CIVILS ATLAS / RESEARCH EDITION 19

July 2026

Understand the news.
Retain what matters.

69 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Examination integrity

Public examinations Bill: deterrence needs investigative capacity

E14-2607-001 · P1 · 2026-07-30 · National / other

WHY IN THE NEWS PRS records introduction on 27 July and passage by Parliament on 30 July. Assent and commencement were not independently established in this batch.

• The amendment Bill raises the proposed punishment for use of unfair means to five–ten years and a fine up to ₹50 lakh.

• Service-provider penalties rise to ₹5 crore, with debarment extended from four to eight years.

• It provides for a central Special Task Force, two-month investigation, designated Sessions fast-track courts and a three-month trial target after chargesheet.

STATIC CONNECTION · ORIGINAL The 2024 central Act covers specified examination authorities; this is not proof every school test or every AP recruitment examination automatically falls within identical jurisdiction.

ANALYSIS · ORIGINAL GUIDANCE

• Paper leaks undermine equality of opportunity, public trust and the fiscal investment of candidates.

• Secure printing, encrypted delivery, vendor due diligence and independent incident logs complement punishment; rushed investigation can weaken evidence and fair trial.

• For APPSC preparation, distinguish national legislation from the state recruitment authority’s rules and actual notification.

READ ACROSS MONTHS · NOTE IDS E12-2605-045, E5-2508-043, E11-2604-040, FEB25-007, E6-2509-030, E12-2605-042, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Parliamentary passage is not itself verified commencement. Timelines and higher maximum fines do not prove faster conviction.

MAINS PROMPT Evaluate a prevention–investigation–trial framework for public examination integrity.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Judicial capacity

Supreme Court strength: replacement Bill and the CJI denominator

E14-2607-002 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS A July Bill seeks to replace the 16 May Ordinance expanding the sanctioned bench.

• The change is from 33 to 37 judges excluding the Chief Justice of India.

• Including the CJI, the corresponding totals are 34 and 38.

• A sanctioned position, a filled vacancy and a functioning bench are separate measures of judicial capacity.

STATIC CONNECTION · ORIGINAL Article 124 permits Parliament by law to prescribe the number beyond the constitutional minimum; an ordinary strength amendment is not a constitutional amendment. Article 123 ordinances require subsequent parliamentary handling.

ANALYSIS · ORIGINAL GUIDANCE

• More judges may improve disposal, but appointment delays, case management and constitution-bench scheduling matter.

• Measure age-wise pendency, time to hearing and reasoned disposal rather than assuming four sanctioned posts eliminate backlog.

• Read this alongside the May Ordinance note as a legislative sequence, not a second independent increase.

READ ACROSS MONTHS · NOTE IDS FEB25-027, E12-2605-001, E13-2606-048, E6-2509-022, VM2503-001, E7-2511-013

PRELIMS CAUTION Do not add four judges in May and another four in July merely because two instruments address the same change.

MAINS PROMPT Why must judicial-capacity reform combine bench strength with procedural reform?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

03 · Legal profession

Draft Advocates reform: regulated entry and representative institutions

E14-2607-003 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The law ministry released a consultation draft amending the Advocates Act, 1961.

• The draft proposes registration of foreign lawyers/firms with the BCI or a State Bar Council, with practice limited to international commercial arbitration.

• It does not propose unrestricted appearance by foreign lawyers in Indian courts and tribunals.

• The proposals include women’s reserved elected seats, welfare/social-security instruments and an election-dispute tribunal.

STATIC CONNECTION · ORIGINAL BCI, State Bar Councils and courts perform different regulatory/adjudicatory functions; professional self-regulation remains subject to law and constitutional review.

ANALYSIS · ORIGINAL GUIDANCE

• Arbitration expertise and reciprocity may attract international business while protectionist barriers can limit competition.

• Representation of women requires fair election design and professional pathways, not only reserved seat totals.

• Transparent registration, conflict rules, client protection and a clear domestic-practice boundary are more useful than treating foreign entry as entirely open or entirely prohibited.

READ ACROSS MONTHS · NOTE IDS E11-2604-023, E6-2510-008, E10-2603-024, E5-2507-012, CA-032, VM2504-001, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are draft proposals, not proved operative rights, final seat allocations or a licence for every foreign advocate.

MAINS PROMPT How can professional regulation balance global legal services with accountability and inclusion?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

04 · National symbols and civil registration

Births and deaths Bill: delayed registration and judicial verification

E14-2607-011 · P1 · 2026-07-31 · National / other

WHY IN THE NEWS Introduced on 29 July, the Bill passed Lok Sabha on 31 July in the reviewed account.

• The reviewed existing framework requires an authorised magistrate’s order for registration after a year.

• The Bill proposes that delays exceeding two years require an order only from a Judicial Magistrate First Class.

• Verification of correctness and prescribed fees are part of the delayed-registration setting.

STATIC CONNECTION · ORIGINAL Registration establishes an official vital-event record; it is not by itself citizenship adjudication. Executive and judicial magistrates are different authorities.

ANALYSIS · ORIGINAL GUIDANCE

• Judicial scrutiny may deter fraudulent records but can increase travel, cost and delay for poor households.

• Simpler timely registration, hospital linkage, mobile assistance and reliable document checks can reduce the need for delayed proceedings.

• For AP, evaluate remote birth access and appeal support rather than assuming computerisation removes every documentation barrier.

READ ACROSS MONTHS · NOTE IDS MAR25-006, MY25-008, E7-2511-016, E8-2601-013, FEB25-027, VM2503-001, APR25-006, E5-2506-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Lok Sabha passage is not passage by both Houses. Do not turn a delay threshold into an assertion that all births can lawfully remain unregistered for two years.

MAINS PROMPT Balance record integrity with universal and timely civil registration.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

National song Bill: intentional disruption versus compulsory singing

E14-2607-010 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS PRS records parliamentary passage of an amendment to the National Honour Act.

• The Bill extends specified protections concerning singing of the national anthem to Vande Mataram, the national song.

• The existing offence concerns intentionally preventing singing or causing disturbance to an assembly engaged in singing.

• The reviewed penalty framework includes imprisonment up to three years, fine or both, with a higher minimum for repeat conviction.

STATIC CONNECTION · ORIGINAL Jana Gana Mana and Vande Mataram have distinct designations. Penal provisions must be interpreted through their precise conduct and intent elements, not expanded from a headline.

ANALYSIS · ORIGINAL GUIDANCE

• National-symbol protection raises questions of civic respect, proportional enforcement and freedoms of conscience and expression.

• Clear public guidance and reasoned enforcement reduce arbitrary use.

• A study answer should distinguish preventing an assembly from singing from merely declining personally to sing; the reviewed summary does not prove a new universal compulsory-singing duty.

READ ACROSS MONTHS · NOTE IDS MAR25-006, MY25-008, E7-2511-016, E8-2601-013, E5-2507-017, JAN25-004

PRELIMS CAUTION Parliamentary passage alone does not establish assent/commencement, and protection of the song does not rename it the national anthem.

MAINS PROMPT How should national-symbol legislation be assessed within constitutional freedoms?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

05 · Rights, identity and public institutions

Internet shutdowns: necessity, reasons and less restrictive options

E14-2607-033 · P1 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July compilation discusses internet restrictions during protest-related public-order concerns.

• The reviewed legal setting is the Telecommunications Act 2023 and Temporary Suspension Rules 2024.

• Reasoned orders, necessity, proportionality, publication and limited duration/area are central safeguards.

• Anuradha Bhasin links speech and professional activity through the internet with Article 19 protections; indefinite suspension is impermissible.

STATIC CONNECTION · ORIGINAL A restriction on the medium affects several underlying rights. Public emergency/safety predicates and a permissible statutory purpose must be examined rather than treating any protest as sufficient ground.

ANALYSIS · ORIGINAL GUIDANCE

• Shutdowns can affect emergency information, digital payments, education and media verification.

• Consider targeted lawful alternatives and rapid independent review; assess actual necessity instead of assuming a whole district must lose connectivity.

• For AP, multilingual public orders and continuity plans for hospitals and welfare payments improve accountability.

READ ACROSS MONTHS · NOTE IDS VM2501-003, E5-2506-009, E6-2509-004, MY25-033, E5-2507-017, E6-2509-007, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The compilation is secondary evidence; volatile shutdown counts and exact order-authority timelines were not independently revalidated here. No unlimited standalone constitutional internet right is asserted.

MAINS PROMPT Apply a proportionality test to communications restrictions.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Fair-trial safeguards: a retrial is not an acquittal

E14-2607-034 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS Drishti discusses Abdul Hameed and deficient legal representation in a capital case.

• The compilation reports that the death sentence was set aside and a fresh trial ordered.

• Effective legal representation must be meaningful, not a nominal advocate appointment.

• A co-accused confession cannot replace independent admissible evidence in the manner criticised by the Court.

STATIC CONNECTION · ORIGINAL Articles 21 and 22(1) protect fair procedure and legal representation; Article 39 A directs equal access to justice. Legal aid is an institutional obligation, not charity.

ANALYSIS · ORIGINAL GUIDANCE

• Serious accusations do not remove procedural safeguards; errors can harm victims' interests as well as the accused by undermining a sustainable verdict.

• Ensure counsel preparation, access to records, interpretation and judicial checks before important evidence stages.

• For AP legal-services institutions, assess quality and continuity of representation alongside beneficiary numbers.

READ ACROSS MONTHS · NOTE IDS FEB25-037, E5-2506-009, E6-2509-004, MY25-033, E5-2507-017, E6-2509-007, E5-2502-002, E5-2507-034 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The judgment itself was not independently read. Setting aside a sentence with retrial does not establish acquittal or factual innocence.

MAINS PROMPT Why is effective legal aid essential to legitimate criminal adjudication?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Citizenship determination: remand, notice and reasoned findings

E14-2607-035 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation reviews Sabitri Dey-related proceedings and procedural fairness in foreigner-status adjudication.

• It reports the Supreme Court set aside High Court decisions and directed fresh adjudication.

• Notice, opportunity to respond and reasoned evaluation are central to a lawful determination.

• A failure of procedure can require reconsideration without itself establishing citizenship.

STATIC CONNECTION · ORIGINAL Articles 5–11 address citizenship at constitutional commencement and Parliament’s power; the Citizenship Act supplies subsequent acquisition rules. Those categories must not be collapsed into one blanket birth rule.

ANALYSIS · ORIGINAL GUIDANCE

• Identity-document inconsistencies need contextual verification and accessible hearings, particularly for vulnerable residents.

• A rule-of-law approach distinguishes citizenship, residence, migration status and administrative identity documents.

• Avoid replacing one oversimplification with another: a remand is neither automatic citizenship nor confirmation of the earlier adverse finding.

READ ACROSS MONTHS · NOTE IDS E6-2509-007, JAN25-041, E5-2506-009, E6-2509-004, MY25-033, E5-2507-017, APR25-006, E5-2506-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original judgment and exact affected-case count were not independently inspected. Do not infer Aadhaar or a birth certificate conclusively determines citizenship.

MAINS PROMPT Explain procedural fairness as a safeguard in high-stakes identity adjudication.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

CRS: completeness, timeliness and cause-of-death quality

E14-2607-036 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July compilation discusses the Civil Registration System report for reference year 2024.

• CRS continuously records births, deaths and stillbirths under the registration law.

• It is administered through the Registrar General’s framework, with decentralised registration machinery.

• A registered death need not have a medically certified cause, and registration can occur late.

STATIC CONNECTION · ORIGINAL CRS is a continuous administrative system; SRS is a sample-based demographic estimation system. A ratio to estimated events depends on the quality of both numerator and denominator.

ANALYSIS · ORIGINAL GUIDANCE

• High headline completeness can coexist with rural under-registration or poor infant-death reporting.

• Track timely registration, disaggregation, cause certification and correction quality rather than celebrating one percentage.

• AP local bodies and health facilities can improve linkage while protecting personal information and assisted access.

READ ACROSS MONTHS · NOTE IDS VM2501-007, E5-2506-009, E6-2509-004, MY25-033, E5-2507-017, E6-2509-007, APR25-006, E5-2506-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The source’s precise 2024 completeness percentages were not checked against the original report; they are not promoted as certified recall figures here. A 2024 report is not a count of July 2026 events.

MAINS PROMPT How should vital-statistics quality be evaluated beyond total registration?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Economy

01 · MSME liquidity and classification

MSME amendment Bill: thresholds, invoices and proportionate enforcement

E14-2607-004 · P1 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS A Bill introduced in Rajya Sabha proposes changes to the 2006 development framework.

• It would empower the Union to notify classification thresholds using investment and turnover rather than retaining statutory investment figures.

• It would require CPSE settlement of procurement invoices from MSMEs through TReDS.

• Selected reporting/information defaults move toward warnings and graduated monetary penalties.

STATIC CONNECTION · ORIGINAL TReDS is an RBI-regulated receivables-financing platform; discounting converts an accepted invoice into earlier liquidity, not a budgetary grant or automatic debt forgiveness.

ANALYSIS · ORIGINAL GUIDANCE

• Adjustable thresholds can accommodate inflation and business growth but need predictable notice and consultation.

• Invoice acceptance delays can defeat platform financing even when registration numbers rise.

• AP supplier-development programmes should track payment days, buyer acceptance, discount costs and access of small firms rather than only platform enrolment.

READ ACROSS MONTHS · NOTE IDS MAR25-014, CA-041, CA-008, E11-2604-035, E5-2508-011, E5-2508-024, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not quote a proposed statutory threshold mechanism as a new notified turnover limit or call introduction enactment.

MAINS PROMPT Assess whether TReDS mandates can solve delayed payments to MSMEs.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

CPSE TReDS directive is distinct from the pending MSME Bill

E14-2607-005 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS PRS separately records an executive mandate for CPSE use of TReDS alongside the legislative proposal. PRS bibliography dates the underlying directive 30 June; it is included here as July-reviewed follow-through, not a newly dated July order.

• CPSEs are directed to settle invoices through TReDS in the reviewed account.

• Auditors are to certify registration with at least one TReDS platform.

• The contemporaneous Bill also addresses invoice settlement, but its legal stage must be recorded separately.

STATIC CONNECTION · ORIGINAL Executive instructions, statutory amendments, platform registration and actual invoice financing are different layers of compliance; they should not be merged into one claimed enacted reform.

ANALYSIS · ORIGINAL GUIDANCE

• Government buyers can provide a reliable anchor for small suppliers, provided receivables are promptly acknowledged.

• Audit should test eligible invoice coverage, disputes and days to payment, not merely a certificate of registration.

• Avoid double-counting this directive and the Bill as two sets of realised benefits to the same firm.

READ ACROSS MONTHS · NOTE IDS CA-041, CA-008, MAR25-014, E5-2508-024, VM2503-005, E12-2605-007, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original directive was not independently read; this note is PRS-based and does not certify applicability to every state PSU or private buyer.

MAINS PROMPT Distinguish formal platform compliance from effective working-capital access.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Manufacturing incentives

Mobile Phone Manufacturing Scheme: sales, sourcing and design

E14-2607-009 · P1 · 2026-07-15 · National / other

WHY IN THE NEWS The Cabinet approved ₹62,500 crore for FY 2026–27 to FY 2030–31.

