CIVILS ATLAS / RESEARCH EDITION 19

March 2026

Understand the news.
Retain what matters.

50 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Parliament and scrutiny

Budget-session resumption and legislative stages

E10-2603-001 · P1 · 2026-03-09 · National / other

WHY IN THE NEWS Parliament resumed its Budget-session sittings on 9 March.

• The March review covers Budget scrutiny and a substantial legislative programme.

• Introduction, committee examination and passage by each House are separate stages.

• An ordinary bill does not become operative merely because one House passes it.

STATIC CONNECTION · ORIGINAL Articles 107–111 govern ordinary legislation; Money Bills have a distinct constitutional route.

ANALYSIS · ORIGINAL GUIDANCE

• A committee reference can improve technical scrutiny but is not a veto or enactment.

• For revision, maintain a stage/date table rather than assigning every bill a single “passed” label.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-004, E10-2603-041, E10-2603-047 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not repeat the review’s incorrect 1 February session-commencement claim or treat resumption as a new session’s first day.

MAINS PROMPT How can parliamentary scrutiny improve legislation without confusing delay with deliberation?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Identity and equality

Transgender amendment: parliamentary-stage snapshot

E10-2603-004 · P1 · 2026-03-25 · National / other

WHY IN THE NEWS The amendment was introduced 13 March and passed the Lok Sabha on 24 March and Rajya Sabha on 25 March.

• PRS records a change from the 2019 Act’s broad definition to listed categories.

• The bill removes the express self-perceived-identity provision and adds medical-board involvement in certification.

• It also introduces or strengthens offences involving forced identity, injury, begging and servitude.

STATIC CONNECTION · ORIGINAL Gender identity, sexual orientation and variations in sex characteristics are distinct concepts; Articles 14, 19 and 21 frame rights analysis.

ANALYSIS · ORIGINAL GUIDANCE

• Evaluate administrative verification against dignity, privacy, inclusion and access to welfare.

• The NALSA self-identification framework is an analytical connection, not proof that a particular challenge has already been decided.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-041, E10-2603-047 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This note verifies parliamentary passage, not assent/commencement from the Gazette. Do not call every provision operative from 25 March or equate orientation with identity.

MAINS PROMPT Evaluate identity certification through equality, autonomy and accountable welfare administration.

Sources: [E10-TRANS], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

03 · Regulatory reform

Jan Vishwas 2026: decriminalisation is not deregulation

E10-2603-007 · P1 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March review covers the replacement Jan Vishwas bill.

• The introduced 2026 proposal covers 79 Central Acts and 784 provisions, according to the primary 27 Marchrelease; this corrects the earlier PRS-derived 80 Actcount.

• It replaces the earlier 2025 bill rather than operating as a second parallel enacted code.

• Changes to penalties and adjudication require provision-by-provision reading.

STATIC CONNECTION · ORIGINAL Decriminalisation can replace imprisonment/criminal prosecution with monetary or administrative enforcement while retaining duties.

ANALYSIS · ORIGINAL GUIDANCE

• Reduced fear of prosecution can aid compliance, but deterrence depends on penalty design and adjudicatory independence.

• Separate minor procedural lapses from conduct causing serious public harm; uniform leniency is not automatically proportionate.

PRELIMS CAUTION A proposed change across 80 Acts does not repeal those Acts or eliminate all penalties. Parliamentary introduction is not commencement.

MAINS PROMPT What principles should guide proportionate regulatory enforcement?

Sources: [E10-PRS], [E11-JAN]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original. Edition 11 checked the primary introduction release and corrected the Act count.

04 · Foreign-contribution regulation

FCRA amendment: asset administration and due process

E10-2603-008 · P1 · 2026-03-25 · National / other

WHY IN THE NEWS A Foreign Contribution (Regulation) amendment bill was introduced on 25 March.

• The proposal concerns administration of foreign contributions and assets in specified registration situations.

• The review describes a designated-authority mechanism for affected funds/assets.

• The relevant safeguards and triggers belong to the proposed text and eventual law, not a blanket transfer of all NGO property.

STATIC CONNECTION · ORIGINAL Registration, renewal, suspension and cancellation have different legal consequences; natural justice requires notice and a reasoned decision.

ANALYSIS · ORIGINAL GUIDANCE

• Regulation must address diversion risks without arbitrarily disrupting legitimate service delivery.

• Asset custody needs transparent accounting, continuity of charitable purpose and review mechanisms.

PRELIMS CAUTION A bill is not an operative authority to confiscate every association’s domestic or foreign-funded assets.

MAINS PROMPT Balance financial integrity, associational freedom and continuity of public-benefit work.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Economy

01 · External-account release

Q3 BoP: a March release about October–December

E10-2603-002 · P1 · 2026-03-02 · National / other

WHY IN THE NEWS RBI released preliminary Q3 FY 2025–26 data on 2 March.

• The current-account deficit was US$13.2 billion, or 1.3% of GDP, in October–December 2025.

• The merchandise deficit was US$93.6 billion, partly offset by US$57.5 billion net services receipts.

• Reserves depleted US$24.4 billion on a BoP basis; April–December CAD was a different aggregate: US$30.1 billion, or 1.0% of GDP.

STATIC CONNECTION · ORIGINAL The current account includes goods, services, primary income and secondary income; it is not the goods balance alone.

ANALYSIS · ORIGINAL GUIDANCE

• Services and remittances cushion, but do not necessarily eliminate, the merchandise gap.

• Quarterly net FDI outflow of US$3.7 billion coexisted with April–December net FDI inflow of US$3.0 billion: period matters.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A BoP-basis reserve flow is not identical to the change in the published reserve stock including valuation effects. These are preliminary estimates.

MAINS PROMPT Assess how energy-price shocks transmit through trade, inflation and external financing.

Sources: [E10-BOP], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Industrial-production reference period

IIP sectors: distinguish the review month from the quarter

E10-2603-003 · P2 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March policy review summarised Q3 FY 2025–26 industrial production.

• Overall IIP grew 5.3% in October–December 2025 over the corresponding quarter.

• Manufacturing grew 6.3% and mining 4.1%.

• Electricity production contracted 0.9% in that comparison.

STATIC CONNECTION · ORIGINAL IIP is a volume index of selected industrial production, not the same measure as GDP value added.

ANALYSIS · ORIGINAL GUIDANCE

• A positive aggregate can conceal a contracting component because sector weights differ.

• Relate electricity, factory output and mining to supply conditions without inferring causation from three growth numbers alone.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are not March 2026 monthly growth rates and do not measure the services sector.

MAINS PROMPT Why should industrial-policy analysis examine sectoral composition rather than only aggregate growth?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

03 · FDI and beneficial ownership

Land-border FDI review: ownership, control and commencement

E10-2603-009 · P1 · 2026-03-15 · National / other

WHY IN THE NEWS DPIIT issued Press Note 2 on 15 March.

• The note links beneficial-owner identification to PMLA/PML Rules and expressly includes control tests.

• For companies, the review describes the greater-than-10% ownership threshold; entity-specific rules and ultimate effective control also matter.

• The note states that the decision takes effect from the FEMA notification, and retains sectoral caps, entry routes and reporting requirements.

STATIC CONNECTION · ORIGINAL A beneficial owner is not necessarily the immediate shareholder; ownership chains can separate legal title from ultimate control.

ANALYSIS · ORIGINAL GUIDANCE

• Screening should identify aggregate indirect interests and effective control, not simply a single shareholder below a percentage.

• Predictable rules can lower uncertainty while retaining security review for controlled investment.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not assert that every sub-10% interest qualifies for unrestricted automatic entry, or that the press-note date itself proves legal commencement.

MAINS PROMPT How can investment screening remain transparent while addressing indirect-control risks?

Sources: [E10-FDI], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

04 · Export-remission mechanisms

RoDTEP restoration amid external disruption

E10-2603-010 · P1 · 2026-03-23 · National / other

WHY IN THE NEWS The March review records restoration of RoDTEP rates and value caps.

• The earlier restriction to 50% of applicable rates/caps was removed in March’s reviewed decision.

• RoDTEP remits specified embedded taxes and duties not refunded through other mechanisms.

• The policy response was linked to exporter pressure amid West Asian trade disruption.

STATIC CONNECTION · ORIGINAL Remission of embedded levies differs from reimbursing every business cost or promising a guaranteed export profit.

ANALYSIS · ORIGINAL GUIDANCE

• Relief can ease cash-flow pressure but does not remove freight, insurance or demand shocks.

• Track eligibility, notified product schedules and claim procedure separately from the general announcement.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Restoration is not a uniform 50% subsidy on the invoice value of every export.

MAINS PROMPT Assess tax remission as one component of export resilience.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

05 · Paperless trade — carry-forward

Digital Trade Facilitation: February draft, March follow-through

E10-2603-011 · P1 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March review discusses a draft circulated by DGFT on 9 February; this is an explicitly dated carry-forward supplement.

• Trade Notice 24/2025–26 sought feedback on the Digital Trade Facilitation Bill, 2026.

• The draft proposes recognition of compliant electronic trade documents and trusted digital verification.

• It addresses control of electronic documents and cross-border recognition/trust services; it is not merely scanning paper into a PDF.

STATIC CONNECTION · ORIGINAL Functional equivalence requires integrity, reliable identification and exclusive control where paper possession represents a transferable right.

ANALYSIS · ORIGINAL GUIDANCE

• Paperless trade can reduce duplication and financing delays only if counterparties and legal systems recognise the records.

• Design must retain data-protection, consumer-protection and cybersecurity safeguards rather than assume a technology removes legal risk.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not invent a first release in March or treat a consultation draft as enacted law. The primary notice is 9 February.

MAINS PROMPT What legal and technical foundations are needed for interoperable paperless trade?

Sources: [E10-DIGITAL], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

06 · Corporate-law reform

Corporate Laws bill and CSR threshold proposal

E10-2603-014 · P1 · 2026-03-23 · National / other

WHY IN THE NEWS The Corporate Laws (Amendment) Bill was introduced on 23 March and referred for parliamentary examination.

• The review covers changes concerning companies and limited-liability partnerships.

• One proposal raises the relevant CSR net-profit applicability threshold to ₹10 crore.

• The referral stage signals further scrutiny, not completed implementation.

STATIC CONNECTION · ORIGINAL A CSR applicability threshold differs from the percentage of qualifying profits to be spent and from other qualifying tests.

ANALYSIS · ORIGINAL GUIDANCE

• Simpler compliance can reduce small-entity costs but may narrow the spending base or alter accountability.

• Judge reforms by compliance outcomes and disclosure quality, not solely the number of requirements removed.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION ₹10 crore is not a universal mandatory CSR payment or a replacement for every turnover/net-worth criterion.

MAINS PROMPT How can corporate-law reform improve ease of doing business without weakening accountability?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

07 · Bank capital and dividends

Bank dividend directions: a prudential ceiling is not a promise

E10-2603-015 · P2 · 2026-03-10 · National / other

WHY IN THE NEWS RBI issued reviewed dividend/remittance directions on 10 March.

• The framework links payouts to prudential conditions and financial strength.

• The review identifies a maximum of 75% of profit after tax under the specified framework.

• Eligibility, regulatory adjustments and the applicable category must be checked before applying the ceiling.

STATIC CONNECTION · ORIGINAL Retained earnings support bank capital; a dividend distributes profit and does not create additional loss-absorbing capacity.

ANALYSIS · ORIGINAL GUIDANCE

• Payout discipline protects depositors and supports resilience, but investors also value predictable returns.

