CIVILS ATLAS / RESEARCH EDITION 19

1–7 November 2026

Understand the news.
Retain what matters.

35 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Justice delivery and accountable institutions

Fast Track Special Courts: expand capacity without sacrificing fair process

E18-2611-002 · P1 · 2026-11-04 · National / other

WHY IN THE NEWS The 4 November Cabinet continues the centrally sponsored scheme through 31 March 2031. The release distinguishes current functional courts from proposed capacity.

• Outlay is ₹3,788.04 crore: central ₹2,353.15 crore and state/UT ₹1,434.89 crore; the central share comes from the Nirbhaya Fund.

• Expansion is envisaged from 779 existing functional FTSCs to 850, including exclusive POCSO courts; additional districts depend on pendency.

• Each court is provided for a dedicated judicial officer, special public prosecutor and six support staff; vulnerable-witness and child-friendly facilities are encouraged.

STATIC CONNECTION · ORIGINAL Fast-track designation, creation of posts, functional courtrooms and disposal quality are distinct. POCSO protects children; every FTSC is not necessarily an exclusive POCSO court.

ANALYSIS · ORIGINAL GUIDANCE

• Speed requires investigation, forensic capacity, prosecution, legal aid, witness support and reasoned decisions as well as judges. Disposal totals alone cannot establish victim wellbeing, fair trial or absence of reversals.

• For AP, map case load and vacancies before assuming uniform additional courts in every district. Funding approval does not certify filled posts or permit dilution of evidentiary rights to achieve numerical targets.

READ ACROSS MONTHS · NOTE IDS E14-2607-034, E12-2605-001, E10-2603-042, E16-2609-004, E15-2608-016, E17-2610-017, E5-2506-018, E5-2508-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 850 is the proposed scheme capacity, not the verified existing functional total of 779.

MAINS PROMPT How can special courts provide timely, child-sensitive justice while protecting due process?

Sources: [E18-FTSC]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

PAC resolution: audit follow-up requires action, not a digital portal alone

E18-2611-005 · P1 · 2026-11-04 · National / other

WHY IN THE NEWS The 3–4 November chairpersons' conference adopts a resolution on public accounts oversight. Its text is a collective commitment, not a newly enacted uniform rule for all legislatures.

• The resolution seeks standardised action-taken timelines and digital audit-para oversight in state/UT PACs.

• It calls for training, analytical tools, peer learning and cooperation with the CAG.

• It proposes considering at least three sittings monthly and subcommittees to address pendency; this is not independent proof that every state PAC already complies.

STATIC CONNECTION · ORIGINAL CAG audit and legislative PAC examination are complementary, not the same institution. An audit observation, committee recommendation, executive response and settled corrective action are separate stages.

ANALYSIS · ORIGINAL GUIDANCE

• Digital tracking can identify delayed replies, but reasoned scrutiny, documentary evidence and executive accountability determine results. Protect due process and avoid turning a portal status into automatic proof of wrongdoing or exoneration.

• For APPSC, connect expenditure authorisation, intended purpose and follow-up rather than equating regular meetings with effective oversight. Compare reduced recurrent irregularities and substantive action, not only uploaded reports.

READ ACROSS MONTHS · NOTE IDS E5-2508-023, E5-2508-044, E12-2605-030, E17-2610-016, E7-2512-010, E15-2608-029, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A conference resolution does not automatically amend every legislature's rules or transfer CAG's constitutional role to the PAC.

MAINS PROMPT How can legislative financial oversight close the gap between audit findings and administrative correction?

Sources: [E18-PAC]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

02 · Digital services and consumer rights

Telecom grievance reform: 24-hour support is not 24 hours of human staffing

E18-2611-007 · P1 · 2026-11-02 · National / other

WHY IN THE NEWS The 2 November release announces final complaint-redressal amendments after consultation. The complete regulation and commencement clause were not separately inspected.

• The release says ISP applicability uses more than 10,000 subscribers at the preceding financial year-end, removing the alternative ₹5 crore turnover criterion.

• Support becomes round-the-clock, with human help at least 16 hours daily and supervised technology allowed for other support; accessible channels for persons with disabilities are emphasised.

• Appeal filing after complaint disposal changes from 30 to 15 days; the appellate authority’s decision within 15 days of receipt is a separate timeline. Quarterly feedback/board reporting and oversight mechanisms are described.

STATIC CONNECTION · ORIGINAL Provider complaint handling, internal appeal and regulatory review differ. A final regulation announcement is stronger than a consultation, but operational dates/exceptions still require the legal instrument.

ANALYSIS · ORIGINAL GUIDANCE

• Multiple channels and accessible help matter when automated systems misunderstand language or repeat generic answers. Shorter filing windows also require clear notification and assistance, not an assumption that speed always helps vulnerable consumers.

• For AP, assess resolution quality, wrongful closures and accessibility alongside complaint counts. Consumer organisations and audits should scrutinise whether reported satisfaction reflects actual participation.

READ ACROSS MONTHS · NOTE IDS E10-2603-020, APR25-018, E15-2608-021, JAN25-002, JAN25-003, JAN25-008, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Round-the-clock support does not require the release’s minimum human staffing to be 24 hours; the stated minimum is 16.

MAINS PROMPT How should telecom grievance reform combine convenience, inclusion and meaningful remedies?

Sources: [E18-RED]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Network Anubhav: interpret user-test maps with sampling and percentile caution

E18-2611-006 · P2 · 2026-11-04 · National / other

WHY IN THE NEWS TRAI launches a geospatial network-experience dashboard on 4 November, combining consumer observations and independent drive-test information.

• The platform draws on MySpeed/MyCall observations and shows provider, technology, area and speed information, with a DND web interface.

• The release describes P 80 mobile and P 90 fixed-broadband values as speeds met or exceeded by 80%/90% of tests; preserve that exceedance convention rather than silently imposing an ordinary lower-tail percentile definition.

• TRAI explicitly says user-test values are not a comprehensive assessment under standard network-quality methodology.

STATIC CONNECTION · ORIGINAL Crowdsourced tests are not a representative census of subscribers. Median, exceedance threshold, average and guaranteed service speed are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Self-selection, handset, location, time and connectivity affect observations. Use maps to locate problems and guide independent checks, not to promise each household the displayed performance.

• For AP, compare rural/coastal and urban data density and accessibility. More measurements improve coverage only when interpretation and privacy safeguards are credible; a dashboard is not an automatic remedy or compensation determination.

READ ACROSS MONTHS · NOTE IDS E15-2608-021, E17-2610-066, E15-2608-039, JAN25-002, JAN25-003, JAN25-008, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION P 80 in this release means 80% of tests at or above the stated speed; the source’s convention and sampling limits matter.

MAINS PROMPT How can consumer-generated telecom data improve accountability without misleading users?

Sources: [E18-NET]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

03 · Fiscal federalism

Advance tax devolution: national and AP figures

CA-043 · P1 · 2026-11-05 · AP-linked

WHY IN THE NEWS The 5 November Finance Ministry release advances the regular November tax-devolution instalment from the normal 10 November date. The complete primary narrative and state table were re-read.

• The regular instalment is ₹1,09,019 crore; it was released on 5 November instead of 10 November in view of the festive season.

• The primary table gives Andhra Pradesh ₹4,597 crore and Telangana ₹2,370 crore.

• This is accelerated timing of a regular instalment, not an additional discretionary grant, a new sharing formula or proof that states spent the funds immediately.

STATIC CONNECTION · ORIGINAL Articles 270 and 280 concern tax sharing and the Finance Commission framework. Vertical sharing, state-wise horizontal distribution, grants and the timing of a release are different questions.

ANALYSIS · ORIGINAL GUIDANCE

• Earlier cash availability can help states manage welfare payments and capital works without changing the full-year entitlement. Evaluate predictability, cash management and actual execution rather than interpreting every release as extra fiscal space.

• For APPSC, retain the AP/Telangana figures and distinguish union release, state treasury receipt, departmental allotment and final expenditure. This note retains CA-043 to preserve bookmarks and earlier references.

READ ACROSS MONTHS · NOTE IDS E15-2608-025, E15-2608-005, E10-2603-033, E16-2609-006, VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This was an advance of the regular instalment, not a newly announced additional grant or revised devolution formula.

MAINS PROMPT Separate predictability of state cash flows from the constitutional and Finance Commission framework for tax sharing.

Sources: [NOV]

Evidence access: Complete unique primary release and state table read in opening chunk 0/3 on 7 November. No separate treasury settlement or final expenditure records inspected.

11 · Grievance institutions and administrative justice

Reported rural-employment grievance rules: registration, enquiry and escalation

E19-010 · P1 · 2026-11-02 (reporting date) · National / other

WHY IN THE NEWS The Rural Development Ministry reports notification of VB–G RAM G grievance rules. The ministry’s summary gives distinct deadlines and channels; the original legal text and appeal schedule remain a separate verification task.

• The release describes grievance officers at gram-panchayat, block and district levels, with district coordination and a designated digital tracking infrastructure.

• Any person may complain about scheme implementation through in-person submission, speed post with delivery proof, digital infrastructure, telephone/helplines or other state-decided modes.

• Physical complaints must be entered digitally on receipt or, if infeasible, by the next working day; acknowledgement records the registration number, receipt date and receiving authority.

• The summary says registration cannot be refused for format, language, mode or procedural deficiency. Physical submission does not become invalid merely because tracking is digital.

• Enquiry is to be completed within seven working days of receipt; resolution within 15 days of receipt. The release does not describe the latter as 15 working days.

• Unresolved cases after the specified 15 days escalate to the next level and remain monitored. Appeals are described as governed by Schedule I to the Act; that schedule and the Rules themselves were not independently read.

STATIC CONNECTION · ORIGINAL Registration, enquiry, a reasoned decision, remedial action, escalation and appeal are different stages. Closing an electronic ticket is not necessarily substantive redress.

ANALYSIS · ORIGINAL GUIDANCE

• Inclusive grievance systems preserve offline entry, receipt evidence and a way to contest a wrong outcome. Digital tracking can improve accountability without making a smartphone a precondition for access.