• Eligible manufacturing sales receive differentiated incentives of 2.25%–5%.

• Additional support up to 1.5% is linked to domestic sourcing of key components/sub-assemblies.

• A further 3% design/R&D incentive supports Indian brands; the release’s production and job figures are expectations.

STATIC CONNECTION · ORIGINAL Gross assembly value, exports and domestic value addition are not interchangeable. A domestically assembled phone can contain imported high-value components and foreign-owned intellectual property.

ANALYSIS · ORIGINAL GUIDANCE

• Incentive design should reward learning, local supplier quality and commercially sustainable R&D rather than relabelling imported inputs.

• Monitor additional exports, subsidy per incremental job and value added net of imported content.

• AP can connect electronics training and component suppliers to national value chains, but an approval does not establish state-level allocations or realised employment.

READ ACROSS MONTHS · NOTE IDS APR25-014, E11-2604-022, MAR25-012, E12-2605-017, E7-2511-027, E6-2510-016, MY25-002, CA-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not automatically add all headline rates for every firm; eligibility conditions and differentiated support matter.

MAINS PROMPT Evaluate output-linked incentives against domestic value addition and technological ownership.

Sources: [E14-MOBILE], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

03 · Financial regulation

Draft foreign-investment rules: a proposed 10% distinction

E14-2607-012 · P1 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS RBI invited comments on a proposed replacement of the 2019 Non-debt Instruments Rules.

• The draft defines FDI as foreign investment of 10% or more in company/LLP equity and FPI as below 10%.

• It expands and reorganises eligible-entity and equity definitions.

• RBI administers operational/payment/reporting matters, while DPIIT interprets foreign-investment policy; comments were invited until 31 August.

STATIC CONNECTION · ORIGINAL Under the reviewed 2019 baseline, foreign equity in an unlisted Indian company is FDI irrespective of percentage; listed-company classification uses the 10% distinction. Draft and baseline must not be mixed.

ANALYSIS · ORIGINAL GUIDANCE

• Consolidation can reduce interpretive uncertainty but requires clarity on sector caps, indirect investment and transition.

• A numerical classification is not equivalent to unrestricted automatic-route permission or control; other legal conditions remain relevant.

• AP investment-promotion answers should distinguish policy facilitation from legal approval and beneficial-ownership checks.

READ ACROSS MONTHS · NOTE IDS E13-2606-008, E10-2603-008, MAR25-003, E7-2511-028, E13-2606-009, E12-2605-009, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The hosted PDF has a blank notification date and is a draft, not proof the 2019 Rules were superseded in July.

MAINS PROMPT Why do foreign-investment reforms need precise definitions and institutional boundaries?

Sources: [E14-FEMA], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Securities Markets Code scrutiny: bounded delegation and appeal

E14-2607-015 · P1 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The Finance Standing Committee examined the proposed consolidation of three securities laws.

• The proposed Code would consolidate the SCRA 1956, SEBI Act 1992 and Depositories Act 1996.

• The Committee sought clearer limits on regulation-making and delegation to market infrastructure institutions.

• It recommended redrafting overlapping civil/criminal defaults and allowing appeals against all SEBI/adjudicating-officer orders to SAT.

STATIC CONNECTION · ORIGINAL Parliament sets essential legislative policy; delegated regulation supplies details within a lawful framework. Exchanges/depositories may themselves face conflicts when exercising delegated supervisory functions.

ANALYSIS · ORIGINAL GUIDANCE

• Consolidation can simplify compliance but broad discretion without reasons, review and accountability risks regulatory uncertainty.

• Appeal design should preserve urgent protective action while providing timely independent correction.

• For an answer, trace rule-maker, delegated supervisor, enforcement authority and appellate body instead of treating all of them as SEBI.

READ ACROSS MONTHS · NOTE IDS E7-2512-015, MAR25-003, JAN25-013, JAN25-014, FEB25-005, FEB25-023, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Committee recommendations are not enacted clauses, and a proposed right of appeal does not automatically suspend every regulatory order.

MAINS PROMPT Can a consolidated market code improve both regulatory agility and the rule of law?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Portfolio-management consultation: mutual-fund-only entry

E14-2607-013 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS SEBI proposed a separate framework for portfolio managers investing only in mutual funds.

• For that proposed category, minimum client investment would fall from ₹50 lakh to ₹25 lakh.

• Applicant net worth would fall from ₹5 crore to ₹2 crore.

• The paper also discusses demat portability, expanded investment options and compliance changes; comments were invited until 13 August.

STATIC CONNECTION · ORIGINAL A PMS client mandate, a mutual-fund unit holding and the manager's own regulatory net worth are different concepts; investor ticket size is not the same as fund-manager capital.

ANALYSIS · ORIGINAL GUIDANCE

• A lower entry threshold can widen access but adds an advisory/fee layer over mutual funds.

• Disclosure should compare total costs, suitability, conflicts and actual service rather than implying higher fees guarantee superior returns.

• Portability can reduce switching costs, while investor protection needs clear asset custody and transfer processes.

READ ACROSS MONTHS · NOTE IDS E5-2507-005, E6-2510-007, E12-2605-011, MAR25-003, E5-2507-012, E8-2601-013, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These reduced thresholds concern the proposed mutual-fund-only category, not every PMS. A consultation is not a final relaxation.

MAINS PROMPT Assess competition, suitability and cost transparency in managed investment services.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Insurance regulations: actuarial separation and protected policyholder funds

E14-2607-014 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS PRS reviews notified IRDAI regulations implementing the 2025 insurance-law amendments.

• Reinsurers must appoint separate actuaries for life and general reinsurance.

• A framework addresses amalgamation/transfer involving non-insurance and insurance businesses.

• Policyholder funds cannot be used to meet liabilities arising from such amalgamation; the transferee board must consider adverse impact on policyholders.

STATIC CONNECTION · ORIGINAL An actuary assesses long-term financial risks; actuarial valuation is distinct from a statutory financial audit. Policyholder money must not be confused with shareholders' discretionary capital.

ANALYSIS · ORIGINAL GUIDANCE

• Business consolidation can improve scale while creating related-party and asset-transfer risks.

• Board accountability, independent valuation and ring-fencing should be tested against actual liabilities.

• The education/protection fund supports awareness, grievance infrastructure and unclaimed-amount recovery systems; its existence is not a promise to reimburse every claim.

READ ACROSS MONTHS · NOTE IDS FEB25-023, MAR25-003, JAN25-064, E12-2605-048, VM2503-008, MY25-010

PRELIMS CAUTION Notified rules are not a completed merger, and the reviewed summaries do not establish every insurer's compliance.

MAINS PROMPT Explain why insurance-sector liberalisation requires stronger governance of policyholder funds.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

04 · Maritime and rail logistics

Major-port waterfront policy: renewal is not a free transfer

E14-2607-016 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The Cabinet revised the 2016 dedicated-facility policy, according to PRS.

• Existing agreements may be renewed/extended for up to 30 years without a fresh tender under the revised policy.

• Renewal pricing uses prevailing market rate or existing payable revenue, whichever is higher.

• Specified government entities may receive allotments without competitive bidding at notified floor prices.

STATIC CONNECTION · ORIGINAL Major-port governance under the Union is distinct from state-controlled non-major ports. A lease/concession, land ownership and private cargo operations are different legal relationships.

ANALYSIS · ORIGINAL GUIDANCE

• Continuity can support sunk industrial investment, but independent valuation and transparent eligibility protect public revenue.

• Exemptions from bidding require published reasons, performance conditions and conflict controls.

• For Visakhapatnam and AP port policy, first identify the port’s legal category; do not apply Union-major-port concessions to every coastal project.

READ ACROSS MONTHS · NOTE IDS MY25-028, E5-2508-018, APR25-038, E5-2507-043, E10-2603-018, JAN25-017, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No fresh tender does not mean zero price, permanent ownership, or unconditional eligibility of every company.

MAINS PROMPT How can port-land allocation balance long-term investment and competitive neutrality?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Railway reforms: contract risk, specialised wagons and fly ash

E14-2607-017 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS PRS records eight railway reforms addressing contractors, freight and skilling.

• Performance security is to be furnished at contract commencement instead of recovered from running bills.

• A proposed eligibility restriction addresses pending litigation exceeding 50% of contractor net worth.

• Industry/designers may propose specialised wagons, while ISO-standard containers are envisaged for fly-ash transport.

STATIC CONNECTION · ORIGINAL Performance security protects execution; it is not a penalty for proved wrongdoing. Pending litigation is exposure, not an adjudicated liability or automatic evidence of guilt.

ANALYSIS · ORIGINAL GUIDANCE

• Earlier security may improve assurance but can strain contractor liquidity and reduce competition.

• Special-purpose freight equipment should meet safety, interoperability and maintenance standards.

• AP thermal-station ash logistics offers an application: covered/containerised movement can reduce dust, but reuse requires suitable quality and economic destinations.

READ ACROSS MONTHS · NOTE IDS E12-2605-055, MY25-028, E5-2506-028, E6-2510-006, MAR25-013, APR25-038, E5-2507-022, E5-2508-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not infer every open wagon was banned immediately or that a pending case establishes contractor guilt.

MAINS PROMPT Assess risk allocation and environmental performance in railway freight reform.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

05 · Energy resources and industrial inputs

Samudra Manthan: exploration risk and the offshore value chain

E14-2607-025 · P1 · 2026-07-31 · National / other

WHY IN THE NEWS The Cabinet approved the National Offshore Exploration Scheme on 31 July.

• The Central Sector Scheme has an outlay of ₹84,084 crore through FY 2030–31.

• It supports seismic data, deep/ultra-deepwater exploration, scientific drilling and common evacuation infrastructure.

• An Oil and Gas Manufacturing and Services Zone and capacity-building measures are included.

STATIC CONNECTION · ORIGINAL An exploratory resource estimate, discovered reserves, commercially recoverable reserves and actual production are different stages. Oil-equivalent units combine energy quantities, not identical physical volumes.

ANALYSIS · ORIGINAL GUIDANCE

• Public geological information can reduce information asymmetry and encourage investment, but unsuccessful wells remain a genuine risk.

• Compare import-security gains with fiscal exposure, spill liability, marine impacts and energy-transition scenarios.

• The Krishna–Godavari offshore setting is relevant to AP, without inferring a new state-specific reserve discovery or production allocation from this national approval.

READ ACROSS MONTHS · NOTE IDS E5-2506-010, JAN25-037, MAR25-011, FEB25-020, CA-038, E11-2604-022, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe the expected reserve addition as oil already produced or confuse Samudra Manthan with the Deep Ocean Mission.

MAINS PROMPT How should India evaluate strategic offshore exploration under uncertainty?

Sources: [E14-OFFSHORE], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Washed coal: beneficiation requires water and reject management

E14-2607-026 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The Coal, Mines and Steel Committee reviewed infrastructure to augment washed-coal production.

• Recommendations include modernised washeries and greater domestic washed-coking-coal blending.

• Pithead washeries and rail-centric first-mile connectivity are proposed to reduce unnecessary haulage.

• Water recycling, zero discharge and appropriate reject utilisation are central environmental recommendations.

STATIC CONNECTION · ORIGINAL Coal beneficiation reduces impurities/ash; it does not turn coal into a zero-carbon fuel. Coking-coal use in steelmaking differs from thermal-coal use in power generation.

ANALYSIS · ORIGINAL GUIDANCE

• Transporting less ash can lower freight burdens, but the removed material still needs safe management.

• Compare yield, water use, quality consistency and lifecycle cost before assuming a washery always creates net gains.

• AP steel and power procurement should identify coal grade and end use rather than substitute one category indiscriminately.

READ ACROSS MONTHS · NOTE IDS E11-2604-011, E12-2605-017, APR25-013, E7-2511-005, VM2502-003, MY25-012, MY25-009, MY25-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A Committee recommendation is not a commissioned washery or proof all clearance requirements have been relaxed.

MAINS PROMPT Assess beneficiation as an industrial-efficiency and environmental-management intervention.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Steel self-reliance: specialty capability and raw-material security

E14-2607-027 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS A parliamentary report examined the roadmap for Made-in-India steel.

• Recommendations cover specialty steel, technology transfer and stronger PLI support.

• Rail-freight rationalisation and multimodal/last-mile links address logistics costs.

• Faster operationalisation of iron-ore mines and beneficiation are proposed for raw-material security.

STATIC CONNECTION · ORIGINAL Crude-steel tonnage, specialty-grade capability and domestic technological ownership are separate dimensions of self-reliance. Beneficiation upgrades ore; it does not itself make finished steel.

ANALYSIS · ORIGINAL GUIDANCE

• Industrial policy should measure certified product quality, reliable orders and energy/material efficiency.

• Mining expansion needs lawful clearances and community safeguards, while lower-carbon steel may face high electricity and capital requirements.

• APPSC answers can connect Visakhapatnam’s industrial ecosystem with national issues without inventing a July plant-specific financial restructuring.

READ ACROSS MONTHS · NOTE IDS E6-2510-016, E7-2511-017, E13-2606-038, CA-005, E6-2510-009, E11-2604-021

PRELIMS CAUTION The report is a recommendation, not proof imports ended, a new state steel plant opened or all proposed PLI changes were notified.

MAINS PROMPT Explain why steel competitiveness requires an ecosystem rather than capacity alone.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

06 · New statistical series

National CPI release: monthly rates versus quarterly averages

E14-2607-064 · P1 · 2026-07-13 · National / other

WHY IN THE NEWS The 13 July release provides primary evidence for June inflation.

• All-India combined CPI inflation is 4.38% year-on-year, provisional.

• CFPI inflation is 5.32%, with rural/urban CPI 4.74%/3.92%.

• The release uses base 2024=100; May’s final combined CPI rate is 3.93%.

STATIC CONNECTION · ORIGINAL An inflation rate is the percentage change in an index over a specified comparison period. A slower increase is disinflation, not necessarily falling prices; an index level of 107 is not 107% inflation.

ANALYSIS · ORIGINAL GUIDANCE

• Food shocks can influence household expectations and real incomes while requiring supply responses as well as monetary analysis.

• Separate commodity-specific volatility from broad persistent pressure and consider distributional burdens.

• Do not compare PRS’s Q 1 average directly with this monthly rate as if both describe the same time aggregation.

READ ACROSS MONTHS · NOTE IDS E9-2602-002, E13-2606-005, E11-2604-003, MY25-027, E9-2602-003, E6-2509-001, FEB25-001, APR25-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are June prices published in July, not July reference-month inflation or a confirmed full-year forecast.

MAINS PROMPT Use dated CPI evidence to distinguish price levels, rates and policy trade-offs.

Sources: [E14-CPI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Core industries: the nine-sector rebasing claim needs a vintage label

E14-2607-038 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July compilation discusses an ICI series using base 2022–23.

• It reports adding iron ore to the earlier eight-sector basket.

• The compiling institution is the Office of Economic Adviser under DPIIT, distinct from MoSPI’s IIP compilation.

• Sector weights and coverage differ across old and new bases; the compilation describes a raw-coal measure intended to avoid double counting.

STATIC CONNECTION · ORIGINAL An index’s base, basket, weights and deflator/data source must be read together. A new numerical index level cannot be spliced directly onto an old series without the documented linking method.