• The maximum permissible ratio is not the optimal ratio for every bank through the credit cycle.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say every bank must distribute 75%, or apply an undifferentiated ceiling without entity/commencement checks.

MAINS PROMPT Explain how dividend policy links bank governance to financial stability.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

08 · Digital fraud — consultation

Proposed small-loss compensation in digital fraud

E10-2603-016 · P1 · 2026-03-06 · National / other

WHY IN THE NEWS RBI’s March review includes draft changes on customer liability.

• The reviewed draft discusses eligible fraud losses up to ₹50,000.

• Proposed compensation is 85% of the net loss or ₹25,000, whichever is lower, subject to conditions.

• The review describes a once-in-a-lifetime benefit in the proposal, not repeated unconditional payouts.

STATIC CONNECTION · ORIGINAL Unauthorised transactions, authorised transactions induced by fraud and customer negligence need careful legal separation.

ANALYSIS · ORIGINAL GUIDANCE

• Compensation can support trust but must accompany rapid reporting, beneficiary-account controls and investigation.

• A cap limits fiscal/industry exposure; it does not mean every fraud victim’s remaining loss disappears.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This was a draft: do not present it as an automatic current right for every digital payment loss.

MAINS PROMPT How can consumer protection reduce fraud harm without creating avoidable moral hazard?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

09 · Regulatory ethics

SEBI conflict-of-interest reform: approval versus notification

E10-2603-017 · P2 · 2026-03-23 · National / other

WHY IN THE NEWS SEBI’s 23 March board meeting considered conflict-management reforms.

• The review records board acceptance of recommendations on conflicts and disclosures.

• Personal financial interests, recusal and post-employment issues require distinct safeguards.

• Board approval and an operative notified regulation are not necessarily the same event.

STATIC CONNECTION · ORIGINAL A conflict can be actual, potential or perceived; disclosure alone may not remove the need for recusal.

ANALYSIS · ORIGINAL GUIDANCE

• Institutional credibility needs enforceable rules, independent review and accessible reporting.

• Safeguards should cover decision processes without turning all private interests into automatic proof of misconduct.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim every recommendation was already legally notified simply because the board approved a reform package.

MAINS PROMPT Why is conflict management central to an independent market regulator?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

10 · Airline consumer protection

Free seat allocation does not mean free air travel

E10-2603-018 · P2 · 2026-03-18 · National / other

WHY IN THE NEWS The aviation ministry announced passenger-facilitation directions on 18 March.

• The release calls for at least 60% of seats to be allocated without the additional allocation charge.

• It also addresses seating passengers on the same PNR together, preferably adjacent.

• Transparent policies and visible passenger rights were emphasised for delays, cancellations and carriage matters.

STATIC CONNECTION · ORIGINAL A base fare, taxes, ancillary charges and a seat-selection fee are different price components.

ANALYSIS · ORIGINAL GUIDANCE

• Unbundling can offer choice, but misleading interfaces may turn an apparently optional charge into an unavoidable cost.

• Assess compliance through booking-path transparency and grievance outcomes, not a headline percentage alone.

PRELIMS CAUTION The direction concerns seat allocation, not 60% of tickets with zero airfare. This is a dated announcement, not a separately checked current DGCA compliance schedule.

MAINS PROMPT How can aviation regulation improve price transparency and accessible passenger rights?

Sources: [E10-AIR], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

11 · Regional connectivity

Modified UDAN: asset development plus operating viability

E10-2603-019 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS The Cabinet approved Modified UDAN on 25 March. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• The scheme runs FY 2026–27 to FY2035–36 with ₹28,840 crore budgetary support.

• It proposes 100 airports from existing unserved airstrips and 200 modern helipads.

• The design includes O&M support and ₹10,043 crore proposed VGF over ten years; route viability is distinct from building an airstrip.

STATIC CONNECTION · ORIGINAL Viability-gap funding supports otherwise insufficient commercial returns, not an assurance that every route will become permanently profitable.

ANALYSIS · ORIGINAL GUIDANCE

• Smaller markets need reliable operations, aircraft availability, ground access and demand, not only construction.

• For AP, assess connectivity benefits alongside subsidy dependence, occupancy and continuity of service; no specific new AP route is certified here.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2507-022, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E6-2510-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Approval does not mean 100 completed new airports or 200 operational helipads. Existing airstrips are central to the airport component.

MAINS PROMPT What makes regional air connectivity sustainable after initial subsidy support?

Sources: [E10-UDAN], [E10-PRS], [E10-V03]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

12 · Toll collection and redress

Unpaid toll notices: digital enforcement with a grievance window

E10-2603-020 · P2 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March review covers amendments to national-highway fee rules.

• The reviewed mechanism provides notice for unpaid highway user fees.

• It describes a doubled amount, with relief linked to payment or a grievance within 72 hours under the rule’s conditions.

• Non-resolution after the specified 15-day stage can affect vehicle-related services through VAHAN.

STATIC CONNECTION · ORIGINAL A user fee for a facility differs from a general tax; automated collection still needs correct vehicle identification and contestability.

ANALYSIS · ORIGINAL GUIDANCE

• Digital records can reduce evasion but create risks from wrong plates, duplicate demands and failed payment matching.

• Notice delivery, accessible appeal and correction trails matter as much as rapid collection.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2507-022, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E6-2510-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe a notice as an unchallengeable final penalty or erase the prescribed payment/grievance windows.

MAINS PROMPT How can digital toll enforcement combine revenue integrity with procedural fairness?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

13 · Mineral-market institutions

Draft mineral exchanges: transparency and delivery risk

E10-2603-024 · P1 · 2026-03-19 · National / other

WHY IN THE NEWS The Ministry of Mines circulated draft Mineral Exchange Rules in March.

• The draft contemplates regulated mineral-trading exchanges and an IBM regulatory role.

• The reviewed framework excludes coal, lignite and atomic minerals.

• Exchange trading, physical delivery, quality verification and dispute settlement need different controls.

STATIC CONNECTION · ORIGINAL A commodity exchange can aid price discovery without creating the mineral resource or replacing mining permissions.

ANALYSIS · ORIGINAL GUIDANCE

• Transparent prices may help smaller buyers, but concentration and grade manipulation can weaken the expected benefits.

• Design should address assaying, delivery failures, conflicts and access to data.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Draft rules are not proof exchanges are already licensed or that every mineral category is covered.

MAINS PROMPT What safeguards are needed for credible mineral price discovery?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

14 · Mineral auctions and concessions

Mineral-rule amendments: allocation is only one stage

E10-2603-025 · P2 · 2026-03-30 · National / other

WHY IN THE NEWS The March review reports notified auction and concession amendments.

• The notified auction amendment provides a conditional premium exemption for certain critical minerals constituting under 10% of the block value, excluding graphite, phosphate and potash from that concession.

• The concession amendment permits application to include an additional mineral, with a state decision within 60 days under the reviewed provision.

• For deep-seated minerals (over 200 metres), contiguous-area extensions are subject to conditions and reviewed caps of 10% of a mining-lease area or 30% of a composite-licence area; separate clearances still matter.

STATIC CONNECTION · ORIGINAL MMDR-based mineral allocation operates alongside environmental, forest, land and other applicable requirements.

ANALYSIS · ORIGINAL GUIDANCE

• Procedural reform can accelerate investment but should not hide execution and compliance bottlenecks.

• For AP resource governance, track auction terms, community interests and restoration obligations separately.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not generalise the under-10% premium exemption to every mineral or infer that an award/extension supplies every environmental clearance. Detailed notified texts were not independently read; these features follow PRS.

MAINS PROMPT How can allocation reform improve mineral security without weakening environmental governance?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

15 · Electricity consumers — consultation

Draft electricity-consumer changes: tariffs and rooftop solar

E10-2603-028 · P2 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March review discusses draft changes to electricity-consumer rules.

• The draft addresses time-of-day tariff rollout and a net-metering charge to be determined by State Electricity Regulatory Commissions.

• The reviewed draft exempts rooftop solar PV systems up to 5 kW from that net-metering charge, not from every technical or billing requirement.

• It would allow SERCs to mandate storage for rooftop installations above 500 kW; it also proposes review of specified abnormally high/low consumption bills within 30 days.

STATIC CONNECTION · ORIGINAL Time-of-day pricing varies with the time of consumption; net metering accounts for imports and exports under a specified framework.

ANALYSIS · ORIGINAL GUIDANCE

• Tariff signals can shift loads but households need usable information, appropriate meters and protection from unfair complexity.

• For AP, check the applicable APERC order and distribution-company procedures before asserting an actual bill reduction.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not generalise a ≤5 kW exemption into free electricity or universal exemption from every connection/technical requirement.

MAINS PROMPT How can tariff reform support grid efficiency while protecting small consumers?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

16 · Industrial ecosystems

BHAVYA: challenge-mode industrial infrastructure

E10-2603-031 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS The Cabinet approved Bharat Audyogik Vikas Yojna on 18 March. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• The scheme envisages 100 industrial parks with ₹33,660 crore outlay.

• The reviewed park size is 100–1,000 acres, with support up to ₹1 crore per acre.

• Challenge-based selection, DPIIT/NICDC coordination and external infrastructure support are parts of the design.

STATIC CONNECTION · ORIGINAL Plug-and-play infrastructure reduces setup frictions but does not automatically create demand, skills or production.

ANALYSIS · ORIGINAL GUIDANCE

• States need land readiness, reliable utilities, transport and credible governance to convert approval into occupancy.

• In AP, evaluate participation against actual selection and execution documents rather than assume every proposed park receives assistance.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 100 parks is an approved programme objective, not 100 completed or fully occupied parks. Funding ceilings are not automatic entitlements.

MAINS PROMPT What differentiates productive industrial ecosystems from underused industrial estates?

Sources: [E10-BHAVYA], [E10-PRS], [E10-V01]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

17 · Fiscal federalism and AP diagnosis

Fiscal Health Index 2026: AP rank and pillar distinction

E10-2603-033 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · AP-linked

WHY IN THE NEWS NITI’s 2026 publication assesses fiscal outcomes for FY2023–24. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• Among 18 major states, Odisha ranks first with 73.1 and AP ranks 17th with 23.1.

• AP is in the overall Aspirational group; its quality-of-expenditure score is 43.1, in the Front Runner group for that pillar.

• The five pillars are expenditure quality, revenue mobilisation, fiscal prudence, debt index and debt sustainability; the NE/Himalayan cohort is separate.

STATIC CONNECTION · ORIGINAL A composite score combines indicators; a pillar score is not the overall ranking and a 2026 publication need not measure 2026 finances.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s weak fiscal-prudence/debt-sustainability scores require a broader diagnosis than one improving spending-quality indicator.

• Use comparable data vintages and the report’s own cohort; cross-cohort league tables can mislead.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call AP an overall Front Runner or infer March 2026 audited finances from FY2023–24 data.

MAINS PROMPT What does AP’s mixed fiscal profile imply for expenditure and revenue reform?

Sources: [E10-FHI], [E10-V05]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Agriculture

01 · Pulses and oilseeds

Pulses and oilseeds: committee recommendations and import dependence

E10-2603-021 · P2 · 2026-03-27 · National / other

WHY IN THE NEWS The Agriculture, Animal Husbandry and Food Processing Committee presented its report on 27 March.

• The Committee recommended expanding oilseed/pulse procurement under PM-AASHA; it is not proof that universal procurement was implemented.

• It recommended a new seeds law, stronger certification/quality standards and a consultative seed-price ceiling mechanism.

• The report proposed conditional palm-oil safeguard action; import-duty changes require their own government instruments rather than a committee recommendation alone.