• Measure acknowledgement delay, actual remedy, repeat complaints and reversal rates, disaggregated by vulnerable groups. A high disposal rate can conceal premature closure or weak remedies.

• Keep the press summary’s seven-working-day enquiry period distinct from its 15-day resolution period. An exam answer should not invent the detailed appeal authority, limitation period or compensation without the legal schedule.

PRELIMS CAUTION Do not add seven working days and 15 days into a sequential 22-day entitlement: both are described from receipt. Escalation is not the same legal mechanism as an appeal.

MAINS PROMPT What institutional safeguards turn time-bound digital grievance tracking into effective administrative justice?

Sources: [E19-GRIEV]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

Economy

01 · Official statistics and evidence governance

VISTAR: a stronger statistical system needs trustworthy methods, not just more data

E18-2611-001 · P1 · 2026-11-04 · National / other

WHY IN THE NEWS The 4 November Cabinet approves a central-sector statistical transformation scheme for 2026–27 to 2030–31. The primary release, rather than rounded coaching totals, anchors this note.

• Outlay is ₹4,371.10 crore, with components for statistical operations/ecosystem, state statistical strengthening and the Economic Census.

• MoSPI proposes 59 surveys in the 16th Finance Commission cycle and plans new service/unincorporated-enterprise indices; proposals are not already published series.

• SSS 2.0 envisages deliverable-linked state capacity and granular estimates; the 8th Economic Census would cover non-farm establishments and underpin a statistical business register.

STATIC CONNECTION · ORIGINAL The Economic Census of establishments is distinct from the population Census. A business register, sample survey, national-account estimate and administrative record have different purposes.

ANALYSIS · ORIGINAL GUIDANCE

• Digital interoperability can reduce duplication, but representativeness, confidentiality, stable definitions and transparent revisions remain essential. Scanner/mobile/e-commerce data can complement rather than automatically replace careful surveys.

• For AP, invest in district estimates, trained personnel and auditable methods. A scheme approval or AI-ready dataset is not proof that every district now has timely, reliable GDP or employment estimates.

READ ACROSS MONTHS · NOTE IDS E15-2608-063, E14-2607-038, E5-2506-030, MY25-010, E13-2606-030, E6-2510-019, APR25-006, E5-2506-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The 8th Economic Census is not the eighth population Census; 59 planned surveys are not 59 completed results.

MAINS PROMPT How can statistical modernisation improve policy targeting without weakening credibility and privacy?

Sources: [E18-VISTAR]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

02 · Industrial capability and strategic inputs

Critical-mineral processing: support refining capability, not merely mine allocation

E18-2611-003 · P1 · 2026-11-04 · National / other

WHY IN THE NEWS The 4 November approval targets domestic high-purity lithium/nickel processing, a different stage from October’s mineral-auction changes.

• The five-year 2026–31 outlay is ₹2,814 crore for two lithium plants of at least 30 kt each and two nickel plants of at least 50 kt each.

• Capital subsidy is 30% of eligible investment, capped at ₹500 crore per lithium beneficiary and ₹900 crore per nickel beneficiary.

• Technical qualification precedes least-cost support bidding; incentives have three milestone-linked tranches. Cobalt may be recovered as a nickel by-product, not a separately described fifth plant.

STATIC CONNECTION · ORIGINAL Mining, beneficiation, refining, precursor production, cell manufacture and recycling are different links. Domestic refining may still depend on imported feedstock, technology or equipment.

ANALYSIS · ORIGINAL GUIDANCE

• Assess raw-material security, recovery quality, waste/water management, energy and long-term offtake. Least subsidy sought is useful only alongside credible technical delivery and lifecycle safeguards.

• For AP industrial analysis, connect battery/electronics demand without inventing a locally selected beneficiary. A subsidy ceiling is not guaranteed payment, and the ₹2,814 crore headline is not identical to aggregate private investment.

READ ACROSS MONTHS · NOTE IDS E5-2506-010, E14-2607-027, E17-2610-020, E10-2603-025, CA-013, VM2502-003, JAN25-037, E5-2507-041 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Two lithium plus two nickel plants do not mean four lithium plants or an automatically operational domestic supply chain.

MAINS PROMPT How should critical-mineral policy balance processing capability, environmental safeguards and supply security?

Sources: [E18-MIN]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Semicon portal and ECMS: two programmes, different approval denominators

E18-2611-016 · P1 · 2026-11-06 · National / other

WHY IN THE NEWS The 6 November release opens Semicon 2.0 portal applications for pillars 2, 3 and 4 and separately announces 12 additional ECMS approvals. Only the opening substantive portion, not every cumulative tail, was read.

• Semicon portal coverage concerns machines/materials, more fabs and ATMP/OSAT; six strategic pillars are described across the wider programme.

• The new 12 ECMS approvals project ₹7,503 crore investment, ₹39,045 crore production and 7,127 direct employment opportunities.

• The listed new ECMS project states are Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Punjab, Tamil Nadu and Uttar Pradesh; AP is not in that specific list.

STATIC CONNECTION · ORIGINAL Chip design, wafer fabrication, packaging/testing, electronic components and manufacturing equipment are different parts of the value chain. Application access is not project approval or commercial output.

ANALYSIS · ORIGINAL GUIDANCE

• Evaluate technology depth, skills, supplier quality, water/power reliability, yields and market demand. Avoid adding a programme’s fiscal outlay to projected private investment as though they were the same accounting measure.

• For AP, explore ecosystem linkages without inventing a newly selected state project from this batch. Prospective production/jobs require later commissioning and audited outcomes; opening a portal does not establish a working fab.

READ ACROSS MONTHS · NOTE IDS E14-2607-027, E16-2609-014, E15-2608-019, E14-2607-025, E14-2607-026, E13-2606-038, CA-013, JAN25-037 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The 12 ECMS approvals are not necessarily 12 new semiconductor fabs; projected jobs are not verified appointments.

MAINS PROMPT How can electronics policy deepen domestic capabilities beyond assembly and headline investment approvals?

Sources: [E18-SEMI]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

03 · Flexible power systems and public finance

Storage VGF: 92 GWh is supported future energy capacity, not power already available

E18-2611-004 · P1 · 2026-11-04 · National / other

WHY IN THE NEWS The 4 November Cabinet approves ₹14,500 crore financial support for grid-scale storage during 2026–31. The release explicitly describes yet-to-be-commissioned capacity.

• Target mix is 60 GWh pumped storage, 30 GWh BESS and 2 GWh alternative technologies, totalling 92 GWh.

• Estimated total investment is ₹97,600 crore, distinct from the ₹14,500 crore VGF support.

• Allocation uses tariff-based competitive bidding; BESS projects have a minimum 40% domestic-content requirement. Detailed awards/guidelines were not independently read.

STATIC CONNECTION · ORIGINAL GW is power, GWh is energy; duration depends on both. Storage shifts electricity with losses and is not a free new primary energy source. VGF differs from total project cost.

ANALYSIS · ORIGINAL GUIDANCE

• Choose services against system needs, renewable profiles and actual dispatchability. Contracts should address degradation, availability, safety, recycling, water and tariffs across technology-specific lifecycles.

• For AP DISCOMs, national eligibility is not an automatic allocation or proof that storage assets are commissioned. Procurement and domestic-content verification must be measured alongside useful flexibility delivered.

READ ACROSS MONTHS · NOTE IDS E16-2609-008, E5-2506-013, E17-2610-048, E16-2609-028, E17-2610-011, E5-2506-009, MY25-009, MY25-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 92 GWh is not 92 GW, and approval does not mean the capacity is already operating.

MAINS PROMPT How can storage support integrate renewables while protecting consumers and public finances?

Sources: [E18-ESS]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

06 · Industrial statistics and interpretation

ASI 2024–25: separate reference year, survey period and publication date

E19-005 · P1 · 2026-11-04 (reporting date) · National / other

WHY IN THE NEWS MoSPI’s 4 November release disseminates detailed factory-sector results following a September factsheet. Its methodological endnote is essential to avoid treating a registered-factory survey as an estimate of every Indian enterprise.

• The reference period is April 2024–March 2025; the release describes field survey work during October 2025–June 2026. The factsheet appeared on 30 September 2026; detailed publications and unit-level data were disseminated in November.

• Volume I reports factory-sector capital, inputs, output, employment, emoluments and value-added measures. National tables use NIC-2008 at 2/3/4 digits; state tables at 2/3 digits.

• The methodology lists registered factories, registered bidi/cigar establishments, specified electricity undertakings not registered with CEA, and qualifying BRE units as state lists become available. It is not a complete census of all informal enterprises.

• The release reports manufacturing corporate-sector GVA growth of 9.28%; this sector accounted for more than 89% of total GVA in the stated survey context. That is not 89% of India’s entire economy.

• Factories with gross plant-and-machinery investment up to ₹5 crore represented 78.69% of operating factories and 34.32% of persons engaged, but 17.61% of net value added in the table.

• The ₹10-crore-and-above capital group represented 15.84% of operating factories, 59.66% of persons engaged and 78.07% of net value added. These capital-size bands are not, by themselves, current statutory MSME classifications.

• Data collection follows an establishment rather than enterprise approach under the Collection of Statistics Act framework. The endnote permits some consolidated returns under specified same-state/industry conditions; unit-level microdata were not independently analysed.

STATIC CONNECTION · ORIGINAL GVA differs from gross output because intermediate consumption is excluded; NVA additionally accounts for depreciation. Persons engaged, employees and workers are not interchangeable denominators.

ANALYSIS · ORIGINAL GUIDANCE

• Use the size distribution to discuss industrial concentration and employment intensity, but do not infer causal productivity advantages solely from cross-sectional shares. Industry mix, capital intensity, outsourcing and prices can affect comparisons.

• Distinguish the corporate-sector growth figure from an all-sector real manufacturing growth rate. The release does not justify silently relabelling the quoted increase as inflation-adjusted productivity.

• For APPSC, seek the actual AP state tables before assigning a state rank or extrapolating employment. Compare like reference years, industry coverage and price concepts across ASI rounds.

READ ACROSS MONTHS · NOTE IDS E6-2510-021

PRELIMS CAUTION Publication in November 2026 does not make these FY2026–27 output data. Factory capital bands are not a substitute for a statutory MSME definition; nominal value-added changes are not automatically real growth.

