CIVILS ATLAS / RESEARCH EDITION 19

May 2026

Understand the news.
Retain what matters.

65 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

Subject guide

Polity & Governance — 6 notes

Economy — 12 notes

Agriculture — 5 notes

Society & Welfare — 10 notes

Environment — 7 notes

Awards & Sports — 3 notes

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Courts and ordinance power

Supreme Court capacity: 37 judges plus the CJI

E12-2605-001 · P1 · 2026-05-16 · National / other

WHY IN THE NEWS The 16 May Ordinance took effect at once.

• Ordinance 1 of 2026 substitutes thirty-seven for thirty-three in section 2 of the 1956 Act.

• The sanctioned total therefore rises from 34 to 38 when the Chief Justice is included.

• Article 123 gives an ordinance statutory force, subject to constitutional legislative control and the six-week reassembly rule.

STATIC CONNECTION · ORIGINAL Article 124 permits Parliament to prescribe the number beyond the Chief Justice; changing the statutory ceiling is not a constitutional amendment.

ANALYSIS · ORIGINAL GUIDANCE

• More posts can permit additional benches, but vacancies, case management, registry support and litigation inflow also affect delay.

• Distinguish a sanctioned post, an appointment, a judge taking oath and actual bench capacity when evaluating reform.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not write 37 including the CJI, assume all posts were immediately filled, or certify the Ordinance’s November status without checking replacement/lapse.

MAINS PROMPT How can judicial capacity reform reduce delay without sacrificing reasoned justice?

Sources: [E12-PRS], [E12-SC]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Rural employment — draft rules and transition

VB–G RAM G: draft allocation rules before commencement

E12-2605-006 · P1 · 2026-05-22 · National / other

WHY IN THE NEWS May consultations must be separated from the Act’s stated 1 July commencement.

• Drafts propose using 16th Finance Commission tax-devolution parameters for normative inter-state allocation under a centrally specified methodology.

• From the second year, specified performance conditions may influence part of allocation.

• Drafts provide DBT of wages/unemployment allowance, with exceptional central exemptions; comments were invited until 21 June.

STATIC CONNECTION · ORIGINAL A draft subordinate instrument is not a final rule, and an enacted law with future commencement is not already an operative replacement on every May date.

ANALYSIS · ORIGINAL GUIDANCE

• Need-sensitive allocation must avoid penalising low-capacity states twice through both deprivation and weak reporting.

• For AP, examine transition of outstanding liabilities, local demand, social audit and bank access before declaring old entitlements extinguished in May.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the draft formula final or infer MGNREGA ceased operating on the day consultation drafts appeared.

MAINS PROMPT Assess fiscal predictability and demand-responsive protection during rural-employment transition.

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Evidence and migration policy

Demographic-change committee: remit is not a finding

E12-2605-018 · P2 · 2026-05-26 · National / other

WHY IN THE NEWS The 26 May review reports a high-level committee chaired by retired Justice P. P. Navlekar.

• Its remit includes studying demographic changes and underlying factors, including alleged illegal immigration.

• It may recommend border-management, deportation-process and Centre–state coordination measures.

• The initial reporting period is one year, with a possible six-month extension.

STATIC CONNECTION · ORIGINAL Population trends cannot alone establish an individual’s citizenship or immigration status; lawful identification and due process are separate requirements.

ANALYSIS · ORIGINAL GUIDANCE

• Reliable census, migration and administrative evidence must be distinguished from political inference or correlation.

• Rights-respecting procedure and transparent methods are necessary when studying community-level changes.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat committee constitution as proof that any particular community or person is an unlawful immigrant.

MAINS PROMPT How should demographic-policy research combine credible evidence with individual rights?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Limited government

Constitutionalism is more than numerical majority

E12-2605-021 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue revisits judicial observations about constitutional limits. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Constitutionalism requires public power to be justified and limited by constitutional rules.

• Articles 13, 32 and 226 underpin judicial review; Article 14 protects equality and non-arbitrariness.

• Majority support does not authorise the removal of fundamental rights or the basic structure through an otherwise impermissible act.

STATIC CONNECTION · ORIGINAL A written Constitution can exist without effective limited government; constitutional practice requires institutions and enforceable safeguards.

ANALYSIS · ORIGINAL GUIDANCE

• For Mains, reconcile representative legitimacy with minority protection and reasoned review rather than present courts and elections as mutually exclusive.

• AP applications include fair consultation and non-arbitrary administration, not an assumption that a national observation invalidated a specific state policy.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not attribute a final holding to an oral remark or equate every restriction on executive power with judicial supremacy over all policy choices.

MAINS PROMPT How can constitutional democracy respect electoral mandates without permitting unchecked power?

Sources: [E12-V01]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

05 · Panchayat performance evidence

PAI 2.0: reference year, categories and local validation

E12-2605-022 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses the FY 2023–24 Panchayat Advancement Index. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The index localises SDGs through nine thematic areas; editorial month is not performance reference year.

• Categories run from Beginner below 40 to Achiever at 90 or above, with intermediate Aspirant, Performer and Front Runner bands.

• The article describes Gram Sabha validation and stronger portal-based cross-checks as improvements.

STATIC CONNECTION · ORIGINAL A composite score depends on weights, data validity and participation; ranking is not a causal estimate of a panchayat’s impact.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, use village-level gaps to inform Gram Panchayat Development Plans and budget priorities.

• Reward improvement without encouraging selective reporting or treating non-submission as proof of identical deprivation.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse FY 2023–24 findings with measured May 2026 performance or present a magazine ranking as an independent village audit.

MAINS PROMPT How can local performance indices improve decentralised planning rather than only ranking?

Sources: [E12-V03]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

06 · Election Commission independence

ECI appointments: committee design and pending review

E12-2605-023 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The magazine covers observations during challenge to the 2023 appointment law. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Under the reviewed law, the selection committee comprises the Prime Minister, a Union Cabinet Minister and the Lok Sabha opposition leader as provided by the statute.

• The earlier Anoop Baranwal arrangement involving the CJI was an interim judicial framework pending legislation.

• Article 324(2) makes presidential appointment subject to parliamentary law; constitutional removal safeguards differ between the CEC and other ECs.

STATIC CONNECTION · ORIGINAL Appointment independence, operational autonomy and removal security are related but distinct institutional safeguards.

ANALYSIS · ORIGINAL GUIDANCE

• Assess whether selection encourages credible independence through transparency, eligibility and reasoned institutional checks.

• A hearing observation does not itself strike down the Act or restore an earlier committee composition.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim the CJI remains a member under the 2023 Act or state that a rhetorical courtroom observation is the final operative order.

MAINS PROMPT Evaluate appointment design as a safeguard for election administration.

Sources: [E12-V04]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Economy

01 · Central labour rules — wage setting

Floor wage versus minimum wage: different legal functions

E12-2605-005 · P1 · 2026-05-08 · National / other

WHY IN THE NEWS The 8 May wage rules specify calculation and consultation processes.

• The central floor-wage process considers minimum living standards and consultation with states/Board.

• Variable dearness allowance is recalculated before 1 April and 1 October using CPI for Industrial Workers.

• The inspected rules provide an eight-hour normal day for daily-wage employees and a 48-hour weekly ceiling for other wage periods.

STATIC CONNECTION · ORIGINAL The central floor is a benchmark; appropriate-government minimum wages and inflation adjustments are not the same administrative act.

ANALYSIS · ORIGINAL GUIDANCE

• Enforcement must address coverage, classification and contractor payment chains, not merely publish a headline rate.

• Do not infer the general retail CPI or its rebasing automatically replaces CPI-IW in a specifically prescribed formula.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These rules do not by themselves announce one new rupee wage applicable to every worker across India.

MAINS PROMPT How can wage-setting combine a credible floor, regional needs and enforceable payment?

Sources: [E12-PRS], [E12-WAGE]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Liquidity guarantees

ECLGS 5.0: guarantee coverage is not debt forgiveness

E12-2605-007 · P1 · 2026-05-05 · National / other

WHY IN THE NEWS The 5 May approval targets temporary liquidity pressures linked to West Asia disruption.

• Eligible standard accounts include businesses with existing working-capital limits and scheduled passenger airlines with outstanding credit as of 31 March.

• Additional business credit is up to 20% of peak utilised Q4 FY 2025–26 working capital, capped at ₹100 crore; eligible airlines have a distinct ceiling up to ₹1,500 crore.

• Coverage is 100% for MSMEs and 90% for non-MSMEs/airlines; business tenor is five years including one-year moratorium, versus seven/two for airlines.

STATIC CONNECTION · ORIGINAL NCGTC guarantees lenders against eligible default risk; borrowers still owe the loan and moratorium is not a grant.

ANALYSIS · ORIGINAL GUIDANCE

• Guarantees can prevent a liquidity shock becoming insolvency, but appraisal and monitoring remain necessary.

• The sanction window runs from NCGTC guideline issue to 31 March 2027; Cabinet approval and actual loan disbursement are distinct.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not apply 20% to the sanctioned but unused limit, equate a guarantee with a waiver, or count targeted credit as paid expenditure.

MAINS PROMPT When can emergency guarantees support viable firms without encouraging poor lending?

Sources: [E12-PRS], [E12-ECLGS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Industrial parks — implementation guidelines

BHAVYA: land readiness, SPVs and conditional assistance

E12-2605-008 · P1 · 2026-05-23 · National / other

WHY IN THE NEWS May guidelines operationalise the earlier industrial-park scheme.

• The programme envisages 100 parks over 2026–27 to 2031–32, with 50 projects in the first phase.

• The reviewed eligibility includes at least 90% encumbrance-free land possession at application and delegated planning/development powers to the SPV.

• Funding is conditional: up to ₹1 crore per acre in the specified framework; private-developer collaborations face a lower ₹50 lakh/acre or 50% infrastructure-cost limit, whichever is lower.

STATIC CONNECTION · ORIGINAL A scheme envelope, selected DPR, SPV equity contribution and completed industrial occupancy are different milestones.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, appraise connectivity, water, serviced land, land obligations and realistic tenant demand alongside incentive size.

• An encumbrance-free certificate does not remove environmental or rehabilitation responsibilities; land value also constrains contribution.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the per-acre maximum an unconditional grant for every industrial-estate acre or treat the 100-park target as completed.

MAINS PROMPT How should industrial parks be selected to produce additional, sustainable economic activity?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Insurance investment — legal layers

Insurance FDI: enabling amendment, FEMA rules and LIC exception

E12-2605-009 · P1 · 2026-05-02 · National / other

WHY IN THE NEWS May’s FEMA amendment changes the investment framework.

• The review reports up to 100% foreign investment under the automatic route in insurance companies following the 2025 enabling Act.

• LIC remains separately capped at 20% under the reviewed framework.

• Residency requirements are relaxed to require at least one among chairperson, managing director and CEO to be a resident Indian citizen.

STATIC CONNECTION · ORIGINAL An automatic investment route removes a specified prior approval requirement; it does not remove sectoral licensing, prudential or policyholder rules.

ANALYSIS · ORIGINAL GUIDANCE

• New capital can support underwriting and distribution, but governance, claims practice and solvency determine consumer outcomes.

• Track the Act, FEMA rules and applicable IRDAI directions separately rather than assuming all changed on one date.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not extend the 100% figure to LIC or claim foreign ownership guarantees universal low-cost insurance.

MAINS PROMPT Assess the benefits and safeguards needed when liberalising insurance capital.

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

05 · Recovery conduct — consultation

Loan-recovery drafts: dignity in technology-enabled collection

E12-2605-010 · P2 · 2026-05-20 · National / other

WHY IN THE NEWS RBI invited comments on 20 May draft amendments.

• Drafts restrict device disabling, with a limited device-finance exception subject to overdue/noticing conditions and protected emergency functions.

• They propose holding referral to recovery agents while a relevant borrower grievance is unresolved.

• Proposed first-visit notice is at least one day electronically or three days by letter, with trained/certified recovery agents.

STATIC CONNECTION · ORIGINAL A valid debt does not eliminate privacy, safety and fair-recovery obligations; a draft safeguard is not automatically operative law.

ANALYSIS · ORIGINAL GUIDANCE

• Digital controls can become coercive if access to work, communication or emergency help is removed.

• Lenders need auditable vendor oversight, accessible complaint resolution and proportional recovery rather than outsourcing accountability.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe every proposed restriction as final, or infer a borrower’s complaint automatically cancels the debt.

MAINS PROMPT How should regulators curb coercive digital recovery without undermining legitimate credit discipline?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

06 · Mutual funds — third-party drafts

Third-party mutual-fund payments: consent and traceability

E12-2605-011 · P2 · 2026-05-20 · National / other

WHY IN THE NEWS SEBI’s 20 May draft addresses specified scenarios.