STATIC CONNECTION · ORIGINAL Self-reliance depends on yields, acreage, prices, consumption and trade; one good harvest does not eliminate structural import exposure.

ANALYSIS · ORIGINAL GUIDANCE

• Policy needs region-specific extension, risk management and processing demand rather than only higher acreage targets.

• AP applications include rainfed cropping decisions, market access and crop suitability, not assuming every district should grow the same crop.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Recommendations are not automatically a notified programme or guaranteed purchase of every farmer’s output.

MAINS PROMPT Design a production-and-market strategy for sustainable pulse/oilseed self-reliance.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Seeds and water productivity

Water-efficient seeds: incentives require agro-ecological evidence

E10-2603-022 · P2 · 2026-03-27 · National / other

WHY IN THE NEWS The Agriculture Committee presented its groundwater-saving seed-research report on 27 March.

• The report recommends modern biotechnology, including gene editing, to improve suitable crop varieties.

• It calls for stronger ICAR research, affordable quality-seed production/distribution and guidance on crop choice in critical water zones.

• It recommends cross-ministry coordination; these proposals do not establish that every recommended variety is approved, available or suitable in every region.

STATIC CONNECTION · ORIGINAL Drought tolerance is not the same as zero irrigation demand, and yield per hectare differs from yield per unit of water.

ANALYSIS · ORIGINAL GUIDANCE

• Use local trials and extension to avoid universal claims based on one successful variety.

• In water-stressed AP districts, align seed choice with soil moisture, crop calendars and farmer risk-bearing capacity.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A recommendation is not a compulsory seed mandate or proof that all varieties save a fixed percentage of water.

MAINS PROMPT How can seed policy contribute to water security without ignoring farm economics?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Society & Welfare

01 · Care work and maternity protection

Adoptive maternity leave: age restriction struck down

E10-2603-005 · P1 · 2026-03-17 · National / other

WHY IN THE NEWS The Supreme Court decided Hamsaanandini Nanduri on 17 March.

• The Court invalidated the three-month age limit for the adopted child in section 60(4) of the Social Security Code.

• The operative entitlement read by the Court is 12 weeks from the date the child is handed over, irrespective of the child’s age.

• The Court urged consideration of paternity leave; that observation is not itself a universal statutory paternity-leave scheme.

STATIC CONNECTION · ORIGINAL Substantive equality tests whether formally neutral classifications fairly accommodate different caregiving situations.

ANALYSIS · ORIGINAL GUIDANCE

• Adoption involves adjustment and attachment needs that do not disappear when a child crosses three months.

• Care policy should combine leave, workplace non-discrimination and shared parental responsibility; the judgment does not erase every statutory coverage condition.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-006 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not convert this ruling into 26 weeks for all adoptive mothers or a newly enacted nationwide paternity entitlement.

MAINS PROMPT How can care-sensitive employment rules advance equality without relying on stereotypes?

Sources: [E10-ADOPT], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Online safety and institutions

Women’s cyber safety: committee oversight and implementation

E10-2603-006 · P2 · 2026-03-23 · National / other

WHY IN THE NEWS The Committee on Empowerment of Women submitted its cyber-safety report on 23 March.

• The Committee on Empowerment of Women, chaired by D. Purandeswari, examined cyberstalking, sextortion, deepfakes and online harassment.

• Recommendations include training ASHAs, Anganwadi workers and teachers as Cyber Safety Ambassadors and expanding cyber-forensic/investigative capacity.

• It called for survivor-centred helpline, counselling and legal support, and recommended platform verification/accountability measures; these are recommendations, not automatically binding new rules.

STATIC CONNECTION · ORIGINAL Legislative committees recommend improvements; executive action and enforceable legal duties require their own instruments.

ANALYSIS · ORIGINAL GUIDANCE

• Fast reporting must be paired with safe evidence handling, privacy and trained investigation.

• Assess outcomes through complaint progression, time-bound assistance and protection from repeat abuse rather than only portal-registration totals.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Recommendations do not prove every district has trained capacity, and content removal does not by itself secure a criminal conviction.

MAINS PROMPT Design a survivor-centred response linking police, platforms and legal aid.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

03 · Public tertiary healthcare

AIIMS recommendations: patient access and referral systems

E10-2603-023 · P2 · 2026-03-18 · National / other

WHY IN THE NEWS The Health Committee’s report on AIIMS New Delhi was presented in March; the cited report is dated 18 March.

• The Committee recommended another AIIMS in Delhi-NCR and expansion in states including Karnataka.

• It recommended decongesting OPDs, adding specified specialised beds and filling faculty/non-faculty vacancies.

• It also recommended stronger district-hospital diagnostics, connecting tertiary decongestion to local referral capacity; these are recommendations, not completed facilities.

STATIC CONNECTION · ORIGINAL Tertiary hospitals provide specialised care but cannot substitute for functioning primary and district-level referral systems.

ANALYSIS · ORIGINAL GUIDANCE

• Digital appointment systems help only when physical capacity, equitable access and referral quality improve too.

• For AP answers, connect tertiary access to district diagnosis, affordable travel and post-treatment follow-up rather than assume Delhi capacity alone solves state gaps.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A new recommendation does not establish that waiting lists, vacancies or access barriers have already been eliminated.

MAINS PROMPT Why should tertiary-hospital reform be linked to the wider public-health system?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

04 · Rural water services

JJM 2.0: connections to sustained service delivery

E10-2603-026 · P1 · 2026-03-10 · National / other

WHY IN THE NEWS The Cabinet approved JJM restructuring and extension on 10 March.

• The approved period extends to December 2028; total outlay is ₹8.69 lakh crore.

• Total central assistance is ₹3.59 lakh crore, including ₹1.51 lakh crore additional central share over the earlier ₹2.08 lakh crore.

• Sujalam Bharat maps source-to-tap systems; Jal Arpan and GP certification link handover to O&M arrangements.

STATIC CONNECTION · ORIGINAL An installed tap differs from regular, adequate, safe water service; capital expenditure creates recurring O&M obligations.

ANALYSIS · ORIGINAL GUIDANCE

• Digital service-area IDs can support accountability only if asset, quality and downtime data are reliable.

• In AP villages, prioritise source sustainability, water-quality testing and an affordable maintenance system rather than count connections alone.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION ₹8.69 lakh crore is total outlay, not entirely Union assistance or spending already incurred. Reported connections and modelled health benefits are not identical evidence.

MAINS PROMPT How can rural water programmes shift from asset creation to accountable service delivery?

Sources: [E10-JJM], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Environment

01 · Climate commitments

2035 NDC approval: intensity, capacity and carbon sink

E10-2603-027 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS The Cabinet approved India’s 2031–35 NDC on 25 March. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• The 2035 targets include a 47% reduction in GDP emissions intensity from the 2005 level.

• The power target is 60% of cumulative installed capacity from non-fossil energy sources.

• The forest/tree-cover carbon-sink target is 3.5–4 billion tonnes CO2-equivalent against 2005 by 2035; the 2070 net-zero goal is unchanged.

STATIC CONNECTION · ORIGINAL Emissions intensity is emissions per unit of GDP; installed capacity measures potential output, not actual generation.

ANALYSIS · ORIGINAL GUIDANCE

• Economic growth can coexist with lower intensity and higher absolute emissions; examine both dimensions.

• Capacity deployment needs networks, storage and demand management to translate into reliable low-carbon electricity.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call this a 47% absolute emissions cut, 60% renewable generation, or proof of the UNFCCC submission date. Non-fossil is broader than renewables.

MAINS PROMPT Assess ambition and implementation in India’s updated climate commitments.

Sources: [E10-NDC], [E10-PRS], [E10-V12]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Renewable-energy certificates

RECs: market instruments are not physical electricity

E10-2603-029 · P2 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March review covers REC-related regulatory changes and capacity-credit treatment.

• CERC notified a 2026 amendment to the renewable-energy-certificate regulatory framework.

• The reviewed multiplier criteria include project tariffs, technology maturity and capacity credit.

• Capacity credit concerns a plant’s reliable contribution to peak demand; it is not the same as installed nameplate capacity or yearly generation.

STATIC CONNECTION · ORIGINAL Renewable purchase obligations, physical energy delivery and tradable certificates are related but separate concepts.

ANALYSIS · ORIGINAL GUIDANCE

• Market instruments can channel revenue to eligible projects, but credible verification and avoidance of double counting are essential.

• A favourable multiplier does not itself cure transmission constraints or make intermittent capacity firm.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat an REC as a carbon credit by definition or equate certificate count with actual new generation.

MAINS PROMPT Assess the role and limits of certificate markets in clean-energy deployment.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

03 · Environmental appraisal — draft

EIA standing bodies proposal: timeliness with safeguards

E10-2603-034 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS March’s magazine discusses a draft amendment to the 2006 EIA framework. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• The proposal concerns temporary standing state-level authority/appraisal arrangements when existing bodies are non-functional.

• The article describes maximum one-year substitution and a 120-day appraisal-escalation feature in the draft.

• Prior environmental-clearance requirements depend on the scheduled project, category and applicable thresholds/exemptions.

STATIC CONNECTION · ORIGINAL EIA includes screening/scoping, appraisal and other applicable stages; Category A and B use different institutional routes.

ANALYSIS · ORIGINAL GUIDANCE

• Continuity can reduce administrative deadlock, but capacity, independent expertise and public participation remain essential.

• Digital escalation should improve traceability rather than turn missed deadlines into automatic environmental approval.

PRELIMS CAUTION Reject the article’s blanket claim that all projects above ₹50 crore require EIA. There is no single universal ₹50-crore test. This is a draft, not verified final law.

MAINS PROMPT How can environmental appraisal become timely without becoming perfunctory?

Sources: [E10-PRS], [E10-V09]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

04 · Biodiversity reporting

CBD seventh national report: evidence versus self-reporting

E10-2603-035 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS March’s magazine discusses India’s seventh CBD national report. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• National reports arise under Article 26 of the Convention on Biological Diversity.

• The report is linked to 23 national targets under India’s updated NBSAP and the Kunming–Montreal framework.

• The global framework has four 2050 goals and 23 targets for 2030, including the widely discussed 30-by-30 conservation target.

STATIC CONNECTION · ORIGINAL The CBD’s objectives are conservation, sustainable use and fair/equitable benefit sharing; treaty duties differ from framework targets.

ANALYSIS · ORIGINAL GUIDANCE

• Reported policy alignment is not independent proof every biodiversity outcome is on track.

• Restoration quality, invasive species, habitat connectivity and community participation need measurable indicators, not only protected-area counts.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E6-2510-011, E7-2511-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Forest-and-tree cover is not the same as natural forest quality; do not copy changing Ramsar/site counts as an undated current total.

MAINS PROMPT How should biodiversity reporting link national targets to verifiable ecological outcomes?

Sources: [E10-PRS], [E10-V10]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

05 · Access and benefit sharing

Nagoya reporting: access, consent and local benefits

E10-2603-036 · P2 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS The magazine covers India’s first national report on Nagoya implementation. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• The Nagoya Protocol supplements the CBD; it was adopted in 2010 and entered into force in 2014.

• Its core concepts include prior informed consent and mutually agreed terms for access/benefit sharing.

• The article reports ₹216.31 crore mobilised and ₹139.69 crore distributed, as report-based figures rather than independently audited current totals.

STATIC CONNECTION · ORIGINAL India’s institutional structure includes the NBA, state biodiversity bodies and local Biodiversity Management Committees, subject to the applicable legal framework.

ANALYSIS · ORIGINAL GUIDANCE

• An approval or compliance certificate measures an administrative step, not automatically fair benefit distribution.