MAINS PROMPT How should ASI data be used to assess employment-intensive industrialisation without confusing coverage, scale and productivity?

Sources: [E19-ASI]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

12 · Transport infrastructure and implementation

MLFF tolling: barrier-free design does not mean toll-free travel

E19-011 · P1 · 2026-11-06 (reporting date) · National / other

WHY IN THE NEWS NHAI’s November guidelines address the physical design needed for multi-lane free-flow tolling. The release is narrower than a claim that every toll plaza has already become barrier-free.

• The announcement concerns standardised toll-plaza infrastructure for four-lane and above national highways, including upcoming and ongoing projects.

• Uniform provisions cover layouts, lane configurations, gantries, lighting, signage, road-safety features and operational/maintenance facilities.

• Barrier-free collection is intended to remove the need to stop at booths. Lane requirements are rationalised compared with conventional plazas, but the release does not specify one universal lane count for every road configuration.

• Projects at DPR stage are to incorporate the design in their documents. Awarded or under-construction projects are to adopt changes through applicable contractual provisions.

• Advance information, variable-message signs and adequate lighting are specified for visibility and user guidance; an administrative/operations-maintenance facility is also described.

• The complete policy circular, detailed technology specifications, nationwide completion date and every existing concession contract were not independently read.

STATIC CONNECTION · ORIGINAL Toll liability, vehicle identification, electronic payment, enforcement and road geometry are related but separate. Free flow describes movement through a tolling zone, not a waiver of payment.

ANALYSIS · ORIGINAL GUIDANCE

• Assess benefits through queue time, fuel use, safety and operating cost, while checking wrongful charging, exceptions, complaints and enforcement consistency. Technology can reduce stopping without eliminating disputes.

• Contractual adoption matters: retrospectively changing an awarded project is not the same as writing requirements into a new DPR. Costs, responsibility and rollout schedules must follow the applicable project framework.

• For APPSC, national-highway logistics links offer a practical application, but this release does not prove any named AP plaza’s conversion. Site-specific claims require a project or operational record.

PRELIMS CAUTION MLFF is not toll-free travel, and a design guideline is not completed national deployment. Do not silently label this a universal GNSS-only or distance-based tolling mandate.

MAINS PROMPT Examine the infrastructure and governance conditions needed for fair, safe and efficient free-flow tolling.

Sources: [E19-MLFF]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

Agriculture

01 · Animal-health surveillance and rural livelihoods

VAJRA-SAT: preparedness for SAT-1 is not an Indian outbreak announcement

E18-2611-009 · P1 · 2026-11-05 · National / other

WHY IN THE NEWS DAHD and ICAR-NIVEDI conduct a national tabletop exercise on 4–5 November; the 6 November release explicitly says FMD SAT-1 has not been reported in India.

• Simulated scenarios address early detection, laboratory confirmation, movement control, epidemiology, vaccine readiness and coordinated communication.

• Participants include state departments, laboratories, research institutions, vaccine manufacturers and border/security agencies.

• A separate discussion concerns FMD-free compartmentalisation of semen centres/banks; a technical meeting does not certify every establishment disease-free.

STATIC CONNECTION · ORIGINAL Foot-and-mouth disease affects livestock and differs from human hand-foot-and-mouth disease. Serotype-specific surveillance and laboratory confirmation matter; an exercise is not a confirmed disease event.

ANALYSIS · ORIGINAL GUIDANCE

• Preparedness requires trained field staff, specimen transport, trusted reporting and clear escalation. Farmers need credible guidance and livelihood support rather than panic caused by misreading a simulation.

• For AP livestock systems, connect October animal-reporting reforms with operational readiness. Neither participation numbers nor a tabletop scenario prove universal vaccine compatibility, freedom from every FMD serotype or completed outbreak control.

READ ACROSS MONTHS · NOTE IDS E13-2606-036, MAR25-019, E17-2610-036, JAN25-023, E5-2508-039, E7-2511-023, E5-2507-015, E5-2507-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The inspected release states SAT-1 has not been reported in India; do not convert a simulation into a domestic outbreak.

MAINS PROMPT How can veterinary preparedness protect livelihoods while preventing misinformation about disease risks?

Sources: [E18-FMD]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

10 · Watershed science and climate resilience

REWARD technical consultation: scientific baselines without rigid planning

E19-009 · P1 · 2026-11-05 (reporting date) · National / other

WHY IN THE NEWS A 4–5 November consultation at ICAR-NBSS&LUP examines draft watershed guidelines. Its substance is about matching land-resource science, feasible implementation and community maintenance—not merely buying drones.

• The Department of Land Resources (DoLR), National Rainfed Area Authority (NRAA) and ICAR-NBSS&LUP convened the third national consultation on draft National Technical Guidelines under World Bank-assisted REWARD (Rejuvenating Watersheds for Agricultural Resilience through Innovative Development).

• The release identifies Odisha and Karnataka as REWARD project states represented. It does not establish AP's inclusion in that project.

• Land Resource Inventory, digital soil libraries, hydrological assessment, GIS/remote sensing and decision-support systems were discussed as inputs to location-specific planning.

• Officials advocated essential uniform parameters with flexibility for institutional capacity, cost, implementation time and local conditions. A proposed harmonised DSS would draw on Odisha and Karnataka experience.

• The release calls for baseline data and impact assessment of WDC-PMKSY 2.0 to inform future design. It describes a move from seven-year project timelines under 1.0 to five years under 2.0.

• The draft technical guidelines were described as inputs towards WDC-PMKSY 3.0. FPOs, SHGs and user groups were emphasised for livelihoods and post-project maintenance; no completed final-guideline notification was inspected.

STATIC CONNECTION · ORIGINAL A watershed is a hydrological planning unit, not automatically an administrative district. Water-harvesting structures, groundwater recharge, soil moisture, cropping decisions and maintenance should be assessed together.

ANALYSIS · ORIGINAL GUIDANCE

• Robust evaluation starts with comparable baselines, rainfall variability and downstream effects. A structure count is a construction output; resilience requires functioning assets, reliable water and better livelihood outcomes.

• For rainfed AP regions, the analytical lesson is to combine scientific maps with local knowledge and equitable access. This is an application, not proof of a particular AP allocation or approved REWARD project.

• Avoid technology-first procurement that collects high-resolution data without field capacity to use it. Community ownership and a funded maintenance arrangement can be more consequential than the novelty of the mapping platform.

READ ACROSS MONTHS · NOTE IDS E13-2606-030

PRELIMS CAUTION A consultation on draft guidelines is not final adoption or sanction of a new programme phase. An AP relevance argument does not establish AP as a named REWARD project state.

MAINS PROMPT Explain how watershed planning can combine scientific evidence, implementation flexibility and community ownership.

Society & Welfare

01 · Service access and health affordability

International Digi Yatra trials: credentials complement, not replace, border formalities

E18-2611-008 · P2 · 2026-11-01 · National / other

WHY IN THE NEWS A 1 November release starts November–December trials for eligible Indian e-passport holders on selected Air India/IndiGo international services.

• Seven trial airports are Delhi, Bengaluru, Hyderabad, Cochin, Mumbai, Chennai and Amritsar; AP airports are not automatically included.

• Credential creation uses the passport MRZ, embedded chip via NFC, a compatible phone and selfie verification, stored in the device wallet.

• Mandatory travel documents, airline checks and immigration continue; feedback informs a proposed wider 2027 rollout.

STATIC CONNECTION · ORIGINAL An e-passport, identity credential, visa, boarding authorisation and permission to enter another country are different. NFC is short-range communication, not satellite navigation.

ANALYSIS · ORIGINAL GUIDANCE

• Convenience must be supported by clear consent, data minimisation, accessible alternatives and reliable correction when identity matching fails. Device-local storage is one design feature, not independent proof the entire ecosystem is risk-free.

• For AP travellers, verify airport/flight eligibility and retain documentation. A pilot should be evaluated through failure rates, inclusion and privacy, not advertised as mandatory universal international travel clearance.

READ ACROSS MONTHS · NOTE IDS E17-2610-029, VM2503-006, E16-2609-015, FEB25-022, E13-2606-036, E13-2606-042, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A Digi Yatra credential does not replace a passport, visa requirement or immigration check.

MAINS PROMPT How should digital identity improve travel without creating exclusion or privacy risks?

Sources: [E18-DIGI]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Anti-cancer price revision: the 7 November release points to 9 November effect

E18-2611-015 · P1 · 2026-11-07 · National / other

WHY IN THE NEWS NPPA’s 7 November update reports revised prices under an October trade-margin order, with effect from 9 November—after this archive’s research cut-off.

• The underlying intervention identifies 137 drugs; companies have reported revised MRPs for 1,225 formulations covering 121 drugs, with reductions in 1,031 formulations.

• Maximum permissible trade margin is 30% under the described order; this is not an identical 30% price cut on every product.

• ₹3,502.31 crore annual consumer savings are estimated, not audited realised savings. The original NPPA notification was not independently inspected.

STATIC CONNECTION · ORIGINAL A drug molecule, formulation, brand, MRP, trade margin and total treatment cost are different denominators. Price regulation does not change an individual’s clinical prescription.

ANALYSIS · ORIGINAL GUIDANCE

• Monitor availability, compliance, displayed prices and complaints alongside affordability; diagnostic, hospital and travel costs can remain high. Reduced list prices are not proof every patient can access the required care.

• For AP, strengthen price-check information and state drug-control follow-up without claiming the future 9 November prices were already universally operative on 7 November. Brand tables are not treatment advice or automatic interchangeability guidance.

READ ACROSS MONTHS · NOTE IDS E15-2608-049, VM2503-006, E16-2609-056, VM2504-011, FEB25-022, E17-2610-059, E5-2506-018, E5-2508-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 137 drugs do not equal 1,225 distinct molecules; 30% margin is not a uniform 30% reduction or an already observed future outcome.

MAINS PROMPT How should medicine-price regulation improve affordability without overlooking availability and total care costs?