ANALYSIS · ORIGINAL GUIDANCE

• Rebasing can better represent current production but may change apparent sector contributions.

• Record publication date, reference month and revision status separately; a strong low-weight sector may not dominate aggregate growth.

• AP industrial answers should use consistent vintages rather than combining old eight-sector weights with a nine-sector headline.

READ ACROSS MONTHS · NOTE IDS E9-2602-002, E5-2508-002, E7-2511-001, E5-2508-006, E8-2601-033, E12-2605-032, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Original OEA release not independently inspected; precise weights, linking factor and June growth are withheld from certified factual recall.

MAINS PROMPT Explain how rebasing changes interpretation without necessarily changing underlying factory output.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Services-production trial index: volume is not nominal turnover

E14-2607-039 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS Drishti contains both a launch preview and a later trial-release account.

• The compilation describes a formal-market services indicator with base 2024–25.

• The trial account refers to nineteen sub-sectors, with a composite overall index to follow.

• Administrative/GST information and deflation are used; government/non-market and informal services are outside the described coverage.

STATIC CONNECTION · ORIGINAL Real output attempts to remove price effects from nominal values. A monthly production index is not identical to quarterly services GVA, and exclusions limit economy-wide inference.

ANALYSIS · ORIGINAL GUIDANCE

• Services measurement improves timeliness, but turnover can reflect prices, formalisation and reporting changes as well as volume.

• Appropriate sector-specific proxies, revisions and documented weights are essential.

• AP tourism/transport analysis should triangulate activity quantities with prices and avoid assigning the national formal-sector index to the whole state service economy.

READ ACROSS MONTHS · NOTE IDS E7-2512-003, E9-2602-002, E6-2510-021, E6-2509-001, E10-2603-033, CA-017, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not merge the preview’s tentative launch language with the later trial as one final comprehensive release. Primary methodology and exact release date remain unverified.

MAINS PROMPT Assess the opportunities and limitations of a formal-services volume indicator.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

07 · Patient capital and circular industry

NIIF: sovereign anchoring and commercially managed investment

E14-2607-040 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation discusses an additional government commitment to NIIF.

• NIIF is a sovereign-anchored platform intended to mobilise long-term institutional capital.

• The magazine reports an additional ₹30,000 crore Union commitment, taking the stated total to ₹60,000 crore.

• A commitment, a fund’s target corpus and money invested in completed infrastructure are distinct.

STATIC CONNECTION · ORIGINAL An investment fund is not the same as a ministry grant account or RBI reserves. Risk-adjusted commercial returns, project cash flows and investor rights shape its operation.

ANALYSIS · ORIGINAL GUIDANCE

• Public anchoring may crowd in patient capital but should not conceal project risk or contingent support.

• Governance, independent investment decisions and transparent portfolio reporting protect credibility.

• For AP infrastructure, project preparation and revenue viability matter; national fund commitments do not imply automatic state allocations.

READ ACROSS MONTHS · NOTE IDS E9-2602-017, VM2504-004, E6-2509-018, CA-008, JAN25-015, FEB25-015

PRELIMS CAUTION The original Cabinet/fund release was not independently read. Amounts are attributed magazine claims; no completed disbursement or guaranteed return is certified.

MAINS PROMPT Evaluate sovereign-anchored funds as a route to infrastructure finance.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

08 · Skill finance

Skill-credit guarantee: individual cover and portfolio cap differ

E14-2607-065 · P1 · 2026-07-09 · National / other

WHY IN THE NEWS The modified scheme was notified 9 July; selected Gazette opening provisions and PRS were inspected.

• Eligible collateral-free skill loans span ₹5,000–₹7.5 lakh, subject to scheme conditions.

• PRS describes 75% default cover up to ₹4 lakh and 70% above ₹4 lakh up to ₹7.5 lakh, with aggregate claims capped at 15% of relevant annual disbursement.

• The revised framework includes qualifying non-NSQF courses via SIDH-registered providers and differentiated six/twelve-month lock-in periods.

STATIC CONNECTION · ORIGINAL A credit guarantee shares lender default risk; it is not a scholarship, borrower debt waiver or assurance every application is approved. The portfolio payout ceiling and per-borrower guarantee percentage operate at different levels.

ANALYSIS · ORIGINAL GUIDANCE

• Access gains require reliable training quality, placement evidence and responsible affordability assessment.

• The upper limit already appeared in the 2024 revision; avoid claiming the full increase first occurred only in July 2026.

• Use grievance and outcome monitoring to prevent low-quality providers selling debt-funded courses without employable skills.

READ ACROSS MONTHS · NOTE IDS E13-2606-008, JAN25-015, MY25-005, E6-2509-031, E8-2601-043, MY25-011, VM2501-001, E5-2507-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The 15% cap is not 15% individual cover. Lock-in expiry does not itself make a claim payable; other default/recovery conditions remain.

MAINS PROMPT How can skill-loan guarantees expand access without financing poor-quality training?

Sources: [E14-SKILL], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Agriculture

01 · Farm inputs and income

PM-KISAN continuation: ₹3.15 lakh crore, not a benefit increase

E14-2607-019 · P1 · 2026-07-31 · National / other

WHY IN THE NEWS The Cabinet approved continuation through FY 2030–31 on 31 July.

• The exact approved outlay is ₹3.15 lakh crore for FY 2026–27 to FY 2030–31.

• Eligible landholding farmer families continue to receive ₹6,000 annually in three equal instalments.

• Digital verification and DBT are delivery mechanisms; the release does not announce ₹6,000 per individual member or per instalment.

STATIC CONNECTION · ORIGINAL Income support differs from crop insurance, minimum support prices and credit waivers. Landholding-based eligibility can differ from the population actually cultivating the land.

ANALYSIS · ORIGINAL GUIDANCE

• Predictable transfers can finance seasonal inputs but nominal benefits may lose purchasing power.

• AP analysis should examine tenant farmers, women’s land titles, mutation errors and prompt correction of rejected transfers.

• Reported beneficiary feedback and simultaneous production growth do not by themselves establish a causal programme effect without evaluation design.

READ ACROSS MONTHS · NOTE IDS APR25-012, E5-2508-029, E5-2507-020, JAN25-020, CA-006, JAN25-019, E5-2506-018, E5-2508-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION PRS rounds the outlay to ₹3.2 lakh crore; use the primary ₹3.15 lakh crore. Continuation is not a newly doubled annual benefit.

MAINS PROMPT Assess income support with attention to adequacy, eligibility and delivery reliability.

Sources: [E14-PMK], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Urea investment policy: separating fixed and variable costs

E14-2607-018 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July review records CCEA approval of the National Investment Policy for Urea 2026.

• The previous 2012 investment-policy window ended in 2019.

• The new framework separates fixed and variable costs and provides a return-on-equity band of 12%–16%.

• The reviewed account provides for conversion of fixed costs into rupees after four years using prevailing exchange rates.

STATIC CONNECTION · ORIGINAL Investment support, producer cost recovery, fertiliser subsidy and the farmer’s retail price are different mechanisms. A return band is not a guaranteed interest rate for ordinary savers.

ANALYSIS · ORIGINAL GUIDANCE

• Additional domestic output may reduce import vulnerability but feedstock cost, gas availability and plant efficiency remain important.

• Nutrient imbalance and water/soil effects require extension and balanced fertilisation, not only more urea capacity.

• Do not equate policy approval with commissioned production or infer a particular AP plant was sanctioned.

READ ACROSS MONTHS · NOTE IDS APR25-012, E12-2605-033, JAN25-020, E12-2605-015, MAR25-011, E11-2604-012, MY25-009, MY25-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original policy text was not independently inspected; the note does not establish a new retail urea price.

MAINS PROMPT Can fertiliser investment reform improve security without deepening nutrient imbalance?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Procurement and food quality

Rice quality norms: July approval, KMS 2027–28 distribution

E14-2607-022 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The Cabinet revised permissible broken-grain content for welfare rice.

• Raw-rice broken content is to fall from 25% to 10%.

• For parboiled rice, the corresponding norm changes from 16% to 5%.

• The reviewed decision schedules distribution of the revised grains from Kharif marketing season 2027–28.

STATIC CONNECTION · ORIGINAL Broken-grain percentage concerns grain quality, not a household’s quantity entitlement. Raw and parboiled rice are different processing categories.

ANALYSIS · ORIGINAL GUIDANCE

• Better quality may improve acceptability, while mills and procurement agencies need segregation, testing and supply planning.

• Assess recovery rates, storage, costs and the utilisation of rejected/broken grain, without assuming all broken rice is unsafe.

• AP procurement answers should preserve the implementation season and distinguish food quality from the June draft AAY quantity formula.

READ ACROSS MONTHS · NOTE IDS E5-2507-016, E6-2509-031, MY25-024, VM2504-006, CA-029, E6-2510-008, E5-2507-015, E5-2508-032 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not apply the new quality percentages to July 2026 deliveries as if already universally implemented, or call this a cut in ration kilograms.

MAINS PROMPT Examine implementation trade-offs in improving welfare-grain quality.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Society & Welfare

01 · Rural employment transition

Rural-employment payments: DBT, allowance and lawful exceptions

E14-2607-006 · P1 · 2026-07-01 · National / other

WHY IN THE NEWS Rules notified on 1 July prescribe the manner of wage and unemployment-allowance payment.

• Payments go directly into the beneficiary’s bank or post-office account through DBT.

• Cash is ordinarily prohibited, but the Union may provide an exemption by order in extraordinary circumstances.

• Unemployment allowance is paid by the respective state/UT under the specified fund-flow mechanism.

STATIC CONNECTION · ORIGINAL A wage for work and unemployment allowance for a qualifying failure to provide work are different entitlements. Digital routing is not a substitute for establishing the underlying entitlement.

ANALYSIS · ORIGINAL GUIDANCE

• Electronic audit trails can improve transparency, but failed authentication, dormant accounts and distance to banking points can cause exclusion.

• Publish payment rejection reasons, accessible assistance and time-bound correction rather than treating a generated order as successful credit.

• For AP, social audit should compare muster rolls, payment orders and actual worker receipts across tribal and remote areas.

READ ACROSS MONTHS · NOTE IDS E12-2605-006, E13-2606-057, E7-2512-011, E7-2512-012, E13-2606-018, E7-2511-003, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Neither unconditional cash payment nor an absolute no-exceptions cash ban accurately describes the rule. DBT does not mean the Union pays every allowance.

MAINS PROMPT How can digital payment rules preserve both accountability and effective worker access?

Sources: [E14-PRS], [E14-WAGES]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Transition rules: old liabilities and balance-day entitlement

E14-2607-007 · P1 · 2026-07-01 · National / other

WHY IN THE NEWS The 1 July rules preserve an accounting and entitlement bridge from MGNREGS.

• States verify liabilities existing up to 30 June 2026 and settle admissible claims.

• Audited utilisation certificates are due within 180 days, with a possible further 90-day extension by the Union.

• Continuing works, verified records and eligible cards carry forward; days already availed are adjusted against the relevant financial-year guarantee.

STATIC CONNECTION · ORIGINAL A statutory transition does not extinguish verified arrears or reset a household’s financial-year work history to zero. Assets and records also require an accountable transfer.

ANALYSIS · ORIGINAL GUIDANCE

• Reconcile old work codes, outstanding wages, material dues and asset registers to prevent double payment or disappearance of liabilities.

• A 180-day accounting deadline is not a universal wage-payment grace period.

• AP implementation should offer a worker-facing statement of days used, balance days and pending wages; aggregate expenditure cannot establish an individual household’s entitlement.

READ ACROSS MONTHS · NOTE IDS E12-2605-006, E13-2606-057, E7-2512-011, E7-2512-012, E8-2601-018, MAR25-001, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not promise a fresh full annual entitlement in addition to days already used, or treat every old claimed liability as automatically admissible.

MAINS PROMPT Design an inclusive and auditable transition between rural-employment regimes.

Sources: [E14-PRS], [E14-TRANSITION]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Food standards and distribution

PDS modernisation: authentication success is not food receipt

E14-2607-021 · P1 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The Committee reviewed digitisation, portability and the technical database of the PDS.

• PRS reports near-complete card digitisation, Aadhaar seeding and fair-price-shop automation.

• The Committee sought inclusion of eligible left-out households and verification of suspect records.

• It specifically flagged authentication problems among elderly people and manual labourers and recommended examining DBT pilots.

STATIC CONNECTION · ORIGINAL Deletion of a ration card does not automatically prove fraud, and a seeded Aadhaar number does not prove a household received its food entitlement. Administrative coverage is not nutritional adequacy.

ANALYSIS · ORIGINAL GUIDANCE

• Use exception handling, offline alternatives and grievance tracking to protect eligible beneficiaries.

• Portability helps migrants only if entitlement visibility, shop stock and authentication all work together.

• AP audits should sample actual receipts, denial reasons and time to correction, while retaining privacy safeguards for linked household data.

READ ACROSS MONTHS · NOTE IDS E5-2508-042, JAN25-003, JAN25-027, E8-2601-043, E11-2604-048, CA-029, E5-2506-018, E5-2508-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat all deleted cards as proven duplicate beneficiaries, or committee support for assessing pilots as a national cash-replacement order.

MAINS PROMPT Design an inclusion-sensitive evaluation of digital PDS reform.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Sugar labelling: committee recommendations and consumer comprehension

E14-2607-020 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS A parliamentary committee examined sugar content in packaged foods, including baby products.

• Recommendations include a scientifically grounded sugar-level classification framework.

• The Committee sought uniform labelling and age-relevant front-of-pack information for infant products.

• It also recommended periodic scientific review and e-commerce monitoring of mislabelled products.

STATIC CONNECTION · ORIGINAL A nutrition label, a health claim and an enforceable food standard are different regulatory tools. Added sugar, total sugars and energy contribution are not identical measures.

ANALYSIS · ORIGINAL GUIDANCE

• Labels should help real purchasing decisions, including low-literacy consumers, rather than merely expand fine print.

• Independent testing, online-market accountability and action against misleading claims complement design reform.

• AP maternal/child-health programmes can use food-literacy counselling without assuming every packaged infant food is interchangeable or medically suitable.

READ ACROSS MONTHS · NOTE IDS E5-2508-042, JAN25-006, E5-2508-012, E10-2603-021, E10-2603-030, E6-2510-014, E5-2507-015, E5-2507-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The report is not itself a newly notified FSSAI sugar limit, and exact thresholds require the relevant final standard.

MAINS PROMPT How can food labelling move from disclosure compliance to meaningful consumer protection?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

03 · Health-sector governance

Draft Pharmacy Commission: four boards and a common exit test

E14-2607-028 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The health ministry released a draft intended to replace the Pharmacy Act 1948.

• It proposes a National Pharmacy Commission and four boards covering two education streams, assessment/rating and ethics/registration.

• A proposed common exit test serves licensing, registration and postgraduate admission purposes.

• State councils would be reconstituted within a year of commencement under the proposal.

STATIC CONNECTION · ORIGINAL Education accreditation, professional licensing and drug-product approval are not the same regulatory functions. A pharmacy professional’s registration is not a marketing authorisation for a medicine.