• Non-monetary benefits can include capacity, technology transfer and research collaboration, but community bargaining power matters.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E6-2510-011, E7-2511-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate the amount mobilised with the amount already distributed, or assert all biological-resource access follows one identical permission route.

MAINS PROMPT How can access-and-benefit sharing translate legal compliance into community gains?

Sources: [E10-PRS], [E10-V11]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Science & Technology

01 · AI governance and intermediary rules

AI committee report and draft IT-rule changes: recommendations versus rules

E10-2603-030 · P2 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The Communications and IT Standing Committee submitted its AI-impact report on 30 March; MeitY also invited comments on draft intermediary-rule changes.

• The Standing Committee report identifies computing, skills and dataset gaps, alongside concentration, interpretability, privacy and fraud risks.

• It recommends examining comprehensive legislation, strengthening AI education/research and progressing relevant draft IT-rule changes.

• A committee report is advisory scrutiny; the separate draft IT Rules remain a consultation instrument in the reviewed account. Neither is proof a new regulator or universal AI law was established.

STATIC CONNECTION · ORIGINAL Parliamentary committees examine and recommend; executive rule-making derives authority from a statute and follows its legal process.

ANALYSIS · ORIGINAL GUIDANCE

• Coordination needs clear responsibility and transparency, but recommendations do not create binding duties by themselves.

• Intermediary-rule design should distinguish lawful speech, due process and technically realistic compliance.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The committee submitted a report on 30 March; it was not newly constituted that day. Do not convert recommendations or draft duties into operative law.

MAINS PROMPT How can India coordinate AI governance while preserving accountability and rights?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Digital public infrastructure

DPI: reusable rails, not simply a government app

E10-2603-032 · P2 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS March’s magazine reviews DPI architecture and international cooperation. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• Identity, payments and data-sharing rails are different DPI functions.

• The article’s 24-MoU figure is explicitly an as-of-February snapshot, not 24 new agreements signed in March.

• Interoperability and open standards do not remove the need for privacy, security and accessible offline alternatives.

STATIC CONNECTION · ORIGINAL Infrastructure supports multiple services; an application is one interface using the underlying rails.

ANALYSIS · ORIGINAL GUIDANCE

• Reusable standards can lower entry costs, but concentration, exclusion and function creep need safeguards.

• Assess outcomes through access, reliability, contestability and consent rather than only transaction scale.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Neither “digital” nor “public” means every dataset should be openly accessible or that every user must own a smartphone.

MAINS PROMPT How can DPI combine scale with rights-preserving design?

Sources: [E10-PRS], [E10-V02]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

03 · Particle physics

LHCb’s doubly charmed baryon: a composite discovery

E10-2603-037 · P2 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS LHCb announced the observation on 17 March using 2024 collision data. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• The Xi-cc-plus particle has quark composition ccd: two charm quarks and one down quark.

• The announcement reports a mass near 3,620 MeV/c^2 and a signal exceeding seven standard deviations.

• It is the isospin partner of the ccu Xi-cc-plus-plus observed in 2017.

STATIC CONNECTION · ORIGINAL Baryons contain three valence quarks; ordinary mesons contain a quark–antiquark pair, not just two quarks.

ANALYSIS · ORIGINAL GUIDANCE

• The result tests strong-interaction descriptions and heavy-quark bound states without adding a new fundamental quark flavour.

• A statistical discovery claim concerns an observed signal; the experiment’s paper and systematic treatment matter for technical assessment.

READ ACROSS MONTHS · NOTE IDS VM2504-004, MY25-020, E5-2507-026, E5-2507-020, E5-2507-032, E6-2510-029, CA-038, E9-2602-018 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This is a newly observed composite baryon, not a new elementary particle or a new chemical element. “Heavy proton” is an analogy.

MAINS PROMPT Explain how experiments test particle theory without confusing composite and fundamental particles.

Sources: [E10-CERN], [E10-V14]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

04 · Satellite-navigation resilience

IRNSS-1F clock failure: navigation and messaging differ

E10-2603-038 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS ISRO’s 13 March statement reports the atomic-clock failure after design-life completion. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• IRNSS-1F completed its ten-year design life on 10 March 2026.

• ISRO says its procured on-board atomic clock stopped on 13 March.

• The short official statement says the satellite continues one-way broadcast messaging services for societal applications.

STATIC CONNECTION · ORIGINAL Satellite navigation derives range from precise timing; broadcast messaging does not impose the same navigation-clock function.

ANALYSIS · ORIGINAL GUIDANCE

• Redundancy, indigenous timing capability and replenishment planning matter for strategic autonomy.

• Assess a constellation through geometry, healthy payloads and service performance rather than the mere number of satellites launched.

READ ACROSS MONTHS · NOTE IDS E5-2506-025, E5-2507-028, E5-2507-027, E5-2506-026, E5-2508-033, E8-2601-034, E8-2601-045, E9-2602-011 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not conclude every function of IRNSS-1F stopped, the entire NavIC system shut down, or certify a live constellation count from a secondary magazine snapshot.

MAINS PROMPT How should India build resilient navigation capability across satellite life cycles?

Sources: [E10-ISRO], [E10-V16]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Security

01 · CAPF leadership

CAPF bill: leadership composition and cadre progression

E10-2603-013 · P2 · 2026-03 (month-level index) · National / other

WHY IN THE NEWS The March review covers a bill governing senior appointments in central armed police forces.

• The proposal includes deputation shares at senior levels.

• The proposed IPS-deputation shares are 50% at Inspector General, at least 67% at Additional Director General, and all Special DG/DG posts.

• These are proposed leadership provisions, not the recruitment ratio for the entire force.

STATIC CONNECTION · ORIGINAL CAPFs and the armed forces have different institutional roles; deputation is not the same as direct entry into every rank.

ANALYSIS · ORIGINAL GUIDANCE

• Institutional coordination can benefit from cross-service experience, while cadre officers seek credible promotion pathways.

• Evaluate operational expertise, morale, accountability and transparent selection together.

PRELIMS CAUTION Do not generalise senior-post shares to all personnel or treat the bill as independently verified commenced law.

MAINS PROMPT Discuss the balance between external leadership experience and internal professional progression.

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

International Relations

01 · Canada and trade negotiations

India–Canada CEPA: terms of reference, not a completed FTA

E10-2603-012 · P1 · 2026-03-02 · National / other

WHY IN THE NEWS Terms of reference for CEPA negotiations were signed on 2 March.

• The document establishes a basis for negotiating a Comprehensive Economic Partnership Agreement.

• Negotiation launch, conclusion, signature, ratification and entry into force are distinct stages.

• The review’s March development does not itself establish a zero-duty schedule for Indian exports.

STATIC CONNECTION · ORIGINAL A CEPA can cover goods, services and wider economic cooperation, subject to the negotiated text.

ANALYSIS · ORIGINAL GUIDANCE

• Commercial opportunity must be considered alongside regulatory standards, mobility and domestic sensitivities.

• Diplomatic normalisation can support negotiations but does not predetermine the final concessions.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Terms of reference are not an implemented free-trade agreement.

MAINS PROMPT How should strategic and commercial interests shape renewed India–Canada engagement?

Sources: [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · West Asia and energy security

West Asian disruption: energy security beyond import volumes

E10-2603-040 · P1 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS March reporting and the magazine connect regional conflict with energy/trade risks. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• Shipping-route risk can raise freight, insurance and delivery uncertainty even before physical imports stop.

• Oil, LNG/LPG and fertiliser supply chains expose different sectors and households.

• Diplomatic engagement, supply diversification and domestic efficiency are complementary responses.

STATIC CONNECTION · ORIGINAL Energy security combines availability, affordability, resilience and sustainability; strategic reserves cover only part of the system.

ANALYSIS · ORIGINAL GUIDANCE

• A Strait of Hormuz disruption scenario should be analysed through route dependence and substitutes, not a predicted permanent closure.

• For AP, consider fisheries/shipping, industrial fuel and household affordability without inventing state-specific shortage figures.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not turn a scenario into a confirmed closure or treat crude-import diversification as a complete solution for every fuel.

MAINS PROMPT How should India balance crisis diplomacy, supply resilience and the energy transition?

Sources: [E10-PRS], [E10-V22]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Andhra Pradesh

01 · Capital and federal legislation

Amaravati resolution: request versus statutory amendment

E10-2603-041 · P1 · 2026-03-28 · AP-linked

WHY IN THE NEWS The Assembly passed the reported resolution on 28 March after Cabinet approval of a draft.

• The resolution sought statutory capital status through amendment to section 5(2) of the AP Reorganisation Act.

• The report refers to Amaravati within the APCRDA-notified area.

• An Assembly request does not itself amend a law enacted by Parliament.

STATIC CONNECTION · ORIGINAL A legislative resolution, a state executive decision and a parliamentary amendment are different constitutional instruments.

ANALYSIS · ORIGINAL GUIDANCE

• Administrative clarity can aid planning, but financing, land obligations and service delivery need separate assessment.

• Preserve the March stage; any April parliamentary development belongs in its later dated note rather than being backdated.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-047 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The March resolution is not proof Parliament had already amended the Act or that future law can never change the capital arrangement.

MAINS PROMPT Discuss the interaction between federal legislation and state capital planning.

Sources: [E10-APCAP], [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

02 · Access to justice

AP Cabinet’s court expansion: sanction to functioning courts

E10-2603-042 · P1 · 2026-03-26 · AP-linked

WHY IN THE NEWS The 26 March Cabinet decision was reported the following day.

• The report records approval for 96 courts.

• It also reports 1,730 posts linked to the expansion.

• Sanction, recruitment, infrastructure and operational court sittings remain separate milestones.

STATIC CONNECTION · ORIGINAL Access to justice depends on location, judges, staff, legal aid, procedure and case management, not buildings alone.

ANALYSIS · ORIGINAL GUIDANCE

• New courts may reduce travel costs and backlog if staffing and registry systems arrive together.

• Evaluate district-wise caseload, time to disposal and litigant access; no completed recruitment is certified here.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Cabinet approval does not mean 96 courts were already functioning or 1,730 people had been appointed.

MAINS PROMPT How should judicial-capacity expansion be evaluated beyond sanctioned numbers?

Sources: [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

03 · Student safety and coaching governance

AP coaching-centre proposal: draft regulatory framework

E10-2603-043 · P2 · 2026-03-26 · AP-linked

WHY IN THE NEWS The March Cabinet report describes proposed 2026 coaching-centre regulation.

• The report refers to a draft framework and registration requirements.

• District-level committees form part of the reported governance design.

• Operative eligibility, thresholds, inspections and appeals require the final notified instrument.

STATIC CONNECTION · ORIGINAL Coaching regulation combines consumer information, child safety, building/fire standards and educational welfare.

ANALYSIS · ORIGINAL GUIDANCE

• Registration alone cannot eliminate misleading guarantees, unsafe premises or harmful academic pressure.

• Enforcement should combine transparent disclosures, complaint channels and inspection capacity without inventing final numerical criteria.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe the draft as already enforceable statewide or infer every centre had been registered.

MAINS PROMPT How can AP improve coaching accountability while protecting students and legitimate educational access?

Sources: [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

04 · Renewable-energy land governance

AP renewable manufacturing zones and nodal responsibility

E10-2603-044 · P1 · 2026-03-26 · AP-linked

WHY IN THE NEWS The Cabinet report covers renewable-energy land decisions in Nandyal and Kadapa.

• The report identifies NREDCAP as nodal agency for Renewable Energy Manufacturing Zones, replacing APSPCL in that role.

• It discusses land decisions in Nandyal and Kadapa districts.