Sources: [E18-CANCER]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

09 · Health financing, data and service outcomes

PM-JAY and ABDM review: a health ID is not insurance or better care

E19-008 · P1 · 2026-11-06 (reporting date) · National / other

WHY IN THE NEWS The 5–6 November NHA review in Kolkata links financial protection, interoperable records, claims and health AI. The complete release distinguishes several systems that are often misleadingly bundled as one health-insurance platform.

• The review treats AB PM-JAY financial protection and ABDM digital-health adoption as complementary rather than identical functions; it calls for better access, quality and health outcomes, not only more cards.

• State presentations reported 4.2 crore West Bengal beneficiaries enrolled and 2.2 lakh people treated after its 16 August 2026 launch. These are attributed administrative figures, not independently validated measures of effective coverage or causality.

• The National Anti-Fraud Unit (NAFU), State Anti-Fraud Units and auto-adjudication were discussed for claims oversight. The National Health Claims Exchange was reviewed alongside ABDM-enabled hospital information systems.

• BODH, a health-AI benchmarking platform using Indian datasets, was presented. States were encouraged to assess suitability and performance before procurement; a demonstration is not independent validation of every model.

• Sandbox 2.0 demonstrated an ABHA-creation integration. An ambient voice-scribe demonstration produced structured records that doctors review and approve before linkage to ABHA.

• Cybersecurity discussion covered phishing, fraudulent apps/URLs, credential leaks and third-party vulnerabilities. States were advised on cybersecurity leads, access controls and regular application/API audits.

STATIC CONNECTION · ORIGINAL Insurance entitlement, a digital identifier, health-record exchange, a claims messaging standard and an AI model have different legal and operational purposes. More digital transactions alone do not demonstrate improved health.

ANALYSIS · ORIGINAL GUIDANCE

• Measure financial protection through out-of-pocket expenditure, denied/delayed claims and care access—not card counts alone. Pair digital integration with clinical quality, primary care and grievance mechanisms.

• Auto-adjudication should be evaluated for false denials, bias, auditability and appeal/clinical-review pathways. Efficiency gains can coexist with exclusion if data quality and exception handling are weak.

• AI procurement requires task-specific external validation, privacy safeguards, security and workflow accountability. The doctor-review requirement in the demonstrated scribe is significant; it is not an endorsement of autonomous diagnosis.

PRELIMS CAUTION An ABHA number does not itself confer PM-JAY eligibility, and a claims exchange is not an insurer. Demonstrated software integration is not proof of universal hospital adoption or improved patient outcomes.

MAINS PROMPT Assess how digital health can strengthen financial protection without confusing interoperability with clinical effectiveness.

Sources: [E19-HEALTH]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

15 · Tribal livelihoods and market institutions

MSME–TRIFED: conditional market access for tribal Vishwakarma artisans

E19-014 · P2 · 2026-11-05 (reporting date) · National / other

WHY IN THE NEWS The MoU links eligible tribal artisans registered under PM Vishwakarma with TRIFED's retail and digital channels. Reading the actual eligibility and consent clauses avoids turning market facilitation into a guaranteed purchase scheme.

• The Ministry of MSME and the Tribal Cooperative Marketing Development Federation of India (TRIFED), under the Ministry of Tribal Affairs, describe a collaboration for eligible tribal artisans registered under PM Vishwakarma.

• Product-based trades include carpentry, metal work, sculpture, pottery, basket/mat/broom/coir work, toys and other listed craft activities. Registration in a scheme is not by itself proof of automatic onboarding into every retail outlet.

• TRIFED is to facilitate onboarding, capacity building and market access through Tribes India outlets and its e-marketplace, subject to its applicable conditions and policies.

• The proposed "Tribes India–PM Vishwakarma Collection" is subject to seller consent and policy compliance. The release also describes aggregation, quality assurance, packaging, imaging and cataloguing support.

• The MSME ministry is to identify/facilitate potential sellers and coordinate awareness and listing. The release reports an institutional arrangement, not completed orders, a minimum guaranteed price or assured export income.

• The signed MoU, individual seller terms, margins and actual commercial results were not independently inspected. Existing TRIFED product categories do not imply every category is newly eligible under this specific arrangement.

STATIC CONNECTION · ORIGINAL Market linkage differs from procurement guarantee, credit assistance and statutory entitlement. Consent, quality standards, transaction costs and payment terms shape the actual value to artisans.

ANALYSIS · ORIGINAL GUIDANCE

• Assess whether aggregation and cataloguing reduce entry barriers without shifting unreasonable inventory, rejection or logistics risk onto small producers. Local-language terms and accessible dispute resolution matter.

• Track repeat sales, net producer realisation, timely payments and continued participation—not registrations or catalogue uploads alone. Disaggregate who is excluded by geography, digital access or compliance costs.

• For APPSC, tribal craft ecosystems provide a relevant application, but no particular AP cooperative or artisan group is confirmed as onboarded by this release. Avoid treating a national MoU as a verified local award.

PRELIMS CAUTION The arrangement concerns eligible tribal PM Vishwakarma artisans and conditional onboarding, not automatic benefits for every artisan or guaranteed government purchase of all products.

MAINS PROMPT How can public market-linkage institutions improve tribal artisan incomes without substituting registration counts for commercial outcomes?

Sources: [E19-TRIFED]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

Environment

01 · Landscape governance and ecological recovery

I-OECMs: conserve beyond protected areas without changing ownership

E18-2611-014 · P1 · 2026-11-03 · AP-linked

WHY IN THE NEWS Guidelines were released at CBD COP-17 in Yerevan on 3 November and reported on 4 November. The release names the Srisailam–Cumbum AP/Telangana demonstration landscape.

• Recognition concerns defined areas outside already protected/conserved coverage that deliver sustained in-situ biodiversity outcomes; it does not itself create a protected area or alter ownership/legal status.

• The release describes NBA preliminary review, state biodiversity validation, interdepartmental decision and measurable monitoring at least every five years.

• The supporting GEF-8 project spans 2026–2032 and six demonstration landscapes/seascapes; landscape inclusion is not blanket recognition of every local parcel.

STATIC CONNECTION · ORIGINAL An OECM is not synonymous with a national park, sanctuary or UNESCO label. Conserved outcomes, governance, reporting and property rights are separate considerations.

ANALYSIS · ORIGINAL GUIDANCE

• Safeguard local institutions, existing rights and credible ecological monitoring. Avoid double counting already reported protected areas or treating recognition alone as proof of lasting biodiversity gains.

• For APPSC, connect tanks, sacred groves, coastal ecosystems and the named landscape with local biodiversity management. Exact eligibility and rights implications require the full guidelines; no automatic new land restriction or tourist permission is inferred here.

READ ACROSS MONTHS · NOTE IDS MAR25-034, APR25-037, E6-2509-018, E15-2608-032, E15-2608-038, E13-2606-041, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION OECM recognition does not automatically transfer ownership or turn the whole Srisailam–Cumbum landscape into a new national park.

MAINS PROMPT How can area-based conservation expand while respecting local governance and credible ecological outcomes?

Sources: [E18-OECM]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

SUVIKALP: a mine-repurposing ranking is not an environmental clearance

E18-2611-010 · P2 · 2026-11-03 · National / other

WHY IN THE NEWS The 3 November Coal Ministry release explains CCO’s mine-repurposing decision-support platform, aligned with 2025 planning guidelines.

• SUVIKALP combines site characteristics, environment, infrastructure, resource constraints, finance and socioeconomic factors.

• It uses multi-criteria TOPSIS ranking; RECLAIM integrates community priorities and PRISM guides implementation pathways.

• The described next phase includes feasibility studies, DPRs, funding, wider adoption and outcome monitoring; recommendations are not completed restoration projects.

STATIC CONNECTION · ORIGINAL Mine closure, rehabilitation, repurposing, environmental permission and title/land-use decisions are distinct. TOPSIS ranks alternatives relative to defined criteria and weights, not universal objective truth.

ANALYSIS · ORIGINAL GUIDANCE

• Transparent assumptions and meaningful participation are necessary because weighting choices can favour certain uses or actors. Test safety, contamination, water, long-term maintenance and local livelihoods before promoting new land use.

• For AP mining landscapes, use this as a governance linkage rather than proof of a newly sanctioned local project. A tourism or solar recommendation cannot itself establish safe land, free consent or legal permission.

READ ACROSS MONTHS · NOTE IDS MY25-014, E7-2511-015, E15-2608-032, E15-2608-038, JAN25-063, E16-2609-029, E5-2502-001, E5-2507-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A high digital suitability rank is not a statutory clearance, financial closure or evidence of completed remediation.

MAINS PROMPT How should post-mining development combine scientific assessment, community priorities and accountable implementation?

Sources: [E18-SUV]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

14 · Freight decarbonisation and climate cooperation

NDC-TIA II: a freight implementation agreement is not an electric-truck mandate

E19-013 · P1 · 2026-11-04 (reporting date) · National / other

WHY IN THE NEWS NITI Aayog’s release reports an agreement signed on 3 November for road-freight decarbonisation. It identifies policy barriers rather than announcing a national truck-purchase obligation.

• NITI Aayog and GIZ signed an implementation agreement under the Nationally Determined Contribution–Transport Initiative for Asia Phase II (NDC-TIA II) on 3 November; the PIB release is dated 4 November.

• The regional initiative is supported by the German Government’s International Climate Initiative, IKI. Named implementing partners include WRI India, ICCT India and Agora Energiewende.

• The release describes medium- and heavy-duty freight electrification as being at an early stage and identifies charging infrastructure, innovative finance and an enabling regulatory framework as needs.

• The agreement formalises collaboration towards low-carbon freight and India’s NDC/long-term climate goals. The short announcement gives no verified national procurement quota, statutory deadline or quantified emissions saving.

• The signed agreement, funding commitment and detailed implementation matrix were not inspected. The initiative’s regional identity should not be converted into a treaty-binding commitment for every Asian country.

STATIC CONNECTION · ORIGINAL Freight decarbonisation involves vehicle efficiency, energy source, utilisation, load factors, logistics and mode choice. Tailpipe emissions and lifecycle greenhouse-gas emissions are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Consider total cost of ownership, predictable high-utilisation routes, depot/highway charging, grid capacity and residual-value/credit risk. Vehicle subsidies alone may not overcome operational constraints.