ANALYSIS · ORIGINAL GUIDANCE

• Clear competency standards can improve patient safety, but assessment quality and institutional independence matter.

• State representation, transition arrangements and access for students from weaker institutions require scrutiny.

• AP pharmacy education and manufacturing clusters need appropriately trained professionals; increasing seats alone does not assure safe dispensing or research capability.

READ ACROSS MONTHS · NOTE IDS E5-2508-018, VM2502-010, E6-2509-008, E5-2508-039, APR25-026, E6-2509-015, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This is a draft, not a newly operative mandatory examination date or proof existing registrations have expired.

MAINS PROMPT Assess the proposed separation of educational, assessment and ethical functions.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

NMC consultation: readiness at application and corpus oversight

E14-2607-029 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The draft new-medical-institutions amendment invited comments until 7 August.

• Proposals revise eligible applicant categories and remove certain documents at the application stage.

• The corpus undertaking would be addressed at approval, with a corpus requirement for existing colleges as well.

• Completed infrastructure/statutory readiness is proposed at application; temporary work-in-progress arrangements would not suffice.

STATIC CONNECTION · ORIGINAL Application-stage documentation, substantive eligibility and final permission are different. Removing one certificate does not abolish all state permissions, land laws or clinical-quality requirements.

ANALYSIS · ORIGINAL GUIDANCE

• Capacity expansion must preserve patient load, faculty, clinical training and financial continuity.

• Rigid rejection of incomplete applications can improve discipline but should be tested for transparent criteria and proportionate procedure.

• AP should assess geographic access and the quality of teaching hospitals rather than equating a corporate applicant category with guaranteed affordable seats.

READ ACROSS MONTHS · NOTE IDS E8-2601-012, E5-2508-039, E10-2603-006, MY25-025, JAN25-003, E5-2507-020, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original draft was not fully inspected, and the July consultation does not establish a final nationwide deregulation.

MAINS PROMPT How can medical-education reform expand capacity without weakening quality?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Drug-rule changes: targeted exemptions and risk-based quality

E14-2607-030 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS PRS reviews several July amendments concerning conventional and traditional-system medicines.

• Specified formulations above 12% ethyl alcohol by volume in quantities exceeding 30 ml lose a licensing exemption in the reviewed account.

• ASU/homoeopathic manufacturing provisions address validity, product codes and labelling mechanisms.

• Scientific shelf-life support, inspector qualifications and risk-based quality systems are among the changes.

STATIC CONNECTION · ORIGINAL An exemption from a particular licence is not a declaration of therapeutic efficacy or freedom from every safety rule. ASU, homoeopathic and other drugs cannot be treated as one undifferentiated legal category.

ANALYSIS · ORIGINAL GUIDANCE

• Permanent licence validity need not mean permanent compliance: inspections, quality assurance and lawful suspension remain important.

• QR information helps only if accessible, reliable and backed by physical labelling essentials.

• For AP, coordinate inspectors, laboratories and complaint channels rather than treating formal licence status as a guarantee that every batch is safe.

READ ACROSS MONTHS · NOTE IDS E10-2603-030, E13-2606-018, E8-2601-023, E7-2511-002, E13-2606-017, E5-2506-004, E5-2505-001, E5-2505-002 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The primary instruments were not independently read; exact category-specific requirements and dates need the final Gazette, not a blanket summary.

MAINS PROMPT Distinguish ease of compliance from dilution of medicine-quality oversight.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

04 · Education and health evidence

UDISE+ and PGI: inputs, enrolment and learning are different

E14-2607-037 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation links school-management data with performance grading.

• UDISE+ is a school-education management information system.

• PGI combines multiple domains rather than measuring only enrolment or buildings.

• Access, transition, retention, pupil–teacher ratios and learning outcomes answer different questions.

STATIC CONNECTION · ORIGINAL Gross enrolment can include pupils outside the official age group; retention/dropout need cohort and stage definitions. A favourable average pupil–teacher ratio can conceal single-teacher schools.

ANALYSIS · ORIGINAL GUIDANCE

• Compare administrative data with appropriate learning assessments and school-level validation.

• Accessible toilets, ramps, functioning internet and teacher deployment matter more than a facility tick-box alone.

• For AP, examine tribal access, disability inclusion, language support and secondary transition; do not invent a state rank from national headlines.

READ ACROSS MONTHS · NOTE IDS E12-2605-063, JAN25-022, FEB25-007, E5-2508-042, E12-2605-048, E7-2511-004, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original 2025–26 tables were not independently read; precise magazine percentages/rankings are withheld pending primary checks.

MAINS PROMPT Design a district education dashboard that links resources to equitable learning.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

NeoSep 1: local evidence for resistant neonatal infections

E14-2607-047 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation reports Indian enrolment at JIPMER in an international antibiotic-combination trial.

• NeoSep 1 investigates safe/effective treatment combinations for severe resistant infections in young infants.

• It is a multicentre trial associated with GARDP, not an already approved universal antibiotic regimen.

• Randomisation, eligibility and monitoring are essential to interpretable comparative evidence.

STATIC CONNECTION · ORIGINAL The neonatal period conventionally covers the first 28 completed days; a study including infants up to 90 days does not redefine every young-infant infection as strictly neonatal. AMR can vary greatly by hospital and region.

ANALYSIS · ORIGINAL GUIDANCE

• Local pathogen surveillance and culture/susceptibility testing improve clinical relevance.

• Antibiotic stewardship, infection prevention and timely clinical care remain necessary alongside research.

• AP neonatal units should use approved clinical guidance and ethical trial processes, not copy experimental combinations from a current-affairs note.

READ ACROSS MONTHS · NOTE IDS E13-2606-045, JAN25-022, FEB25-007, E5-2508-042, E12-2605-048, E12-2605-022, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Trial enrolment is not proof a combination is effective or licensed. Unverified magazine death counts are withheld.

MAINS PROMPT Explain why locally relevant trials and infection prevention must advance together.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Environment

01 · Environmental rule of law

Retrospective EC judgment: narrow amnesty is not perpetual regularisation

E14-2607-023 · P1 · 2026-07-29 · National / other

WHY IN THE NEWS On 29 July the Supreme Court distinguished the 2017 notification from the 2021 administrative OM.

• The Court upheld the 2017 notification as narrowly tailored, time-bound delegated legislation.

• It quashed the perpetual 2021 OM prospectively; an administrative instruction cannot supplant the EIA notification.

• Existing ECs remain valid unless individually challenged; no further applications under the impugned instruments are to be entertained.

STATIC CONNECTION · ORIGINAL Prior EC remains the normative requirement. Delegated legislation, an administrative OM and the Court's Article 142 power are legally distinct sources of authority.

ANALYSIS · ORIGINAL GUIDANCE

• A limited transitional response must not incentivise starting projects illegally and seeking routine later approval.

• Pending applications require the judgment's specific directions, not automatic permission; individual ECs can still face lawful challenge.

• For AP infrastructure, maintain project-specific permits and compliance chronology rather than assuming either every old clearance collapsed or every violation was forgiven.

READ ACROSS MONTHS · NOTE IDS E7-2511-015, E7-2511-004, MAR25-032, MY25-014, E5-2506-012, E10-2603-034, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The earlier May 2025 ruling was recalled on review. Do not present that older rule as unchanged, or say all retrospective EC is categorically permitted.

MAINS PROMPT Explain the judgment's balance between prior clearance, legal hierarchy and transitional fairness.

Sources: [E14-COURT], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Energy transition and resource security

PM Surya Sarovar: 5 GW floating solar with two-hour storage

E14-2607-024 · P1 · 2026-07-31 · National / other

WHY IN THE NEWS The Cabinet approved ₹5,070 crore for floating PV with co-located storage on 31 July.

• The target is 5,000 MW with at least two hours of storage, equivalent to 10,000 MWh at that power scale.

• Eligible projects receive ₹1 crore/MW after successful commissioning, plus preparatory support up to ₹50 lakh per project.

• Sanctions run through FY 2030–31 and disbursement through FY 2032–33; approximately 700 MW refers to existing floating PV, not all Indian solar.

STATIC CONNECTION · ORIGINAL MW measures power; MWh measures stored/delivered energy. Floating PV is not pumped storage, and a reservoir surface is not ecologically or socially vacant land.

ANALYSIS · ORIGINAL GUIDANCE

• Avoided land competition must be weighed against fisheries, water quality, evaporation, anchoring and reservoir operations.

• Storage can shift energy in time but requires charging, round-trip-loss and safety analysis.

• AP reservoirs need hydrological, bathymetric and community feasibility checks; nationwide eligibility does not imply a particular reservoir has been approved.

READ ACROSS MONTHS · NOTE IDS E7-2512-009, E5-2507-033, E12-2605-060, E5-2506-013, FEB25-038, E10-2603-040, MY25-009, MY25-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not mistake an assessed potential for commissioned capacity or equate the outlay with money already paid.

MAINS PROMPT Evaluate floating solar through energy, water and livelihood safeguards.

Sources: [E14-SOLAR], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Puga geothermal wells: demonstration is not national-scale generation

E14-2607-043 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation discusses wells supporting a proposed 1 MW demonstration at Puga Valley, Ladakh.

• Puga is a Himalayan geothermal setting, not a volcanic power station already supplying all Ladakh.

• Geothermal systems use subsurface heat for power or direct heat applications.

• Exploration wells, sustainable production flow and a commissioned electricity plant are different milestones.

STATIC CONNECTION · ORIGINAL Power conversion depends on temperature, flow and reservoir characteristics; lower-temperature direct use differs from steam-driven electricity. Renewable classification does not remove local reservoir-depletion risks.

ANALYSIS · ORIGINAL GUIDANCE

• Assess reinjection, corrosive fluids, induced seismicity, local ecology and high-altitude construction costs.

• Reliable output requires measured reservoir performance, not merely a high temperature at one depth.

• Use the pilot as a lesson in staged technology validation; no implication that AP has identical geological potential is made.

READ ACROSS MONTHS · NOTE IDS E6-2509-013, E5-2507-033, E11-2604-030, E13-2606-052, FEB25-038, E10-2603-040, MY25-009, MY25-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Well commissioning is not proof the full pilot plant is operational or national geothermal potential has become installed capacity.

MAINS PROMPT How should geothermal demonstration projects be evaluated before scale-up?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

03 · Circular industry and biodiversity

Ship recycling: circular material flows need safe dismantling

E14-2607-041 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July compilation links recycling capability with India’s shipbuilding ambitions.

• Recycling recovers steel and other materials from end-of-life vessels.

• The Recycling of Ships Act 2019 and Hong Kong Convention form part of the reviewed safety/environmental framework.

• Hazardous-material identification, worker protection and waste management are distinct from gross-tonnage recycling capacity.

STATIC CONNECTION · ORIGINAL Gross tonnage, deadweight and light-displacement tonnage measure different things; a recycling ranking cannot be directly equated with shipbuilding output or export capability.

ANALYSIS · ORIGINAL GUIDANCE

• Recovered materials can support circular industry, but unsafe beaching, toxic exposure and downstream waste can transfer costs to workers and coastal communities.

• Independent yard audits and traceable hazardous-waste disposal complement investment.

• AP maritime development should distinguish building, repairing, operating and dismantling ships rather than label them one capability.

READ ACROSS MONTHS · NOTE IDS E12-2605-038, E5-2507-040, E6-2509-018, E5-2506-029, JAN25-036, JAN25-037, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Precise global shares and the magazine’s mega-yard/job targets were not independently verified; an ambition is not a commissioned facility.

MAINS PROMPT How can circular maritime industry reconcile competitiveness with worker and coastal safety?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

White-bellied heron: river connectivity and riparian habitat

E14-2607-049 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS Drishti discusses hydropower-related concerns in the Lohit river landscape.

• The white-bellied heron is a highly threatened eastern-Himalayan river-associated bird.

• The compilation identifies free-flowing rivers and mature riparian trees as important habitat.

• Changes in flow, turbidity, disturbance and nesting sites can affect ecological suitability.

STATIC CONNECTION · ORIGINAL A riverine bird depends on habitat quality across connected reaches, not just the number of hectares inside a protected-area boundary. Project-level mitigation and basin-level cumulative effects differ.

ANALYSIS · ORIGINAL GUIDANCE

• Assess environmental flows, seasonal breeding needs and upstream/downstream impacts before considering compensation planting adequate.

• Long-term monitoring needs consistent survey methods and protection against disclosure of sensitive nest locations.

• AP answers can transfer the habitat-connectivity principle to river and wetland management without claiming this Himalayan species is an established AP population.

READ ACROSS MONTHS · NOTE IDS VM2503-011, E13-2606-032, JAN25-018, JAN25-036, JAN25-037, APR25-016, E5-2507-015, E5-2507-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Exact global/Indian population estimates and schedules were not independently verified here; avoid presenting small fluctuating counts as permanent facts.

MAINS PROMPT How should river-development appraisal account for narrowly distributed threatened species?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Biogas and CBG: circularity depends on methane control

E14-2607-050 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation discusses biological conversion of organic waste into useful energy and manure.

• Anaerobic digestion produces methane-rich biogas from suitable organic feedstock.

• Upgrading removes unwanted components to produce compressed biogas meeting the applicable quality requirements.

• Digestate can return nutrients to soils when properly processed and used.

STATIC CONNECTION · ORIGINAL Raw biogas, upgraded biomethane/CBG and natural gas are related fuels, not identical product specifications. Organic origin does not make unmanaged methane leakage harmless.

ANALYSIS · ORIGINAL GUIDANCE

• Reliable feedstock contracts, segregation, collection logistics and off-take are crucial to project viability.

• Methane leakage, digestate contamination and process energy can weaken promised climate benefits.

• AP dairy, food-waste and crop-residue opportunities need local mass/energy balances and farmer incentives rather than assuming every residue is freely available.

READ ACROSS MONTHS · NOTE IDS MY25-041, JAN25-036, JAN25-037, APR25-016, E5-2507-040, E12-2605-038, MY25-009, MY25-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A theoretical national resource estimate is not installed capacity; avoid a blanket claim every biogas project is carbon-neutral.

MAINS PROMPT Design a lifecycle-based assessment of a decentralised CBG project.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Science & Technology

01 · Electronics value chains

Semicon 2.0: six pillars beyond the fabrication plant

E14-2607-008 · P1 · 2026-07-15 · National / other

WHY IN THE NEWS The Cabinet approved an ecosystem programme on 15 July with ₹1,27,500 crore outlay.

• The six pillars cover design/IP, machines/materials, fabs, ATMP/OSAT, advanced R&D and talent.

• ATMP means assembly, testing, marking and packaging; OSAT refers to outsourced semiconductor assembly and test.

• The release distinguishes twelve approved manufacturing units under the earlier phase from three that had begun commercial production.

STATIC CONNECTION · ORIGINAL Chip design, wafer fabrication and packaging are complementary but technologically different activities. An approved fab is not the same as a commissioned high-yield production line.

ANALYSIS · ORIGINAL GUIDANCE

• Supply-chain resilience needs gases, chemicals, equipment servicing and skilled clean-room operation, not simply subsidised buildings.

• Assess water and electricity demand, environmental controls, technology choice and long-term unit economics.

