced package envisaged wide goods tariff liberalisation and services access.

• A separate double-contribution arrangement concerns eligible temporary workers and social-security contributions.

• May negotiation conclusion must be distinguished from subsequent signature and treaty commencement.

STATIC CONNECTION · ORIGINAL An FTA generally reduces barriers among partners; rules of origin determine which goods qualify and prevent simple transshipment abuse.

ANALYSIS · ORIGINAL GUIDANCE

• Assess tariff schedules, exclusions and firm-level compliance costs rather than treating headline coverage as immediate universal free trade.

• AP exporters need product-specific rules and actual effective dates before pricing expected benefits.

READ ACROSS MONTHS · NOTE IDS CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022, CA-035 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not date later signature or ratification to May; the social-security arrangement is not a general income-tax exemption.

MAINS PROMPT What determines whether an FTA translates negotiated market access into realised exports?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

India–Chile CEPA terms of reference

MY25-003 · P2 · 2025-05-09 · National / other

WHY IN THE NEWS The two countries agreed a negotiating framework.

• The terms of reference aim to build on the existing preferential trade agreement.

• The proposed agenda extends to digital services, investment and critical minerals.

• Terms of reference define the negotiation’s scope, not completed concessions.

STATIC CONNECTION · ORIGINAL A preferential agreement, a comprehensive agreement and an agreement to negotiate are different legal stages.

ANALYSIS · ORIGINAL GUIDANCE

• Diversification can create opportunities where infrastructure, standards and reliable supply accompany diplomacy.

• Critical-mineral cooperation needs commercially viable extraction and processing, not only a mention in a negotiating agenda.

PRELIMS CAUTION Do not call agreed negotiating terms a signed CEPA with immediately operative zero duties.

MAINS PROMPT How can India’s trade strategy connect market access with resilient input supply?

Sources: [MY-PRS]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

05 · Global health governance

WHO Pandemic Agreement adopted: further legal steps remain

MY25-025 · P1 · 2025-05-20 · National / other

WHY IN THE NEWS The World Health Assembly adopted the negotiated agreement.

• Adoption followed the April conclusion of negotiations.

• The agreement envisages cooperation on pandemic prevention, preparedness and response.

• The PABS annex and subsequent signature/ratification sequence must be distinguished from adoption.

STATIC CONNECTION · ORIGINAL Adoption, opening for signature, national ratification and entry into force are separate treaty stages.

ANALYSIS · ORIGINAL GUIDANCE

• Equitable access requires practical financing, production and benefit-sharing arrangements.

• Pathogen sharing and access to resulting countermeasures raise trust and distributive-justice questions.

PRELIMS CAUTION Do not state that May adoption made the treaty automatically binding on every WHO member or transferred national health authority wholesale to WHO.

MAINS PROMPT What makes equitable access a core condition of effective global pandemic cooperation?

Sources: [MY-WHO]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

06 · UN mandates & peace operations

UN peacekeeping: mandate, consent and impartiality

MY25-040 · P1 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue covered India’s pledges at the 2025 ministerial. Editorial coverage month is not an event date.

• The Security Council establishes mandates through resolutions.

• The General Assembly has important financing/resource approval roles.

• Core principles include consent, impartiality and limits on force subject to the mandate.

STATIC CONNECTION · ORIGINAL Impartiality does not mean doing nothing in the face of mandate violations; peacekeeping is distinct from unrestricted war fighting.

ANALYSIS · ORIGINAL GUIDANCE

• Credible missions require suitable mandates, equipment, protection and political processes.

• Pledging a unit is not the same as deployment, and deployments do not substitute for a viable peace process.

PRELIMS CAUTION Do not freeze a magazine’s mission count as a permanent fact or assume every mission has identical authority to use force.

MAINS PROMPT What makes UN peacekeeping mandates operationally credible and politically sustainable?

Sources: [V2505-06]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Andhra Pradesh

01 · Capital infrastructure & delivery

Amaravati relaunch: mixed project stages, not a completed capital

MY25-019 · P1 · 2025-05-02 · AP-linked

WHY IN THE NEWS The PM launched a package including resumed capital-city works.

• The official event value was over ₹58,000 crore across multiple development projects.

• The package mixed inaugurations, dedications and foundation stones.

• Capital institutions, roads, connectivity and flood-management infrastructure were part of the wider development agenda.

STATIC CONNECTION · ORIGINAL An aggregate event value is not the amount already spent or the value of projects all completed that day.