• Proposals cover employer salary-deduction investment facilities and eligible distributor commission paid as units.

• A donation channel is discussed with appropriate investor mandates.

• Proposed safeguards include KYC of payer/beneficiary and an auditable, non-cash trail through segregated accounts.

STATIC CONNECTION · ORIGINAL Payment by another person, legal ownership of units and a tax-deductible donation are distinct concepts.

ANALYSIS · ORIGINAL GUIDANCE

• Salary-linked investment can reduce transaction friction, but employees need genuinely voluntary mandates and easy correction.

• Segregation and verification matter because convenience can create laundering or mis-selling channels.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat the consultation as unrestricted permission for any unidentified third party to fund any folio.

MAINS PROMPT Evaluate convenience and investor protection in third-party investment payments.

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

07 · CSR and social finance

Zero coupon zero principal: philanthropy, not a return-bearing bond

E12-2605-012 · P1 · 2026-05-29 · National / other

WHY IN THE NEWS MCA’s 29 May release explains the 27 May amendments.

• Subscription to qualifying SSE-issued ZCZP instruments becomes an eligible CSR activity.

• A company’s spending on this route cannot exceed 10% of its total CSR expenditure in that financial year.

• The instrument pays neither coupon nor principal redemption; qualifying NPOs bear project-execution/evaluation responsibilities.

STATIC CONNECTION · ORIGINAL A social stock exchange financing instrument need not deliver a financial return: assess its specified philanthropic purpose and accountability.

ANALYSIS · ORIGINAL GUIDANCE

• Simplified company compliance shifts attention to NPO reporting, credible outcomes and safeguards against related-party diversion.

• The percentage base is CSR expenditure, not net profit, turnover or the company’s entire cash balance.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not interpret zero principal as a risk-free investment repaid at maturity or 10% of corporate profit.

MAINS PROMPT How can social-finance instruments expand credible giving without diluting CSR accountability?

Sources: [E12-PRS], [E12-CSR]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

08 · Transport fitness and regulatory evidence

Vehicle fitness: retesting, geo-tagged records and conflicts

E12-2605-019 · P2 · 2026-05-08 · National / other

WHY IN THE NEWS The 8 May vehicle-rule amendment revises testing procedures.

• The reviewed rules categorise a vehicle as end-of-life if it is not declared fit within 180 days after being declared unfit.

• Specified fitness tests must be video-recorded with geo-tags and uploaded through the prescribed app.

• Ownership/operator restrictions address conflicts, including local vehicle-repair interests; these are not a blanket repeal of all testing safeguards.

STATIC CONNECTION · ORIGINAL A fitness certificate assesses prescribed roadworthiness, not merely the vehicle’s age or registration validity.

ANALYSIS · ORIGINAL GUIDANCE

• Digital records can deter sham tests only if footage, identities and actual measurement are verified.

• For AP, accessible accredited capacity and transparent retesting/grievances matter for both safety and livelihoods.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2507-022, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E6-2510-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not infer every older vehicle is immediately scrapped or a video upload guarantees accurate testing.

MAINS PROMPT How can vehicle-fitness reform improve safety without becoming a compliance-only exercise?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

09 · Digital infrastructure and governance

DPI@2047: interoperability needs accountable institutions

E12-2605-030 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue describes NITI Aayog’s strategic DPI roadmap. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The proposed phases are DPI 2.0 for 2025–35 and DPI 3.0 for 2035–47.

• The framework links sector transformation to foundational identity, payments and consent-based data exchange.

• Interoperability is a technical/institutional design goal, not permission to share every personal record without limits.

STATIC CONNECTION · ORIGINAL DPI is a reusable enabling layer; services built on it can remain exclusionary or poorly governed if access and remedies fail.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, district-led demand aggregation should pair assisted/offline access with purpose limitation and usable grievance redress.

• Measure actual service completion, cost and exclusion rather than accounts created or API calls alone.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe a roadmap as a newly binding data-sharing law or assume all DPI applications are automatically non-excludable public goods.

MAINS PROMPT What governance principles make digital infrastructure genuinely inclusive?

Sources: [E12-V14]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

10 · UPI — decade of infrastructure

UPI’s decade: scale, interoperability and consumer protection

E12-2605-031 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The May edition carries forward the 2016–2026 anniversary. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• NPCI developed UPI as an interoperable instant-payment framework with participating banks and providers.

• UPI LITE, offline variants and visitor-wallet facilities have distinct designs and eligibility conditions.

• Transaction count, value and share of a specifically defined payments market must not be interchanged.

STATIC CONNECTION · ORIGINAL Authentication confirms a credential/action; it does not eliminate deception-based fraud or guarantee merchant credit access.

ANALYSIS · ORIGINAL GUIDANCE

• For AP’s small merchants, reliability and assisted dispute resolution matter as much as acceptance QR codes.

• Zero-MDR policy raises funding and competition questions; large volume alone does not establish cost recovery or a provider’s solvency.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim every UPI transaction works offline, every payment is a bank deposit or digital logs guarantee a loan.

MAINS PROMPT How can UPI sustain scale while protecting trust, competition and inclusion?

Sources: [E12-V15]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

11 · IIP — base, deflator and publication chronology

IIP rebasing: May coverage includes later June developments

E12-2605-032 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS Independent MoSPI text prevents treating a scheduled May release as an actual May launch. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The new series uses 2022–23 as base and expands industrial coverage; the later primary release confirms first launch on 1 June.

• On 29 June, the PPI-based series superseded the initial WPI-deflated 2022–23 series; 234 of 463 item groups use value-based production, representing 36.02% weight.

• These are later chronology checks in a May-indexed magazine note, not claims the June facts were already known on 28 May.

STATIC CONNECTION · ORIGINAL An index’s base, weights, sector coverage, deflator and vintage jointly determine comparability; an index level is not its growth rate.

ANALYSIS · ORIGINAL GUIDANCE

• Do not mechanically splice old quarterly growth from the April release to the revised new-series level.

• Deflating value-based production is necessary to distinguish price changes from real output; changes to the deflator can revise the history.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The original 28 May calendar date was a schedule, not independently verified launch; do not label the old manufacturing weight as the new series weight.

MAINS PROMPT How do base-year and deflator revisions improve measurement while complicating comparisons?

Sources: [E12-PRS], [E12-IIPJUN], [E12-V16]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

12 · Bank capital and risk

Bank capital: CET1 is not cash or a reserve ratio

E12-2605-035 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue covers revised treatment of quarterly profits in capital calculations. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• CRAR compares eligible regulatory capital with risk-weighted assets; CET1 is the highest-quality core component.

• Risk-weighted assets are exposures adjusted for prescribed risks, not the capital a bank is required to hold.

• Minimum baseline ratios and additional buffers/applicability conditions must be identified separately.

STATIC CONNECTION · ORIGINAL Capital absorbs losses; liquidity meets payment demands. A well-capitalised bank can still face a liquidity crisis.

ANALYSIS · ORIGINAL GUIDANCE

• Permission to recognise eligible interim profits can change measured capital but does not create new cash or remove provisioning requirements.

• AP-linked credit analysis should examine asset quality, capital composition and lending standards, not assume a ratio relaxation forces lending.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call CRAR the CRR/SLR, or infer high capital alone guarantees no bank can fail.

MAINS PROMPT Why must bank resilience be assessed through both solvency and liquidity?

Sources: [E12-V19]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Agriculture

01 · Kharif prices — season and cost basis

Kharif MSP 2026–27: distinguish price, cost and procurement

E12-2605-013 · P1 · 2026-05-13 · National / other

WHY IN THE NEWS The 13 May CCEA decision covers 14 kharif crops.

• Common paddy MSP is ₹2,441/quintal, up ₹72; Grade A is ₹2,461.

• Sunflower has the highest absolute increase of ₹622/quintal; jowar hybrid’s percentage increase is higher because bases differ.

• The published cost basis includes paid-out costs and imputed family labour, not every broader C 2 opportunity-cost component.

STATIC CONNECTION · ORIGINAL MSP announcement is a price-policy decision, not a guarantee every farmer sells all output at that price.

ANALYSIS · ORIGINAL GUIDANCE

• AP analysis should connect paddy/groundnut choices to irrigation, procurement access, quality standards and payments.

• Compare like varieties, seasons and units; ₹/quintal is not ₹/tonne and nominal growth is not automatically real income growth.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate the 1.5-times stated cost benchmark with 1.5 times every individual farmer’s full C 2 cost or assured universal procurement.

MAINS PROMPT Can MSP support diversification when procurement and water incentives remain uneven?

Sources: [E12-PRS], [E12-MSP]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Sugarcane — recovery-linked price

Sugarcane FRP: ₹365 is tied to recovery

E12-2605-014 · P2 · 2026-05-05 · National / other

WHY IN THE NEWS The May approval concerns the 2026–27 sugar season.

• The reviewed base FRP is ₹365/quintal at 10.25% recovery.

• A ₹3.56/quintal adjustment applies per 0.1 percentage-point recovery change around the base.

• The review specifies no further deduction below 9.5% recovery.

STATIC CONNECTION · ORIGINAL Sugar recovery measures sugar obtained relative to cane; FRP differs from a state-advised price and from a general kharif MSP.

ANALYSIS · ORIGINAL GUIDANCE

• Higher announced cane prices matter only with timely mill payment and viable recovery/processing economics.

• For AP, examine water use, mill liquidity and farmer arrears rather than infer profits from the headline price alone.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say ₹365 applies identically at every recovery rate or confuse percentage points with a percentage change.

MAINS PROMPT Assess price regulation and timely payment in sugarcane value chains.

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Fibre productivity

Cotton mission: yield, quality and resilient farm incomes

E12-2605-015 · P2 · 2026-05-05 · National / other

WHY IN THE NEWS The 5 May mission approval covers 2026–27 to 2030–31.

• The review rounds the outlay to about ₹5,659 crore.

• Focus areas include pest/disease-resistant high-yielding seeds, production technologies and quality-testing infrastructure.

• Initial coverage is described as 140 districts in 14 cotton-producing states, not all districts immediately.

STATIC CONNECTION · ORIGINAL Production equals area multiplied by yield; quality, input costs and prices also determine farm income.

ANALYSIS · ORIGINAL GUIDANCE

• AP applications include suitable seed advice, integrated pest management, contamination control and traceable marketing.

• Do not infer that a sanctioned mission proves a particular district received funds or farmers achieved the target yield.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Higher national output or a new seed variety alone does not establish lower pesticide costs, guaranteed prices or universal pest resistance.

MAINS PROMPT How can cotton productivity improve without shifting excessive risk onto farmers?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Rural investment and diversification

Rural resilience: finance, organisations and non-farm work

E12-2605-033 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses IFAD’s country-strategy framework and NABARD cooperation. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• COSOP is a multi-year country strategic framework, not itself a direct universal household grant.

• The described priorities include climate/social resilience and scaling proven development knowledge.

• SHGs, FPOs and cooperatives can connect people with finance, markets and infrastructure, but have different memberships and functions.

STATIC CONNECTION · ORIGINAL Rural livelihoods combine agriculture, wage work, enterprise and care; output growth in one sector need not absorb all underemployed workers.

ANALYSIS · ORIGINAL GUIDANCE

• AP applications should integrate local water/climate risk, producer organisations and viable non-farm demand.

• Avoid deriving near-zero productivity for every agricultural worker merely from mismatched aggregate GDP and employment shares.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A strategy or memorandum is not proof that all rural households obtained affordable investment credit.

MAINS PROMPT How can rural investment support resilient income diversification?

Sources: [E12-V17]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

05 · Producer organisations and markets

FPO viability: membership is not commercial sustainability

E12-2605-034 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews NAAS recommendations on producer organisations. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• FPOs aggregate farmer demand/supply for inputs, marketing, processing and shared services.

• Producer-company and cooperative legal forms are distinct; the magazine’s older Part IXA reference should not be used as the current 2013 Act chapter citation.

• Professional management, working capital, member trust and quality control influence business viability.

STATIC CONNECTION · ORIGINAL A legal entity’s registration, number of members and turnover do not by themselves establish net member benefit or bargaining power.

ANALYSIS · ORIGINAL GUIDANCE

• AP FPOs can evaluate paddy/horticulture/fisheries opportunities only with market-specific logistics, standards and buyer risk controls.

• Performance support should reward member transactions, transparent pricing and durable cash flows rather than registration targets alone.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not promise a fixed 20–40% input saving or elimination of every intermediary for every FPO.

MAINS PROMPT What makes producer collectivisation economically viable and democratically accountable?