• For AP electronics clusters, supplier capability and training partnerships can create value even without a leading-edge fab; no new AP fab approval is inferred here.

READ ACROSS MONTHS · NOTE IDS MAR25-012, FEB25-017, FEB25-019, MAR25-018, E6-2510-015, E11-2604-021, CA-013, JAN25-037 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not classify every packaging unit as a silicon wafer fab or count approved investment as completed production.

MAINS PROMPT How can India move from semiconductor incentives to a durable industrial ecosystem?

Sources: [E14-SEMICON], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Precision and strategic technologies

Quantum error correction: logical reliability, not magic parallel answers

E14-2607-048 · P1 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation links error-correction progress with India’s quantum ambitions.

• Physical qubits are vulnerable to noise and decoherence.

• Error-correcting codes encode logical information across multiple physical qubits and use suitable checks to detect/correct errors.

• Below-threshold physical performance can allow lower logical error rates as appropriate code resources grow.

STATIC CONNECTION · ORIGINAL Superposition does not permit reading all possible answers at once; measurement and algorithm design constrain accessible information. Entanglement does not enable faster-than-light messaging.

ANALYSIS · ORIGINAL GUIDANCE

• Useful fault-tolerant computing needs hardware, control, software, benchmarking and a large resource overhead.

• Compare logical error rates and demonstrated workloads, not only raw physical-qubit count.

• For AP Quantum Valley study, national mission targets and state land/institutional announcements are not proof of a functioning universal fault-tolerant computer.

READ ACROSS MONTHS · NOTE IDS MY25-023, E7-2511-009, VM2503-013, E6-2510-029, E5-2507-002, E5-2508-035, VM2504-004, MY25-020 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Quantum devices are not automatically faster for every task, and not every qubit platform operates at the same cryogenic temperature.

MAINS PROMPT What evidence should distinguish quantum capability from headline qubit counts?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Helium: cryogenic utility and concentrated supply

E14-2607-042 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation discusses helium-supply concerns and technological dependence.

• Helium is an inert, non-flammable noble gas with a boiling point around 4.2 K.

• Terrestrial helium accumulates over geological timescales, commonly in natural-gas systems, largely from radioactive decay.

• Cryogenics, MRI, semiconductor processes and research depend on its physical properties.

STATIC CONNECTION · ORIGINAL Cosmic abundance does not imply inexpensive recoverable terrestrial supply. A gas reserve, concentration suitable for recovery and a commercial purification facility are different.

ANALYSIS · ORIGINAL GUIDANCE

• Recovery/recycling, leak control, supplier diversification and strategic inventory can reduce vulnerability.

• Cryogenic transport and boil-off create logistical constraints not solved simply by finding trace helium.

• The Krishna–Godavari basin is a relevant AP resource context, but no commercial helium discovery or proven recovery economics is inferred.

READ ACROSS MONTHS · NOTE IDS E12-2605-025, E9-2602-027, E7-2511-009, E5-2507-002, E5-2508-035, VM2504-002, CA-013, JAN25-037 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The magazine’s China export-ban claim and exact Indian import shares were not independently checked; they are not treated as verified policy facts.

MAINS PROMPT Assess helium security as a link between science infrastructure and resource policy.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

White Rabbit timing: traceable time as critical infrastructure

E14-2607-044 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS Drishti describes an IST-dissemination demonstration centred on RRSL Bengaluru.

• White Rabbit extends precision timing over optical-fibre Ethernet using Precision Time Protocol concepts.

• The demonstration links precise Indian time dissemination with CSIR-NPL and institutional partners.

• Finance, telecommunications, smart grids and digital records require consistent, traceable timestamps.

STATIC CONNECTION · ORIGINAL IST is UTC+5:30. Maintaining a national time standard, distributing it and synchronising a user’s device are separate technical functions. This is time transfer, not a change of India’s time zone.

ANALYSIS · ORIGINAL GUIDANCE

• Fibre-based timing can reduce dependence on vulnerable satellite signals, but route outages, hardware compromise and calibration remain risks.

• Secure authentication, redundancy and auditable clock performance are important for trustworthy digital infrastructure.

• For AP financial/industrial systems, resilience requires diverse timing paths rather than declaring one demonstration immune to spoofing.

READ ACROSS MONTHS · NOTE IDS E12-2605-025, APR25-018, VM2502-012, E13-2606-040, JAN25-018, E7-2511-009, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A pilot does not establish universal national rollout, perfect security or that ordinary internet connections provide nanosecond accuracy.

MAINS PROMPT Explain precision timing as a public-good infrastructure for the digital economy.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

03 · Space and biomedical research

Space oncology: a research platform, not a cancer cure

E14-2607-045 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July compilation examines microgravity-based studies of tumour behaviour and therapies.

• Microgravity can alter cell adhesion, signalling and three-dimensional cell-culture behaviour.

• Spheroids and protein-crystallisation studies may support disease models and drug development.

• Laboratory response does not establish clinical efficacy, population benefit or an approved treatment.

STATIC CONNECTION · ORIGINAL Microgravity changes the effective experimental environment; it does not remove gravity from the universe. Simulated microgravity and actual spaceflight also require careful comparison.

ANALYSIS · ORIGINAL GUIDANCE

• Translational value depends on reproducibility, controls, radiation confounders and affordable downstream therapy.

• Hospitals, laboratories and space agencies need ethical review, transparent data and realistic opportunity-cost analysis.

• For India, collaboration should target answerable biomedical questions rather than use space novelty as evidence of medical success.

READ ACROSS MONTHS · NOTE IDS MY25-037, E7-2512-024, E11-2604-019, FEB25-050, VM2504-004, E5-2507-020, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A change in cancer cells in an experimental setting is not proof astronauts or terrestrial patients can be cured by microgravity.

MAINS PROMPT Evaluate the promise and limits of space-based biomedical research.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Gaganyaan re-entry: a chain of safety-critical systems

E14-2607-046 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The compilation reviews crew-module preparation and safe return requirements.

• Thermal protection manages intense aerodynamic heating during atmospheric re-entry.

• Attitude-control systems orient the module; parachutes slow it for sea recovery.

• Flotation/up-righting and communication support crew safety after splashdown.

STATIC CONNECTION · ORIGINAL A blunt-body detached shockwave and an ablative heat shield perform different protective roles. A drogue parachute stabilises; main parachutes provide substantial final deceleration.

ANALYSIS · ORIGINAL GUIDANCE

• A human-spaceflight safety case must cover separation, re-entry, descent, splashdown and recovery as a connected system.

• Redundancy helps only if common-mode failures and integration are tested.

• Indian Navy recovery coordination and realistic sea conditions matter; a component test is not a completed crewed mission.

READ ACROSS MONTHS · NOTE IDS E5-2506-010, E12-2605-042, E5-2506-025, CA-038, E9-2602-027, FEB25-050, E5-2507-028, E5-2507-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Preparations and test success do not certify that astronauts flew in July or establish a final mission date.

MAINS PROMPT Why must human-spaceflight progress be judged by integrated safety evidence?

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Security

01 · Defence procurement and cyber resilience

Defence offsets: promised obligation versus transferred capability

E14-2607-032 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The Public Accounts Committee reviewed management of defence offsets.

• Offsets oblige foreign vendors to reverse-purchase, export, invest or support eligible domestic technology/R&D under contract terms.

• Recommendations include broader capital-acquisition coverage and meeting 50% of obligations through FDI or technology transfer.

• The Committee also sought clearer eligible technologies, deadlines and deterrents to non-compliance.

STATIC CONNECTION · ORIGINAL An offset credit, a contractual promise and independently absorbed technology are different measures. FDI value does not by itself prove domestic design capability.

ANALYSIS · ORIGINAL GUIDANCE

• Audit should test additionality, valuation, timeliness and whether local firms can maintain and improve the transferred technology.

• Rigid targets can distort procurement if vendor capability and security needs are ignored.

• For AP defence-industrial linkages, focus on certified suppliers and workforce capability rather than announcing state benefits from national recommendations.

READ ACROSS MONTHS · NOTE IDS VM2502-012, APR25-031, VM2504-005, E9-2602-019, E11-2604-029, MY25-006

PRELIMS CAUTION These are Committee recommendations, not a universal newly operative 50% offset rule for every acquisition.

MAINS PROMPT How can offset policy be judged by capability rather than nominal contract value?

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

International Relations

01 · Bilateral cooperation and economic security

Japan · Economic-security cooperation: resilient supply chains, not autarky

E14-2607-066 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July policy review records bilateral engagements; this note uses month-level indexing and attributes the outcomes to PRS.

• PRS records MoCs involving biogas, batteries, pharmaceuticals, critical minerals and AI policy.

• A joint economic-security declaration emphasises project-based collaboration in strategic sectors.

• The review also describes research and infrastructure cooperation.

STATIC CONNECTION · ORIGINAL A declaration, MoU, sector agreement and enforceable domestic implementation have different legal and operational consequences.

ANALYSIS · ORIGINAL GUIDANCE

• Diversification and trusted partnerships can reduce single-source risk but may raise cost or exclude suppliers.

• India should assess joint R&D, local capability, interoperable standards and project implementation rather than count MoUs as operating factories.

• For AP, use ports, skills, agri-food and technology links as possible applications, not unverified state-specific agreements.

READ ACROSS MONTHS · NOTE IDS E5-2508-019, E12-2605-025, E13-2606-021, VM2504-002, E12-2605-061, E9-2602-027, MY25-002, CA-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The review’s exact visit/outcome dates conflict; no precise day is assigned. Signing a cooperation text is not a new binding mutual-defence alliance.

MAINS PROMPT Assess Japan cooperation through strategic objectives, delivery mechanisms and implementation limits.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Indonesia · Maritime and technology ties: cooperation across the eastern Indian Ocean

E14-2607-067 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July policy review records bilateral engagements; this note uses month-level indexing and attributes the outcomes to PRS.

• PRS reports cooperation on peaceful space use and maritime security.

• The account includes medical products, disaster management and mineral/steel supply chains.

• Rare-earth magnets and defence-industrial cooperation feature among the reported areas.

STATIC CONNECTION · ORIGINAL A declaration, MoU, sector agreement and enforceable domestic implementation have different legal and operational consequences.

ANALYSIS · ORIGINAL GUIDANCE

• Indonesia’s archipelagic geography makes maritime domain awareness and resilient sea lanes important.

• Technology collaboration needs export permissions, procurement decisions and real transfer/absorption; discussion of a system does not establish a completed sale.

• For AP, use ports, skills, agri-food and technology links as possible applications, not unverified state-specific agreements.

READ ACROSS MONTHS · NOTE IDS E13-2606-021, VM2503-004, JAN25-039, E5-2507-008, E12-2605-026, VM2502-004, MY25-002, CA-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Prabowo Subianto is Indonesia’s President, not Prime Minister as the review incorrectly labels him. No completed BrahMos delivery is inferred.

MAINS PROMPT Assess Indonesia cooperation through strategic objectives, delivery mechanisms and implementation limits.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Australia · Energy, maritime and emerging-technology cooperation

E14-2607-068 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July policy review records bilateral engagements; this note uses month-level indexing and attributes the outcomes to PRS.

• The review records declarations on energy security, maritime/defence, cyber/critical technologies and sports.

• MoUs include maritime law enforcement and skill development in mining.

• Research, emerging-technology skills and cinema cooperation also appear.

STATIC CONNECTION · ORIGINAL A declaration, MoU, sector agreement and enforceable domestic implementation have different legal and operational consequences.

ANALYSIS · ORIGINAL GUIDANCE

• Resource supply and workforce capability can support strategic resilience without eliminating price, environmental or geopolitical risks.

• Distinguish bilateral cooperation from Quad functions and identify the concrete delivery institutions behind declarations.

• For AP, use ports, skills, agri-food and technology links as possible applications, not unverified state-specific agreements.

READ ACROSS MONTHS · NOTE IDS E13-2606-021, VM2502-004, E5-2508-019, E12-2605-027, APR25-033, VM2504-003, MY25-002, CA-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A declaration is not proof of an operating mine, a military basing agreement or a guaranteed uranium shipment.

MAINS PROMPT Assess Australia cooperation through strategic objectives, delivery mechanisms and implementation limits.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

New Zealand · Maritime cooperation, Antarctic research and trade ambitions

E14-2607-069 · P2 · 2026-07 (month-level index) · National / other

WHY IN THE NEWS The July policy review records bilateral engagements; this note uses month-level indexing and attributes the outcomes to PRS.

• PRS reports logistics-support, hydrographic-data and maritime cooperation arrangements.

• The account includes Antarctic research, academic mobility, disaster risk and dairying.

• Doubling bilateral trade by 2030 is a target, not an achieved trade value.

STATIC CONNECTION · ORIGINAL A declaration, MoU, sector agreement and enforceable domestic implementation have different legal and operational consequences.

ANALYSIS · ORIGINAL GUIDANCE

• Hydrographic data support navigation, while Antarctic research relates to scientific/environmental cooperation, not sovereignty over Antarctica.

• Agricultural productivity and mobility cooperation need standards, safeguards and evidence of implementation rather than automatic market-access assumptions.

• For AP, use ports, skills, agri-food and technology links as possible applications, not unverified state-specific agreements.

READ ACROSS MONTHS · NOTE IDS E13-2606-021, MAR25-039, E5-2508-019, VM2502-004, E12-2605-027, VM2503-004, MY25-002, CA-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A logistics agreement is not a permanent base or a mutual-defence treaty; a trade target is not an implemented free-trade concession.

MAINS PROMPT Assess New Zealand cooperation through strategic objectives, delivery mechanisms and implementation limits.

Sources: [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Andhra Pradesh

01 · Industry and women’s enterprise

Hero parts centre: separate ₹750 crore facility from wider expansion

E14-2607-052 · P1 · 2026-07-01 · AP-linked

WHY IN THE NEWS The 1 July foundation ceremony was reported by ETV Bharat on 2 July.

• The Global Parts Center 2.0 carries a reported ₹750 crore investment and approximately 85,000 sqm built-up scale.

• The site described as Madanapalle is in Satyavedu mandal, Tirupati district, not the better-known Madanapalle town.

• A separate ₹3,200 crore five-year expansion plan and additional employment expectations were announced.

STATIC CONNECTION · ORIGINAL A parts distribution/after-sales hub, vehicle assembly capacity and EV-component manufacturing are related but distinct operations. Foundation, construction and commercial operation are different milestones.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s connectivity and supplier ecosystem can support industrial logistics, but investment announcements need milestone and employment verification.

• Track local procurement, women’s safe employment, technical training and actual additional jobs.

• The report gives inconsistent existing-capacity figures; avoid building a growth calculation from them.

READ ACROSS MONTHS · NOTE IDS E5-2508-029, FEB25-041, CA-008, E8-2601-041, MAR25-022, MAR25-024, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add the ₹750 crore and ₹3,200 crore as proved non-overlapping disbursements or call projected jobs already created.

MAINS PROMPT Assess industrial-investment announcements through location accuracy and measurable additionality.

Sources: [E14-HERO]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Union Bank SHG charges: reduced fees are not a loan waiver

E14-2607-053 · P1 · 2026-07-01 · AP-linked

WHY IN THE NEWS ETV Bharat reported the decision concerning women’s self-help groups on 1 July.