ANALYSIS · ORIGINAL GUIDANCE

• Implementation needs credible finance, procurement, land-pooling commitments and flood resilience.

• Assess delivery milestones and livelihood safeguards alongside metropolitan economic ambition.

PRELIMS CAUTION Do not describe every project as operational on 2 May or treat the whole package as capital-building construction alone.

MAINS PROMPT What institutional safeguards can make capital-city development financially and socially sustainable?

Sources: [MY-AP]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

02 · Quantum ecosystem & research

Amaravati Quantum Valley: planned hardware, present cloud access

MY25-020 · P1 · 2025-05-02 · AP-linked

WHY IN THE NEWS IBM described plans with AP and its collaboration with TCS.

• The envisioned park anchor is IBM Quantum System Two with a 156-qubit Heron processor.

• The IBM release makes physical deployment conditional on export licences and definitive agreements.

• The announcement distinguishes cloud-resource access arrangements from a future on-site installation.

STATIC CONNECTION · ORIGINAL Physical qubits, logical error-corrected qubits and demonstrated useful quantum advantage are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Talent, algorithms, cryogenic/infrastructure capability and relevant users matter alongside acquiring hardware.

• Public evaluation should test milestones and opportunity costs rather than promise that qubit count guarantees practical breakthroughs.

READ ACROSS MONTHS · NOTE IDS VM2504-004, E5-2507-026, E5-2507-020, E5-2507-032, E6-2510-029, CA-038, E9-2602-018, E9-2602-026 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION May plans do not prove the computer was installed or that the project achieved quantum advantage.

MAINS PROMPT How can AP build an effective quantum ecosystem rather than a hardware-led prestige project?

Sources: [MY-IBM]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

03 · Defence testing infrastructure

Nagayalanka missile test range: foundation-stage investment

MY25-021 · P1 · 2025-05-02 · AP-linked

WHY IN THE NEWS The event included laying the foundation for the DRDO range.

• The reported range cost was around ₹1,460 crore.

• Planned facilities include instrumentation, radars, telemetry and electro-optical systems.

• The location is Nagayalanka in Andhra Pradesh.

STATIC CONNECTION · ORIGINAL A test range measures system performance under controlled conditions; it is not itself a missile-production factory.

ANALYSIS · ORIGINAL GUIDANCE

• Additional testing capacity can support reliable indigenous systems when safety, environmental compliance and technical validation are maintained.

• Coastal infrastructure needs careful assessment of communities and ecosystems as well as strategic value.

PRELIMS CAUTION Foundation laying is not evidence of commissioning, successful weapon tests or full operating capacity.

MAINS PROMPT How should strategic testing infrastructure reconcile capability development with local safeguards?

Sources: [MY-DRDO]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

04 · Public health participation

YogAndhra campaign: May preparation versus June event

MY25-022 · P2 · 2025-05-21 · AP-linked

WHY IN THE NEWS Local reporting recorded the Visakhapatnam curtain raiser.

• The month-long initiative began on 21 May ahead of International Yoga Day.

• The local launch was held at RK Beach, Visakhapatnam.

• Training and demonstrations were planned ahead of the June programme.

STATIC CONNECTION · ORIGINAL Campaign participation is an output, not direct evidence of sustained behaviour change or clinical benefit.

ANALYSIS · ORIGINAL GUIDANCE

• Public-health activities can encourage accessible routines if participation is inclusive and voluntary.

• Evaluate regular engagement and safe practice instead of assuming a record attendance figure establishes health outcomes.

PRELIMS CAUTION The May launch and 21 June mass event are distinct. Do not backdate June turnout or records into May.

MAINS PROMPT How can mass public-health campaigns produce measurable and sustained benefits?

Sources: [MY-YOGA]

Evidence access: Original synthesis from listed access levels; source-backed essentials distinguished from original analytical guidance

Culture & History

09 · Medical texts & historical evidence

Sushruta and Charaka: distinguish textual heritage from modern validation

E5-2505-004 · P2 · Magazine coverage: 2025-05 · web posted: 2025-06-17 · event date varies · National / other

WHY IN THE NEWS The issue revisited the medical traditions associated with the two figures. Magazine coverage is an editorial index, not the event date.

• The Sushruta tradition is associated particularly with surgery.

• The Charaka tradition is associated particularly with internal medicine.

• The transmitted texts have complex histories of composition and redaction.

STATIC CONNECTION · ORIGINAL Historical description of a procedure or remedy is not contemporary clinical evidence of efficacy and safety.