• Tonnage shifted or trucks purchased are outputs, not a complete emissions account. Assess tonne-kilometres, electricity emissions, payload and avoided diesel use with a transparent baseline.

• For AP’s logistics economy, port-linked freight routes are an analytical application, not a confirmed beneficiary corridor. Do not invent AP funding or a named pilot absent the implementation documents.

PRELIMS CAUTION An implementation agreement does not itself mandate electric-truck purchases or prove that quantified emissions reductions have occurred. Event date 3 November differs from release date 4 November.

MAINS PROMPT Outline a credible policy package for decarbonising heavy road freight while preserving logistics competitiveness.

Sources: [E19-FREIGHT]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

Science & Technology

01 · Foundation models and trustworthy deployment

IndiaAI models: local language and offline capability need independent evaluation

E18-2611-017 · P1 · 2026-11-03 · National / other

WHY IN THE NEWS The 3 November MeitY release announces EKA-1 by Soket and Dhīr 2B/5B by ZenteiQ under the IndiaAI Innovation Centre pillar. Model cards, licences and performance were not independently tested.

• The release describes EKA-1 as 26.3 billion parameters, trained on approximately 7.5 trillion tokens across 22 scheduled Indian languages and English.

• Dhīr models are described as supporting English and ten Indian languages, with on-premise/offline-capable document-grounded use.

• Parameter counts, training tokens, supported languages and benchmark performance measure different things; ministry/developer claims are not our independent validation.

STATIC CONNECTION · ORIGINAL A foundation model, retrieval system, application and agent are not identical. Offline deployment can limit external transfer but does not itself eliminate hallucination, insecure access or malicious inputs.

ANALYSIS · ORIGINAL GUIDANCE

• Test language/dialect performance, factual reliability, bias, latency and data handling for the actual task. Claims of openness require inspecting the exact licence, weights and restrictions, not relying on the label alone.

• For AP service design, evaluate Telugu accessibility, human escalation and auditable decisions before consequential deployment. Public compute support and model release do not establish safe autonomous decisions about pensions, health or admissions.

READ ACROSS MONTHS · NOTE IDS E13-2606-045, VM2502-002, E5-2508-045, E15-2608-042, E6-2509-017, VM2502-006, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A larger parameter count or on-device operation does not guarantee accuracy, privacy or approval for every public-sector use.

MAINS PROMPT How should indigenous foundation-model development be linked to safe, inclusive public-service deployment?

Sources: [E18-AI]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

08 · Medicine quality and regulatory accountability

Draft drug-quality reforms: immediate suspension and accountable batch release

E19-007 · P1 · 2026-11-04 (reporting date) · National / other

WHY IN THE NEWS Two Health Ministry releases on 3–4 November concern distinct proposed safeguards: identifying who authorises a drug batch and acting rapidly when critical quality tests fail. Neither release proves that final amendments were already in force.

• The 4 November proposal would allow immediate suspension of the concerned drug's manufacturing licence after a Government Analyst reports a not-of-standard-quality (NSQ) result for assay, dissolution, related substances, impurities or sterility.

• The relevant central licensing approving authority or state licensing authority would act according to jurisdiction. The release describes the existing prescribed process, including show-cause procedure, as a potential source of delay.

• Restoration is proposed only after effective root-cause analysis and corrective and preventive action, verified to the licensing authority's satisfaction. A manufacturer's unsupported assurance is not the stated standard.

• Consequential Form 13 changes would communicate the analyst's report to the Drugs Controller General (India), or DCGI, the relevant state/UT licensing authority, manufacturer and marketer, supporting coordinated action.

• The 3 November proposal separately calls for formally authorised, appropriately qualified/experienced batch-release personnel, maintained records and a prescribed batch-release certificate.

• The NSQ proposal invites comments within 30 days from public availability of the Gazette copies—not automatically 30 days from the PIB release. The linked session-bound Gazette request returned a runtime error, so its original text and publication trigger were not verified.

STATIC CONNECTION · ORIGINAL Quality assurance before release, post-market testing, product recall, manufacturing-licence action and criminal liability are distinct tools. NSQ should not automatically be equated with intentional counterfeiting.

ANALYSIS · ORIGINAL GUIDANCE

• Fast interim intervention can reduce exposure to unsafe products, but sound regulation also needs reliable testing, proportionate scope, clear communication, lawful review and verified remediation. Do not invent an appeal process absent the instrument.

• Authorised batch release adds traceable responsibility; it does not replace Good Manufacturing Practice (GMP), validation or an independent regulator. An accountable signatory needs access to complete manufacturing and testing records.

• For AP's pharmaceutical ecosystem, the analytical concern is coordination between manufacturing-site regulators, destination states, procurement bodies and hospitals. No AP factory violation or specific suspended licence is established by these proposals.

PRELIMS CAUTION These are draft proposals, not proof of an operative automatic suspension rule. The suspension concerns the specified drug/licence context; do not infer that every product of a manufacturer is automatically banned.

MAINS PROMPT How can drug regulation combine rapid patient protection with reliable evidence, traceability and verified corrective action?

Sources: [E19-NSQ], [E19-BATCH]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

Security

01 · Personnel policy and capability development

Next-generation corvettes: signed contracts are beyond AoN, but not delivery

E18-2611-012 · P1 · 2026-11-02 · National / other

WHY IN THE NEWS On 2 November the Ministry signs ₹53,866.50 crore contracts for eight corvettes. This is a later procurement stage than October's separate in-principle AoN proposals.

• GRSE is to construct five ships and Goa Shipyard three; the Navy provides indigenous design under the described project.

• Intended roles span surface/sub-surface warfare, coastal defence, surveillance and protection of maritime routes.

• Expected employment is expressed as 72 lakh shipyard and 460 lakh ancillary person-days over ten years, not those numbers of permanent workers.

STATIC CONNECTION · ORIGINAL A corvette, destroyer, submarine and aircraft carrier are different platforms. Design, contract, construction, trials, delivery and commissioning remain separate stages.

ANALYSIS · ORIGINAL GUIDANCE

• Evaluate build quality, integration, maintenance, supply resilience and delivery schedules. Indigenous design strengthens capability but does not prove every component is domestic or all future costs are fixed.

• For AP's maritime-industrial ecosystem, analyse supplier opportunities without assigning these specific shipbuilding contracts to Visakhapatnam. Employment estimates are prospective and cannot be treated as realised jobs.

READ ACROSS MONTHS · NOTE IDS E7-2512-008, E13-2606-052, E16-2609-008, APR25-006, MY25-016, CA-033, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Five plus three ships are contracted, not eight already commissioned ships or 532 lakh permanent jobs.

MAINS PROMPT How should naval procurement be assessed across contracts, domestic capability and lifecycle readiness?

Sources: [E18-COR]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Agniveer pathway: retain willingness and selection conditions

E18-2611-011 · P1 · 2026-11-04 · National / other

WHY IN THE NEWS The 4 November Cabinet approval adds an engagement pathway for those outside the initial merit-based regular intake; detailed service orders were not independently read.

• The earlier merit-based offer of regular employment for 25% is retained in the release.

• Remaining 75% are offered another two-year engagement based on willingness.

• After that period, regular enrolment is offered subject to willingness and meeting selection criteria; higher remuneration, enhanced Seva Nidhi and seniority benefits are announced without detailed rates here.

STATIC CONNECTION · ORIGINAL A policy pathway, an offer, acceptance, eligibility, selection and actual regular appointment differ. Temporary engagement and regular service have distinct terms.

ANALYSIS · ORIGINAL GUIDANCE

• Assess operational readiness, training continuity, predictable careers and fiscal sustainability together. Claims of performance in a government release are not a substitute for independent long-term evaluation.

• For AP aspirants, rely on official recruitment/service instructions for individual decisions. Do not promise unconditional absorption on the announcement date or invent precise pay/seniority calculations absent the operative orders.

READ ACROSS MONTHS · NOTE IDS JAN25-018, E8-2601-027, E6-2509-001, E14-2607-031, E16-2609-051, E17-2610-035, E5-2507-009, E5-2507-010 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The pathway is conditional; it is not automatic immediate regular appointment of every individual regardless of willingness or selection.

MAINS PROMPT How can military personnel policy balance readiness, skills, fair careers and sustainable costs?

Sources: [E18-AGN]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Pralay test: user evaluation is not confirmed operational induction

E18-2611-013 · P2 · 2026-11-05 · National / other

WHY IN THE NEWS DRDO reports a successful quasi-ballistic missile test off Odisha on 5 November, with test objectives met according to range data.

• The test takes place from Dr APJ Abdul Kalam Island, with instrumentation from Integrated Test Range, Chandipur.

• Research Centre Imarat, Hyderabad, and other DRDO laboratories developed the system; BDL is a development-cum-production partner.

• The release describes user evaluation and says induction is imminent, not already completed. Exact range/warhead claims are not adopted without the appropriate source.

STATIC CONNECTION · ORIGINAL Quasi-ballistic trajectories differ from a simple ideal ballistic path; the label is not synonymous with a cruise missile. Development, production, evaluation and deployment have different meanings.

ANALYSIS · ORIGINAL GUIDANCE

• Operational capability needs reliability, training, logistics, command arrangements and integration beyond a successful test. Do not infer universal performance under every condition from one release.

• For APPSC, distinguish Telangana’s Hyderabad institution from the Odisha test location and avoid a fabricated AP launch site. Link indigenous research with production while preserving the narrow scope of observed test success.

READ ACROSS MONTHS · NOTE IDS E6-2509-011, E12-2605-058, E17-2610-063, JAN25-032, E8-2601-035, FEB25-040

PRELIMS CAUTION “Induction imminent” is not independently confirmed operational induction or combat deployment.

MAINS PROMPT Why should military technology evaluation distinguish development milestones from usable operational capability?

Sources: [E18-PRAL]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

International Relations

01 · Bay of Bengal cooperation and disaster readiness

BIMSTEC maritime exercise: event completion and release dates differ

E18-2611-018 · P2 · 2026-11-03 · National / other

WHY IN THE NEWS A 6 November release reports the maiden exercise held 30 October–3 November under Andaman and Nicobar Command, concluding at Sri Vijaya Puram on 3 November.