Sources: [E12-V18]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Society & Welfare

01 · Central labour rules — working conditions

OSH rules: weekly hours and safe night work

E12-2605-002 · P1 · 2026-05-08 · National / other

WHY IN THE NEWS Central Rules were notified on 8 May.

• The inspected Rule 64 limits work in a covered establishment to 48 hours a week.

• Rule 83 requires written consent for women’s night/early work, alongside transport and other safety conditions.

• Lighting, accessible facilities, emergency contact and compliance with workplace sexual-harassment law are substantive safeguards.

STATIC CONNECTION · ORIGINAL Labour is a Concurrent List field; identify the appropriate government, establishment coverage and operative rule before applying a central instrument to an AP workplace.

ANALYSIS · ORIGINAL GUIDANCE

• Night-work access can widen opportunity only if workers can refuse without coercion and safety is actually funded.

• Inspections and worker grievance channels complement digital records; a permission clause is not evidence of safe practice.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not universalise every central rule to every AP establishment or equate 48 weekly hours with an unconditional 12-hour daily norm.

MAINS PROMPT Balance women’s labour-market opportunity with consent, safety and enforceability.

Sources: [E12-PRS], [E12-OSH]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Central labour rules — gig eligibility

Gig benefits: registration, engagement days and scheme conditions

E12-2605-003 · P1 · 2026-05-08 · National / other

WHY IN THE NEWS Selected Social Security Central Rules were independently inspected.

• Registration provisions address gig/platform workers aged at least 16, using the designated portal and prescribed documents.

• Benefit eligibility includes at least 90 engagement days with one aggregator or 120 cumulatively across aggregators in the previous financial year, plus scheme-specific conditions.

• For the multi-aggregator calculation, working with three aggregators on one calendar day can count as three days: it is not necessarily 120 distinct calendar days.

STATIC CONNECTION · ORIGINAL Registration, eligibility and actual enrolment/payment under a notified scheme are separate stages.

ANALYSIS · ORIGINAL GUIDANCE

• Portability needs reliable worker-controlled records of engagement and an accessible correction process.

• Thresholds can exclude intermittent workers; evaluate coverage without assuming registration automatically confers every salaried-worker benefit.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not substitute 120 distinct calendar days for the rule’s cumulative counting, or promise automatic EPF/ESI payments to every registrant.

MAINS PROMPT How should portable social protection accommodate fragmented platform work?

Sources: [E12-PRS], [E12-SOC]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Central labour rules — industrial relations

Industrial-relations rules: representation and procedure

E12-2605-004 · P2 · 2026-05-08 · National / other

WHY IN THE NEWS The May review describes notified central industrial-relations machinery.

• Rules address recognition of trade unions, Works Committees and Grievance Redressal Committees.

• Procedures cover strike/lock-out notices and applications for covered lay-off, retrenchment or closure cases.

• Model standing orders address mining, manufacturing and services; applicability depends on the parent Code and establishment category.

STATIC CONNECTION · ORIGINAL A procedure prescribed for permission-requiring establishments is not a new universal permission requirement for every employer.

ANALYSIS · ORIGINAL GUIDANCE

• Genuine representation and timely grievance resolution can reduce disputes before they become work stoppages.

• For AP analysis, inspect central versus state jurisdiction, thresholds and actual institutions before asserting a uniform workplace rule.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse a notice period, an application deadline, permission and an absolute prohibition on industrial action.

MAINS PROMPT Evaluate industrial peace through representation, predictable procedure and effective grievance redress.

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Food-system delivery

SARTHAK-PDS: handling support and technology convergence

E12-2605-016 · P2 · 2026-05-27 · National / other

WHY IN THE NEWS The 27 May approval continues the umbrella framework to March 2031.

• The reviewed central outlay for the extension is ₹25,530 crore.

• Support combines intra-state grain movement/handling and fair-price-shop dealer margins with SMART-PDS modernisation.

• The policy operates within NFSA delivery, not a new universal cash income scheme.

STATIC CONNECTION · ORIGINAL Allocation, offtake, physical delivery and household receipt are distinct stages in food-security administration.

ANALYSIS · ORIGINAL GUIDANCE

• Reliable dealer incentives and logistics matter alongside authentication technology.

• For AP, audit failed transactions, stock reconciliation, accessibility and offline safeguards; do not make biometric success a substitute for entitlement delivery.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate a digital record with grain physically received or assume a modernisation allocation expands every household’s legal quota.

MAINS PROMPT How can PDS modernisation improve accountability without excluding eligible households?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

05 · Examination integrity

Examination reform: security, fairness and recovery

E12-2605-045 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses NEET-related disruption and wider examination governance. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Question-setting, custody, centre management, scoring and grievance resolution are separate risk points.

• Digital testing can change leakage modes but does not eliminate impersonation, compromised centres or insider collusion.

• A cancelled exam, an alleged leak and a final criminal finding require distinct evidentiary descriptions.

STATIC CONNECTION · ORIGINAL Merit-based access depends on both integrity and equitable opportunity; excessive security burdens can exclude legitimate candidates.

ANALYSIS · ORIGINAL GUIDANCE

• For APPSC, use auditable access logs, secure printing/transmission, independent incident review and timely candidate communication.

• Contingency planning should minimise lost time, travel costs and uncertainty while protecting evidence and fair investigation.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat all allegations as proven guilt or suggest an online-only format automatically prevents malpractice.

MAINS PROMPT How can examination systems combine credible security with fairness to candidates?

Sources: [E12-V33]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

06 · Demography — reference and denominators

SRS 2024: fertility and mortality are not census counts

E12-2605-046 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews ORGI’s 2024 reference-year statistical report. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The article reports national TFR 1.9, IMR 24 and under-five mortality 28; retain the report year and secondary-reading scope.

• CBR and CDR use population denominators; infant/under-five mortality use live-birth denominators.

• Neonatal mortality concerns the first 28 completed days, not a loose birth-to 29-days definition.

STATIC CONNECTION · ORIGINAL TFR is a synthetic period fertility measure; it is not current population growth, completed family size for every woman or a census headcount.

ANALYSIS · ORIGINAL GUIDANCE

• Sub-replacement fertility can coexist with population growth because age structure and momentum matter.

• For AP, connect reproductive choice, maternal/child survival, migration and ageing rather than infer a cash incentive alone restores replacement fertility.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not assign the 2024 report estimates to observed May 2026 births or claim TFR below 2.1 means immediate population decline.

MAINS PROMPT How should states respond to demographic transition while protecting health and reproductive autonomy?

Sources: [E12-V34]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

07 · Care infrastructure

Care economy: recognising work without inventing GDP

E12-2605-047 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews an EAC-PM working paper on care. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Care includes paid services and unpaid household support for children, older people, disability and illness.

• Time-use estimates must identify activity, participant/population denominator, sex and reference year.

• Proposals for financing or parental-leave reform in a working paper are not automatically enacted entitlements.

STATIC CONNECTION · ORIGINAL Most unpaid household services fall outside conventional GDP production boundaries; satellite valuation is not an amount already included in measured GDP.

ANALYSIS · ORIGINAL GUIDANCE

• AP can assess childcare, eldercare, worker conditions and service quality as employment-enabling infrastructure.

• Redistribution must include men, employers and public services, rather than merely rewarding women for remaining default carers.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not use the older PLFS self-employment-hours gap as unpaid-care time or turn an estimated 15–17% valuation into official GDP growth.

MAINS PROMPT Why should care be treated as social infrastructure rather than only a private household responsibility?

Sources: [E12-V35]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

08 · Health survey — insurance and expenditure

Household health evidence: coverage is not financial protection

E12-2605-048 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue describes the 2025 NSS 80th-round health survey. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The reviewed survey reference period is January–December 2025, not the publication month.

• The article reports private-hospital shares of 57.9% rural and 64.6% urban: a combined national percentage cannot be inferred without weights.

• Self-reported morbidity, hospitalisation episodes and insurance coverage measure different phenomena.

STATIC CONNECTION · ORIGINAL Out-of-pocket burden depends on treatment prices, benefits, exclusions, medicines and lost earnings, not only possession of insurance.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, evaluate public-facility readiness, outpatient access, referrals and actual claim/payment experiences.

• Do not mix an allopathic-plus-AYUSH doctor count with a claimed universal physician norm without checking definitions.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A rise in insurance coverage does not prove catastrophic spending disappeared; symptom reporting is not the same as clinical prevalence.

MAINS PROMPT How should health policy measure financial protection beyond insurance enrolment?

Sources: [E12-V36]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

09 · School-system convergence

Samagra Shiksha: continuity, inclusion and learning

E12-2605-053 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue describes a bridge extension into the 16th Finance Commission cycle. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The article reports continuation to 30 September 2026 or earlier competent approval for the new cycle; the underlying order is not independently read.

• Samagra Shiksha integrates school education from pre-primary to Class XII and subsumed SSA, RMSA and teacher-education components.

• It is a centrally sponsored framework, with state delivery and differing funding patterns by category.

STATIC CONNECTION · ORIGINAL Enrolment, attendance, foundational learning and secondary completion are different outcome measures.

ANALYSIS · ORIGINAL GUIDANCE

• AP applications include teacher development, inclusive facilities and support for migrant/never-enrolled children.

• Do not confuse a bridge extension with a fresh five-year approval or a scheme budget with total public school expenditure.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Samagra Shiksha is not identical to PM POSHAN; the latter’s contradictory magazine summary dates require checking its own operative order.

MAINS PROMPT How should school-system finance support sustained learning and inclusion?

Sources: [E12-V44]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

10 · Child screening and referral

RBSK 2.0: screening must lead to diagnosis and care

E12-2605-054 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews revised child-health guidelines. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The framework retains the 4Ds: defects at birth, diseases, deficiencies and developmental delays including disabilities.

• It describes an expanded 38-condition scope and support for children from birth to 18 years.

• Delivery spans newborn facilities, anganwadis, schools and district early-intervention/referral services.

STATIC CONNECTION · ORIGINAL A positive screening result identifies a need for further assessment; it is not automatically a final diagnosis.

ANALYSIS · ORIGINAL GUIDANCE

• AP implementation should measure completed referral, treatment access and follow-up rather than screening counts alone.

• Digital child-health records need confidentiality, continuity and practical correction mechanisms, with informed family participation.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not imply every child under 18 receives the same test at the same site or every screened condition has already been cured.

MAINS PROMPT Design an effective screening-to-care pathway for child health.

Sources: [E12-V46]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Environment

01 · Coal conversion — scheme design

Surface gasification: import substitution is not zero-carbon energy

E12-2605-017 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The 13 May approval provides a ₹37,500 crore incentive envelope. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Financial support is at most 20% of eligible plant-and-machinery cost, paid in four equal milestone-linked instalments.

• Caps are ₹5,000 crore/project and ₹12,000 crore/entity group; the ₹9,000 crore/product cap explicitly excepts synthetic natural gas and urea.

• The scheme envisages about 75 MT gasification; the national 2030 target is 100 MT, not the same denominator.

STATIC CONNECTION · ORIGINAL Gasification uses controlled partial oxidation to make syngas, mainly CO and hydrogen; downstream conversion is not inherently carbon-free.

ANALYSIS · ORIGINAL GUIDANCE

• Appraisal must compare lifecycle emissions, water, ash handling, capture performance and import-substitution economics.

• Unlike April’s underground gasification, this scheme concerns surface facilities; do not merge their land, subsurface and closure risks.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not apply the product cap without its SNG/urea exception, call projected investment realised, or describe all coal-derived hydrogen as green.

MAINS PROMPT Evaluate surface gasification through energy security, fiscal additionality and environmental costs.

Sources: [E12-PRS], [E12-COAL], [E12-V26]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Circular material systems

Circular economy: reduce and repair before recycling

E12-2605-038 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses industry proposals for stronger coordination. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Circularity includes durability, sharing, reuse, repair, refurbishment and material recovery.

• A proposed nodal ministry/agency is not an already-created institution.

• EPR assigns specified producer obligations under applicable rules, not identical duties for every waste stream.

STATIC CONNECTION · ORIGINAL Recycling is one stage in a material hierarchy; avoiding waste and extending useful product life can reduce primary extraction earlier.

ANALYSIS · ORIGINAL GUIDANCE

• AP urban planning should connect segregation, viable recovery markets, worker safety and procurement standards.

• Measure actual recovery, quality and displacement of virgin inputs rather than certificates or gross collected tonnage alone.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2507-022, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E6-2510-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate waste-to-energy incineration with material recycling or repeat a projected 2050 market value as present output.

MAINS PROMPT How can circular-economy policy align producer incentives with local waste-system capacity?