ANALYSIS · ORIGINAL GUIDANCE

• Critical scholarship can value medical heritage without anachronistic institutional claims.

• Modern healthcare requires appropriate testing, ethics and qualified practice.

PRELIMS CAUTION Do not present legendary chronology as certain, claim an ancient modern-style Benares University appointment, or use historical recipes as treatment advice.

MAINS PROMPT How can scientific temper coexist with careful appreciation of medical heritage?

Sources: [E5-V2505-37]

Evidence access: Access recorded per source; factual essentials separated from original analytical and exam guidance

May 2025 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

MAY-01. Which statement correctly interprets the May 2025 provisional GDP release?

A. 6.5% was the FY2024–25 real GDP growth estimate.

B. 7.4% was the full-year growth estimate.

C. GVA and GDP are necessarily identical.

D. 6.5% was May 2025 monthly growth.

MAY-02. What was announced in May regarding the India–UK FTA?

A. Conclusion of negotiations, distinct from subsequent treaty implementation.

B. Replacement of WTO rules for all Indian trade.

C. Immediate universal duty-free entry for every product.

D. A general income-tax exemption for every migrant.

MAY-03. India–Chile terms of reference primarily represent:

A. An agreed framework for negotiations.

B. A fully operative customs union.

C. The completion of all CEPA tariff concessions.

D. A common currency.

MAY-04. RoDTEP is best understood as:

A. Remission of eligible embedded taxes not refunded elsewhere.

B. A cash grant unrelated to embedded levies.

C. An exemption from all foreign import duties.

D. A guaranteed purchase of every export consignment.

MAY-05. Under revised CGSS provisions, ₹20 crore refers to:

A. The minimum capital for all firms.

B. The stated maximum guarantee cover per borrower.

C. A universal grant to every startup.

D. A cancellation of every startup debt.

MAY-06. Does an MSP announcement establish that all output is procured?

A. No; procurement access and actual purchases are separate.

B. Only if the crop is grown in Andhra Pradesh.

C. Yes, private trade is automatically prohibited.

D. Yes, every farmer must sell all output to the Union.

MAY-07. Which terms are explicitly described in the 28 May MISS continuation release?

A. Eligible crop KCC loans up to ₹3 lakh at 7%, with prompt-repayment incentive.

B. All borrowers receive a 1.5% final rate.

C. No repayment conditions apply.

D. Every agricultural loan up to ₹5 lakh at zero interest.

MAY-08. The Draft Registration Bill consultation proves which of the following?

A. The 1908 Act was already repealed by the draft.

B. Proposed registration reforms were opened for public feedback.

C. Every land dispute is resolved automatically online.

D. Every registered document has guaranteed indefeasible title.

MAY-09. A climate-finance taxonomy primarily:

A. Automatically sanctions a bank loan.

B. Bans all industrial transition investment.

C. Classifies activities according to defined climate criteria.

D. Creates a carbon credit for every classified project.

MAY-10. Who chairs the Payments Regulatory Board under the 2025 framework?

A. RBI Governor.

B. Comptroller and Auditor General.

C. Union Home Secretary.

D. Chairperson of SEBI.

MAY-11. The May FPI corporate-debt relaxation should be read as:

A. Abolition of all foreign-exchange regulation.

B. A ban on all short-term debt.

C. Removal of specified general-route limits, not every debt-investment condition.

D. Mandatory foreign purchase of government bonds.

MAY-12. A SHAKTI coal linkage is primarily concerned with:

A. Direct household electricity subsidy.

B. A universal exemption from emission rules.

C. Access to a coal supply allocation.

D. Ownership of a distribution company.

MAY-13. Why does the May Vanashakti note require a legal chronology warning?

A. Later recall and subsequent proceedings mean the May holding is not a timeless current-law certificate.

B. Every Supreme Court judgment expires after a month.

C. All existing clearances were necessarily cancelled.

D. The case concerned only GST.

MAY-14. What is the approved total outlay described for ITI upgradation?

A. ₹60,000 crore across central, state and industry shares.

B. ₹60,000 crore entirely spent in May.

C. ₹20,000 crore entirely from RBI.

D. ₹10,000 crore entirely from trainees.

MAY-15. Which feature distinguishes a virtual PPA in the May draft?

A. It requires a dedicated private wire in every case.

B. It permits unlimited double counting of RECs.

C. It eliminates all market-price risk.

D. No physical electricity exchange between its contracting parties.

MAY-16. TRAI’s May satellite-spectrum document should be described as:

A. Recommendations, distinct from adopted assignment conditions.

B. A law passed by Parliament.

C. An automatic licence for every company.

D. A ban on non-geostationary satellites.

MAY-17. What benefit cap is described in the road-accident treatment scheme?