• BIMSTEC has seven members: Bangladesh, Bhutan, India, Myanmar, Nepal, Sri Lanka and Thailand.

• The release separately lists participating Indian, Myanmar and Sri Lankan ships and representatives/delegations; membership is not evidence that all seven sent naval vessels.

• The event combines harbour engagements and sea activity off Sri Vijaya Puram; it advances cooperation rather than creating a collective-defence treaty.

STATIC CONNECTION · ORIGINAL Landlocked membership is compatible with regional maritime cooperation. The Andaman and Nicobar Islands are strategically located near important Bay of Bengal/Indian Ocean routes.

ANALYSIS · ORIGINAL GUIDANCE

• Information sharing, communication, interoperability and sustained institutions matter beyond exercise publicity. Avoid treating a short activity as a resolution of all political differences or maritime crime.

• For AP, connect sea-lane security, ports, fisheries and HADR coordination without assuming a new automatic regional military deployment commitment. Preserve the October start, November completion and later reporting date to avoid duplicated chronology.

READ ACROSS MONTHS · NOTE IDS APR25-032, E15-2608-054, MAR25-041, E12-2605-064, E14-2607-067, E14-2607-068, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A seven-member organisation does not imply seven navies each deployed ships; 6 November is the report date, not the exercise’s completion.

MAINS PROMPT How can BIMSTEC translate maritime cooperation into practical regional public goods?

Sources: [E18-BIM]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

07 · Research cooperation and regulatory stages

India–EU Horizon Europe: concluded talks are not operational association

E19-006 · P1 · 2026-11-07 (reporting date) · National / other

WHY IN THE NEWS India’s 7 November announcement and 6 November newspaper reporting describe the conclusion of association negotiations. Background EU material helps separate political announcements, formal talks and the conditions for actual research funding.

• The Science Ministry reports successful completion of negotiations on India’s association with Horizon Europe, building on bilateral science cooperation and the Trade and Technology Council.

• Pillar II concerns collaborative research on global challenges and industrial competitiveness, including health, digital/industry/space, climate/energy/mobility, food and bioeconomy themes.

• The European Commission’s background page distinguishes the January summit announcement, exploratory talks on 6 February, the TTC meeting on 15 July and the planned start of formal negotiations on 17 July. These are different milestones, not contradictory dates for one event.

• The separately read TNIE report says direct funding and project leadership would follow signature and completion of required procedures, with association expected from January 2027. That expectation is reported, not verified as a completed legal entry into force.

• Associated-country participation applies to programme areas covered by the agreement; it involves a financial contribution. Neither a signed instrument nor India’s contribution amount was independently inspected.

• The existing science-and-technology agreement, renewed until 2030, is a separate framework. Horizon Europe association is not EU membership, an FTA or an automatic grant to every Indian institution.

STATIC CONNECTION · ORIGINAL International cooperation has stages: exploratory discussion → negotiations → agreed text → signature/internal procedures → operational eligibility → competitive call and grant award.

ANALYSIS · ORIGINAL GUIDANCE

• A strong Mains answer weighs access to consortia and infrastructure against proposal capacity, intellectual-property arrangements, research integrity and the cost of participation. These are analytical issues, not invented terms of an unread agreement.

• Eligibility expands the opportunity set but does not remove competitive selection. University support offices, transparent partner agreements and compliance capability can determine whether opportunities become funded projects.

• Keep trade negotiations and research association separate even when both appear in the same diplomatic narrative. Do not assert an FTA’s signature, a specific grant amount or universal mobility rights from this release.

PRELIMS CAUTION Negotiations concluded does not mean association is already in force. The 15 July TTC decision and 17 July formal-talk start are distinct; do not collapse them into a single date.

MAINS PROMPT Examine how international research association can strengthen India’s innovation ecosystem while retaining clear funding and governance safeguards.

Andhra Pradesh

01 · Maritime cooperation and public assets

RINL land auction: successful bids are not independently verified settled receipts

E18-2611-020 · P1 · 2026-11-03 · AP-linked

WHY IN THE NEWS NLMC’s 4 November release reports the second auction phase conducted on 3 November in Visakhapatnam. It is land-asset monetisation, not a reported sale of the entire steel enterprise.

• Phase II covers 114 parcels with ₹218 crore successful bids and about 17.96% premium; reserve price is ₹184.8 crore in prose versus ₹184.81 crore in the table.

• The two phases total 264 parcels and ₹584.33 crore bid value; Phase I’s 12 October event is not a new November auction.

• A third round for remaining parcels is prospective and conditional; settlement, title transfer and deployment of proceeds were not independently inspected.

STATIC CONNECTION · ORIGINAL Reserve price, successful bid, receivable, realised cash and net proceeds are different. Monetising surplus land differs from disinvestment in the operating company.

ANALYSIS · ORIGINAL GUIDANCE

• Transparent title, survey, land-use conditions, competition and disclosure help protect public value. A premium over reserve indicates a comparison with the chosen benchmark, not automatic proof of the best possible social/economic use.

• For APPSC, assess public purpose, local planning and the steel enterprise’s asset position without inventing operational shutdown or privatisation completion. Keep person-days, jobs, investment and land receipts in separate accounting categories.

READ ACROSS MONTHS · NOTE IDS E17-2610-061, E17-2610-062, JAN25-049, E14-2607-067, E14-2607-068, E14-2607-069, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION ₹218 crore successful bids are not independently verified final cash receipt or proof that the whole Visakhapatnam Steel Plant was sold.

MAINS PROMPT What safeguards should govern public-land monetisation in an industrial city?

Sources: [E18-RINL]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Tiger Triumph: Visakhapatnam hosts a HADR planning exercise, not an actual cyclone mission

E18-2611-019 · P2 · 2026-11-05 · AP-linked

WHY IN THE NEWS The 6 November release reports the fifth India–US tri-service edition, conducted 31 October–5 November and closed at Visakhapatnam on 5 November.

• Staff exercises, expert exchanges and a tabletop simulation focus on combined HADR planning, including amphibious operations.

• Cyberspace and medical-operation discussions support interoperability; the source does not establish an actual joint deployment in the local cyclone response.

• Tiger Triumph began in 2019; partner, edition number, event dates and reporting date should be kept distinct.

STATIC CONNECTION · ORIGINAL HADR is humanitarian assistance and disaster relief. A planning exercise, a field rescue operation and a treaty obligation are different.

ANALYSIS · ORIGINAL GUIDANCE

• Pre-agreed procedures can improve communications, medical coordination, logistics and safety when disasters occur. Evaluate lessons translated into workable protocols rather than assuming a closing ceremony proves operational readiness everywhere.

• For APPSC, connect Visakhapatnam’s naval role with civilian disaster institutions and respect for host-state decision-making. Exercises do not replace local warning, evacuation, shelter and lifeline responsibilities or prove foreign forces undertook the Murasu response.

READ ACROSS MONTHS · NOTE IDS MAR25-041, E17-2610-061, E17-2610-062, E12-2605-041, E14-2607-067, E14-2607-068, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A tri-service HADR exercise is not proof of an actual combined combat or cyclone-rescue operation.

MAINS PROMPT How can joint HADR exercises strengthen coastal disaster response while preserving clear civilian coordination?

Sources: [E18-TIGER]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

02 · Murasu chronology and accountable recovery

Immediate relief: ₹37 crore district allocation is separate from central assistance

E18-2611-022 · P1 · 2026-11-02 · AP-linked

WHY IN THE NEWS The 2 November IANS report describes immediate AP relief funding to 17 districts as Murasu approached. Original treasury orders and individual expenditures were not inspected.

• The breakdown is six districts×₹3 crore, eight×₹2 crore and three×₹1 crore: ₹18+₹16+₹3=₹37 crore.

• Reported uses include evacuation, food, shelters, medicine, fuel, transport and essential-service restoration, with emergency treasury permission referenced.

• A state release, a district authorisation, actual expenditure, beneficiary receipt and a later central-assistance request are not interchangeable.

STATIC CONNECTION · ORIGINAL Emergency spending should be rapid but retain lawful purpose, records, procurement integrity and later reconciliation. Disaster relief is not automatically insurance compensation for every private loss.

ANALYSIS · ORIGINAL GUIDANCE

• Collectors need operational flexibility alongside clear responsibilities, accessible records and verification that support reaches vulnerable households. Do not infer equal district amounts or complete adequacy from the aggregate.

• For APPSC, distinguish this state emergency envelope from regular tax devolution and from the CM’s subsequent request to the Union. The latter report’s 15-day detailed-assessment plan is not proof the report or central payment already occurred by 7 November.

READ ACROSS MONTHS · NOTE IDS E14-2607-052, E7-2512-035, E17-2610-062, FEB25-045, E5-2508-029, E13-2606-054, VM2502-002, E5-2507-030 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION ₹37 crore is neither ₹37 crore per district nor independently verified central assistance sanctioned in response to the later letter.

MAINS PROMPT How can emergency relief combine speed, equity and expenditure accountability?

Sources: [E18-APREL], [E18-APLETTER]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Murasu: distinguish confirmed coastal crossing from preliminary loss snapshots

E18-2611-021 · P1 · 2026-11-03 · AP-linked

WHY IN THE NEWS TNIE/PTI's 6 November report confirms the cyclone crossed near Ongole on Tuesday,3 November; earlier 2 November reporting described the expected crossing. A final IMD observational report was not inspected.

• The report locates crossing between Nellore and Narsapur, close to Ongole; forecast timing/surge should not be promoted into final observed wind or water levels.

• Reported loss is preliminary, around ₹1,919 crore; the same report quotes ₹1,918.5 crore while another 6 November account gives ₹1,919.59 crore.

• These are evolving source snapshots, not independently reconciled audited estimates; the earlier ₹4,600 crore paragraph concerned Arnab and must not be assigned to Murasu.

STATIC CONNECTION · ORIGINAL Consecutive cyclones compound exposure and vulnerability. A landfall event, weather warning, state loss memorandum, central assessment and relief sanction have different evidentiary stages.

ANALYSIS · ORIGINAL GUIDANCE

• Retain timestamps and responsible attribution when figures change. Avoid summing overlapping snapshots or suggesting a requested amount is money already received.