• The reported waiver concerns processing and inspection charges on SHG lending.

• Previously specified cash-credit loans above ₹10 lakh attracted processing fees, while loans above ₹5 lakh attracted quarterly inspection charges.

• The decision does not, in the reviewed account, waive principal or all interest on SHG borrowing.

STATIC CONNECTION · ORIGINAL The effective cost of credit includes interest, fees, insurance and transaction costs. A fee waiver is different from subsidised interest, repayment moratorium or debt cancellation.

ANALYSIS · ORIGINAL GUIDANCE

• Lower charges can improve working capital, but viable enterprise also needs market access, financial literacy and protection from coercive recovery.

• SERP and bank coordination should verify charges actually removed from statements and enable complaints.

• The report’s headline savings example requires fee-frequency/tax assumptions not fully reconciled here, so exact claimed savings are withheld.

READ ACROSS MONTHS · NOTE IDS FEB25-041, MAR25-022, E5-2508-030, E8-2601-043, E13-2606-055, E5-2506-006, VM2501-001, E5-2507-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original bank circular was not read; do not generalise this reported Union Bank decision to all banks and all women’s loans.

MAINS PROMPT How should AP evaluate financial inclusion beyond the amount of SHG credit sanctioned?

Sources: [E14-SHG]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

02 · Tribal inclusion and disability rights

412 Aadhaar centres: compliance action and continuity of access

E14-2607-054 · P1 · 2026-07-02 (reporting date) · AP-linked

WHY IN THE NEWS A 2 July Telugu report describes alleged irregularities at tribal-welfare enrolment centres.

• The report identifies 412 centres under the Tribal Welfare Department.

• The headline uses cancellation, but quoted officials describe temporary suspension pending correction and compliant kits.

• Allegations include documentation, agency-management and operating-location problems; the original UIDAI order was not inspected.

STATIC CONNECTION · ORIGINAL Aadhaar enrolment, citizenship and entitlement eligibility are different issues. An agency-level suspension does not cancel every resident’s Aadhaar or prove beneficiaries committed fraud.

ANALYSIS · ORIGINAL GUIDANCE

• Corrective action should secure enrolment while providing alternative access for remote tribal residents.

• Audit operator credentials, devices, consent and document checks, with independent grievance support.

• Continuity plans are essential where identity enrolment affects access to welfare; punish proven wrongdoing without treating an entire community as suspect.

READ ACROSS MONTHS · NOTE IDS JAN25-003, E6-2509-007, VM2504-007, E12-2605-053, MY25-033, JAN25-014, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not report a permanent shutdown or final criminal guilt from the headline alone; the duration and remedial conditions remain source-limited.

MAINS PROMPT Balance enrolment integrity with inclusion in tribal areas.

Sources: [E14-AADHAAR]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Rare diseases and disability certificates: progression needs reassessment

E14-2607-055 · P1 · 2026-07-02 (reporting date) · AP-linked

WHY IN THE NEWS The Hindu’s 2 July report documents certification barriers in Vijayawada and Kurnool-related cases.

• The report includes a child with Becker muscular dystrophy whose assessed percentage remained unchanged despite deterioration.

• Another family sought certification for a progressive Huntington’s-disease case, with delays after assessment.

• SADAREM appointment/assessment processes and limited certifier awareness emerge as implementation concerns.

STATIC CONNECTION · ORIGINAL A rare-disease diagnosis and a legally assessed disability percentage are not the same determination. Progressive functional loss requires appropriate, evidence-based reassessment, not solely recognition of a disease name.

ANALYSIS · ORIGINAL GUIDANCE

• Use trained multidisciplinary assessment, accessible appointments, reasoned decisions and time-bound appeals.

• Support caregivers and home-bound patients instead of forcing repeated travel to demonstrate visible impairment.

• Pension bands in the report are examples, not a fully verified current eligibility schedule; assistance must follow the governing rules and individual assessment.

READ ACROSS MONTHS · NOTE IDS CA-039, E9-2602-041, MY25-016, E5-2508-034, E6-2509-014, E7-2511-025, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Neither every rare condition automatically establishes a fixed disability percentage nor an old certificate proves the condition cannot worsen.

MAINS PROMPT How can disability administration become responsive to progressive diseases?

Sources: [E14-DISABILITY]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

03 · Health-policy participation

Rare-disease policy dialogue: July publication, June consultation

E14-2607-056 · P2 · 2026-07-07 (reporting date) · AP-linked

WHY IN THE NEWS IORD published a stakeholder account on 7 July; its photo caption dates the conference 24 June.

• The consultation was organised through DME at Dr.NTR University of Health Sciences, Vijayawada.

• Participants discussed early diagnosis, genetic testing, provider training and coordination with patient organisations.

• The account supports a policy-development process, not proof that a final enforceable state policy was notified in July.

STATIC CONNECTION · ORIGINAL National policy direction and state service delivery are complementary. A stakeholder conference, draft consultation, Cabinet decision and notified scheme are different stages.

ANALYSIS · ORIGINAL GUIDANCE

• Patient registries need consent, privacy and a useful referral pathway rather than data collection without treatment access.

• Transparent eligibility, financing and priorities help balance expensive therapies with diagnosis, supportive care and prevention.

• Advocacy accounts are valuable for lived experience but first-state and universal-treatment claims require independent verification.

READ ACROSS MONTHS · NOTE IDS MY25-022, E5-2506-019, MAR25-019, E12-2605-032, E6-2509-024, E13-2606-036, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not date the actual conference 7 July or promise every proposed referral centre/free treatment service already operates.

MAINS PROMPT Design a participatory and financially accountable state rare-disease framework.

Sources: [E14-RARE], [E14-DISABILITY]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

04 · Tourism, heritage and urban resilience

Godavari Pushkaralu 2027 works: sanction, finance and lasting services

E14-2607-058 · P1 · 2026-07-04 (reporting date) · AP-linked

WHY IN THE NEWS A 4 July report describes preparations in Rajamahendravaram for the 2027 event.

• The minister announced ₹580 crore first-phase support, using both released and sanctioned language.

• The report cites ₹1,500 crore proposals and ₹150 crore state share within the allocation.

• Roads, drainage, drinking water, sanitation, ghats and river-pollution control feature in the proposed works.

STATIC CONNECTION · ORIGINAL Proposal cost, administrative sanction, actual release and expenditure are distinct public-finance stages. A state share within a package is not an additional package to add again.

ANALYSIS · ORIGINAL GUIDANCE

• Permanent urban benefits should outlast the festival: sewage treatment, safe access and maintained water services matter.

• Coordinate municipal, irrigation, endowment, transport and emergency-response agencies with accountable milestones.

• Underlying orders and bank flows remain unread; the story is not an expenditure audit or proof all funds reached contractors.

READ ACROSS MONTHS · NOTE IDS FEB25-018, FEB25-021, E5-2508-013, E9-2602-023, E12-2605-033, E13-2606-048, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add 580,150 and 1500 crore into a fictitious total. July preparation is not the 2027 festival itself.

MAINS PROMPT Evaluate pilgrimage investment through fiscal clarity, crowd safety and post-event public value.

Sources: [E14-PUSHKAR]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

NiVU tourism MoU: multilingual access with a phased rollout

E14-2607-057 · P1 · 2026-07-07 · AP-linked

WHY IN THE NEWS Deccan Chronicle reports the 7 July tourism partnership with Explurger.

• The pact is for three years, with 30 major destinations planned in the first year and over 100 in the wider rollout.

• QR access supports voice/text in more than 130 languages without a separate visitor app, according to the report.

• Mangalagiri temple pilots precede the wider plan; tourist analytics are part of the proposed service.

STATIC CONNECTION · ORIGINAL AI-enabled interpretation, physical accessibility and heritage authenticity are different components of visitor experience. An MoU and a pilot do not establish statewide implementation.

ANALYSIS · ORIGINAL GUIDANCE

• Curated local-language knowledge, source attribution and expert review can reduce hallucinated history and misleading ritual information.

• Minimise personal data, explain analytics and provide alternatives for visitors without phones/connectivity.

• Measure reliable answers, accessibility and user benefit, not only QR scans. The contemporary report names Explurger; a coaching source’s Xplorer label is not adopted.

READ ACROSS MONTHS · NOTE IDS E13-2606-041, MAR25-023, E13-2606-053, E13-2606-058, E5-2508-023, E11-2604-036, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The first-AI-tourism-state claim is promotional/aspirational, not an independently audited national ranking or completed deployment.

MAINS PROMPT What safeguards should govern AI interpretation at AP heritage and pilgrimage sites?

Sources: [E14-NIVU]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Seshachalam epigraphy: a July revision topic, not a July discovery

E14-2607-063 · P2 · 2026-07 (month-level index) · AP-linked

WHY IN THE NEWS The July magazine includes inscriptions independently reported on 23 June; the inscribed date is 31 July 1554.

• The accounts describe three inscriptions associated with Sadasivaraya at Sadasivakona in Tirupati's Seshachalam forest.

• Telugu, Tamil and Kannada attest a multilingual epigraphic setting.

• Temple/monastery patronage, revenue arrangements and Gudimallam links inform the regional historical interpretation.

STATIC CONNECTION · ORIGINAL The date of an inscription, modern discovery, news publication and magazine indexing are four separate chronology fields. Sadasivaraya should not be casually substituted with Krishnadevaraya.

ANALYSIS · ORIGINAL GUIDANCE

• Estampages, documented transcription and contextual interpretation support preservation and future verification.

• Forest access and heritage protection require coordinated permission, minimal disturbance and responsible tourism.

• Avoid deriving a complete picture of social life from a single royal grant or repeating an unverified earliest-Siva-temple superlative.

READ ACROSS MONTHS · NOTE IDS MAR25-023, E13-2606-053, E13-2606-058, E5-2503-001, E10-2603-037, JAN25-052, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 31 July 1554 is not a 2026 discovery date. This note is July-indexed revision; the original news was in June, even outside the magazine's stated 25 June start.

MAINS PROMPT What can multilingual temple inscriptions reveal, and what are their limits as historical evidence?

Sources: [E14-DRISHTI], [E14-HERITAGE]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

05 · Prices, employment and resource planning

Rural-employment transition in AP: a household-facing audit

E14-2607-062 · P1 · 2026-07-01 · AP-linked

WHY IN THE NEWS The July national payment/transition rules have direct state administrative implications; this is not an independent audit of AP implementation.

• Old admissible liabilities up to 30 June require verification and reconciliation.

• Verified work records/cards and ongoing works can continue under the transition arrangements.

• A household’s remaining financial-year days must account for days already availed, while wages and unemployment allowance follow different payment responsibilities.

STATIC CONNECTION · ORIGINAL A launch ceremony, notified entitlement and actual household work delivered are separate. Person-days measure labour time, not the number of permanent jobs created.

ANALYSIS · ORIGINAL GUIDANCE

• At village level, publish accessible work-demand receipts, days used/balance and outstanding-payment status.

• Check rejected bank transactions and eKYC problems through assisted mechanisms rather than silently removing workers.

• Social audits should reconcile financial records with worker testimony and physical assets, including transferred assets and ongoing works.

READ ACROSS MONTHS · NOTE IDS E13-2606-057, E7-2512-011, E12-2605-006, E7-2512-010, E7-2512-012, VM2504-007, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION No state-specific ₹300 wage-floor or 125 freshdays is certified from the national payment rules alone; exact entitlements require the relevant statute/notifications.

MAINS PROMPT How should AP make a statutory employment transition visible and accountable to workers?

Sources: [E14-TRANSITION], [E14-WAGES]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

AP inflation in the 13 July release: June prices, provisional estimates

E14-2607-059 · P1 · 2026-07-13 · AP-linked

WHY IN THE NEWS MoSPI’s primary release reports Andhra Pradesh alongside national state-level comparisons.

• AP combined headline CPI inflation for June 2026 is 5.39%; CFPI food inflation is 8.18%.

• The all-India combined figures are 4.38% and 5.32% respectively.

• The series uses 2024=100; these are year-on-year inflation rates, not index levels or month-on-month price changes.

STATIC CONNECTION · ORIGINAL A state rate reflects its consumption basket and observed price changes; it is not an estimate for every household. Higher food inflation can disproportionately affect poorer families.

ANALYSIS · ORIGINAL GUIDANCE

• Investigate crop supply, perishables, transport and retail conditions before attributing the gap to a single policy.

• Use targeted relief and supply-chain improvements while avoiding claims that one state number proves general price-control success or failure.

• State item indices can have thin samples; MoSPI explicitly advises caution. Updated final estimates may differ.

READ ACROSS MONTHS · NOTE IDS E13-2606-004, E11-2604-003, E11-2604-042, E12-2605-064, E13-2606-057, E5-2507-001, FEB25-001, APR25-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 13 July is publication date, not the reference month. Do not label 5.39% as July AP inflation or compare it to a quarterly average without explanation.

MAINS PROMPT Explain how AP can respond to food-price pressure using appropriately dated evidence.

Sources: [E14-CPI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

AP reservoir-solar appraisal: a national eligibility opportunity

E14-2607-060 · P2 · 2026-07-31 · AP-linked

WHY IN THE NEWS The 31 July floating-solar approval creates a national policy context; this is an AP application note, not a project sanction.

• The national target is 5,000 MW with co-located storage of at least two hours.

• Post-commissioning assistance and separate preparatory-study support follow different conditions.

• All states/UTs may benefit, but no named AP reservoir allocation is established by the inspected release.

STATIC CONNECTION · ORIGINAL Reservoir ownership, irrigation operations, fisheries rights, power evacuation and environmental appraisal can involve different institutions. Solar surface-area availability must be tested against seasonal water levels.

ANALYSIS · ORIGINAL GUIDANCE

• Map drawdown, anchoring, dam-safety restrictions and fishers’ access before issuing tenders.

• Assess storage safety and grid value against added capital cost, while consulting local water users.

• Tie public support to verified commissioning and ecological/service performance, not merely installed floats or signed intent letters.

READ ACROSS MONTHS · NOTE IDS E12-2605-060, E10-2603-047, VM2504-007, E5-2507-033, E6-2509-024, E10-2603-034, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not turn this analytical opportunity into a news claim that an AP reservoir already received 5000 MW or ₹5070 crore.

MAINS PROMPT Propose a screening framework for floating solar on AP reservoirs.

Sources: [E14-SOLAR]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Krishna–Godavari offshore context: security with coastal safeguards

E14-2607-061 · P2 · 2026-07-31 · AP-linked

WHY IN THE NEWS Samudra Manthan provides a 31 July national exploration context; AP-specific implications here are analytical.

• The scheme supports geological data, offshore exploratory drilling and common infrastructure.

• Seismic indications are not equivalent to commercially recoverable reserves.

• The inspected approval does not assign a quantified new production outcome or reserve discovery to AP.

STATIC CONNECTION · ORIGINAL Offshore resources require coordination of petroleum regulation, maritime safety, environment and coastal livelihoods. Reserve accretion and annual production use different concepts.

ANALYSIS · ORIGINAL GUIDANCE

• Protect navigation and fishers’ access through consultation, credible spill response and liability arrangements.