A. Only preventive screening, not trauma care.

B. Unlimited lifetime treatment at any facility.

C. Up to ₹1.5 lakh and seven days from the accident, at designated hospitals.

D. ₹15 lakh for every monthly admission.

MAY-18. The ₹58,000-crore Amaravati event package represented:

A. A single hospital procurement.

B. A mix of inaugurations, dedications and foundation-stage projects.

C. Only completed capital-city buildings.

D. Only projects already fully paid for.

MAY-19. Which condition in IBM’s May Quantum Valley announcement is important?

A. Cloud access meant the on-site computer was installed.

B. On-site deployment remained subject to licences and definitive agreements.

C. 156 qubits proved universal fault-tolerant computation.

D. The release guaranteed quantum advantage on all workloads.

MAY-20. Nagayalanka’s May development concerned:

A. Commercial manufacture of every DRDO missile.

B. Commissioning of a civilian airport.

C. A new foreign embassy.

D. Foundation laying for a missile test range.

MAY-21. Which chronology is correct for YogAndhra?

A. May campaign launch preceded the June International Yoga Day event.

B. The June event occurred before the May campaign.

C. The campaign began in January 2024.

D. All June attendance figures are May outcomes.

MAY-22. What was the reported PSLV-C61/EOS-09 outcome on 18 May?

A. First-stage cancellation before liftoff.

B. Mission not accomplished following a third-stage anomaly.

C. Satellite successfully deployed and delivering operational data.

D. A completed lunar landing.

MAY-23. Which pairing is correct?

A. Kamala — a space telescope.

B. Pusa DST Rice 1 — a wheat-only programme.

C. DRR Dhan 100 (Kamala) — ICAR-IIRR, Hyderabad.

D. Pusa DST Rice 1 — RBI.

MAY-24. WHA adoption of the Pandemic Agreement in May meant:

A. WHO gained unlimited authority to order national lockdowns.

B. Further annex and treaty-law steps still remained.

C. It immediately bound every WHO member automatically.

D. Ratification was legally impossible.

MAY-25. A private member in Parliament is:

A. Only a nominated MP.

B. An MP who is not a minister.

C. Any employee of a private company.

D. Only a member of the opposition.

MAY-26. Which denominator is used for the unemployment rate?

A. Total population in every case.

B. Only employed persons.

C. Labour force.

D. Number of registered factories.

MAY-27. Which treaty–function pairing is correct?

A. Rotterdam — regulation of all nuclear fuel.

B. Stockholm — administration of shipping routes.

C. Basel — global interest-rate coordination.

D. Rotterdam — prior informed consent for listed chemicals.

MAY-28. India’s 0.685 HDI value in HDR 2025 refers to:

A. The state HDI of Andhra Pradesh.

B. An unemployment rate.

C. 2023 data in that report.

D. May 2025 monthly observations.

MAY-29. Which demographic denominator pairing is correct?

A. IMR — deaths per 100,000 total population.

B. MMR — maternal deaths per 100,000 live births.

C. CBR — births per 100 population.

D. MMR — maternal deaths per 1,000 employed women.

MAY-30. Why is a customised infant gene-editing case not a universal cure?

A. CPS1 is a container-shipping code.

B. Somatic editing is necessarily inherited by all offspring.

C. Individual evidence does not establish broad or long-term efficacy and safety.

D. A single case automatically licenses every application.

Explained answer key

MAY-01. A The release reported annual real GDP growth of 6.5% and Q4 growth of 7.4%, using that release vintage. [MY25-001]

MAY-02. A Negotiation conclusion, signature and entry into force are different milestones. Social-security contribution arrangements are not general tax exemptions. [MY25-002]

MAY-03. A Terms of reference set scope; they do not establish that a CEPA has entered into force. [MY25-003]

MAY-04. A Its objective is remission of embedded duties and taxes, subject to eligibility and rates. May restoration for categories took effect from June. [MY25-004]

MAY-05. B Guarantees support eligible lending and do not remove borrower repayment duties or underwriting requirements. [MY25-005]

MAY-06. A Announced support prices do not themselves prove universal procurement or a legal buying obligation for every unit. [MY25-006]

MAY-07. A The dated release retains the structure; the February Budget enhancement announcement must not be silently substituted for May operational terms. [MY25-007]