Sources: [E12-V24]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Small hydropower — capacity and support

Small hydro: eligible capacity is not an impact exemption

E12-2605-039 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue carries forward the approved small-hydro development scheme. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Indian small-hydro classification covers installed capacity up to 25 MW; the described support scheme targets projects of 1–25 MW.

• The article describes a 2026–31 programme with a roughly ₹2,584.60 crore outlay and 1,500 MW addition target.

• Support differs by location and is capped; the target is not already generated electricity.

STATIC CONNECTION · ORIGINAL Run-of-river design can reduce large-storage needs but still alter flows, connectivity, sediment and local access.

ANALYSIS · ORIGINAL GUIDANCE

• AP applications require site-specific hydrology, cumulative ecological assessment, safety and cost appraisal.

• Do not infer an editorial-month scheme mention is its first approval date or every eligible project has a final sanction.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Small capacity does not mean no environmental or rehabilitation impacts, and MW is not annual energy output.

MAINS PROMPT When is small hydropower a credible component of a resilient energy mix?

Sources: [E12-V25]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Ocean carbon removal

Marine CDR: permanence, additionality and ecosystem risk

E12-2605-040 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews interest in ocean-based removal methods. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Approaches discussed include coastal ecosystem restoration and more experimental ocean-chemistry/biomass interventions.

• Gross uptake is not necessarily durable net atmospheric removal once leakage, reversals and energy use are considered.

• Measurement, reporting and verification remain central scientific/governance challenges.

STATIC CONNECTION · ORIGINAL Avoided emissions and removed atmospheric carbon are different accounting claims; neither permits double counting.

ANALYSIS · ORIGINAL GUIDANCE

• AP coastal projects must protect fisheries, biodiversity and community consent alongside carbon measurement.

• Do not treat restoring mangroves and large-scale ocean alkalinity modification as having identical evidence or risk.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Marine removal complements rather than replaces deep emissions cuts; a pilot is not proof of safe gigatonne-scale deployment.

MAINS PROMPT What safeguards should precede large-scale marine carbon-removal claims?

Sources: [E12-V27]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

05 · Big-cat cooperation

IBCA: seven species, range countries and actual membership

E12-2605-041 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reports Saudi Arabia joining the conservation alliance. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The seven focal cats are tiger, lion, leopard, snow leopard, cheetah, jaguar and puma.

• Range-country eligibility is broader than the count of countries that have formally joined.

• Habitat connectivity, prey and conflict mitigation matter alongside species-specific protection.

STATIC CONNECTION · ORIGINAL An international coalition’s announcement, treaty status, membership and field implementation should be dated separately.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, connect habitat conservation with locally occurring species and institutions; do not infer all seven cats naturally occur in India.

• Avoid copying the article’s inconsistent five-year/fiscal-year funding description as a verified appropriation period.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION IBCA is not evidence that all 95 potential range countries are members, or that jaguar/puma have wild Indian ranges.

MAINS PROMPT How can international species cooperation support habitat-level conservation?

Sources: [E12-V28]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

06 · Dam systems and safety

Dam safety: structural integrity and downstream preparedness

E12-2605-042 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews rehabilitation and safety modernisation. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Dam management addresses inspection, operation, maintenance, emergency planning and responsibility, not only construction.

• Sedimentation can reduce usable storage even where a dam wall remains structurally sound.

• DRIP financing/rehabilitation and statutory safety bodies are complementary, not identical interventions.

STATIC CONNECTION · ORIGINAL Reservoir storage, design flood, gate operation and downstream exposure together determine risk; age alone does not identify failure probability.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, use basin-level forecasting, rule curves, independent review and warning protocols alongside repairs.

• Differentiate the inventory definitions of large/specified dams rather than repeat undated totals as exact current coverage.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call a safety audit proof of zero future risk or assume a newly built project requires no operational preparedness.

MAINS PROMPT Design a lifecycle approach to dam safety in a changing climate.

Sources: [E12-V29]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

07 · ENSO and forecast uncertainty

“Super” El Niño: probability is not destiny

E12-2605-043 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses a potential strong event later in 2026. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• ENSO couples tropical Pacific ocean-temperature and atmospheric-circulation anomalies.

• “Super El Niño” is an informal intensity description, not a separate fourth ENSO phase.

• Monsoon impacts are probabilistic and interact with the Indian Ocean, intraseasonal variability and regional conditions.

STATIC CONNECTION · ORIGINAL A forecast of a driver does not establish the realised rainfall at every Indian district or deterministic drought.

ANALYSIS · ORIGINAL GUIDANCE

• For AP, update sowing advice, irrigation budgeting and heat plans using issued forecasts and local conditions.

• Do not treat an earlier magazine forecast as the latest November outlook or a century-record event already observed.

READ ACROSS MONTHS · NOTE IDS VM2501-001, E5-2507-013, E5-2507-014, E9-2602-017, E9-2602-018, E9-2602-030, E9-2602-031, E9-2602-033 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION El Niño does not mean drought in every part of India every year; a probability must retain its issue date and lead time.

MAINS PROMPT How should climate-risk planning use seasonal probabilities without overstating certainty?

Sources: [E12-V30]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Science & Technology

01 · AI-enabled weather services

Weather AI: resolution, lead time and skill are different

E12-2605-044 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue describes new monsoon and high-resolution forecast products. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The monsoon-advance product provides probabilistic guidance up to four weeks ahead.

• The 1-kmrainfall product discussed is a pilot for Uttar Pradesh, not proof of identical AP deployment.

• IMD, IITM Pune and NCMRWF are identified as collaborating institutions.

STATIC CONNECTION · ORIGINAL Higher spatial resolution is a grid characteristic, not an automatic guarantee of greater accuracy or decision usefulness.

ANALYSIS · ORIGINAL GUIDANCE

• AP users need calibrated forecast skill, local advisories and dissemination in accessible formats.

• Combine AI products with observations, uncertainty communication and impact-based decisions rather than replace accountable forecasters.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse monsoon advance with total seasonal rainfall or extend a UP pilot’s coverage to all India.

MAINS PROMPT What makes AI weather guidance operationally useful rather than only technically impressive?

Sources: [E12-V31]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Research governance

Ease of R&D: predictable support and accountable autonomy

E12-2605-049 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses NITI Aayog’s research-administration report. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The report diagnoses delayed fellowships, compliance burdens and weak research–industry links.

• Recommendations include professional research offices, better grant administration and technology-transfer capacity.

• A proposed target of 2% GDP for research is an aspiration, not a statement that spending already reached it.

STATIC CONNECTION · ORIGINAL GERD, government budget provision, actual expenditure and research output have different denominators and timing.

ANALYSIS · ORIGINAL GUIDANCE

• AP universities need timely support, ethical review and freedom to pursue quality research, not only more MoUs or patent counts.

• Evaluate commercialisation alongside open science, reproducibility and public-interest research that may not yield an immediate licence.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call a recommended digital fellowship platform an already universal service or assume all patents become useful products.

MAINS PROMPT How can India reduce research friction without weakening scientific accountability?

Sources: [E12-V38]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Autonomous systems and security

Atlas swarms: coordination is not proven invulnerability

E12-2605-050 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reports China’s AI-enabled drone-swarm system. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• A swarm uses coordinated multiple UAVs rather than simply several independent drones flying nearby.

• Communication, sensing, task allocation and collision avoidance determine collective performance.

• Battery limits, weather, electronic warfare and adversarial disruption constrain real-world capability.

STATIC CONNECTION · ORIGINAL A public demonstration or claimed autonomy is not independent evidence of tested performance in every operational environment.

ANALYSIS · ORIGINAL GUIDANCE

• For AP defence-tech analysis, distinguish civil drone skills, indigenous development and deployment-specific authorisation.

• Human control, target validation and accountability remain central where autonomous systems could apply force.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate decentralised control with immunity to jamming or infer an exhibition proves combat effectiveness.

MAINS PROMPT What operational and ethical safeguards should govern increasingly autonomous swarms?

Sources: [E12-V39]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Security

01 · Maritime strategy and public policy

INMSS 2026: maritime security beyond a war–peace binary

E12-2605-036 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews the Navy’s new public maritime strategy. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• It follows public strategic articulations in 2007 and 2015.

• The discussion covers grey-zone competition, cyber/disruptive technologies and sea-lane security.

• Whole-of-government coordination includes naval, coastal, commercial and other agencies with distinct mandates.

STATIC CONNECTION · ORIGINAL Sea control, sea denial, deterrence, coastal policing and humanitarian assistance are different tasks requiring different capabilities.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s ports, fisheries and coastal communities make information-sharing and incident response important civilian linkages.

• A strategy outlines objectives and concepts; it does not prove every platform, command arrangement or coastal sensor is operational.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate a strategy publication with a new statute or assume the Navy alone performs all maritime law enforcement.

MAINS PROMPT How should India integrate maritime economic security with defence preparedness?

Sources: [E12-V21]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Financial crime — stages and denominators

Money laundering: attachment is not final confiscation

E12-2605-037 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses the ED’s FY 2025–26 report. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• A prosecution complaint, a completed trial and a conviction count are distinct stages.

• Asset attachment and final confiscation/restoration have different legal consequences.

• A conviction percentage needs its completed-case denominator; it is not automatically the share of all registered investigations ending in conviction.

STATIC CONNECTION · ORIGINAL Money laundering concerns proceeds of crime; a suspicious transaction alert is an investigative signal, not itself a judgment of guilt.

ANALYSIS · ORIGINAL GUIDANCE

• Compare enforcement statistics across matched periods and legal stages before judging deterrence or agency performance.

• Preserve procedural safeguards, timely trials and independent oversight alongside better financial intelligence.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call attached assets money already recovered by victims or extend a 94% completed-trial ratio to the entire pending caseload.

MAINS PROMPT How should financial-crime enforcement balance effectiveness, due process and credible performance reporting?

Sources: [E12-V22]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

International Relations

01 · India–US strategic supply chains

India–US cooperation: critical minerals and strategic autonomy

E12-2605-025 · P1 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reviews relations alongside May’s critical-minerals framework. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The framework reported by PRS covers mining, processing, recycling, investment and scrap management.

• Cooperation also spans defence technology, trusted connectivity and civil space, but individual programmes have different legal stages.

• Tariffs, market access and mobility can remain contested even when security interests converge.

STATIC CONNECTION · ORIGINAL A strategic partnership does not make interests identical or give a framework the effect of a completed mine, refinery or free-trade treaty.

ANALYSIS · ORIGINAL GUIDANCE

• Assess value-chain bottlenecks such as separation/refining and technology alongside access to ore.

• For AP, examine port/logistics and processing possibilities only after environmental, commercial and supply-chain appraisal.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not infer guaranteed mineral deliveries or an operative full bilateral FTA from a cooperation framework.

MAINS PROMPT How can India diversify strategic supply chains while retaining policy autonomy?

Sources: [E12-PRS], [E12-V07]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Nordic geography and cooperation

India–Nordic ties: five countries, different treaty channels

E12-2605-026 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The third India–Nordic Summit was held in Oslo in May. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The Nordic participants are Denmark, Finland, Iceland, Norway and Sweden.

• Cooperation covers green technology, innovation, ocean sectors and people-to-people links.

• Norway/Iceland are EFTA members; Denmark/Finland/Sweden are EU members, so TEPA and EU channels are not interchangeable.

STATIC CONNECTION · ORIGINAL The Nordic region is not synonymous with Scandinavia, the EU or the entire membership of EFTA.

ANALYSIS · ORIGINAL GUIDANCE

• India can connect industrial transition with research, skills and investment, but summit ambitions require subsequent implementation.

• For AP, offshore/marine and clean-industry applications should be presented as analytical opportunities, not automatically funded state projects.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not put all five Nordic countries into the EU or assume a summit partnership itself eliminates tariffs.

MAINS PROMPT How can India translate Nordic cooperation into measurable green-industrial capability?

Sources: [E12-PRS], [E12-V08]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · UAE energy and maritime links

UAE partnership: reserves, trade systems and implementation

E12-2605-027 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The 15 May visit produced energy, defence and maritime outcomes. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The reviewed outcomes include defence-industrial cooperation and strategic oil-storage arrangements/exploration.

• A virtual trade corridor using MAITRI concerns interoperable trade/regulatory processes, not a new physical canal.

• An announced US$5 billion investment commitment must be distinguished from realised inflows and audited project completion.

STATIC CONNECTION · ORIGINAL Strategic reserves, commercial inventories and domestic production each address different energy-security risks.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s Visakhapatnam petroleum infrastructure makes storage logistics a useful linkage, but specific expansion must be checked against the actual instrument.