• Nodal responsibility and land approval do not establish commissioned factories or electricity generation.

STATIC CONNECTION · ORIGINAL A renewable-energy manufacturing zone concerns industrial supply capacity and is not automatically a power-generation park.

ANALYSIS · ORIGINAL GUIDANCE

• Clear institutional ownership can improve coordination, but land due diligence, utilities and investor selection still matter.

• For Kadapa, assess actual site/allotment records and local employment conditions before attributing investment outcomes.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate the agency change with cancellation of every APSPCL function or claim plants are already producing.

MAINS PROMPT How should AP connect clean-energy manufacturing with transparent land and industrial policy?

Sources: [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

05 · Clean cooking and network access

Deepam 2 and PNG: approval versus household entitlement

E10-2603-045 · P2 · 2026-03-26 · AP-linked

WHY IN THE NEWS The March Cabinet report discusses extending cooking-fuel support to PNG users.

• The proposal concerns extending Deepam 2 support to piped-natural-gas users.

• PNG distribution and LPG cylinder supply are technically different delivery systems.

• Eligibility, billing adjustment and start date require implementing orders, not inference from a Cabinet headline.

STATIC CONNECTION · ORIGINAL Clean-cooking access combines connection availability, recurring affordability, safety and reliable supply.

ANALYSIS · ORIGINAL GUIDANCE

• Fuel-neutral benefit design can avoid penalising households for switching systems, but metering and benefit reconciliation need clear rules.

• Assess actual network access: inclusion on paper is not a PNG connection in every town or village.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not promise every household free unlimited PNG or treat LPG-cylinder units as automatically identical to metered gas volumes.

MAINS PROMPT What safeguards make clean-cooking support equitable across fuel-delivery systems?

Sources: [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

05 · Fiscal transparency and local accountability

AP district–mandal budget mapping: allocation is not local expenditure

E19-003 · P2 · 2026-03-11 · AP-linked

WHY IN THE NEWS The 11 March circular sets out the data preparation behind AP's budget outreach. Reading the original document reveals the roles and limits that a headline about constituency allocations can miss.

• HoD-wise NIDHI formats were pre-populated with FY2026–27 BE for schemes, programmes and projects under revenue and capital heads.

• HODs were instructed to distribute their totals through "District Wise Budget Distribution 2026–27". The memo refers to 28 districts for this exercise; district-reorganisation notifications were not independently checked.

• Past expenditure trends or other criteria considered appropriate by the department could be used for district allocations. The circular does not prescribe a single universal population-only formula.

• Chief Planning Officers were enabled a mandal-distribution tile and were to coordinate with district-level officers. District Collectors were to verify and approve the distribution for constituency-report generation.

• The prescribed data-entry/submission deadline was 5 p.m. on 13 March 2026. Neither the underlying NIDHI tables nor actual submissions were accessed.

• The document's sequencing is administrative: departmental BE → district allocation → mandal distribution → constituency reports. It is not a fresh appropriation for every constituency.

STATIC CONNECTION · ORIGINAL Fiscal transparency requires distinguishing approved estimates, territorial apportionment, administrative release, expenditure and outcomes. The same rupee may appear in multiple geographic aggregation tables without becoming new money.

ANALYSIS · ORIGINAL GUIDANCE

• Historical spending can make allocation practical, but may perpetuate the disadvantage of areas with weak administrative capacity. An evidence-based assessment should also examine deprivation, unit costs, service gaps and implementability.

• Check for double counting when aggregating department-wise tables or comparing district and constituency totals. Cross-boundary infrastructure and statewide services may not fit neatly into one constituency.

• An APPSC governance answer should ask whether residents can access readable tables and compare them with releases and outcomes. The existence of an internal login or a deadline is not equivalent to open budget data.

READ ACROSS MONTHS · NOTE IDS CA-042

PRELIMS CAUTION Do not infer completed works, equal constituency entitlements or a verified statewide district count from this allocation memo alone. A reporting distribution is not proof of a payment or a legal reorganisation.

MAINS PROMPT Discuss the opportunities and risks of geographically disaggregated state budgets for local accountability.

Sources: [E19-APDIST]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

AP Budget Outreach: public communication versus participatory budgeting

E19-004 · P2 · 2026-03-28 · AP-linked

WHY IN THE NEWS A second primary circular moves from the allocation-data exercise to district and constituency meetings. It provides a concrete AP case for assessing whether budget communication creates a meaningful feedback loop.

• The 28 March circular scheduled outreach meetings during 30 March–4 April 2026, after the budget provisions had been finalised through passage of the Appropriation Bill.

• District meetings were to be chaired by the district in-charge minister with elected representatives; constituency meetings were to be held by Constituency Special Officers with MLAs and other representatives.

• Before meetings, Collectors/CPOs were to distribute district budgets among mandals using historical usage or needs-based judgement and generate constituency reports through NIDHI.

• Discussion topics included allocations, Swarna Andhra Vision KPIs, state fiscal stress and human-resource expenditure. The circular describes communication about an already finalised budget, not a binding citizen vote on budget formulation.

• Collectors and special officers were to hold press meets. Post-meeting feedback required a one-page discussion/outcome summary, attendee list and two high-resolution photographs through the Collector’s login.

• The complete circular was read, but meeting records, feedback forms and independent evidence of statewide completion were not inspected.

STATIC CONNECTION · ORIGINAL Budget transparency, consultation, deliberation and participatory budgeting are different degrees of public influence. Information dissemination can support accountability without transferring allocation authority.

ANALYSIS · ORIGINAL GUIDANCE

• The strongest evaluation follows questions raised, written official responses, subsequent correction of data and changes in implementation. Attendance and photographs measure activity; they do not prove comprehension or influence.

• Accessible Telugu/English explanations, disaggregated local figures and treatment of marginalised groups can make outreach useful. Analytical recommendations should not be misrepresented as mandatory clauses in the memo.

• Compare the 11 March data-preparation order with the 28 March meeting order: a district’s reported allocation should be traceable to the departmental total before it is used in public communication.

READ ACROSS MONTHS · NOTE IDS E19-003, CA-042

PRELIMS CAUTION An instruction to organise outreach is not proof that meetings happened. Post-budget communication is not automatically participatory budgeting or a new legislative appropriation.

MAINS PROMPT Assess how a post-budget outreach programme can move beyond publicity towards measurable fiscal accountability.

Sources: [E19-APMEET], [E19-APDIST]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

06 · Occupational livelihoods and minerals

Vaddera cooperative quarry support: targeted concessions

E10-2603-046 · P1 · 2026-03-26 · AP-linked

WHY IN THE NEWS The Cabinet report describes concessions for eligible Vaddera societies.

• The reported decision reserves 15% of quarry leases for the relevant societies.

• It reports 50% concessions in the specified premium and seigniorage charges.

• Final eligibility, mineral/lease scope and procedures require the applicable state orders.

STATIC CONNECTION · ORIGINAL Seigniorage is a mineral-related levy; a quarry concession differs from an unrestricted exemption from all environmental and safety law.

ANALYSIS · ORIGINAL GUIDANCE

• Targeted access can support traditional livelihoods if societies have finance, genuine member control and safety capacity.

• Prevent proxy capture through transparent allotment, member verification and disclosure of production/dues.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not convert the concession into a waiver of every tax, universal free quarry ownership or permission to mine without other approvals.

MAINS PROMPT How can targeted mineral access support occupational communities without enabling elite capture?

Sources: [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

07 · SC status and constitutional orders

Chinthada Anand: statutory SC eligibility and the ST distinction

E10-2603-047 · P1 · 2026-03-24 · AP-linked

WHY IN THE NEWS The Supreme Court dismissed the AP-linked appeal on 24 March.

• The Court applied paragraph 3 of the Constitution (Scheduled Castes) Order, 1950 to a Christian pastor’s claim to SC status.

• It distinguished the Scheduled Tribes Order, which has no equivalent religion-based exclusion; tribal-status assessment is fact-specific.

• The appeal also concerned ordinary IPC allegations, which were separately examined on the evidence; the challenged HC order was dated 30 April 2025.

STATIC CONNECTION · ORIGINAL Articles 341 and 342 govern notified SC/ST identification; a caste certificate must accord with the applicable constitutional order.

ANALYSIS · ORIGINAL GUIDANCE

• The judgment discusses proof of original notified caste, bona fide reconversion and community acceptance for a reconversion claim.

• Eligibility doctrine does not establish that conversion erases social discrimination, nor does it strip anyone of ordinary criminal-law protection.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not generalise this SC rule to automatic loss of ST status, all minority rights or immunity for violence. The IPC findings were case-specific, not a general bar on complaints.

MAINS PROMPT Explain the relationship between notified status, statutory protection and evidence-sensitive adjudication.

Sources: [E10-SCSTATUS], [E10-PRS]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

08 · Municipal revenue and arrears

Municipal tax relief: interest is not the principal tax

E10-2603-048 · P2 · 2026-03-26 · AP-linked

WHY IN THE NEWS The March Cabinet report records relief concerning property-tax dues.

• The report describes a 50% waiver of interest on the relevant property-tax arrears.

• A reduction of interest does not by itself reduce the underlying principal tax by 50%.

• Applicable period, conditions and payment deadlines require the implementing municipal/state order.

STATIC CONNECTION · ORIGINAL Property tax is an important municipal own-revenue source; an arrears amnesty changes collection incentives.

ANALYSIS · ORIGINAL GUIDANCE

• Temporary relief may improve near-term recovery but repeated amnesties can penalise timely taxpayers and weaken discipline.

• Track additional collections, remaining arrears and service-financing effects rather than report only the concession percentage.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not advertise “half the property tax waived” or claim all arrears were extinguished.

MAINS PROMPT When can municipal arrears relief improve collection without undermining long-term compliance?

Sources: [E10-APCAB]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

Culture & History

01 · Equality movements and anniversaries

Mahad Satyagraha: 99 years and a centenary-year distinction

E10-2603-039 · P2 · Magazine coverage: 2026-03 · web posted: 2026-04-30 · event date varies · National / other

WHY IN THE NEWS The March issue revisits the 20 March 1927 Mahad action. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

• B.R. Ambedkar led the assertion of equal access to the Chavdar tank at Mahad.

• 20 March 2026 marks 99 completed years since 20 March 1927.

• The 100th anniversary falls in March 2027; a centenary-year observance beginning in 2026 is a different description.

STATIC CONNECTION · ORIGINAL Social access to public resources connects anti-caste mobilisation with equality and the later constitutional prohibition of untouchability.

ANALYSIS · ORIGINAL GUIDANCE

• Legal recognition and actual access can diverge when social exclusion remains entrenched.

• Connect history to Article 17 and public-service access without retroactively claiming the 1927 action occurred under the 1950 Constitution.

PRELIMS CAUTION Do not confuse the March tank satyagraha with the December1927 Manusmriti-burning event or label March 2026 the completed 100th anniversary.

MAINS PROMPT How did struggles over everyday public access shape the meaning of citizenship?

Sources: [E10-PRS], [E10-V35]

Evidence access: Source registry states actual access scope. Static connections, analysis and exam guidance are original.

March 2026 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

MAR26-01. Consider the March BoP release: 1. Its quarterly reference period is October–December 2025. 2. The US$13.2 billion figure is the merchandise deficit. 3. Reserve depletion is stated on a BoP basis. Which are correct?

A. 1, 2 and 3.

B. 2 and 3 only.

C. 1 and 2 only.

D. 1 and 3 only.

MAR26-02. A report quotes manufacturing growth of 6.3% alongside overall IIP growth of 5.3%. In this note, these describe:

A. Services output within IIP.

B. Final March 2026 GDP growth.

C. The same growth rate for every industrial sector.

D. Year-on-year changes for October–December 2025, not March monthly output.

MAR26-03. Which statement is supported by the transgender amendment research recorded here?