MAY-08. B A draft is not enacted law, and document registration is not universally a conclusive title guarantee. [MY25-008]

MAY-09. C Classification can guide finance but is not itself loan approval or credit issuance. [MY25-009]

MAY-10. A The RBI Governor chairs it; the board should not be confused with the Monetary Policy Committee. [MY25-010]

MAY-11. C Investor-level sublimits and aggregate/regulatory conditions are distinct. Avoid treating a targeted relaxation as total deregulation. [MY25-011]

MAY-12. C A fuel linkage differs from a PPA and does not guarantee plant profitability or remove other regulatory duties. [MY25-012]

MAY-13. A The historical May decision protected previously granted ECs and was followed by further litigation. Read current binding orders before relying on the rule today. [MY25-014]

MAY-14. A The scheme comprises ₹30,000 crore central, ₹20,000 crore state and ₹10,000 crore industry shares; approval is not expenditure. [MY25-015]

MAY-15. D VPPAs separate financial arrangements and environmental attributes from direct physical supply. The May document was a draft. [MY25-016]

MAY-16. A A regulator’s recommendations do not prove that all proposed charges and terms have been adopted. [MY25-017]

MAY-17. C The amount, time and designated-facility conditions all matter; access depends on implementation. [MY25-018]

MAY-18. B Event totals must not be mistaken for expenditure or completed operational infrastructure. [MY25-019]

MAY-19. B IBM distinguished cloud-resource access from the envisioned physical installation and explicitly noted conditions. [MY25-020]

MAY-20. D A test range provides instrumentation and testing infrastructure; foundation laying is not commissioning. [MY25-021]

MAY-21. A Preparation and final mass-event participation are different milestones and should not be backdated. [MY25-022]

MAY-22. B The launch occurred, but initial ISRO statements said mission objectives were not accomplished. Preliminary cause reports are not final findings. [MY25-023]

MAY-23. C Kamala was developed from Samba Mahsuri by IIRR; Pusa DST Rice 1 was developed by IARI from MTU 1010. [MY25-024]

MAY-24. B Adoption, opening for signature, ratification and entry into force are separate legal stages. [MY25-025]

MAY-25. B The sponsor’s ministerial status defines the category; PMBs do not automatically escape whips or anti-defection law. [MY25-026]

MAY-26. C UR is unemployed as a share of the labour force; LFPR and WPR use population denominators. Reference periods and age groups also matter. [MY25-027]

MAY-27. D Basel concerns hazardous-waste movement, Rotterdam PIC procedures and Stockholm persistent organic pollutants. Consent is not a blanket ban. [MY25-032]

MAY-28. C A report’s publication year differs from its underlying data year. HDI combines health, education and income dimensions. [MY25-034]

MAY-29. B CBR uses 1,000 population; IMR 1,000 live births; MMR 100,000 live births. The source’s CBR ×100 formula needs correction. [MY25-035]

MAY-30. C The therapy targeted a specific variant in liver cells. Generalisation requires appropriate evidence, regulation and follow-up. [MY25-037]

Mains answer laboratory

These are practice frameworks, not model answers or examination predictions. Use the historical May evidence and check later legal/implementation changes. Broad AP links do not constitute exact APPSC paper mapping.

1. From trade agreement to realised exports · 250 words

Prompt: Negotiated market access is necessary but insufficient for export competitiveness. Discuss using the India–UK announcement.

Opening: Distinguish the May conclusion of negotiations from signature and entry into force.

Mechanism: Lower tariffs and services opportunities → compliance with origin/standards → competitive production → actual sales.

Balance: Product exclusions, adjustment costs, utilisation by MSMEs and non-tariff barriers can limit benefits. The social-security arrangement is distinct from an income-tax exemption.

AP application: Use product-specific opportunities for state exporters only after checking schedules and implementation dates; do not invent an export gain.

Conclusion: Pair diplomacy with logistics, standards, skills and accessible compliance support.

Study references: MY25-002, MY25-003, MY25-004.

2. Climate finance without greenwashing · 250 words

Prompt: Transition finance must recognise development constraints without legitimising indefinite high emissions.

Opening: A taxonomy classifies economic activities; it does not itself provide funding or generate carbon credits.

Mechanism: Clear criteria → credible disclosure → comparable investment choices → monitored transition outcomes.

Balance: Use measurable pathways, transparent boundaries and review dates; test additionality and carbon-lock-in risks.

Application: Explain why renewable attribute ownership under a proposed VPPA must be distinguished from physical electricity supply. Add the April hydrogen production-boundary example if useful.