• Cooperation can diversify resilience while leaving India exposed to chokepoints, price volatility and concentration risk.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not count proposed foreign storage as already-filled domestic reserve capacity or treat a digital corridor as a defence alliance.

MAINS PROMPT Evaluate India–UAE cooperation through energy resilience and diversified economic links.

Sources: [E12-PRS], [E12-V09]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Nuclear governance

NPT review deadlock does not terminate the treaty

E12-2605-028 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue reports a consensus failure at the eleventh review conference. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The NPT combines non-proliferation, disarmament and peaceful-use pillars.

• India is not an NPT party; IAEA safeguards apply under specific agreements and facility arrangements, not simply to every installation.

• The CTBT’s opening for signature and its entry into force are distinct; India has not signed it.

STATIC CONNECTION · ORIGINAL A review conference evaluates treaty implementation; failure to adopt a final document is not legal withdrawal by every party.

ANALYSIS · ORIGINAL GUIDANCE

• Disarmament credibility and security concerns must be assessed together, without treating non-membership in one treaty as absence of all obligations.

• Avoid copying undated membership totals or an overbroad assertion that an Additional Protocol places every Indian civilian facility under identical safeguards.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the NPT ceased operating because consensus failed or that India is an NPT-recognised nuclear-weapon state.

MAINS PROMPT Why does nuclear governance require both credible non-proliferation and disarmament commitments?

Sources: [E12-V11]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

05 · Oil coordination — announcement versus effect

UAE OPEC exit: 28 April announcement, 1 May effect

E12-2605-029 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The official WAM extract distinguishes the two dates. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The UAE announced exit from OPEC and OPEC+ on 28 April, effective 1 May 2026.

• OPEC is a producer organisation; OPEC+ includes coordinated cooperation with non-OPEC producers.

• The official statement describes gradual output adjustment guided by demand, not an instant unlimited supply surge.

STATIC CONNECTION · ORIGINAL Quota coordination, production capacity, actual output and benchmark prices are separate variables.

ANALYSIS · ORIGINAL GUIDANCE

• For India, more production flexibility could improve options, but shipping disruption, refining suitability and global demand can dominate near-term prices.

• Do not copy a fixed oil-supply share or member count without its date and definition.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Exit does not mean UAE stops exporting oil, and it does not guarantee an immediate price fall for Indian consumers.

MAINS PROMPT How do producer-coordination changes affect an import-dependent economy’s energy security?

Sources: [E12-WAM], [E12-V12]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Andhra Pradesh

01 · Rail administration — legal and operative dates

South Coast Railway: May notification, June operation

E12-2605-055 · P1 · 2026-05-05 (reporting date) · AP-linked

WHY IN THE NEWS The 5 May contemporary report welcomes the new-zone notification.

• Visakhapatnam is the reported headquarters of South Coast Railway.

• The report schedules official operations from 1 June 2026; May notification and operational commencement are separate milestones.

• A zone is an administrative unit, not a guarantee that every requested originating train or freight project was sanctioned.

STATIC CONNECTION · ORIGINAL Railways are a Union subject; zonal reorganisation changes administrative jurisdiction rather than state ownership of the national railway.

ANALYSIS · ORIGINAL GUIDANCE

• AP gains should be measured through passenger access, freight reliability, project delivery and coordination with ports.

• Confirm the actual Gazette, boundaries and divisional transition before relying on a secondary summary for a legal-jurisdiction question.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say June operations had already begun on 5 May, or count a headquarters foundation stone as the same event as notification.

MAINS PROMPT How can rail-administrative reorganisation translate into measurable regional connectivity?

Sources: [E12-APRAIL]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Rural digital infrastructure

AP BharatNet: 13,426 GPs and demand-based village access

E12-2605-056 · P1 · 2026-05-13 · AP-linked

WHY IN THE NEWS The 13 May primary release records a state-led implementation agreement.

• Approved central support is ₹2,432 crore; APBIL is the implementing entity in the state-led model.

• The 13,426 GP scope comprises 1,692 Phase I upgrades, 11,254 Phase II GPs and 480 new GPs.

• Connectivity to 3,942 villages is demand-based; over five lakh home-fibre connections are expected, not reported as already delivered.

STATIC CONNECTION · ORIGINAL A backbone to a panchayat is not identical to an active, affordable last-mile household subscription.

ANALYSIS · ORIGINAL GUIDANCE

• Ring-topology upgrades can improve resilience, but maintenance, power, redundancy and service quality remain essential.

• Link e-governance, telemedicine and learning outcomes to actual uptime and usable access rather than fibre kilometres alone.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E7-2512-035, E8-2601-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not add the 3,942 village figure to GP counts as if all are the same unit, or present expected home connections as activated.

MAINS PROMPT How should AP measure rural broadband success beyond infrastructure rollout?

Sources: [E12-BHARAT]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Skills and research ecosystems

Deep-tech training: 2 lakh learner target is not job placement

E12-2605-057 · P1 · 2026-05-11 · AP-linked

WHY IN THE NEWS The 11 May PTI report details the IBM SkillsBuild collaboration.

• Partners include APSCHE, APSSDC and Amaravati Quantum Valley alongside IBM SkillsBuild.

• The target is two lakh learners in 2026–27 and ten lakh over five years across AI, quantum, data analytics, cybersecurity and entrepreneurship.

• A proposed NIELIT innovation/skilling centre at Acharya Nagarjuna University has its own development timeline.

STATIC CONNECTION · ORIGINAL Course enrolment, completion, credible skill assessment and placement are distinct human-capital outcomes.

ANALYSIS · ORIGINAL GUIDANCE

• AP can pair open access with laboratories, mentorship, faculty capacity and pathways for non-metropolitan students.

• Demand-linked training should be assessed through independent competence and employment/enterprise results, not a certificate count alone.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate a planned centre with an already functioning university or say all targeted learners have obtained jobs.

MAINS PROMPT What makes deep-tech skilling translate into inclusive employment and research capacity?

Sources: [E12-APSKILL]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Aerospace infrastructure — development stages

Puttaparthi AMCA foundation: infrastructure is not fighter induction

E12-2605-058 · P1 · 2026-05-15 · AP-linked

WHY IN THE NEWS The 15 May report records a foundation ceremony.

• The reported AMCA infrastructure project is valued at ₹15,803 crore in Sri Sathya Sai district.

• The newspaper describes nearly 650 acres and a projected 7,500 jobs, not an audited count of existing posts.

• The event supports development infrastructure; prototype testing, certification, production and service induction are later separate stages.

STATIC CONNECTION · ORIGINAL A fifth-generation fighter programme involves airframe, propulsion, avionics, systems integration and testing; physical infrastructure alone does not prove readiness.

ANALYSIS · ORIGINAL GUIDANCE

• AP applications include supplier skills, quality certification and credible milestones for local industrial spillovers.

• Keep this infrastructure report distinct from April’s 350-acre DRDO land-allotment report; do not assume identical land/project scope.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim an operational AMCA fighter squadron was launched on 15 May or turn projected jobs into realised employment.

MAINS PROMPT How can AP convert aerospace infrastructure into durable technological capability?

Sources: [E12-APAMCA]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

04 · Budget execution and public financial management

AP prepaid government meters: the DDO–HOD–treasury accountability chain

E19-002 · P1 · 2026-05-05 · AP-linked

WHY IN THE NEWS A 5 May Finance circular specifies how government-department service connections are mapped and prepaid electricity bills are processed. It is a government-office billing instruction, not a universal household-meter order.

• The circular refers to Energy Department G.O.Rt.No.22 of 23 March 2026; that underlying GO was not independently inspected.

• Service connections under each DDO are to be grouped into a consolidated prepaid account. DDOs must confirm or add Unified Service Connections through CFMS “USC Number Confirmation”; correct mapping is expressly their responsibility.

• The concerned HOD initiates the prepaid-meter payment process for DDOs under its administrative control. The circular identifies head 3451-00-090-00-(11) Energy-200-209 Electricity Charges for HOD bill generation.

• DISCOMs are to share each HOD’s current-month recharge/advance amount, based on previous-month consumption, with CFMS by the 5th. HODs must raise bills by the 7th through the dedicated electricity-charge tile.

• The Pay and Accounts Officer/Treasury Officer is to audit and pass bills on or before the 9th. Consumption is deducted from the HOD-level consolidated advance account.

• APCFSS is tasked with portal facilities/manuals; treasury authorities and APCFSS are asked to prepare the billing module. These instructions do not independently prove statewide operational completion or savings.

STATIC CONNECTION · ORIGINAL Prepayment concerns the timing and control of payment. Meter accuracy, tariff setting, electricity subsidy, distribution losses and reliable service are separate regulatory and operational issues.

ANALYSIS · ORIGINAL GUIDANCE

• The 5th–7th–9th sequence creates a testable service-level chain. Map a delayed payment to the responsible stage instead of assuming every disconnection is a meter defect or every unpaid bill is the DDO’s fault.

• Good implementation requires a verified connection inventory, treatment of closed/transferred offices, reconciliation of advance balances, consumption alerts and escalation for essential facilities. These are analytical recommendations, not extra conditions claimed to appear in the circular.

• For APPSC, link digital treasury integration with energy-sector financial discipline while preserving human responsibility. Centralising payment at HOD level does not remove the DDO’s connection-mapping duty or the treasury’s audit role.

READ ACROSS MONTHS · NOTE IDS CA-042

PRELIMS CAUTION Do not turn this government-department memo into a claim that all domestic or agricultural consumers must follow the same payment mechanism. The referenced Energy GO and actual field implementation still need separate examination.

MAINS PROMPT How can digital prepaid billing improve government electricity-payment discipline without disrupting essential public services?

Sources: [E19-APMETER]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

05 · AI investment — commitments and resources

AI data-centre approval: land and power are not completed capacity

E12-2605-059 · P1 · 2026-05-15 (reporting date) · AP-linked

WHY IN THE NEWS The 15 May Cabinet report describes a Reliance-linked proposal.

• The report associates the project with Polipalli/Bhogapuram-area sites and a cable-landing link.

• It reports nearly 855 acres of allotment, over ₹1.08 lakhcrore investment and about 1,000 direct jobs as proposal expectations.

• Primary land orders, company filings and detailed district/site boundaries were not independently reconciled.

STATIC CONNECTION · ORIGINAL Data-centre capacity, computing performance, power demand, capital investment and employment are different metrics.

ANALYSIS · ORIGINAL GUIDANCE

• AP appraisal should examine water/energy demand, grid resilience, connectivity, land obligations and incentives per realised outcome.

• Anchor benefits in enforceable milestones and transparent resource commitments rather than gross announced investment alone.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say all capital has arrived or the centre is operational; the report’s broad regional label is not a certified land-boundary description.

MAINS PROMPT Evaluate data-centre incentives through resource sustainability and economic additionality.

Sources: [E12-APCAB]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

06 · Solar and storage — units and commissioning

Solar-plus-storage approval: MW AC, MWp DC and MWh differ

E12-2605-060 · P1 · 2026-05-15 (reporting date) · AP-linked

WHY IN THE NEWS The same Cabinet report includes a Sri Sathya Sai clean-energy proposal.

• The reported Reliance proposal is 6,600 MW AC/9,000 MWp DC solar with 29,000 MWh battery storage.

• AC output rating and DC module peak capacity are not two independent plants whose ratings should be added.

• MWh is stored energy; without the discharge-power rating it does not establish battery duration in hours.

STATIC CONNECTION · ORIGINAL Storage duration equals usable energy divided by discharge power, subject to operating limits and efficiency.

ANALYSIS · ORIGINAL GUIDANCE

• AP implementation should verify land, transmission, cycling degradation, water and project-specific environmental responsibilities.

• Approval, financial closure, construction, grid connection and dependable delivered supply are different stages.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call 29,000 MWh 29,000 MW or infer the battery runs for 29,000 hours; do not present approved capacity as commissioned.

MAINS PROMPT How should AP evaluate solar-storage investments beyond headline nameplate capacity?

Sources: [E12-APCAB]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

07 · Industrial expansion — additionality

Manufacturing approvals: compare jobs, capital and supply chains

E12-2605-061 · P2 · 2026-05-15 (reporting date) · AP-linked

WHY IN THE NEWS The 15 May report lists multiple industrial proposals.

• It reports Apollo Tyres Phase IV expansion at about ₹6,100 crore and an Eicher/Royal Enfield greenfield proposal at ₹2,508 crore.

• The same report describes enzyme, solar-cell/module and cement proposals with different locations and requirements.

• Reported employment estimates are prospective and cannot be added to already-created jobs.

STATIC CONNECTION · ORIGINAL Gross committed investment is not net additional economic activity; opportunity costs, incentives, imports and displacement matter.