A. Gender identity and sexual orientation are identical legal concepts.

B. Parliamentary passage dates are checked, while Gazette assent and commencement were not independently inspected.

C. Rajya Sabha passage alone proves every provision was operative that day.

D. A later constitutional challenge is presumed already decided.

MAR26-04. The adoptive-maternity ruling reviewed here removed which restriction?

A. All limits on the duration of maternity leave.

B. All employment-related coverage conditions for every person.

C. Every distinction between adoption and childbirth leave.

D. The adopted child’s three-month age limit for the specified 12-week leave entitlement.

MAR26-05. Which inference about paternity leave is justified by Hamsaanandini Nanduri?

A. All fathers received an automatic statutory 26-week leave entitlement.

B. The observation applies only to biological mothers.

C. The Court urged consideration of a provision; this is not itself a universal enacted entitlement.

D. The Court prohibited Parliament from legislating on paternity leave.

MAR26-06. Decriminalisation in regulatory reform necessarily means:

A. Conversion of every violation into a constitutional right.

B. Repeal of every underlying Act.

C. None of the alternatives: duties and administrative or monetary enforcement may remain.

D. Removal of all penalties for every covered activity.

MAR26-07. A proposal for administration of specified foreign-contribution assets should be treated as:

A. A proposed mechanism whose triggers and safeguards require the text and eventual legal stage.

B. Proof all charitable work has ceased.

C. A completed repeal of foreign-contribution registration.

D. Immediate confiscation of all domestic NGO property.

MAR26-08. Under the March FDI press note, a third-country investor has a land-border-linked interest below a company ownership threshold but effective control exists. Which is the sound approach?

A. Examine control, aggregation, sector conditions and commencement; do not rely on the percentage alone.

B. Ignore indirect interests because the immediate investor is elsewhere.

C. Treat the investment as unconditionally exempt from every approval.

D. Assume a press note automatically overrides every sectoral cap.

MAR26-09. What does the primary FDI note state about commencement?

A. The note abolishes all future reporting requirements.

B. The decision takes effect from the FEMA notification.

C. The publication date alone makes every change effective.

D. Each foreign investor chooses its own effective date.

MAR26-10. Restoration of RoDTEP rates and value caps means:

A. Restoring the applicable remission framework, not granting 50% of every export invoice.

B. A uniform cash subsidy equal to half of every invoice.

C. A guarantee no exporter can suffer losses.

D. Automatic compensation for every freight increase.

MAR26-11. The Digital Trade Facilitation draft’s chronology is best stated as:

A. An already commenced Act from the 2025 Budget speech.

B. A 9 February DGFT consultation carried forward in the March review.

C. A March parliamentary amendment verified from the Gazette.

D. A bill first published on 31 March solely because that is the index date.

MAR26-12. India–Canada CEPA terms of reference signed in March establish:

A. A basis for negotiations, not an implemented tariff-elimination schedule.

B. Automatic entry into force of a final agreement.

C. A binding zero-tariff rate for every product immediately.

D. Completion of every domestic ratification process.

MAR26-13. The proposed ₹10 crore CSR threshold should not be interpreted as:

A. A proposal concerning an applicability test.

B. Distinct from the percentage spending requirement.

C. A subject for legislative scrutiny.

D. A mandatory ₹10 crore CSR payment by every company.

MAR26-14. Under the reviewed draft compensation formula, an otherwise eligible net loss of ₹20,000 would give what proposed amount before any other condition is applied?

A. ₹20,000 because all eligible losses are fully refunded.

B. ₹50,000 because that is the reviewed loss ceiling.

C. ₹17,000, because 85% is below the ₹25,000 cap.

D. ₹25,000 regardless of the loss.

MAR26-15. A SEBI board announcement accepting conflict reforms is best distinguished from:

A. A separately operative notified instrument implementing each recommendation.

B. A policy-level decision.

C. A subject for governance analysis.

D. An expression of institutional intent.

MAR26-16. The aviation direction on 60% free seat allocation concerns:

A. The seat-allocation charge, not a promise that 60% of passengers fly without paying airfare.

B. Reservation of all seats for the government.

C. An unconditional right to business-class travel.

D. Abolition of 60% of ticket fares and taxes.

MAR26-17. Which pair matches Modified UDAN’s approved design?

A. 100 already commissioned new greenfield airports; no operating support.

B. FY 2026–27 to FY2035–36; ₹28,840 crore support.

C. Calendar 2026 alone; ₹28,840 lakh support.

D. 200 operational helipads certified on approval day; no VGF.

MAR26-18. A draft mineral-exchange framework can improve price discovery, but does not itself:

A. Require attention to assaying.

B. Create mineral deposits or replace mining and other applicable permissions.

C. Need transparent governance.

D. Raise questions about delivery risk.

MAR26-19. Which JJM 2.0 comparison is correct?

A. ₹8.69 lakh crore is already-spent Union assistance.

B. ₹8.69 lakh crore is total outlay; ₹3.59 lakh crore is total central assistance.

C. ₹1.51 lakh crore is the entire original and revised mission cost combined.

D. Both amounts are the same measure with different spellings.

MAR26-20. Consider the 2035 NDC targets: 1. The 47% target concerns GDP emissions intensity versus 2005. 2. The 60% target concerns non-fossil installed electricity capacity. 3. They guarantee a 47% absolute emissions cut and 60% renewable generation. Which are correct?

A. 2 and 3 only.

B. 1 and 3 only.

C. 1, 2 and 3.

D. 1 and 2 only.

MAR26-21. Approval of BHAVYA establishes:

A. Completed production in 100 selected AP parks.

B. A programme design for industrial parks, not proof that 100 parks are complete and occupied.

C. Automatic demand for every tenant’s output.

D. An unconditional grant to every industrial landowner.

MAR26-22. AP’s FHI 2026 profile is correctly described as:

A. A live audit of March 2026 accounts.

B. An overall Front Runner because one pillar is 43.1.

C. First nationally across a single combined major/NE/Himalayan cohort.

D. 17th of 18 major states overall, with a different Front Runner classification for expenditure quality.

MAR26-23. Which EIA claim should be rejected?

A. Project category and scheduled thresholds matter.

B. Every project above ₹50 crore is subject to one identical universal EIA test.

C. A draft amendment needs a separate final-law check.

D. Appraisal institutions require qualified capacity.

MAR26-24. A seventh CBD national report is best used as:

A. Proof forest-and-tree cover equals undisturbed natural forest.

B. A replacement for all ecological field evidence.

C. A guarantee all invasive-species risks are resolved.

D. An official reporting input to assess against indicators, not independent proof every target has been achieved.

MAR26-25. Which pairing is correct for the LHCb discovery?

A. Xi-cc-plus—chemical element; meson—atomic nucleus.

B. Xi-cc-plus—ordinary electron; meson—three valence quarks.

C. Xi-cc-plus—ccd composite baryon; meson—quark–antiquark pair.

D. Xi-cc-plus—new fundamental quark; meson—two identical quarks only.

MAR26-26. ISRO’s short statement on IRNSS-1F supports which conclusion?

A. Navigation-clock failure can coexist with continued one-way broadcast messaging.

B. Every NavIC satellite lost its clock on the same day.

C. Every payload and function of the satellite permanently stopped.

D. The page independently certifies a live constellation-wide operating count.

MAR26-27. 20 March 2026 is correctly related to Mahad’s 20 March1927 action as:

A. 99 completed years; the 100th anniversary falls in 2027.

B. The date of the December1927 Manusmriti-burning action.

C. The first anniversary of the event.

D. The completed 100th anniversary.

MAR26-28. The March AP Assembly resolution on Amaravati was:

A. A completed record of every capital project’s construction.

B. A request for statutory amendment, not itself Parliament’s amendment of the central Act.

C. Proof that the Act can never be amended again.

D. An automatic amendment of section 5 by the Assembly.

MAR26-29. Which distinction is important in Chinthada Anand?

A. Loss of a particular status makes violence against the person lawful.

B. Statutory SC eligibility decides whether social discrimination can ever occur.

C. All ST status automatically ends on any conversion.

D. The SC Order’s religion-based rule must not be mechanically applied as an identical ST exclusion, and ordinary criminal allegations need separate legal/evidentiary analysis.

MAR26-30. AP’s reported 50% municipal property-tax interest relief means:

A. Half of every household’s entire tax liability is extinguished.

B. No implementing conditions or deadlines can apply.

C. A concession concerning the interest component, not automatic halving of principal property tax.

D. Every municipal arrear has been collected.

Explained answer key

MAR26-01. D The current account includes goods, services, primary income and secondary income; it is not the goods balance alone. Services and remittances cushion, but do not necessarily eliminate, the merchandise gap. Caution: A BoP-basis reserve flow is not identical to the change in the published reserve stock including valuation effects. These are preliminary estimates. [E10-2603-002]

MAR26-02. D IIP is a volume index of selected industrial production, not the same measure as GDP value added. A positive aggregate can conceal a contracting component because sector weights differ. Caution: These are not March 2026 monthly growth rates and do not measure the services sector. [E10-2603-003]

MAR26-03. B Gender identity, sexual orientation and variations in sex characteristics are distinct concepts; Articles 14, 19 and 21 frame rights analysis. Evaluate administrative verification against dignity, privacy, inclusion and access to welfare. Caution: This note verifies parliamentary passage, not assent/commencement from the Gazette. Do not call every provision operative from 25 March or equate orientation with identity. [E10-2603-004]

MAR26-04. D Substantive equality tests whether formally neutral classifications fairly accommodate different caregiving situations. Adoption involves adjustment and attachment needs that do not disappear when a child crosses three months. Caution: Do not convert this ruling into 26 weeks for all adoptive mothers or a newly enacted nationwide paternity entitlement. [E10-2603-005]

MAR26-05. C Substantive equality tests whether formally neutral classifications fairly accommodate different caregiving situations. Adoption involves adjustment and attachment needs that do not disappear when a child crosses three months. Caution: Do not convert this ruling into 26 weeks for all adoptive mothers or a newly enacted nationwide paternity entitlement. [E10-2603-005]

MAR26-06. C Decriminalisation can replace imprisonment/criminal prosecution with monetary or administrative enforcement while retaining duties. Reduced fear of prosecution can aid compliance, but deterrence depends on penalty design and adjudicatory independence. Caution: A proposed change across 80 Acts does not repeal those Acts or eliminate all penalties. Parliamentary introduction is not commencement. [E10-2603-007]

MAR26-07. A Registration, renewal, suspension and cancellation have different legal consequences; natural justice requires notice and a reasoned decision. Regulation must address diversion risks without arbitrarily disrupting legitimate service delivery. Caution: A bill is not an operative authority to confiscate every association’s domestic or foreign-funded assets. [E10-2603-008]

MAR26-08. A A beneficial owner is not necessarily the immediate shareholder; ownership chains can separate legal title from ultimate control. Screening should identify aggregate indirect interests and effective control, not simply a single shareholder below a percentage. Caution: Do not assert that every sub-10% interest qualifies for unrestricted automatic entry, or that the press-note date itself proves legal commencement. [E10-2603-009]

MAR26-09. B A beneficial owner is not necessarily the immediate shareholder; ownership chains can separate legal title from ultimate control. Screening should identify aggregate indirect interests and effective control, not simply a single shareholder below a percentage. Caution: Do not assert that every sub-10% interest qualifies for unrestricted automatic entry, or that the press-note date itself proves legal commencement. [E10-2603-009]