• Assess shared evacuation infrastructure and local supplier/skill opportunities without assuming drilling necessarily succeeds.

• Use project-specific EIA and cumulative coastal planning; a national energy-security objective does not eliminate statutory clearances.

READ ACROSS MONTHS · NOTE IDS E9-2602-038, E13-2606-058, E7-2512-012, E5-2501-002, VM2501-008, VM2504-007, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not mislabel a national outlay as AP investment already spent, or confuse exploration licensing with permission to ignore marine safeguards.

MAINS PROMPT Evaluate offshore-energy opportunities from the perspective of AP’s coastal communities.

Sources: [E14-OFFSHORE]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Culture & History

01 · Modern thought and public service

Vivekananda: service, universalism and national regeneration

E14-2607-051 · P2 · 2026-07-04 · National / other

WHY IN THE NEWS The July compilation recalls Vivekananda on his 4 July death anniversary.

• Born Narendra Nath Datta in 1863, he was a disciple of Ramakrishna.

• His 1893 Chicago address and Vedanta/Yoga engagement connected Indian thought to international audiences.

• The Ramakrishna Mission was founded in 1897 with a strong service orientation.

STATIC CONNECTION · ORIGINAL Religious universalism, social service and modern nationalism overlap but are not identical ideas. A historical thinker’s influence should be located in nineteenth-century colonial society.

ANALYSIS · ORIGINAL GUIDANCE

• Use education, dignity and service as interpretive themes, with specific institutions and works rather than motivational quotations of uncertain origin.

• Public-service ethics can connect care for vulnerable people with practical institutional action.

• Avoid treating one thinker as the sole cause of independence or erasing internal diversity in Indian reform traditions.

READ ACROSS MONTHS · NOTE IDS E5-2505-004, FEB25-022, E5-2508-017, E5-2508-030, E7-2512-010, E7-2512-013

PRELIMS CAUTION An anniversary is not a new historical discovery. Different Ramakrishna institutions and their founding dates should not be casually conflated.

MAINS PROMPT Discuss the relation between spiritual universalism and social service in Vivekananda’s thought.

Sources: [E14-DRISHTI]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

Awards & Sports

01 · Sports participation and athlete development

Khelo India revamp: development pathway, not a medal forecast

E14-2607-031 · P2 · 2026-07-31 · National / other

WHY IN THE NEWS The Cabinet approved expanded Khelo India and ANSF support on 31 July.

• Combined outlay is ₹36,441 crore for FY 2026–27 to FY 2030–31.

• Feeder Schools, Utkrishta Vidyalayas and Emerging Khelo India Athletes strengthen the talent pathway.

• A National Coach Accreditation Board and unified digital sports platform are envisaged alongside support for women, para-athletes and indigenous sports.

STATIC CONNECTION · ORIGINAL Grassroots participation, talent identification, high-performance training and competition exposure are different stages. ANSF assistance and Khelo India are not identical components even when the outlay is combined.

ANALYSIS · ORIGINAL GUIDANCE

• A pathway needs safe facilities, nutrition, trained coaches and school continuity, particularly for disadvantaged athletes.

• Transparent selection, safeguarding, injury support and accessible para-sport opportunities prevent institutional expansion from reproducing exclusion.

• AP should track regular participation and progression, not promise medals merely from sanctioned centres or digital registrations.

READ ACROSS MONTHS · NOTE IDS E5-2507-017, E8-2601-026, E5-2507-019, FEB25-021, E11-2604-044, E12-2605-043, E5-2508-023, E5-2507-018 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The end-year is 2030–31; PRS’s 2023–31 is a typo. An Olympic bid is not proof hosting rights were awarded.

MAINS PROMPT Design an equitable athlete-development ecosystem from school to elite sport.

Sources: [E14-KHELO], [E14-PRS]

Evidence access: Source-access registry records the passages actually read and primary/secondary limits. Static connections, analysis and exam prompts are original guidance.

July 2026 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

JUL26-01. What is the safest July snapshot of the public examinations amendment?

A. Parliamentary passage is recorded, but assent and commencement need separate verification.

B. Introduction proves commencement.

C. It applies identically to every classroom test.

D. Higher penalties prove higher conviction rates.

JUL26-02. A proposed Supreme Court strength of 37 judges excluding the CJI means what total including the CJI?

A. 37

B. 41

C. 38

D. 34

JUL26-03. What best distinguishes TReDS discounting from a subsidy?

A. It replaces all buyer verification.

B. It finances accepted receivables rather than automatically forgiving the borrower’s debt.

C. It is an unconditional fiscal grant.

D. It cancels every disputed invoice.

JUL26-04. Which statement correctly describes the July rural-employment payment rules?

A. Cash must always be paid without an order.

B. Unemployment allowance is necessarily paid entirely by the Union.

C. A generated payment order guarantees successful credit.

D. DBT to bank/post-office accounts is the norm, with a Union exemption by order possible in extraordinary circumstances.

JUL26-05. A household has already used some employment days before transition. What is the sound principle?

A. The household automatically gets a fresh full annual entitlement in addition.

B. Old wages are extinguished.

C. Days used are accounted for when determining the remaining financial-year entitlement.

D. The 180 day certificate deadline becomes a universal wage-payment grace period.

JUL26-06. Which is not equivalent to wafer fabrication?

A. Processing wafers in a fabrication facility

B. Producing semiconductor devices on wafers

C. ATMP/OSAT packaging and testing

D. Manufacturing wafers in a fab

JUL26-07. Why should mobile-phone production not be equated with domestic value addition?

A. Export value never includes imported inputs.

B. All assembled products are entirely imported finished goods.

C. Gross sales automatically measure net domestic content.

D. Domestic assembly may still use imported components and foreign-owned IP.

JUL26-08. What legislative stage does the reviewed July birth-registration Bill account report?

A. Lok Sabha passage on 31 July, not passage by both Houses

B. Enactment of every proposed judicial-verification clause

C. Automatic citizenship for every registered birth

D. A general permission to avoid registration for two years

JUL26-09. Under the draft foreign-investment framework, how is the 10% threshold described?

A. FDI only above 50% in every entity

B. FDI at 10% or more and FPI below 10% in company/LLP equity

C. Exactly 10% is always FPI

D. Every foreign investment is debt

JUL26-10. The proposed ₹25 lakh PMS ticket applies to which category in the consultation?

A. All retail mutual-fund purchases

B. Every PMS without exception

C. A proposed mutual-fund-only portfolio-management category

D. The net worth of every client

JUL26-11. Which insurance-governance principle is described in the July regulatory review?

A. Policyholder money is unrestricted shareholder capital.

B. The education fund pays every disputed claim in full.

C. Every merger is automatically approved.

D. Policyholder funds cannot meet liabilities arising from the specified amalgamation.

JUL26-12. The Securities Markets Code Committee recommendations should be treated as what?

A. Proof all exchanges have unlimited regulatory power

B. Scrutiny proposals on delegation, offences and appeals, not automatically enacted law

C. A new court judgment annulling all SEBI orders

D. Automatic suspension of every SEBI order

JUL26-13. Which qualification matters when applying the reviewed waterfront policy to Andhra Pradesh?

A. Renewal without tender always means zero price.

B. Identify whether the port is a Union major port before applying that framework.

C. Every AP port is administered exclusively by the Union.

D. The policy transfers permanent land ownership to every company.

JUL26-14. What exact PM-KISAN continuation outlay does the inspected primary release specify?

A. ₹3.15 lakh crore

B. ₹36,441 crore

C. ₹6,000 crore

D. ₹3.2 lakh crore exactly

JUL26-15. Which is the most defensible digital-PDS evaluation?

A. Every deleted card proves fraud.

B. Check eligible inclusion, failed authentication and actual food receipt alongside database coverage.

C. Aadhaar seeding guarantees nutrition adequacy.

D. A committee report automatically replaces food with cash nationwide.

JUL26-16. When is distribution under the reviewed revised broken-rice norms scheduled to begin?

A. Kharif marketing season 2027–28

B. Only after 2047

C. All July 2026 deliveries immediately

D. The first day of calendar 2025

JUL26-17. Which correctly captures the 29 July retrospective-EC conclusions?

A. Every existing EC automatically became void.

B. All pending applications must automatically receive EC.

C. The 2017 limited notification was upheld; the 2021 perpetual OM was quashed prospectively.

D. Every future project can start without prior EC.

JUL26-18. A 5,000 MW power scale with two-hour storage corresponds to what energy amount?

A. 10,000 MW of annual electricity

B. 5,000 MW per hour

C. 2,500 MWh

D. 10,000 MWh

JUL26-19. What is not established merely by offshore exploration approval?

A. Support for seismic information

B. A policy framework for exploration

C. The possibility of unsuccessful wells

D. That an expected resource addition is already commercially produced oil

JUL26-20. What is the correct period for the combined ₹36,441 crore Khelo India/ANSF approval?

A. Only calendar 2026

B. FY 2026–27 to FY 2023–31

C. FY 2026–27 to FY 2030–31

D. FY 2035–36 to FY 2040–41

JUL26-21. Which is the sound constitutional approach to internet restrictions?

A. Any protest is by itself sufficient ground.

B. Test legal authority, necessity, proportionality, scope, duration and less restrictive alternatives.

C. Publication of reasons is never relevant.

D. Indefinite shutdowns are automatically permissible.

JUL26-22. Which distinction is correct for vital statistics?

A. Every registered death necessarily has a medical cause certificate.

B. CRS continuously registers events; SRS supplies sample-based demographic estimates.

C. The 2024 report measures only July 2026 births.

D. CRS is only a five-year opinion poll.

JUL26-23. White Rabbit timing should not be confused with which claim?

A. That India changed its time zone or achieved universally invulnerable timing

B. Traceability to a maintained time standard

C. Precision time transfer over fibre

D. Timing needs in financial and telecom systems

JUL26-24. Which quantum-computing statement is scientifically sound?

A. All qubit platforms use identical temperatures.

B. Every quantum computer is faster on every task.

C. Entanglement sends usable messages faster than light.

D. Superposition does not allow simply reading every possible answer, and logical reliability differs from raw qubit count.

JUL26-25. Which treatment of the Hero investment report is sound?

A. The site must be the well-known Madanapalle town.

B. Separate the ₹750 crore parts centre from the wider ₹3,200 crore expansion announcement and verify overlap.

C. Both sums prove completed July expenditure.

D. Projected jobs are already verified permanent employment.

JUL26-26. The reported Union Bank SHG decision in AP is best described as what?

A. A processing/inspection fee waiver, not principal or all-interest cancellation

B. Cancellation of every woman’s debt at every bank

C. A waiver applying only to corporate bonds

D. A universal interest-free loan statute

JUL26-27. What caution is necessary about the 412 tribal Aadhaar centres report?

A. The headline says cancellation, while quoted officials describe temporary suspension pending correction.

B. All allegations were finally proved in court.

C. Every beneficiary’s Aadhaar was permanently cancelled.

D. Aadhaar conclusively establishes citizenship.

JUL26-28. Which accurately describes the reported NiVU rollout?

A. A mandatory downloaded app for every visitor

B. Proof every generated historical answer is correct

C. A phased three-year Explurger partnership, with 30 sites in the first year and over 100 planned

D. A completed rollout at every AP destination

JUL26-29. AP’s 5.39% headline CPI and 8.18% food inflation in the 13 July release refer to which period?

A. June 2026 year-on-year, provisional

B. July 2026 month-on-month, final

C. The CPI index level itself

D. An annual GDP growth rate

JUL26-30. What is the correct interpretation of the 15% skill-guarantee figure?

A. The only guarantee percentage for every borrower

B. A promise that 15% of every course fee is a grant

C. An automatic borrower interest subsidy

D. An aggregate relevant-year claim payout cap, not individual default cover

Explained answer key

JUL26-01. A Legislative stages and implementation outcomes are distinct. The reviewed source records passage on 30 July, not an independently checked commencement notification. [E14-2607-001]

JUL26-02. C Adding the single CJI position gives 38. A replacement Bill should not be counted as another four posts in addition to the May Ordinance increase. [E14-2607-002]

JUL26-03. B Invoice acceptance, financier participation and financing cost matter; platform registration alone does not prove prompt payment. [E14-2607-003]

JUL26-04. D The Gazette allows an extraordinary exemption. Wages and unemployment allowance have distinct responsibilities and actual receipt must be checked. [E14-2607-006]

JUL26-05. C The transition preserves a balance-day approach and verified old liabilities; accounting deadlines are not a licence to delay every wage. [E14-2607-007]

JUL26-06. C Packaging/testing is an important but distinct value-chain stage. Approved units are also different from commissioned commercial production. [E14-2607-008]

JUL26-07. D Value-chain analysis separates assembly, component sourcing and design/IP ownership; incentives have differentiated eligibility conditions. [E14-2607-009]

JUL26-08. A One-house passage and proposed delayed-registration procedures do not establish final enactment or citizenship status. [E14-2607-011]

JUL26-09. B These are draft definitions. They should not be substituted for the reviewed 2019 baseline, especially its treatment of unlisted-company equity. [E14-2607-012]

JUL26-10. C The consultation also proposes ₹2 crore applicant net worth for that category. Client investment and manager net worth are different, and proposals are not final rules. [E14-2607-013]

JUL26-11. D Ring-fencing and board assessment of adverse policyholder effects are distinct from proof that any particular merger complied. [E14-2607-014]

JUL26-12. B Committee scrutiny can inform legislation. Clear delegation boundaries and independent appeals must be distinguished from final statutory text. [E14-2607-015]

JUL26-13. B Major and non-major ports have different governance. Reviewed renewal pricing uses market/existing-revenue safeguards, not free unconditional transfer. [E14-2607-016]

JUL26-14. A The Cabinet release gives ₹3.15 lakh crore for FY 2026–27 to FY 2030–31. PRS rounds it. The annual eligible-family benefit remains ₹6,000 in three instalments. [E14-2607-019]

JUL26-15. B Digitisation and entitlement fulfilment are different. Administrative deletions and authentication need verification and accessible correction mechanisms. [E14-2607-021]

JUL26-16. A Raw-rice broken content moves 25% to 10% and parboiled 16% to 5%. These are quality norms, not reductions in household ration kilograms. [E14-2607-022]

JUL26-17. C The Court preserved existing ECs subject to individual challenge and barred fresh applications under the impugned instruments. Prior clearance remains the norm and pending cases require specific directions. [E14-2607-023]

JUL26-18. D Power multiplied by duration gives energy. The scheme’s roughly 700 MW baseline refers to floating PV, not all Indian solar capacity. [E14-2607-024]

JUL26-19. D Exploration estimates, discoveries, recoverable reserves and production are different stages. Cabinet approval is not a realised state-specific discovery. [E14-2607-025]

JUL26-20. C The primary PIB release corrects the PRS end-year typo. Funding approval and athlete-development targets are not completed outcomes or awarded Olympic hosting rights. [E14-2607-031]

JUL26-21. B Internet use engages speech and profession rights. A statutory public-order response must satisfy lawful predicates and procedural safeguards. [E14-2607-033]

JUL26-22. B Completeness, timeliness and cause-of-death certification measure different qualities. An estimated denominator also affects completeness ratios. [E14-2607-036]

JUL26-23. A IST remains UTC+5:30. Demonstration, national rollout and security assurance are separate issues; redundancy and calibration remain important. [E14-2607-044]

JUL26-24. D Algorithm design, measurement, noise and error-correction overhead constrain useful capability. Avoid marketing claims based solely on physical-qubit totals. [E14-2607-048]

JUL26-25. B The report locates this Madanapalle in Satyavedu mandal, Tirupati. Foundation, expansion intent, commercial operation and realised jobs are distinct. [E14-2607-052]

JUL26-26. A The Telugu report concerns specified SHG charges. The original bank circular and headline savings assumptions were not independently reconciled. [E14-2607-053]

JUL26-27. A Original UIDAI orders were not read. Agency compliance action must be distinguished from resident identity validity and legal guilt. [E14-2607-054]

JUL26-28. C The report describes QR-based voice/text access and Mangalagiri pilots. A target is not completion and AI output needs curation and privacy safeguards. [E14-2607-057]

JUL26-29. A The primary release uses 2024=100. Publication month, reference month, rate and index level must remain distinct. [E14-2607-059]

JUL26-30. D PRS describes individual cover 75% up to ₹4 lakh and 70% above ₹4 lakh to ₹7.5 lakh. Portfolio ceiling, individual guarantee and borrower repayment are different. [E14-2607-065]

Mains answer laboratory

Original planning aids, not official answers or predictions. Preserve historical dates, legal stages and source limitations.