ANALYSIS · ORIGINAL GUIDANCE

• AP can appraise supplier development, skills, environmental compliance and milestone-linked public support.

• Compare realised investment and retained jobs on the same date, not approvals from different meetings plus MoU totals.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E6-2510-015, E7-2511-009 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not count an expansion and its parent plant’s entire historical investment twice or certify company decisions from Cabinet reporting alone.

MAINS PROMPT How should investment promotion be evaluated through durable additional jobs and capability?

Sources: [E12-APCAB]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

08 · Demography and reproductive choice

Birth incentives: announcement before verified operating rules

E12-2605-062 · P1 · 2026-05-16 · AP-linked

WHY IN THE NEWS The 16 May BusinessLine report records new incentive figures.

• The Chief Minister announced ₹30,000 for a third child and ₹40,000 for a fourth at Narasannapeta.

• This follows earlier debate on low fertility; the announced figures should not be conflated with an older second-child proposal.

• No final eligibility/implementation GO or payment audit was independently read for this note.

STATIC CONNECTION · ORIGINAL Sub-replacement TFR, ageing, population momentum and a household’s reproductive choices are distinct analytical levels.

ANALYSIS · ORIGINAL GUIDANCE

• AP policy must protect informed choice, maternal safety, childcare and gender equality rather than pressure women or penalise childlessness.

• Evaluate whether support addresses durable care/housing/work costs, not only whether a one-off payment changes stated intentions.

READ ACROSS MONTHS · NOTE IDS E5-2506-018, E5-2508-029, E5-2508-030, E6-2509-027, E9-2602-031, E9-2602-042, E9-2602-043, E10-2603-005 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say every eligible family was already paid or that a political announcement proves a final legally claimable entitlement.

MAINS PROMPT Can pronatalist incentives address ageing without undermining reproductive autonomy?

Sources: [E12-APBIRTH]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

09 · School outcomes — targets and measurement

Andhra education model: enrolment, retention and learning

E12-2605-063 · P1 · 2026-05-21 (reporting date) · AP-linked

WHY IN THE NEWS TNIE reports the 20 May education review on 21 May.

• Stated goals include 100% enrolment and at least 10% growth in government-school enrolment; these are targets, not measured achievements.

• Measures include GFLN, LEAP monitoring, one-class-one-teacher and planned classroom technology/infrastructure support.

• The report separately identifies dropouts and never-enrolled children, who require different outreach.

STATIC CONNECTION · ORIGINAL Admission, regular attendance, grade progression and foundational competence are separate outcome indicators.

ANALYSIS · ORIGINAL GUIDANCE

• AP should connect door-to-door tracking with migrant support, teacher capacity, safe facilities and independent learning checks.

• Digital tools need maintenance, accessibility and valid evidence of educational benefit; devices alone do not guarantee improvement.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not report 100% enrolment as achieved or equate government-school market share growth with system-wide learning gains.

MAINS PROMPT How can an education reform programme improve both inclusion and actual learning?

Sources: [E12-APEDU]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

10 · Inflation — release and observation dates

12 May CPI: AP’s April headline 4.20%, food 5.64%

E12-2605-064 · P1 · 2026-05-12 · AP-linked

WHY IN THE NEWS The 12 May release reports April provisional prices on base 2024=100.

• AP’s combined CPI inflation is 4.20% and food inflation 5.64%; these are distinct baskets.

• National corresponding April rates are 3.48% and 4.20%, while March national headline 3.40% is final in this release.

• The numerical match between AP headline 4.20% and national food 4.20% does not make them the same statistic.

STATIC CONNECTION · ORIGINAL Year-on-year inflation compares like-month indices; an index level, month-on-month movement and percentage-point gap are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• AP’s headline exceeds the national rate by 0.72 percentage points; do not call that a 72% price increase.

• Use food-specific supply/logistics evidence and household exposure before explaining the gap causally.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are April observations published in May, not May inflation; do not swap the state/national and headline/food labels.

MAINS PROMPT How should state inflation analysis distinguish measurement from explanation?

Sources: [E12-CPI]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Culture & History

01 · Bhojshala — heritage and legal status

Bhojshala: distinguish archaeology, attribution and current orders

E12-2605-051 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue discusses litigation over the Dhar monument. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• Bhojshala–Kamal Maula complex is in Dhar, Madhya Pradesh, with layered inscriptions, architecture and worship claims.

• The magazine reports a High Court decision; the underlying full judgment and any later stay/appeal have not been independently reviewed here.

• Heritage conservation and religious-rights questions engage distinct statutory and constitutional tests.

STATIC CONNECTION · ORIGINAL An archaeological interpretation, historical patronage attribution and operative court direction are different kinds of claims.

ANALYSIS · ORIGINAL GUIDANCE

• For Mains, focus on evidence-led conservation, lawful access arrangements and protection from damage or inflammatory inference.

• Do not copy the article’s erroneous gloss of Kurma as crocodile: Kurma means tortoise; specific inscription authorship needs separate verification.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not certify present ownership/worship rights or final litigation status from a monthly summary, or extend one site’s dispute to other communities/monuments.

MAINS PROMPT How should heritage disputes be managed through evidence, law and conservation?

Sources: [E12-V41]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

Awards & Sports

01 · Anti-doping — consultation

Anti-doping draft: criminal offences versus sports sanctions

E12-2605-020 · P2 · 2026-05-19 · National / other

WHY IN THE NEWS May consultation proposes amendments to the 2022 Act.

• Draft offences address trafficking/administration of prohibited substances or methods linked to sport.

• Aggravated proposed penalties address minors, commercial conduct or organised crime.

• Separate proposed advertising/promotion offences complement the regulatory anti-doping system; comments were invited until 18 June.

STATIC CONNECTION · ORIGINAL A sports-rule violation, disqualification and a criminal conviction follow different legal elements and procedures.

ANALYSIS · ORIGINAL GUIDANCE

• Protect athletes from exploitative supply networks while preserving testing reliability, fair hearings and proportionality.

• For AP sports administration, combine education and support for minors with qualified medical advice and safe reporting.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION These are draft criminal provisions, not a claim that every positive test automatically attracts the proposed prison term.

MAINS PROMPT How should anti-doping policy protect clean sport and athletes’ procedural rights?

Sources: [E12-PRS]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

02 · Sports governance institutions

Sports Board and Tribunal: institutions need operational capacity

E12-2605-024 · P2 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The issue describes 2026 rules under the 2025 sports-governance Act. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The reviewed Board has a chairperson and two members, with a three-year term subject to its age/reappointment provisions.

• Tribunal leadership and members have distinct age limits and five-year terms under the described framework.

• Digital filing and enforceable orders are institutional tools; they do not alone settle every federation dispute.

STATIC CONNECTION · ORIGINAL Institutional independence requires fair appointment, athlete representation, clear jurisdiction and remedies, not only a new body’s name.

ANALYSIS · ORIGINAL GUIDANCE

• For AP sports bodies, accountability should encompass selection transparency, safe-sport protections and accessible appeals.

• Separate the national statutory framework from a claim that every state association dispute is automatically transferred to the Tribunal.

READ ACROSS MONTHS · NOTE IDS APR25-006, E5-2506-003, E5-2508-010, E9-2602-009, E9-2602-030, E10-2603-001, E10-2603-004, E10-2603-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse the Board’s term/age rules with the Tribunal’s or treat draft anti-doping criminal penalties as these notified governance rules.

MAINS PROMPT What makes sports governance genuinely athlete-centred?

Sources: [E12-V05]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

03 · Civilian honours — announcement and investiture

Padma 2026: May investiture is not a second award announcement

E12-2605-052 · P3 · Magazine coverage: 2026-05 · web posted: 2026-06-30 · event date varies · National / other

WHY IN THE NEWS The primary release confirms Civil Investiture Ceremony-I on 25 May. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

• The President conferred Padma Vibhushan, Padma Bhushan and Padma Shri at Rashtrapati Bhavan.

• Annual approval/announcement and an individual receiving an award at a ceremony are separate events.

• Civilian decorations are not hereditary titles or prefixes/suffixes to personal names.

STATIC CONNECTION · ORIGINAL Article 18’s prohibition on titles must be read with the constitutional treatment of national awards; an honour does not create a privileged legal rank.

ANALYSIS · ORIGINAL GUIDANCE

• Study distinctions, institutions and verified recipient-field pairs rather than circulate an unverified exhaustive list.

• This note does not claim every annual recipient was present at the first ceremony or reproduce all awardees.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not count the same honour twice because it appears in January’s announcement and May’s investiture.

MAINS PROMPT How can national honours recognise public service without encouraging title-based hierarchy?

Sources: [E12-PADMA], [E12-V42]

Evidence access: Source registry records actual reading and access limits. Static links, analysis and exam guidance are original.

May 2026 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

MAY26-01. The May ordinance’s statutory ceiling of 37 Supreme Court judges implies a total sanctioned strength of:

A. 38 including the Chief Justice.

B. 74 including the Chief Justice.

C. 37 including the Chief Justice.

D. A number fixed only by the current working strength.

MAY26-02. An ordinance’s ordinary six-week constitutional reassembly clock runs from:

A. Its newspaper publication date regardless of reassembly.

B. Reassembly of Parliament, using the later date where the Houses reassemble on different dates.

C. The next general election.

D. The day the Cabinet first discusses it.

MAY26-03. The inspected central OSH rule provides which general weekly ceiling for covered workers?

A. 48 hours.

B. No limit where a digital attendance system exists.

C. 12 hours.

D. 84 hours.

MAY26-04. Under the inspected multi-aggregator engagement rule, 40 calendar days earning from each of three aggregators can contribute:

A. Only 40 days because multiple aggregators can never be counted separately.

B. 120 cumulative aggregator-days, subject to the remaining scheme conditions.

C. An automatic lifelong pension without any other condition.

D. 360 days because every shift counts as three calendar days.

MAY26-05. A central floor-wage rule and a minimum-wage notification should be distinguished because:

A. The rule itself necessarily fixes one identical rupee wage for every worker.

B. Every consumer-price index automatically substitutes for CPI-IW.

C. Floor wage means the current RBI repo rate.

D. The floor is a benchmark, while appropriate-government minimum wages and prescribed adjustments involve separate decisions.

MAY26-06. The May VB–G RAM G allocation consultation should be read as:

A. Proof no transition liabilities can exist.

B. Draft rules ahead of stated 1 July commencement, not a final May allocation formula.

C. Final rules operative on every date in May merely because comments were invited.

D. An automatic termination of every pending wage claim.

MAY26-07. An otherwise eligible non-airline borrower’s peak utilised Q4 working capital is ₹200 crore. Before other checks, 20% under ECLGS 5.0 is:

A. ₹100 crore for every borrower automatically.

B. ₹20 crore because utilised credit is irrelevant.

C. ₹40 crore, below the ₹100 crore borrower cap.

D. ₹200 crore as a debt waiver.

MAY26-08. For a 100-acre private-developer collaboration with ₹80 crore eligible infrastructure cost, the reviewed lower-of test gives which ceiling before other conditions?

A. ₹80 crore because the entire cost is reimbursed.

B. ₹100 crore as an unconditional acreage grant.

C. ₹40 crore.

D. ₹50 crore regardless of the cost limb.

MAY26-09. Which entity remains under a distinct 20% foreign-investment cap in the reviewed May framework?

A. Every private insurance company without exception.

B. Every listed Indian company.

C. Life Insurance Corporation of India.

D. Every mutual fund investor.

MAY26-10. If a company’s total CSR expenditure in a year is ₹20 crore, the 10% ZCZP-route ceiling corresponds to:

A. ₹20 crore because the instrument has no coupon.

B. An instrument guaranteed to repay ₹2 crore principal.

C. 10% of the company’s profit regardless of actual CSR expenditure.

D. ₹2 crore, subject to qualifying-instrument conditions.

MAY26-11. Among the reviewed 2026–27 kharif MSP changes, the highest absolute increase is for:

A. Moong.

B. Maize.

C. Common paddy.

D. Sunflower seed.

MAY26-12. The cost description accompanying the primary kharif MSP table includes:

A. Only the national average retail food price.

B. Only the farmer’s cash spending on seed.

C. Every individual farmer’s full cost guaranteed to be reimbursed.

D. Paid-out costs plus imputed family labour, rather than automatically every C 2 opportunity-cost component.

MAY26-13. The ₹9,000 crore product-level incentive cap in the reviewed surface-gasification scheme explicitly excepts:

A. Synthetic natural gas and urea.

B. All imported solar cells.

C. Only household electricity meters.

D. Every product without distinction.

MAY26-14. Which Nordic pair belongs to EFTA rather than the EU?