MAR26-10. A Remission of embedded levies differs from reimbursing every business cost or promising a guaranteed export profit. Relief can ease cash-flow pressure but does not remove freight, insurance or demand shocks. Caution: Restoration is not a uniform 50% subsidy on the invoice value of every export. [E10-2603-010]

MAR26-11. B Functional equivalence requires integrity, reliable identification and exclusive control where paper possession represents a transferable right. Paperless trade can reduce duplication and financing delays only if counterparties and legal systems recognise the records. Caution: Do not invent a first release in March or treat a consultation draft as enacted law. The primary notice is 9 February. [E10-2603-011]

MAR26-12. A A CEPA can cover goods, services and wider economic cooperation, subject to the negotiated text. Commercial opportunity must be considered alongside regulatory standards, mobility and domestic sensitivities. Caution: Terms of reference are not an implemented free-trade agreement. [E10-2603-012]

MAR26-13. D A CSR applicability threshold differs from the percentage of qualifying profits to be spent and from other qualifying tests. Simpler compliance can reduce small-entity costs but may narrow the spending base or alter accountability. Caution: ₹10 crore is not a universal mandatory CSR payment or a replacement for every turnover/net-worth criterion. [E10-2603-014]

MAR26-14. C 85% × ₹20,000 = ₹17,000, below the ₹25,000 cap. The calculation is conditional on draft eligibility; it is not a statement that the scheme was already operative. [E10-2603-016]

MAR26-15. A A conflict can be actual, potential or perceived; disclosure alone may not remove the need for recusal. Institutional credibility needs enforceable rules, independent review and accessible reporting. Caution: Do not claim every recommendation was already legally notified simply because the board approved a reform package. [E10-2603-017]

MAR26-16. A A base fare, taxes, ancillary charges and a seat-selection fee are different price components. Unbundling can offer choice, but misleading interfaces may turn an apparently optional charge into an unavoidable cost. Caution: The direction concerns seat allocation, not 60% of tickets with zero airfare. This is a dated announcement, not a separately checked current DGCA compliance schedule. [E10-2603-018]

MAR26-17. B Viability-gap funding supports otherwise insufficient commercial returns, not an assurance that every route will become permanently profitable. Smaller markets need reliable operations, aircraft availability, ground access and demand, not only construction. Caution: Approval does not mean 100 completed new airports or 200 operational helipads. Existing airstrips are central to the airport component. [E10-2603-019]

MAR26-18. B A commodity exchange can aid price discovery without creating the mineral resource or replacing mining permissions. Transparent prices may help smaller buyers, but concentration and grade manipulation can weaken the expected benefits. Caution: Draft rules are not proof exchanges are already licensed or that every mineral category is covered. [E10-2603-024]

MAR26-19. B An installed tap differs from regular, adequate, safe water service; capital expenditure creates recurring O&M obligations. Digital service-area IDs can support accountability only if asset, quality and downtime data are reliable. Caution: ₹8.69 lakh crore is total outlay, not entirely Union assistance or spending already incurred. Reported connections and modelled health benefits are not identical evidence. [E10-2603-026]

MAR26-20. D Emissions intensity is emissions per unit of GDP; installed capacity measures potential output, not actual generation. Economic growth can coexist with lower intensity and higher absolute emissions; examine both dimensions. Caution: Do not call this a 47% absolute emissions cut, 60% renewable generation, or proof of the UNFCCC submission date. Non-fossil is broader than renewables. [E10-2603-027]

MAR26-21. B Plug-and-play infrastructure reduces setup frictions but does not automatically create demand, skills or production. States need land readiness, reliable utilities, transport and credible governance to convert approval into occupancy. Caution: 100 parks is an approved programme objective, not 100 completed or fully occupied parks. Funding ceilings are not automatic entitlements. [E10-2603-031]

MAR26-22. D A composite score combines indicators; a pillar score is not the overall ranking and a 2026 publication need not measure 2026 finances. AP’s weak fiscal-prudence/debt-sustainability scores require a broader diagnosis than one improving spending-quality indicator. Caution: Do not call AP an overall Front Runner or infer March 2026 audited finances from FY2023–24 data. [E10-2603-033]

MAR26-23. B EIA includes screening/scoping, appraisal and other applicable stages; Category A and B use different institutional routes. Continuity can reduce administrative deadlock, but capacity, independent expertise and public participation remain essential. Caution: Reject the article’s blanket claim that all projects above ₹50 crore require EIA. There is no single universal ₹50-crore test. This is a draft, not verified final law. [E10-2603-034]

MAR26-24. D The CBD’s objectives are conservation, sustainable use and fair/equitable benefit sharing; treaty duties differ from framework targets. Reported policy alignment is not independent proof every biodiversity outcome is on track. Caution: Forest-and-tree cover is not the same as natural forest quality; do not copy changing Ramsar/site counts as an undated current total. [E10-2603-035]

MAR26-25. C Baryons contain three valence quarks; ordinary mesons contain a quark–antiquark pair, not just two quarks. The result tests strong-interaction descriptions and heavy-quark bound states without adding a new fundamental quark flavour. Caution: This is a newly observed composite baryon, not a new elementary particle or a new chemical element. “Heavy proton” is an analogy. [E10-2603-037]

MAR26-26. A Satellite navigation derives range from precise timing; broadcast messaging does not impose the same navigation-clock function. Redundancy, indigenous timing capability and replenishment planning matter for strategic autonomy. Caution: Do not conclude every function of IRNSS-1F stopped, the entire NavIC system shut down, or certify a live constellation count from a secondary magazine snapshot. [E10-2603-038]

MAR26-27. A Social access to public resources connects anti-caste mobilisation with equality and the later constitutional prohibition of untouchability. Legal recognition and actual access can diverge when social exclusion remains entrenched. Caution: Do not confuse the March tank satyagraha with the December1927 Manusmriti-burning event or label March 2026 the completed 100th anniversary. [E10-2603-039]

MAR26-28. B A legislative resolution, a state executive decision and a parliamentary amendment are different constitutional instruments. Administrative clarity can aid planning, but financing, land obligations and service delivery need separate assessment. Caution: The March resolution is not proof Parliament had already amended the Act or that future law can never change the capital arrangement. [E10-2603-041]

MAR26-29. D Articles 341 and 342 govern notified SC/ST identification; a caste certificate must accord with the applicable constitutional order. The judgment discusses proof of original notified caste, bona fide reconversion and community acceptance for a reconversion claim. Caution: Do not generalise this SC rule to automatic loss of ST status, all minority rights or immunity for violence. The IPC findings were case-specific, not a general bar on complaints. [E10-2603-047]

MAR26-30. C Property tax is an important municipal own-revenue source; an arrears amnesty changes collection incentives. Temporary relief may improve near-term recovery but repeated amnesties can penalise timely taxpayers and weaken discipline. Caution: Do not advertise “half the property tax waived” or claim all arrears were extinguished. [E10-2603-048]

Mains answer laboratory

Original planning aids, not official model answers or predictions. Facts, static connections and proposed reforms remain distinct.

How should India manage external vulnerability during an energy shock?

Study reference: E10-2603-002

Dated anchor: RBI released preliminary Q3 FY 2025–26 data on 2 March.

1. Anchor the 2 March release: Q3 CAD US$13.2 billion/1.3% of GDP; identify the reference quarter as October–December 2025.

2. Map transmission: import bill, freight/insurance, input costs, inflation, exchange-rate pressure and external financing.

3. Explain cushions: services, remittances, reserves and diversified supply; each has different limits and time horizons.

4. Counterpoint: suppressing all price signals can shift costs to budgets, while abrupt pass-through can harm vulnerable households.

5. Recommend targeted support, transparent contingency planning, efficiency and stable external-financing policy. Distinguish BoP-basis reserve flows from valuation-driven stock changes.

Evidence caution: A BoP-basis reserve flow is not identical to the change in the published reserve stock including valuation effects. These are preliminary estimates.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

Examine adoptive-maternity protection through substantive equality.

Study reference: E10-2603-005

Dated anchor: The Supreme Court decided Hamsaanandini Nanduri on 17 March.

1. Use the 17 March ruling’s removal of the adopted child’s three-month age restriction; preserve the specified 12-week entitlement.

2. Explain why caregiving and attachment needs are not confined to infancy or biological childbirth.

3. Link Articles 14/21 to dignity and non-arbitrary classification without assuming every statutory coverage condition was struck down.

4. Address implementation: employer awareness, accessible claims and protection against adverse workplace treatment.

5. Propose a wider shared-care framework, while distinguishing the Court’s paternity-leave suggestion from an enacted universal entitlement.

Evidence caution: Do not convert this ruling into 26 weeks for all adoptive mothers or a newly enacted nationwide paternity entitlement.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

Can transparent investment screening reconcile capital access and economic security?

Study reference: E10-2603-009

Dated anchor: DPIIT issued Press Note 2 on 15 March.

1. Anchor DPIIT Press Note2, 15 March, and its explicit dependence on a FEMA notification for effect.

2. Explain indirect ownership, entity-specific thresholds, aggregated interests and ultimate effective control.

3. Benefits: predictable rules can reduce uncertainty for diversified funds while preserving review of controlled investments.

4. Risks: layered entities, information asymmetry, discretionary delay and weak enforcement can defeat both investment and security aims.

5. Recommend clear reporting, auditable beneficial-ownership information, reasoned decisions and timelines; retain sectoral caps and do not use a percentage as the sole test.

Evidence caution: Do not assert that every sub-10% interest qualifies for unrestricted automatic entry, or that the press-note date itself proves legal commencement.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

How can JJM move from counting connections to assuring rural water services?

Study reference: E10-2603-026

Dated anchor: The Cabinet approved JJM restructuring and extension on 10 March.

1. Anchor the December2028 extension and separate total outlay ₹8.69 lakh crore from central assistance ₹3.59 lakh crore.

2. Map source sustainability, treatment, distribution, household availability, quality testing and repair response.

3. Use Sujalam Bharat mapping, Jal Arpan and GP/O&M certification as accountability mechanisms rather than outcomes already proved.

4. In AP, connect water-stressed sources, local maintenance finance and village capacity; avoid treating a tap as proof of year-round safe supply.

5. Recommend service-level disclosure, inclusive community oversight and maintenance support. Measure downtime, quality and household reliability, not only assets built.

Evidence caution: ₹8.69 lakh crore is total outlay, not entirely Union assistance or spending already incurred. Reported connections and modelled health benefits are not identical evidence.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

Assess the implementation challenge in India’s 2035 climate commitments.

Study reference: E10-2603-027

Dated anchor: The Cabinet approved India’s 2031–35 NDC on 25 March. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

1. State the targets accurately: 47% GDP-intensity reduction versus2005, 60% non-fossil installed capacity, and the specified forest/tree carbon sink.

2. Explain intensity versus absolute emissions and capacity versus generation; non-fossil includes more than renewables.

3. Map implementation needs across power networks/storage, industrial efficiency, finance, livelihoods and ecological restoration.

4. Counterpoint: nominal capacity additions may underdeliver without grid integration; forest quantity can hide ecological-quality problems.

5. Recommend sectoral milestones and transparent monitoring. Cabinet approval is not independently verified UNFCCC submission, and the 2070 net-zero goal is distinct.

Evidence caution: Do not call this a 47% absolute emissions cut, 60% renewable generation, or proof of the UNFCCC submission date. Non-fossil is broader than renewables.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

What does AP’s Fiscal Health Index profile imply for fiscal reform?