Conclusion: Credible verification and review are more important than a green label.

Study references: MY25-009, MY25-016; April magazine hydrogen supplement.

3. Reliable public infrastructure in Andhra Pradesh · 250 words

Prompt: Announced investment is not equivalent to delivered public value. Discuss with Amaravati and Quantum Valley.

Opening: Identify the May infrastructure relaunch and the envisioned quantum installation as different types of development initiatives.

Mechanism: Finance and agreements → permissions/procurement → construction → operations → measurable benefits.

Balance: Land-pooling commitments, flood resilience, ongoing operating costs and transparent milestones matter. The IBM announcement includes export-licence/definitive-agreement conditions.

Evaluation: For a capital city use service accessibility, resilience and sustainable finance. For quantum investment use skills, research access and useful validated applications—not qubit count alone.

Conclusion: Publish stage-specific progress and outcome evidence instead of adding targets to achievements.

Study references: MY25-019, MY25-020, MY25-021.

4. Agricultural support beyond headline prices · 150 words

Prompt: Higher support prices and cheaper credit cannot by themselves ensure resilient farm incomes.

Opening: Use common paddy MSP ₹2,369 per quintal for the announced 2025–26 season, clearly dated.

Mechanism: Price support and seasonal credit help when procurement, quality requirements, lending access and timely payment work.

Balance: Water stress, input costs, climate shocks and market concentration remain. Do not confuse the Budget KCC enhancement ambition with the explicit May MISS continuation terms.

AP application: Assess actual procurement and fisheries-credit conditions without assuming universal eligibility.

Conclusion: Combine risk management, extension, diversified markets and reliable implementation.

Study references: MY25-006, MY25-007.

5. Labour statistics and human development · 250 words

Prompt: Explain why headline unemployment and a national HDI rank are incomplete measures of development.

Opening: The first monthly PLFS bulletin published in May refers to April; HDR 2025’s India HDI value refers to 2023.

Mechanism: Employment participation, work availability, earnings, health and education capture different capabilities.

Balance: Compare like age groups and reference periods; UR uses the labour force, while WPR/LFPR use population. National means conceal group and regional disparities.

Policy: Link ITI upgradation to completion, placement quality and wages; link welfare to disaggregated health/learning outcomes.

Conclusion: A dashboard with well-defined denominators is more useful than competing isolated rankings.

Study references: MY25-015, MY25-027, MY25-034, MY25-035.

6. Technology claims and ethical evidence · 150 words

Prompt: How should public policy respond to promising but early genome-editing applications?

Opening: Contrast announced edited rice varieties with a personalised somatic therapy for an infant.

Mechanism: Precise intervention → delivery and biological effect → validation → monitoring → responsible adoption.

Balance: Off-target effects, environment/clinical context, consent, cost and access require context-specific safeguards. One case is not a universal cure, and trial performance is not a farm-level guarantee.

AP application: Connect rice relevance with local agronomy and seed systems without claiming universal availability.

Conclusion: Encourage innovation through transparent evidence and proportionate, adaptive oversight.

Study references: MY25-024, MY25-037.

7. Deterrence, escalation and information integrity · 250 words

Prompt: Effective counterterrorism requires disciplined military and public communication. Discuss.

Opening: Date and attribute the 7 May Operation Sindoor statement rather than repeating every battlefield claim as independently established.

Mechanism: Defined objectives, credible capability, integrated defence and clear signalling interact with diplomacy and escalation control.

Balance: Civilian protection, uncertain information and adversarial misinformation require verification; a system inventory is not proof of a specific engagement.

Institutions: Use appropriate command processes and reliable dated briefings. Do not conflate rhetorical descriptions with a formal change to nuclear doctrine.

Conclusion: Credibility comes from capability and evidentiary discipline, not the volume of unsupported claims.

Study references: MY25-030, MY25-031, MY25-038.

8. Emergency care as a delivery system · 150 words

Prompt: A cashless-care entitlement is necessary but insufficient for effective road-trauma response.

Opening: State the notified cap of ₹1.5 lakh for seven days at designated hospitals, not an unlimited universal benefit.

Mechanism: Incident detection → safe transport → timely triage/admission → treatment → claims → rehabilitation.

Balance: Rural access, hospital refusal, fund settlement and follow-up affect real outcomes. Prevention, enforcement and road design remain essential.

AP application: Track time-to-treatment and referral failures across districts rather than only expenditure or enrolment.

Conclusion: Connect finance with accountable trauma networks and prevention.

Study references: MY25-018.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