A. Finland and Denmark.

B. Norway and Iceland.

C. Denmark and Sweden.

D. Sweden and Finland.

MAY26-15. Failure of an NPT review conference to adopt a consensus outcome means:

A. The CTBT automatically entered into force.

B. The review failed to agree a document, not that the treaty automatically ceased to exist.

C. India automatically became an NPT-recognised nuclear-weapon state.

D. All parties automatically withdrew from the NPT.

MAY26-16. Which chronology matches the inspected official UAE withdrawal extract?

A. Announcement 28 April; stated effect 1 May 2026.

B. Announcement 1 May; effect 28 April.

C. No exit from OPEC+, only a stop to all oil exports.

D. An immediate guarantee of lower Indian pump prices.

MAY26-17. The later MoSPI release confirms which new-IIP chronology?

A. Initial new-series launch 1 June, followed by PPI-based supersession 29 June.

B. No change after the old 2011–12 series.

C. Actual launch necessarily 28 May because an earlier calendar scheduled it.

D. Every June development was already published on 1 May.

MAY26-18. Risk-weighted assets in bank-capital calculations are:

A. The amount of capital a bank is required to hold, by definition.

B. The annual interest rate paid to depositors.

C. Always identical to cash reserves at RBI.

D. Exposures adjusted for prescribed risks, forming the denominator of capital ratios.

MAY26-19. A credible marine-carbon-removal claim must establish:

A. Net additional durable atmospheric removal after leakage, reversals and relevant energy costs.

B. That emissions reduction elsewhere is no longer necessary.

C. That every pilot can immediately operate safely at gigatonne scale.

D. Only gross carbon moved into seawater at one instant.

MAY26-20. A forecast strong El Niño implies for an Indian district:

A. A probabilistic risk factor, not deterministic rainfall or guaranteed drought.

B. That no local observations or other climate drivers matter.

C. Certain drought in every district.

D. A fourth ENSO phase distinct from warm, cool and neutral.

MAY26-21. Infant mortality rate uses which denominator?

A. Only insured households.

B. Total mid-year population, identical to crude death rate.

C. Live births, normally expressed per 1,000.

D. Only registered deaths of adults.

MAY26-22. Given private-hospital shares of 57.9% rural and 64.6% urban, a national combined share requires:

A. Appropriate rural/urban hospitalisation weights.

B. A simple unweighted average regardless of survey design.

C. Treating rural people as urban respondents.

D. The unsupported claim every region exceeds 60%.

MAY26-23. May’s Padma investiture should be distinguished from the annual announcement because:

A. Every ceremony necessarily announces a wholly new list.

B. Conferral at a ceremony does not create another award for the same recipient.

C. The award becomes a hereditary legal title.

D. All annual recipients must attend the first ceremony.

MAY26-24. In the reviewed South Coast Railway report, May notification and 1 June operation are:

A. Proof the railway became a state-owned corporation.

B. Proof every requested train was sanctioned in May.

C. The same event because both concern Visakhapatnam.

D. Different administrative/legal milestones.

MAY26-25. Which sum reconstructs the AP BharatNet GP scope?

A. 13,426+3,942=13,426.

B. Five lakh homes equal 13,426 GPs by definition.

C. 1,692+480=13,426.

D. 1,692+11,254+480=13,426.

MAY26-26. A proposed 29,000 MWh battery storage system’s duration cannot be derived without:

A. Its usable discharge-power rating and operating assumptions.

B. Assuming 29,000 MWh means 29,000 hours.

C. Converting every MWh into one MW without time.

D. Adding solar AC and DC nameplate capacities as independent plants.

MAY26-27. The AP deep-tech initiative’s two-lakh figure is:

A. A count of universities already functioning.

B. A guarantee every learner becomes a quantum researcher.

C. An audited number of jobs already created on 11 May.

D. A 2026–27 learner target, not verified completed training or job placement.

MAY26-28. The 15 May Puttaparthi AMCA event establishes:

A. A combat squadron already inducted.

B. That April’s 350-acre DRDO allotment has an identical project/land scope.

C. That all projected 7,500 jobs existed that day.

D. A reported infrastructure foundation milestone, not operational fighter induction.

MAY26-29. For AP’s ₹30,000/₹40,000 birth-incentive announcement, the sound historical inference is:

A. A cash announcement alone proves fertility returned to replacement level.

B. Reproductive choice is legally extinguished by a demographic target.

C. Announced figures require separate verification of eligibility, operating rules and payments.

D. Every qualifying family had already been paid on 16 May.

MAY26-30. AP headline CPI inflation 4.20% minus national headline 3.48% equals:

A. The same statistic as national food inflation merely because it is 4.20%.

B. 0.72 quintals.

C. 72% growth in AP prices.

D. 0.72 percentage points.

Explained answer key

MAY26-01. A The substitution concerns judges in addition to the CJI: 37 + 1 = 38. Sanctioned posts are not proof every seat is filled. [E12-2605-001]

MAY26-02. B Article 123 links cessation to six weeks after parliamentary reassembly, with the later reassembly date where the Houses differ. Earlier disapproval/withdrawal and other constitutional conditions remain relevant. [E12-2605-001]

MAY26-03. A The inspected Rule 64 states 48 hours per week. This is not an unconditional 12-hour daily-work permission or proof every establishment falls within central jurisdiction. [E12-2605-002]

MAY26-04. B The rule explicitly allows engagement with three aggregators on one calendar day to count as three days.40×3=120. Registration, scheme conditions and actual benefits remain distinct. [E12-2605-003]

MAY26-05. D The inspected rules describe consultation and floor-setting; VDA uses the specifically prescribed CPI-IW. A legal framework is not itself a newly announced universal rupee rate. [E12-2605-005]

MAY26-06. B The review identifies the instruments as drafts and distinguishes the Act’s 1 July commencement. Consultation cannot be treated as final subordinate law. [E12-2605-006]

MAY26-07. C 20%×₹200 crore=₹40 crore. The scheme uses peak utilised working capital, not an unused sanctioned limit; the support is repayable credit with a guarantee, not a grant. [E12-2605-007]

MAY26-08. C ₹50 lakh×100 acres=₹50 crore; 50%×₹80 crore=₹40 crore. The lower figure is ₹40 crore, still subject to land-value, sanction and other conditions. [E12-2605-008]

MAY26-09. C The reviewed insurance-company liberalisation is not a 100% cap for LIC. Licensing, prudential and policyholder requirements also remain separate from the investment route. [E12-2605-009]

MAY26-10. D The percentage base is total annual CSR expenditure: 10%×₹20 crore=₹2 crore. A ZCZP instrument pays neither coupon nor principal redemption. [E12-2605-012]

MAY26-11. D The primary table gives sunflower+₹622/quintal, versus paddy+₹72, maize+₹10 and moong+₹12. Highest absolute rise is not necessarily highest percentage rise. [E12-2605-013]

MAY26-12. D The release explicitly includes paid-out production expenses and imputed family labour. The stated 1.5-times benchmark must not be relabelled as 1.5 times each individual farmer’s full C 2 cost. [E12-2605-013]

MAY26-13. A The primary coal release preserves the SNG/urea exception. Other caps include ₹5,000 crore/project and ₹12,000 crore/entity group, with a 20% plant-and-machinery incentive maximum. [E12-2605-017]

MAY26-14. B Norway and Iceland are EFTA members; Denmark, Finland and Sweden are EU members. Nordic, Scandinavian, EU and EFTA are not identical groups. [E12-2605-026]

MAY26-15. B A review process and the legal existence of the treaty are distinct. Non-consensus does not automatically amend membership or terminate obligations. [E12-2605-028]

MAY26-16. A The WAM extract distinguishes 28 April announcement from 1 May effect. Actual output, quota coordination and oil prices are separate variables. [E12-2605-029]

MAY26-17. A The inspected 29 June primary text explicitly identifies the earlier 1 June launch and subsequent PPI-based supersession. A scheduled release date is not evidence it occurred on time. [E12-2605-032]

MAY26-18. D CRAR compares eligible regulatory capital with risk-weighted exposures. Capital, liquidity reserves and the risk-adjusted asset denominator are different concepts. [E12-2605-035]

MAY26-19. A Gross uptake is not the same as durable net removal. MRV, ecosystem effects, additionality and permanence must be assessed; removal complements emissions cuts. [E12-2605-040]

MAY26-20. A ENSO affects risk, but regional rainfall also depends on other ocean/atmosphere and local influences. Preserve issue date, lead time and forecast probability. [E12-2605-043]

MAY26-21. C IMR counts deaths under age one per 1,000 live births. CBR/CDR use population denominators, while TFR is a different synthetic fertility measure. [E12-2605-046]

MAY26-22. A The denominators and survey weights matter. One subgroup is below 60%; a combined national estimate cannot be established from the two percentages alone. [E12-2605-048]

MAY26-23. B Announcement/approval and ceremonial presentation are different stages. Do not double-count honours or assume first-ceremony attendance equals the complete annual list. [E12-2605-052]

MAY26-24. D The contemporary report welcomed notification in May but scheduled operation from 1 June. New trains and project approvals require their own evidence. [E12-2605-055]

MAY26-25. D The primary release separates Phase I upgrades, Phase II GPs and new GPs.3,942 demand-based villages and projected home connections are different units, not extra GP categories. [E12-2605-056]

MAY26-26. A Duration in hours equals usable energy in MWh divided by discharge power in MW. Capacity ratings and project approval also do not prove commissioning. [E12-2605-060]

MAY26-27. D The PTI report states targets of two lakh learners in 2026–27 and ten lakh over five years. Enrolment, completion, competence and placement must be tracked separately. [E12-2605-057]

MAY26-28. D The inspected newspaper report concerns the foundation of infrastructure. Prototype testing, certification, production and service induction remain distinct stages. [E12-2605-058]

MAY26-29. C The inspected report supports the announcement, not a primary implementation GO or payment audit. Demographic objectives must preserve informed choice and health. [E12-2605-062]

MAY26-30. D 4.20−3.48=0.72 percentage points. These are April provisional observations published 12 May; AP food inflation 5.64% is a separate basket. [E12-2605-064]

Mains answer laboratory

Original planning aids, not official answers or predictions. Anchor each argument in its source/date and preserve open implementation questions.

Central labour reform needs both clarity and workplace enforceability.

Study reference: E12-2605-002

Dated anchor: Central Rules were notified on 8 May.

1. Anchor 8 May central rules. Explain appropriate-government jurisdiction rather than applying every central rule to every AP workplace.

2. Use inspected examples: 48 weekly hours and written consent, transport, lighting and emergency safeguards for women’s night work.

3. Link wage-setting to floor/minimum distinctions, CPI-IW adjustment and reliable contractor-payment chains.

4. Counterpoint: digital records and permission clauses do not remove coercion, under-reporting or weak inspections.

5. Recommend worker-accessible grievances, trained inspectors and outcome checks of actual wages, hours and safety.

Evidence caution: Do not universalise every central rule to every AP establishment or equate 48 weekly hours with an unconditional 12-hour daily norm.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

Design portable social protection for platform workers.

Study reference: E12-2605-003

Dated anchor: Selected Social Security Central Rules were independently inspected.

1. Anchor the inspected registration/eligibility provisions and 90/120-day distinction.

2. Explain cumulative aggregator-days: a calendar date with three aggregators can count three times. Do not promise every registrant every salaried benefit.

3. Assess portability, fragmented earnings, intermittent work and workers’ ability to inspect/correct platform records.

4. Counterpoint: badly designed thresholds can exclude vulnerable low-engagement workers while registration counts exaggerate coverage.

5. Recommend clear scheme eligibility, sustainable financing, accessible appeal and reporting of benefits actually received.

Evidence caution: Do not substitute 120 distinct calendar days for the rule’s cumulative counting, or promise automatic EPF/ESI payments to every registrant.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

Emergency credit guarantees should support viable firms without disguising fiscal risk.

Study reference: E12-2605-007

Dated anchor: The 5 May approval targets temporary liquidity pressures linked to West Asia disruption.

1. Anchor 5 May ECLGS 5.0, standard-account eligibility and credit guaranteed through NCGTC.

2. Explain 20% of peak utilised Q4 working capital, ₹100 crore cap and distinct airline rules. Guarantee is not a debt waiver.

3. Analyse how temporary liquidity support can preserve supply chains and jobs during external shocks.

4. Counterpoint: guarantees create contingent public liabilities and may weaken appraisal if lenders assume no residual risk.

5. Recommend additionality checks, transparent default/recovery reporting, sector exposure limits and credible exit.

Evidence caution: Do not apply 20% to the sanctioned but unused limit, equate a guarantee with a waiver, or count targeted credit as paid expenditure.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

A circular economy cannot be built through recycling certificates alone.