• For APPSC, connect hazard preparedness, evacuation and recovery while treating final fatalities, maximum winds and total losses cautiously. An early reported count is not a permanent final record, and weakening does not end flooding or electrical hazards.

READ ACROSS MONTHS · NOTE IDS E17-2610-065, E17-2610-063, E13-2606-054, E11-2604-041, E16-2609-052, E16-2609-053, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION ₹4,600 crore is not a settled Murasu loss figure simply because it appears in a report about the approaching second storm.

MAINS PROMPT How should disaster reporting communicate confirmed events and evolving impacts without confusing the public?

Sources: [E18-APLOSS], [E18-APREL], [E18-APLETTER]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

03 · Lifeline restoration and livelihood evidence

Murasu lifelines: restoration percentages need a timestamp and the right denominator

E18-2611-023 · P1 · 2026-11-06 (reporting date) · AP-linked

WHY IN THE NEWS TNIE/PTI's 6 November report gives a 5 November review snapshot for power, telecom, roads and drainage. It does not certify complete statewide service recovery.

• APCPDCL had reportedly restored 871 of 1,103 affected 11 kV feeders and repaired 1,493 of 3,946 damaged poles; feeder and pole counts measure different tasks.

• 30,518 of 31,428 telecom towers were reported operational, about 97%; this does not prove 97% of all users had reliable service at every location.

• Road damage, cleared trees/drain blockages and ongoing flood monitoring show interacting infrastructure risks; original engineering audits were not inspected.

STATIC CONNECTION · ORIGINAL An energised feeder, an operational tower, household connection, usable road and safe restored service are distinct outcomes. Network totals and affected-asset totals have different denominators.

ANALYSIS · ORIGINAL GUIDANCE

• Prioritise hospitals, water, shelters and communications with safe isolation, testing and documented handover. A rapid return of electricity can still be unsafe if flood-damaged consumer installations are not checked.

• For APPSC, compare restoration inputs with continuity, reach and quality. Cross-state support and official progress reports are valuable, but an announcement or high percentage cannot replace verification of unresolved local pockets and public safety.

READ ACROSS MONTHS · NOTE IDS E17-2610-066, E15-2608-038, E11-2604-047, E17-2610-063, E17-2610-064, E17-2610-065, E5-2506-028, E5-2507-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION 97% of towers operational is not automatically 97% of households connected, complete repair or final audited recovery.

MAINS PROMPT How should post-disaster lifeline restoration be measured and governed?

Sources: [E18-APLOSS]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

Crop-loss assessment: do not merge differing post-Murasu estimates

E18-2611-024 · P1 · 2026-11-06 (reporting date) · AP-linked

WHY IN THE NEWS Two 6 November reports describe preliminary livelihood losses, but their horticulture figures differ. Keep the source, date, sector and assessment stage attached rather than combining them into one invented series.

• IANS’s letter account gives agriculture 1,43,122 hectares / 1,86,063 farmers and horticulture 6,504.38 hectares / 12,178 farmers.

• TNIE/PTI’s review snapshot gives rounded agriculture 1.4 lakh hectares / over 1.8 lakh farmers and horticulture 6,749 hectares / 12,586 farmers.

• The IANS account estimates agriculture ₹874.96 crore and horticulture ₹337.10 crore; original survey/letter and final totals were not inspected.

STATIC CONNECTION · ORIGINAL Affected area, fully lost output, farmer count, tenancy, insured area and compensation eligibility are distinct. Water receding may change an initial assessment.

ANALYSIS · ORIGINAL GUIDANCE

• Use ground verification, geotagged evidence where appropriate, accessible corrections and explicit treatment of tenants, fishers and vulnerable workers. Digitised claims still need fair appeals and safeguards against exclusion.

• For APPSC, connect crop rehabilitation, seed/input support, market access, drainage and aquaculture without claiming a universal compensation rate or completed payout. A sector estimate is not automatically the farmer’s individual entitlement or an audited statewide account.

READ ACROSS MONTHS · NOTE IDS E17-2610-065, E17-2610-028, MY25-024, E11-2604-047, E14-2607-059, E17-2610-063, E5-2506-018, E5-2508-029 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The differing horticulture counts cannot be silently averaged, added or described as a verified revision without evidence.

MAINS PROMPT How can disaster-loss assessment support timely and equitable livelihood recovery?

Sources: [E18-APLETTER], [E18-APLOSS]

Evidence access: Actual reading depth is recorded in data/source-access.json and research/edition18/Research-Log.md. Static links, analysis, cautions and Mains prompts are original study guidance.

13 · SHG enterprise, markets and outcome measurement

Vijayawada SARAS: turnover, household income and lasting market access differ

E19-012 · P1 · 2026-11-04 (reporting date) · AP-linked

WHY IN THE NEWS A detailed ministry account and a separately read local newspaper report provide an AP-linked case on rural women's market access. Their metrics support analysis, but do not establish audited household-income gains.

• The ministry describes the event at Punnami Ghat, Vijayawada as the first National SARAS Mela outside Delhi-NCR, involving roughly 1,500 women entrepreneurs and SHG members from more than 30 states/UTs, through about 600 stalls.

• PIB reports over ₹12.8 crore in sales, over 12 lakh footfalls and over ₹1.9 crore food-court sales. The food-court figure is part of the event narrative, not an additional amount to add automatically to the cumulative total.

• The 3 November TOI article reports ₹12.84 crore and 5.73 lakh products, and says the event concluded on 2 November. It also describes an 11-day exhibition; PIB cites inauguration on 15 October and October weather closures. The timing/duration discrepancy is unresolved.

• PIB says handloom/handicrafts accounted for 75% of sales and describes buyer-seller meetings, product readiness, packaging, Udyam registration and e-commerce onboarding support.

• The ministry defines Lakhpati Didis by sustainable annual household income of at least ₹1 lakh. The cited ₹50 lakh–₹1 crore enterprise figures are turnover, not automatically personal income or profit.

• Administrative counts of training attendances, seller onboarding and registrations may refer to overlapping people or a wider helpdesk reach. They cannot be summed into a unique-beneficiary total without underlying records.

STATIC CONNECTION · ORIGINAL Turnover differs from profit; enterprise revenue differs from household income; footfalls differ from unique customers. A market-access intervention should be assessed beyond the exhibition's gross sales.

ANALYSIS · ORIGINAL GUIDANCE

• The stronger outcome is repeat orders and viable year-round demand after the fair. Track margins after travel, packaging and platform fees, payment reliability, rejection rates and control over income.

• Public support can address the whole enterprise chain: product quality, photography, compliance, credit and buyer linkage. Onboarding is an intermediate step, not evidence that a seller received or fulfilled an order.

• For APPSC, connect SERP/SHGs and local craft ecosystems to procurement and retail channels. Use attributed figures with dates, preserve the timing discrepancy and avoid promotional success stories as causal evaluation.

PRELIMS CAUTION Do not add food-court sales again to the headline total or treat footfalls as unique visitors. A ₹1 crore enterprise turnover does not establish ₹1 crore net household income.

MAINS PROMPT How should rural women's marketing initiatives be evaluated beyond fair attendance and gross turnover?

Sources: [E19-SARAS], [E19-TOI]

Evidence access: See the individual E19 source-access records and research/edition19/Research-Log.md. Primary release summaries are not substituted for unread legal instruments or audited implementation.

1–7 November 2026 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

NOV26-01. How should the 5 November tax release be classified?

A. Proof all states had already spent the amount

B. An early release of the regular November instalment

C. A new horizontal-sharing formula

D. A new discretionary grant outside regular devolution

NOV26-02. Which AP/Telangana devolution pairing is correct?

A. AP ₹2,370 crore; Telangana ₹4,597 crore

B. AP ₹1,09,019 crore; Telangana nil

C. AP ₹4,597 crore; Telangana ₹2,370 crore

D. Both states receive identical ₹4,597 crore

NOV26-03. Which distinguishes the proposed 8th Economic Census correctly?

A. It is the eighth Census of all people in independent India

B. It concerns non-farm establishments, not a population headcount

C. It has already published every district’s revised GDP

D. It automatically replaces every sample survey

NOV26-04. What is VISTAR’s approved outlay and scheme type?

A. ₹4,371.10 crore; central-sector scheme

B. ₹3,788.04 crore; exclusively state-funded scheme

C. ₹14,500 crore; universal individual cash transfer

D. ₹2,814 crore; already completed Economic Census

NOV26-05. Which pairing correctly distinguishes existing and proposed FTSC capacity?

A. 779 exclusive POCSO courts in each district

B. 850 existing; expansion to 779

C. 850 new courts in every state

D. 779 functional courts; provision to expand to 850

NOV26-06. How is the FTSC continuation financed?

A. Only by private insurance companies

B. Entirely by a new levy on all schools

C. Exclusively by every victim’s court fee

D. Central and state/UT shares, with the central share from Nirbhaya Fund

NOV26-07. What is the planned processing-plant mix under critical-mineral capex support?

A. Two cobalt-only mines and two graphite refineries

B. Four lithium mines and no processing plants

C. Two lithium and two nickel plants

D. Four operating plants already delivering cells

NOV26-08. Which preserves the capex-support limits?

A. 100% of every cost without milestones

B. ₹500 crore for nickel and ₹900 crore for lithium

C. 30% of eligible investment, capped at ₹500 crore for lithium and ₹900 crore for nickel per beneficiary

D. A uniform guaranteed ₹2,814 crore for each applicant

NOV26-09. Which storage mix totals the approved 92 GWh target?

A. 30 GWh pumped storage + 60 GWh BESS + 20 GWh others

B. 60 GWh pumped storage + 30 GWh BESS + 2 GWh others

C. 60 GW batteries + 30 GW solar + 2 GW coal

D. 92 GWh already commissioned on approval day

NOV26-10. Which domestic-content condition is explicitly described for BESS?

A. No domestic-content requirement for any project

B. A requirement that 40% of every state’s electricity be stored

C. A minimum 40% domestic-content requirement

D. A universal 100% local-content certificate already issued

NOV26-11. What is the sound legal interpretation of the PAC conference resolution?