Examination integrity requires more than higher punishments.

Study reference: E 14-2607-001

1. Anchor parliamentary passage on 30 July, separately checking assent/commencement before asserting operative law.

2. Map secure question production, delivery, centre management, vendor contracts and evidence preservation.

3. Balance investigative capacity and faster trials with competent counsel, judicial independence and reliable digital forensics.

4. For APPSC, distinguish central statutory scope from the state recruitment framework and avoid assuming identical jurisdiction.

5. Measure leak incidence, timely reasoned disposal, candidate redress and vendor accountability rather than only maximum penalties.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

A rural-employment transition must preserve both rights and records.

Study reference: E 14-2607-007

1. Anchor 1 July payment and transitional rules; old liabilities are verified up to 30 June.

2. Explain carry-forward works/cards, used-days adjustment, assets and auditable liability reconciliation.

3. Distinguish wages, unemployment allowance, household entitlement and accounting-certificate deadlines.

4. For AP, propose assisted eKYC/payment correction, work-demand receipts and village-level publication of used/balance days.

5. Use social audit to link records, actual worker receipts and physical assets without publishing excessive personal data.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

Technological sovereignty depends on value-chain capability, not factory announcements.

Study reference: E 14-2607-008

1. Anchor 15 July Semicon 2.0 and mobile-manufacturing approvals, separating approved outlay from expenditure.

2. Map design/IP, equipment/materials, fabs, packaging/testing, R&D and talent as complementary stages.

3. Compare gross assembly/export values with domestic content, productivity and commercial sustainability.

4. Discuss subsidy cost, water/power demand, environmental compliance, trusted partnerships and local supplier learning.

5. For AP, propose skill/supplier linkages without inventing a new fab approval; evaluate incremental capability rather than announcement counts.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

Environmental regularisation must not become a substitute for prior clearance.

Study reference: E 14-2607-023

1. Anchor 29 July judgment: limited 2017 notification upheld, perpetual 2021 OM quashed prospectively.

2. Explain legal hierarchy: administrative instruction cannot supplant delegated legislation; prior EC remains normative.

3. Preserve existing ECs subject to individual challenge, specific treatment of pending cases and bar on fresh applications under the impugned instruments.

4. Discuss moral hazard, public interest, legal certainty and the limits of administrative amnesties; do not claim every pending project is cleared.

5. For AP infrastructure, recommend project-specific compliance chronology, transparent appraisal and cumulative-impact monitoring.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

Floating solar is a joint energy–water governance challenge.

Study reference: E 14-2607-024

1. Anchor 31 July approval,5000 MW with two-hour storage,₹5070 croreoutlay and post-commissioning support.

2. Explain power versus energy:5000 MW × 2 hours=10000 MWh;700 MW baseline means floating PV only.

3. Assess reservoir drawdown, bathymetry, anchoring, fisheries, ecological effects, dam safety and grid evacuation.

4. For AP, identify responsible reservoir/power institutions and consult water users; no named reservoir allocation is verified.

5. Use feasibility, safe storage, measured commissioning and lifecycle performance rather than theoretical potential as the investment test.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

Disability certification should respond to progressive functional loss.

Study reference: E 14-2607-055

1. Anchor 2 July reporting on BMD/Huntington cases and reassessment delays, not a complete eligibility-law audit.

2. Distinguish diagnosis, functional impairment assessment, certificate and pension entitlement.

3. Examine travel, appointment, expertise, digital payment/booking and appeal barriers for home-bound patients and caregivers.

4. Recommend trained multidisciplinary boards, accessible reassessment, reasoned decisions and time-bound remedies under applicable law.

5. Connect rights-based welfare with dignity and measurable waiting-time/appeal outcomes; avoid unsupported automatic-percentage promises.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

AI-enabled tourism needs cultural accountability and privacy by design.

Study reference: E 14-2607-057

1. Anchor 7 July Explurger/NiVU partnership: phased 30 sites in year one, over 100 planned in three years.

2. Explain potential multilingual access through QR/voice/text, while separating pilot, MoU and completed deployment.

3. Assess historical accuracy, local expert curation, unsafe advice, accessibility, low connectivity and hallucinations.

4. Limit analytics to necessary data with clear notices, secure retention and human correction; preserve non-smartphone access.

5. Measure answer reliability and visitor inclusion rather than first-state publicity or scan counts.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

State inflation analysis must preserve the reference month and distributional context.

Study reference: E 14-2607-059

1. Anchor 13 July primary release forJune: APheadline 5.39%,CFPI 8.18%; India 4.38% and 5.32%,provisional.

2. Distinguish index levels, year-on-year rates, month-on-month changes and quarterly averages under the 2024 base.

3. Examine food supply, storage, logistics, perishability and unequal household expenditure burdens.

4. For AP, combine transparent market monitoring, targeted support and supply-chain measures without attributing the entire gap to one cause.

5. Conclude with revised data checks and equity-sensitive outcomes rather than headline inflation alone.

Conclusion test: Identify the institution, safeguard and outcome; separate recommendations from established facts.

Source register

Evidence access is recorded explicitly. Most non-PRS references were inspected as source extracts; primary full-text review remains open for them.

[E14-PRS] PRS · July 2026 Monthly Policy Review

https://prsindia.org/policy/monthly-policy-review/july-2026

Substantive review chunks 0–8 of 13 read; bibliography not completely read. Primary instruments not all inspected. Corrections: PM-KISAN exact outlay 3.15 lakh crore, Khelo end-year 2030–31, floating rather than all solar capacity. Foreign-visit date/title inconsistencies withheld.

[E14-DRISHTI] Drishti IAS · Saraansh July 2026 public compilation

https://www.drishtiias.com/images/pdf/Saraansh%20July%202026.pdf

118-page public PDF retrieved temporarily. Coverage expressly 25 June–24 July. Contents and selected passages on PDF pages 6–8,12–15,45–46,52–53,62–64,68,77–81,85–87,92–93,95–97 read (some pages partial). Not a complete issue review. Seshachalam discovery actually reported 23 June; ISP preview and release passages differ; precise unverified statistics withheld. Quantum superposition does not allow reading every answer; neonatal trial age definitions do not redefine neonatal period. Full text/PDF not redistributed.

[E14-SEMICON] PIB · Semicon 2.0 approval

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2284796&reg=48&lang=1

Complete substantive release read in opening fetch chunk; duplicated release/footer not necessarily read. Approval and expected outcomes are not completed expenditure or delivered results.

[E14-MOBILE] PIB · Mobile Phone Manufacturing Scheme approval

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2284792&reg=48&lang=1

Complete substantive release read in opening fetch chunk; duplicated release/footer not necessarily read. Approval and expected outcomes are not completed expenditure or delivered results.

[E14-SOLAR] PIB · PM Surya Sarovar approval

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2292433&reg=48&lang=1

Complete substantive release read in opening fetch chunk; duplicated release/footer not necessarily read. Approval and expected outcomes are not completed expenditure or delivered results.

[E14-OFFSHORE] PIB · Samudra Manthan approval

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2292445&reg=48&lang=1

Complete substantive release read in opening fetch chunk; duplicated release/footer not necessarily read. Approval and expected outcomes are not completed expenditure or delivered results.

[E14-KHELO] PIB · Khelo India and ANSF approval

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2292439&reg=48&lang=1

Complete substantive release read in opening fetch chunk; duplicated release/footer not necessarily read. Approval and expected outcomes are not completed expenditure or delivered results.

[E14-PMK] PIB · PM-KISAN continuation

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2292437&reg=48&lang=1

Complete substantive release read in opening fetch chunk; duplicated release/footer not necessarily read. Approval and expected outcomes are not completed expenditure or delivered results.

[E14-CPI] MoSPI · CPI June 2026 release, 13 July

https://www.mospi.gov.in/uploads/latestreleasesfiles/1783939158764-Press%20Release%20of%20CPI%20for%20June%202026.pdf

Opening chunk 0 of 3 read including national highlights and state table: 2024 base, 4.38% headline/5.32% CFPI, AP 5.39%/8.18%. June reference month, July publication; provisional. State item indices require thin-sample caution.

[E14-WAGES] Gazette · VB–G RAM G payment rules, 1 July

https://egazette.gov.in/WriteReadData/2026/273989.pdf

Opening chunk 0 of 2 read: complete Hindi substantive rules and English through payment provisions. Bank/post-office DBT, central exception by order, state responsibility for unemployment allowance. Footer/remaining English duplication not fully read.

[E14-TRANSITION] Gazette · VB–G RAM G transitional provisions, 1 July

https://egazette.gov.in/WriteReadData/2026/273988.pdf

Opening chunk 0 of 3 read, Hindi provisions on liabilities, 180+90 days, works/cards, balance-day entitlement and assets; English duplication not all read. Translation used for original English notes; no complete implementation audit.

[E14-SKILL] Gazette · modified skill-credit guarantee scheme, 9 July

https://egazette.gov.in/WriteReadData/2026/274551.pdf

Opening chunk 0 of 8 read, Hindi loan range 5000–750000, interest caps, SIDH/course definitions and six/twelve-month lock-in. Tiered cover and aggregate claim cap cross-checked against PRS, not later Gazette pages. Effective notification date distinguished from Gazette heading/upload.

[E14-FEMA] RBI-hosted draft Foreign Investment Rules

https://rbidocs.rbi.org.in/rdocs/Content/PDFs/DRAFTFRULES21072026A745983B20174E018AAEEC1ED26D36FE.PDF

Opening chunk 0 of 3 read: blank notification date, draft definitions of eligible entities, equity, FDI/FPI and RBI/DPIIT roles. Annexures not fully read. Draft is not operative replacement of 2019 Rules.

[E14-COURT] Supreme Court · retrospective EC judgment, 29 July

https://api.sci.gov.in/supremecourt/2023/50009/50009_2023_1_1501_72722_Judgement_29-Jul-2026.pdf

80-page official PDF retrieved in memory; final five pages 76–80 read including conclusions (ii)–(x), prospective invalidation, existing ECs subject to individual challenge, no fresh applications and Article 142 reservation. Earlier reasoning and paragraph 79 conditions not fully read; summary also follows PRS. Not a claim every pending case automatically gets clearance.

[E14-HERO] ETV Bharat · Hero parts centre and expansion, 2 July

https://www.etvbharat.com/en/business/hero-motocorp-to-invest-rs-3200-crore-in-andhra-pradesh-and-create-4000-additional-jobs-enn26070205292

Entire substantive English report read in chunk 0. Foundation on Wednesday 1 July. 750 crore centre distinct from 3200 crore expansion; report contains conflicting current-capacity figures, withheld. Madanapalle here is in Satyavedu mandal, Tirupati, not the better-known Madanapalle town.

[E14-SHG] ETV Bharat · Union Bank waives SHG loan charges, 1 July

https://www.etvbharat.com/te/state/union-bank-of-india-waives-processing-and-inspection-charges-on-dwcra-shg-loans-in-ap-aps26070105080

Entire substantive Telugu report read; original English summary. Processing/inspection fee waiver not principal/interest waiver. Claimed 93500 three-year example and aggregate savings not reproduced because full fee/tax assumptions were not independently reconciled; bank circular not read.

[E14-AADHAAR] ETV Bharat · 412 tribal Aadhaar centres, 2 July

https://www.etvbharat.com/te/state/irregularities-at-aadhaar-centers-uidai-cancels-412-tribal-centers-aps26070200651

Entire substantive Telugu report read; headline says cancellation, quoted departmental account says temporary suspension pending compliant kits. Alleged irregularities not adjudicated guilt; UIDAI original order not read.

[E14-DISABILITY] The Hindu · rare disease disability certification, 2 July

https://www.thehindu.com/news/national/andhra-pradesh/hurdles-persist-for-persons-with-rare-diseases-seeking-disability-certification/article71170223.ece

Entire substantive reporting read in chunk 0, including BMD and Huntington cases, SADAREM, assessment delays and DME response. Pension bands are reported examples, not independently inspected current eligibility rules.

[E14-RARE] IORD · AP stakeholder consultation account, published 7 July

https://www.rarediseases.in/andhra-pradesh-state-policy-rare-diseases-stakeholder-conference/

Complete substantive participant account read. Photo caption identifies conference as 24 June 2026; 7 July is publication date. State policy is consultation, not proved final notification. First-state claim is advocacy attribution, not independently established ranking.

[E14-NIVU] Deccan Chronicle · NiVU tourism MoU, 7 July

https://www.deccanchronicle.com/southern-states/andhra-pradesh/ap-to-be-first-ai-powered-tourism-state-1969165

Complete substantive report read: three-year Explurger pact, 30 sites first year, over 100 planned, voice/text over 130 languages, QR/no app, Mangalagiri pilot. Search/page timezones differ; event Tuesday 7 July. Not Xplorer: coaching compilation naming differs. First-AI-state is ministerial aspiration, not audited completion.

[E14-PUSHKAR] Deccan Chronicle · first-phase Godavari Pushkaralu works, 4 July

https://www.deccanchronicle.com/southern-states/andhra-pradesh/ap-release-580-crore-for-first-phase-of-2027-godavari-pushkaralu-works-1968431

Complete substantive report read. Uses released/sanctioned 580 crore with 150 crore state share and 1500 crore proposals; underlying orders, cash flows and later conflicting 585 crore claim not reconciled. Do not add overlapping amounts or claim audited utilisation.

[E14-HERITAGE] The Hindu · Seshachalam inscriptions, 23 June reporting

https://www.thehindu.com/news/national/andhra-pradesh/vijayanagara-kings-16th-century-inscriptions-come-to-light-in-the-seshachalam-forest-tirupati/article71136771.ece

Detailed search-result article extract read, not direct full page. June 23 publication contradicts simple July-magazine event dating. Three languages and 1554 epigraph date used as attributed magazine-indexed revision; earliest-Siva-temple superlative withheld.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