Study reference: E10-2603-033

Dated anchor: NITI’s 2026 publication assesses fiscal outcomes for FY2023–24. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

1. Identify the data vintage: FHI 2026 assesses FY2023–24; AP ranks 17/18 major states with23.1 overall.

2. Distinguish the expenditure-quality pillar43.1/Front Runner from the overall Aspirational classification.

3. Diagnose revenue mobilisation, fiscal prudence, debt index and debt sustainability alongside productive-spending quality.

4. Discuss trade-offs: abrupt expenditure cuts can damage services, while weak project appraisal and contingent liabilities can compound debt risk.

5. Recommend better own-revenue administration, credible medium-term planning, transparent guarantees and outcome-based capital selection; do not invent March 2026 audited conclusions.

Evidence caution: Do not call AP an overall Front Runner or infer March 2026 audited finances from FY2023–24 data.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

How can environmental clearance be timely without weakening scrutiny?

Study reference: E10-2603-034

Dated anchor: March’s magazine discusses a draft amendment to the 2006 EIA framework. March is the editorial coverage index; the web edition was posted 30 April. Event dates are distinguished in the text.

1. Anchor the draft standing-state-body proposal as a response to institutional vacancies and delays, not verified final law.

2. Explain the scheduled-project/category framework; explicitly reject a universal ₹50-crore EIA test.

3. Benefits: continuity, digital routing and clear appraisal responsibilities can reduce avoidable uncertainty.

4. Risks: poor expertise, rushed public consultation, conflicts and deadline-driven rubber-stamping can undermine environmental legitimacy.

5. Recommend adequate capacity, transparent reasons, participation and compliance monitoring. Institutional delay should not be treated as automatic environmental approval.

Evidence caution: Reject the article’s blanket claim that all projects above ₹50 crore require EIA. There is no single universal ₹50-crore test. This is a draft, not verified final law.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

Explain notified social status, legal protection and evidence in the AP-linked SC-status ruling.

Study reference: E10-2603-047

Dated anchor: The Supreme Court dismissed the AP-linked appeal on 24 March.

1. Anchor Chinthada Anand, 24 March, and paragraph3 of the SC Order1950; distinguish the challenged HC order’s 30 April 2025 date.

2. Explain that SC-status-dependent benefits must follow the notified legal framework and the Court’s treatment of the claimant’s facts.

3. Preserve the explicit ST distinction: no equivalent religion-based exclusion; the Court describes a fact-sensitive tribal-identity assessment.

4. Analyse ordinary IPC allegations separately; case-specific evidentiary findings do not extinguish universal criminal-law protection or deny persistent social discrimination.

5. Conclude with careful status verification, due process and avoidance of sweeping generalisations. This is an answer framework, not individual legal advice.

Evidence caution: Do not generalise this SC rule to automatic loss of ST status, all minority rights or immunity for violence. The IPC findings were case-specific, not a general bar on complaints.

Conclusion test: Identify the institution, financing/rights safeguard and measurable outcome rather than merely restating the proposal.

Source register

Evidence access is recorded explicitly. Most non-PRS references were inspected as source extracts; primary full-text review remains open for them.

[E10-PRS] PRS · March 2026 policy review

https://prsindia.org/policy/monthly-policy-review/march-2026

Chunks 0–11 of 13 inspected: substantive policy review and most references. Final reference tail not inspected. Referenced primary texts not all independently read. Budget-session commencement and AP High Court year were not reused: primary/other records contradict those details. Additional direct HTML paragraph checks inspected the women/cyber, pulse/oilseed, water-efficient seed, AIIMS, CAPF, corporate/CSR, fraud, toll, electricity, REC and mineral-rule passages. AI report submission is not committee constitution.

[E10-BHAVYA] PIB · BHAVYA approval, 18 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2241785&reg=3&lang=1

Chunk 0 of 2: substantive approval and scheme design inspected; not project implementation records.

[E10-NDC] PIB · 2031–35 NDC approval, 25 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2245209&reg=3&lang=1

Chunk 0 of 3: substantive targets and baseline distinctions inspected; later text and UNFCCC submission record not independently reviewed.

[E10-BOP] RBI · Q3 FY2025–26 balance of payments

https://rbidocs.rbi.org.in/rdocs/PressRelease/PDFs/PR22016B971CD8D1D8411CA7DEF94DF1EB4768.PDF

Full single-chunk release read, including preliminary/revised status, quarterly/April–December distinction, flows and BoP-basis reserve depletion.

[E10-FDI] DPIIT · Press Note 2 of 2026

https://www.dpiit.gov.in/static/uploads/2026/03/b9da5830b052c2f2d788593e97d07c63.pdf

Full three-page note read. Explicit commencement depends on FEMA notification; corresponding notification not independently located/read.

[E10-DIGITAL] DGFT · Digital Trade Facilitation draft, 9 February

https://content.dgft.gov.in/Website/dgftprod/cb2fc214-b604-4cb8-a924-c3a439ad7a14/Trade%20Notice%2024%20dated%2009.02.2026.pdf

Opening chunk 0 of 4 read: dated notice, explanatory purpose, definitions, application and opening legal-recognition clauses. Later draft provisions not fully inspected. This is a February draft carried forward in March review, not first released in March.

[E10-ADOPT] Supreme Court · Hamsaanandini Nanduri, 17 March

https://api.sci.gov.in/supremecourt/2021/18032/18032_2021_7_1502_69584_Judgement_17-Mar-2026.pdf

Opening fetch chunk 0 of 7 plus final five PDF pages (96–100) inspected. Concluding paragraphs 166–170 read; not a full reading of the 100-page judgment.

[E10-SCSTATUS] Supreme Court · Chinthada Anand v State of AP, 24 March

https://api.sci.gov.in/supremecourt/2025/26891/26891_2025_16_1501_69653_Judgement_24-Mar-2026.pdf

Opening fetch chunk 0 of 8 and PDF pages 23–33 selectively inspected: postulates, SC/ST distinction, application, criminal allegations and dismissal. Full 33-page reasoning not read; HC date is 30 April 2025, not PRS's 2024.

[E10-FHI] NITI Aayog · Fiscal Health Index 2026

https://www.niti.gov.in/sites/default/files/2026-03/Fiscal-Health-Index-2026.pdf

Official landing read; PDF downloaded. Ranking table PDF p41 and AP/quality-of-expenditure passages p43 and p47–49 inspected. Selected other AP matches extracted, not full report review. Ranking uses FY2023–24 data, not March2026 live finances.

[E10-APCAB] The New Indian Express · AP Cabinet, 27 March

https://www.newindianexpress.com/states/andhra-pradesh/2026/Mar/27/andhra-govt-cabinet-okays-draft-resolution-on-capital-amaravati

Chunk 0 of 2 substantive report read. Cabinet met 26 March. Independent newspaper reporting, not primary GO/Gazette or proof of implementation.

[E10-APCAP] IANS/SocialNewsXYZ · AP Assembly resolution, 28 March

https://www.socialnews.xyz/2026/03/28/andhra-assembly-passes-resolution-seeking-statutory-capital-status-for-amaravati/

Full substantive single-chunk report read. Resolution requested parliamentary amendment; no claim this reporting is the primary resolution text or an enacted amendment.

[E10-AIR] PIB · Passenger facilitation, 18 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2241546&reg=3&lang=1

Full single-chunk release read. Reports directions on seat allocation; not a zero-airfare entitlement or separately checked current DGCA circular.

[E10-UDAN] PIB · Modified UDAN approval, 25 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2245471&reg=3&lang=1

Chunk 0 of 3 read through scheme period, outlay, aerodrome/helipad development, O&M, VGF and indigenous procurement design. Later continuation not fully read; no implementation certification.

[E10-JJM] PIB · JJM 2.0 approval, 10 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2237550&reg=3&lang=2

Chunk 0 of 2 substantive approval read: exact outlay/central shares, service framework, O&M certification and reported connections. Estimated impacts are not independently established outcomes.

[E10-CERN] LHCb · Doubly charmed baryon discovery, 17 March

https://lhcb-outreach.web.cern.ch/2026/03/17/observation-of-the-doubly-charmed-heavy-proton-%CE%BEcc/

Chunk 0 of 2 substantive experiment announcement read, including ccd composition, 2024 collision data, mass and >7-sigma signal. Scientific paper not independently reviewed.

[E10-ISRO] ISRO · IRNSS-1F mission-life statement, 13 March

https://www.isro.gov.in/IRNSS-F_successfully.html

fetch_page returned mainly navigation; direct requests/BeautifulSoup recovered and inspected the short dated substantive statement: atomic clock stopped 13 March, design life completed 10 March, messaging continues. No independently verified constellation-wide operating count.

[E10-TRANS] PRS · Transgender amendment bill track

https://prsindia.org/billtrack/the-transgender-persons-protection-of-rights-amendment-bill-2026

Chunk 0 of 2 read: introduction/passage dates and substantive bill summary. Original bill/Act Gazette and commencement notification not independently inspected; note is deliberately a parliamentary-stage snapshot.

[E10-V11] Vision IAS · March 2026 · 2.5 Nagoya Protocol

https://visionias.in/current-affairs/monthly-magazine/2026-04-30/environment/india-submits-1st-national-report-on-implementation-of-nagoya-protocol

Selected lead/substantive passages inspected from retrieved public article body; not full issue review or independent reading of every primary reference.

[E10-V14] Vision IAS · March 2026 · 3.1 Discovery of New Particle by Large Hadron Collider

https://visionias.in/current-affairs/monthly-magazine/2026-04-30/science-and-technology/discovery-of-new-particle-by-large-hadron-collider

Selected lead/substantive passages inspected from retrieved public article body; not full issue review or independent reading of every primary reference.

[E10-V16] Vision IAS · March 2026 · 3.3 IRNSS-NAVIC

https://visionias.in/current-affairs/monthly-magazine/2026-04-30/science-and-technology/irnss-navic-1

Selected lead/substantive passages inspected from retrieved public article body; not full issue review or independent reading of every primary reference.

[E10-V35] Vision IAS · March 2026 · 9.1 Mahad Satyagraha

https://visionias.in/current-affairs/monthly-magazine/2026-04-30/culture/mahad-satyagraha-4

Selected lead/substantive passages inspected from retrieved public article body; not full issue review or independent reading of every primary reference.

[E10-V22] Vision IAS · March 2026 · 5.1 Energy Security and India’s Foreign Policy

https://visionias.in/current-affairs/monthly-magazine/2026-04-30/international-relations/energy-security-and-indias-foreign-policy

Selected lead/substantive passages inspected from retrieved public article body; not full issue review or independent reading of every primary reference.

[E11-JAN] PIB · Jan Vishwas introduction,27 March

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2246226&reg=3&lang=1

Full substantive release in chunk 0 of 2 read: 79 Acts,784 provisions,717 decriminalisation/67 ease-of-living. Corrects March note’s PRS-derived 80 Acts. Detailed final Gazette/commencement not read.

[E19-APDIST] AP Finance · district/mandal budget allocation memo, 11 March 2026

https://apfinance.gov.in/images/Budget_Outreach_2026-27_Memo.pdf

Complete one-chunk primary memo read. NIDHI logins and underlying allocation tables were not accessed. Its reference to 28 districts is reported as the memo’s allocation instruction, not independent verification of district-reorganisation notifications.

[E19-APMEET] AP Finance · budget outreach meetings circular, 28 March 2026

https://apfinance.gov.in/images/Budget_Outreach_Programme_2026-27_Circular_Memo.pdf

Complete three-page circular as one extracted chunk read. Instructions, 30 March–4 April window and required feedback are verified as instructions, not proof every meeting occurred.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