Study reference: E12-2605-038

Dated anchor: The issue discusses industry proposals for stronger coordination. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

1. Anchor the issue’s coordination proposal as an advocacy position, not an already-created ministry.

2. Define the hierarchy: reduce, durable design, repair, reuse, refurbish and recover materials.

3. For AP municipalities, connect source segregation, EPR, worker safety and financially viable end-markets.

4. Counterpoint: weak traceability can encourage false recovery claims; incineration and material recycling are not identical.

5. Recommend auditable material flows, circular public procurement, repair ecosystems and measures of displaced virgin extraction.

Evidence caution: Do not equate waste-to-energy incineration with material recycling or repeat a projected 2050 market value as present output.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

Can pronatalist support respect reproductive autonomy?

Study reference: E12-2605-062

Dated anchor: The 16 May BusinessLine report records new incentive figures.

1. Anchor 16 May announced ₹30,000/₹40,000 third/fourth-child figures; operating GO and payments remain unverified.

2. Distinguish sub-replacement TFR from immediate population decline, and national averages from state age structures.

3. Consider childcare, housing, employment security, maternal health and gendered care burdens alongside cash.

4. Counterpoint: incentives may have limited durable fertility effects and become coercive if attached to public targets or denial of contraception.

5. Recommend voluntary rights-based support, transparent eligibility, health safeguards and long-term evaluation rather than birth quotas.

Evidence caution: Do not say every eligible family was already paid or that a political announcement proves a final legally claimable entitlement.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

Why should health policy look beyond insurance enrolment?

Study reference: E12-2605-048

Dated anchor: The issue describes the 2025 NSS 80th-round health survey. May is the editorial coverage index; the public edition was posted on 30 June. Event/release dates can differ.

1. Anchor 2025 survey reference year and separate morbidity, hospitalisation, insurance and expenditure denominators.

2. Explain why 57.9% rural/64.6% urban hospitalisation shares cannot be pooled without weights.

3. Assess exclusions, outpatient medicines, provider costs, referral delays and lost earnings that affect financial protection.

4. For AP, link primary/public facility readiness to treatment completion and claims rather than only enrolment cards.

5. Recommend independent financial-protection measures, quality safeguards and accessible redress; do not infer clinical prevalence from self-reporting alone.

Evidence caution: A rise in insurance coverage does not prove catastrophic spending disappeared; symptom reporting is not the same as clinical prevalence.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

How should AP evaluate AI data-centre investment proposals?

Study reference: E12-2605-059

Dated anchor: The 15 May Cabinet report describes a Reliance-linked proposal.

1. Anchor the reported Cabinet approval and distinguish land allotment, commitment, financial closure and commissioning.

2. Assess power/water reliability, cable connectivity, land obligations and local environmental constraints.

3. Compare capital-intensive infrastructure with durable supplier, research and skilled-employment spillovers.

4. Counterpoint: large announced rupee totals can overstate additionality or hide expensive public incentives and resource commitments.

5. Recommend enforceable milestones, fiscal/resource disclosure and independently verified performance. Do not add AC/DC ratings or storage energy as identical capacity.

Evidence caution: Do not say all capital has arrived or the centre is operational; the report’s broad regional label is not a certified land-boundary description.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

How can the Andhra education model improve inclusion and learning together?

Study reference: E12-2605-063

Dated anchor: TNIE reports the 20 May education review on 21 May.

1. Anchor 20 May review reported 21 May. Treat 100% enrolment and 10% government-school growth as goals, not achievements.

2. Distinguish never-enrolled, dropout, attendance, grade completion and foundational-learning measures.

3. Connect GFLN, teacher capacity, accessible infrastructure and migrant-family support; devices alone are not pedagogy.

4. Counterpoint: dashboard pressure can create inflated enrolment or conceal absence; more government-school admissions do not automatically prove higher learning.

5. Recommend independent learning checks, safe infrastructure, teacher support and follow-up until children attend and progress.

Evidence caution: Do not report 100% enrolment as achieved or equate government-school market share growth with system-wide learning gains.

Conclusion test: Identify a responsible institution, an implementation safeguard and a measurable outcome.

Source register

Evidence access is recorded explicitly. Most non-PRS references were inspected as source extracts; primary full-text review remains open for them.

[E12-PRS] PRS · May 2026 monthly policy review

https://prsindia.org/policy/monthly-policy-review/may-2026

All eight chunks read, including substantive review and references. Underlying instruments not all read. Quarterly IIP in this review uses the earlier series and April release, not the later rebased series.

[E12-SC] Gazette · Supreme Court judges ordinance, 16 May

https://egazette.gov.in/WriteReadData/2026/272639.pdf

Full single-chunk two-page Gazette read: Ordinance 1/2026, Article 123, immediate commencement and 33→37 substitution. Total including CJI is 38; sanctioned is not working strength.

[E12-OSH] Gazette · OSH Central Rules, 8 May

https://www.labour.gov.in/static/uploads/2026/05/ee246f790cad0b8e99c3828f34fa09a6.pdf

Direct requests recovered 318-page bilingual PDF; opening and selected English Rules 64/83 read using text extraction. Forty-eight weekly hours and written consent/transport/lighting/night-work safeguards verified. Not complete 318-page rule review or AP state-rule reconciliation.

[E12-SOC] Gazette · Social Security Central Rules, 8 May

https://www.labour.gov.in/static/uploads/2026/05/49aa9b62c2125499c37399b90e969d67.pdf

Direct requests recovered 259-page PDF; selected gig-registration/eligibility provisions read, including 16-year registration, 90/120 day engagement and same-calendar-day multi-aggregator cumulative counting. All other benefit schedules not reviewed.

[E12-WAGE] Gazette · Code on Wages Central Rules, 8 May

https://www.labour.gov.in/static/uploads/2026/05/6eb0c35ba63b776487a025e5123b6b12.pdf

Direct requests recovered 69-page PDF; English working-day, VDA and floor-wage provisions read. Eight-hour normal daily-wage day, 48 weekly ceiling, April/October adjustments and floor-wage consultation/revision verified. Full instrument not reviewed.

[E12-ECLGS] PMO · ECLGS 5.0 approval, 5 May

https://www.pmindia.gov.in/en/news_updates/cabinet-approves-emergency-credit-line-guarantee-scheme-5-0/

Full substantive release read: standard accounts as of 31 March, guarantee coverage, peak utilised working-capital base, borrower caps, moratorium/tenor, NCGTC guideline commencement and sanction deadline. Not individual sanctioned lending data.

[E12-CSR] PIB/MCA · ZCZP CSR framework, 29 May

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2266792&reg=3&lang=1

Full substantive single-chunk release read: ScheduleVII, 27 May notifications, 10% annual CSR expenditure ceiling and NPO responsibility. Detailed Rule 4 A project-period/unspent-money provisions follow PRS, not independent full notification reading.

[E12-MSP] PIB · Kharif MSP approval, 13 May

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2260617&reg=3&lang=1

Full substantive body and MSP table in chunk 0 read, including paddy 2441/2461, sunflower highest absolute increase 622, paid-out plus imputed family labour cost definition. Detailed procurement outcomes not read.

[E12-COAL] PIB · Surface coal/lignite gasification, 13 May

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2260622&reg=3&lang=1

Full substantive release in chunk 0 read: 37500 crore, 20% plant/machinery, 5000/9000/12000 caps, SNG/urea exception to product cap, four equal milestone instalments, 75 MTscheme and 100 MTnational target. Does not independently verify projected jobs/emissions.

[E12-CPI] MoSPI · April CPI release, 12 May

https://www.mospi.gov.in/uploads/PressRelease/CPI%20Press%20Release%20of%20April%202026.pdf

Opening chunk 0 of 3 read, covering pages 1–6: national April provisional/March final, state AP CPI/food 4.20/5.64, denominator/method notes and opening annexure. Remaining detailed tables not fully read.

[E12-IIPJUN] MoSPI · May IIP release, 29 June — chronology cross-check

https://mospi.gov.in/uploads/latestreleasesfiles/1782729608698-IIP%20Press%20release%20May%202026.pdf

Opening chunk 0 of 4 read: confirms actual new-series release 1 June, subsequent PPI adoption 29 June, 234 of 463 value-based groups/36.02% weight and May reference-month estimates. Used to prevent treating scheduled 28 May as actual launch or June developments as known in May.

[E12-PADMA] PIB · Padma investiture-I, 25 May

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2265098&reg=3&lang=1

Full substantive 67-word release read. Confirms 25 May ceremony, not annual award-count list. Attached photograph PDF not read; no exhaustive recipient list claimed.

[E12-WAM] WAM · UAE OPEC/OPEC+ withdrawal announcement

https://www.wam.ae/en/article/bzxzuh7-uae-announces-decision-exit-opec-opec+

Full substantive official search extract read: 28 April announcement, 1 May effective date, production-policy review and gradual output approach. Direct fetch failed HTTP 500. No claim full website or OPEC legal notice inspected.

[E12-BHARAT] PIB · AP amended BharatNet agreement, 13 May

https://www.pib.gov.in/PressReleasePage.aspx?PRID=2260827&reg=3&lang=1

Full substantive release in chunk 0 of 2 read: signatories/APBIL role, 2432 crore, 13426 GP decomposition, 3942 villages on demand, five-lakh-plus home-connection expectation. Agreement text and execution audit not read.

[E12-APSKILL] PTI/ThePrint · Deep-tech learners initiative, 11 May

https://theprint.in/india/andhra-launches-deep-tech-skilling-push-targets-10-lakh-learners-in-five-years/2928210/

Both chunks read; full substantive PTI body including 2 lakh/10 lakh targets, IBM/APSCHE/APSSDC and proposed ANU NIELIT centre. Separate direct requests failed 403. Completion and job-placement outcomes not verified.

[E12-APAMCA] The Hindu · AMCA infrastructure foundation, 15 May

https://www.thehindu.com/news/national/andhra-pradesh/amca-project-in-puttaparthi-a-testimony-to-aps-ease-of-doing-policy-says-cm-naidu/article70982113.ece

Full substantive single-chunk report read despite subscription/error clutter: 15 May foundation, 15803 crore, nearly 650 acres, projected 7500 jobs. Not a primary sanction or evidence a fighter prototype flew/was inducted.

[E12-APCAB] APAC Media · AP Cabinet investment decisions, 15 May

https://apacnewsnetwork.com/2026/05/andhra-pradesh-cabinet-clears-rs-1-4-lakh-cr-investments-across-ai-clean-energy-manufacturing/

fetch_page opening mainly navigation; direct requests/BeautifulSoup recovered full substantive body and it was read. RIL AI/solar, Apollo/Eicher and other decisions are reported approvals, not audited realised investment. Detailed GOs, company filings and district/land boundaries not reconciled.

[E12-APBIRTH] BusinessLine · AP birth-incentive announcement, 16 May

https://www.thehindubusinessline.com/news/national/andhra-pradesh-to-offer-rs-30000-for-third-child-and-rs-40000-for-fourth-child/article70986673.ece

Full substantive single-chunk report read: 30000/40000 announcement at Narasannapeta. Search previews showed PTI version; fetched body was BL Hyderabad Bureau. No implementation GO, eligibility rules or actual payments inspected.

[E12-APEDU] TNIE · Andhra education review, 21 May

https://www.newindianexpress.com/states/andhra-pradesh/2026/May/21/andhra-model-of-education-must-be-a-national-benchmark-minister-lokesh

Direct requests/BeautifulSoup recovered/read full substantive body: 20 May review reported 21 May, 100% enrolment goal, 10% government-school enrolment target, GFLN, LEAP, proposed tools and infrastructure. No independently measured learning-outcome gains claimed.

[E12-APRAIL] IANS/SocialNews · South Coast Railway notification report, 5 May

https://www.socialnews.xyz/2026/05/05/long-cherished-dream-of-andhra-people-fulfilled-cm-naidu-on-creation-of-south-coast-railway-zone/

Substantive contemporary search extract read: May notification welcomed 5 May, VisakhapatnamHQ, operations scheduled 1 June. Underlying Gazette not independently read; exactnotification-day/divisional boundary claims not certified.

[E12-V26] Vision IAS · May 2026 · 5.3 Coal Gasification

https://visionias.in/current-affairs/monthly-magazine/2026-06-30/environment/scheme-for-promotion-of-surface-coallignite-gasification-projects

[E19-APMETER] AP Finance · government-department prepaid-meter billing memo, 5 May 2026

https://apfinance.gov.in/images/Smart_Metering.pdf

Complete one-chunk primary circular read, including DDO mapping, HOD billing and 5th/7th/9th sequence. Referenced Energy GO of 23 March not independently read; implementation outcomes not audited.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