A. A collective oversight commitment, not automatic amendment of every legislature’s rules

B. A transfer of the CAG’s constitutional role to private auditors

C. Proof every state PAC now meets three times monthly

D. An automatic final conviction for every audit observation

NOV26-12. How does the Network Anubhav release describe P80 for mobile speed?

A. 80% of every subscriber’s bill is refunded

B. 80% of tests were at or above the stated speed

C. Exactly 80% of every user’s data is private

D. It guarantees a minimum speed to every household

NOV26-13. Which preserves the human-assistance distinction in telecom grievance support?

A. Human staffing exactly 24 hours under every circumstance

B. All appeals decided exclusively by unsupervised AI

C. Only 16 hours of any support, with no other channel

D. Round-the-clock support, with human help at least 16 hours daily

NOV26-14. Which pair of appeal periods is described in the release?

A. Only a quarterly window to file any appeal

B. Filing within 15 days after disposal; decision within 15 days of receipt

C. Filing and decision both fixed at one hour

D. Filing within 30 years; decision without a deadline

NOV26-15. What remains necessary during international Digi Yatra trials?

A. Universal use at every AP airport

B. An automatic right to enter any foreign country

C. Only a selfie, with no passport or visa requirements

D. Travel documents and mandatory airline/immigration formalities

NOV26-16. Which is correct about VAJRA-SAT and FMD SAT-1?

A. It certified every animal in India disease-free

B. It was preparedness; the release says SAT-1 had not been reported in India

C. It declared a confirmed SAT-1 outbreak in every state

D. It concerned human hand-foot-and-mouth disease only

NOV26-17. What does SUVIKALP’s TOPSIS output establish?

A. An automatic environmental clearance

B. Proof every abandoned mine has been restored

C. A new title deed for every affected resident

D. A ranking based on the chosen criteria and inputs

NOV26-18. Which condition survives in the Agniveer pathway announcement?

A. Willingness and meeting selection criteria for later regular enrolment

B. No additional engagement period for the remaining group

C. Abolition of the initial merit-based 25% pathway

D. Unconditional immediate regular appointment for everyone

NOV26-19. Which shipbuilder allocation matches the corvette contracts?

A. Five submarines and three carriers

B. GRSE three; GSL five

C. GRSE five; GSL three

D. Eight ships all already delivered by Visakhapatnam yard

NOV26-20. What does the Pralay release establish?

A. A successful user-evaluation test, with induction described as imminent

B. A cruise-missile test at an AP launch site

C. An independent audit of performance under every condition

D. Completed combat deployment in every command

NOV26-21. What follows from I-OECM recognition?

A. It does not itself change ownership or create a protected area

B. Every recognised site automatically becomes a national park

C. Every parcel in a demonstration landscape has already been recognised

D. Every private title is automatically extinguished

NOV26-22. What is the temporal caution for anti-cancer prices?

A. All future price effects were already audited by 7 November

B. The update cancels every clinical prescription

C. The 7 November update states revised prices take effect on 9 November

D. The highest reported brand reduction applies equally to every drug

NOV26-23. Which correctly distinguishes the 6 November electronics announcements?

A. Semicon portal pillars 2/3/4 and 12 additional ECMS approvals are separate measures

B. All 12 ECMS applicants are already operating semiconductor fabs

C. Projected investment equals audited government spending

D. Every listed new ECMS state is Andhra Pradesh

NOV26-24. Which is a valid caution about EKA-1 and Dhīr?

A. Parameter/language claims and offline capability do not prove safety or factual accuracy

B. A ministry release is an independent audit of all licences and benchmarks

C. Every model supports exactly the same languages and architecture

D. On-device deployment makes hallucination impossible

NOV26-25. Which avoids overclaiming BIMSTEC participation?

A. The exercise creates an automatic collective-defence treaty

B. Landlocked countries cannot belong to BIMSTEC

C. BIMSTEC contains only three countries

D. Seven members do not imply seven navies each sent a ship

NOV26-26. What did Tiger Triumph’s inspected conclusion release describe?

A. Proof foreign forces conducted the state’s Murasu rescue

B. An independently confirmed joint combat operation in AP

C. A new exercise with no pre-2026 history

D. India–US tri-service HADR staff/tabletop work, ending at Visakhapatnam on 5 November

NOV26-27. What does the ₹218 crore RINL figure represent in the inspected release?

A. A verified third-round auction already completed

B. Successful Phase-II bids for 114 land parcels

C. Independently audited final cash receipts for the entire steel plant

D. A state pension allocation for 114 households

NOV26-28. Why should ₹4,600 crore not be silently assigned to Murasu?

A. The cited approaching-storm report’s paragraph concerned preceding Arnab damage

B. It was proved to be Murasu’s final audited loss

C. It is a universally fixed compensation for each cyclone

D. Every newspaper’s newest number replaces all earlier records automatically

NOV26-29. Which arithmetic matches the reported ₹37 crore emergency allocation?

A. ₹37 crore of verified central assistance for every district

B. 6×₹3 crore + 8×₹2 crore + 3×₹1 crore

C. 17×₹37 crore

D. 6×₹2 crore + 8×₹3 crore + 3×₹3 crore

NOV26-30. What is the sound handling of differing horticulture-loss estimates?

A. Add both reports to double the affected area

B. Average them into an invented official revision

C. Keep source/date snapshots distinct pending verification

D. Treat affected hectares as identical to compensation already paid

Explained answer key

NOV26-01. B The primary release advances the normally 10 November instalment of ₹1,09,019 crore to 5 November. Timing changes, not a verified additional entitlement. [CA-043]

NOV26-02. C The inspected state table distinguishes the two states. A union release is separate from subsequent departmental allotment and actual expenditure. [CA-043]

NOV26-03. B VISTAR's Economic Census component supports establishment-level information and a statistical business register. Planned surveys and data architecture are not completed results. [E18-2611-001]

NOV26-04. A The 4 November release gives the precise outlay for 2026–31. State statistical strengthening is one component, but this does not turn the programme into the distinct FTSC centrally sponsored scheme. [E18-2611-001]

NOV26-05. D The release's existing functional total includes 399 exclusive POCSO courts. The 850 target is total proposed scheme capacity, not additional courts or proof of filled posts. [E18-2611-002]

NOV26-06. D The ₹3,788.04 crore total comprises central ₹2,353.15 crore and state/UT ₹1,434.89 crore. Funding, functional staffing and quality outcomes require separate evaluation. [E18-2611-002]

NOV26-07. C The scheme targets processing rather than merely mine allocation. Cobalt may arise as a nickel by-product; eligible plant support is not a claim of completed commissioning. [E18-2611-003]

NOV26-08. C Technical qualification and least-support financial bidding precede selection, and disbursement is milestone-linked. Caps are not automatic entitlements or total private investment. [E18-2611-003]

NOV26-09. B GWh measures stored energy, not power. The release explicitly describes yet-to-be-commissioned capacity and distinguishes ₹14,500 crore support from estimated ₹97,600 crore investment. [E18-2611-004]

NOV26-10. C The requirement attaches to BESS projects under the described scheme; it is not proof of compliance, an entire grid's energy share or universal project commissioning. [E18-2611-004]

NOV26-11. A The resolution seeks action-taken timelines, digital monitoring, capacity building and consideration of meeting frequency. Audit, committee scrutiny, executive response and legal responsibility differ. [E18-2611-005]

NOV26-12. B The source uses an exceedance convention and warns that user-generated tests are not comprehensive standard-method quality assessment. Do not silently substitute a different percentile convention or population denominator. [E18-2611-006]

NOV26-13. D The release permits supervised technology-based solutions, accessible channels and oversight. The filing and decision timelines are separate from staffing requirements; the full regulation's operative details still require checking. [E18-2611-007]

NOV26-14. B The described filing window changes from 30 to 15 days; the internal appellate authority's decision period is separately measured from receipt. This note does not independently certify every exception/commencement clause. [E18-2611-007]

NOV26-15. D Trials cover eligible Indian e-passport holders on selected flights at seven named airports. A device credential complements, not replaces, lawful travel procedures. [E18-2611-008]

NOV26-16. B The 4–5 November tabletop exercise rehearses detection, laboratory confirmation and coordinated response. Simulation, serotype status and actual outbreak evidence must not be conflated. [E18-2611-009]

NOV26-17. D Decision support requires transparent weights, site evidence and community participation. Feasibility, permission, finance, implementation and remediation outcomes remain separate stages. [E18-2611-010]

NOV26-18. A The 4 November release retains the initial merit-based regular intake and provides a willing remaining group another two years, followed by a conditional regular-enrolment pathway. Service orders remain necessary for individual terms. [E18-2611-011]

NOV26-19. C The ₹53,866.50 crore contracts were signed on 2 November. This is beyond AoN but not construction completion, delivery or commissioning; forecast person-days are not permanent job counts. [E18-2611-012]

NOV26-20. A The test took place off Odisha on 5 November, with RCI Hyderabad and BDL roles described. The note does not invent ranges/warheads or convert imminent induction into completed deployment. [E18-2611-013]

NOV26-21. A The guidelines' release distinguishes sustained biodiversity outcomes, existing governance, application review and monitoring. Srisailam–Cumbum's landscape inclusion is not blanket parcel-level designation. [E18-2611-014]

NOV26-22. C The underlying October NPPA order is discussed through a 7 November release, with 9 November effect. Projected savings and reported formulation MRPs are not universal realised treatment-cost reductions. [E18-2611-015]

NOV26-23. A The new ECMS batch has projected ₹7,503 crore investment and seven listed states excluding AP. Portal access, approval, commissioning and output remain distinct. [E18-2611-016]

NOV26-24. A The release describes different developers, sizes and language coverage. Model cards, weights, licence and actual Telugu/task performance require independent evaluation. [E18-2611-017]

NOV26-25. D The 6 November release lists ships and delegations separately for the 30 October–3 November event. Regional cooperation, participation and treaty obligations differ. [E18-2611-018]

NOV26-26. D The fifth edition ran 31 October–5 November; the release was dated 6 November. Planning/simulation and an actual disaster deployment are not the same activity. [E18-2611-019]

NOV26-27. B Land monetisation differs from enterprise disinvestment. The combined two-phase bid value is ₹584.33 crore for 264 parcels; payment and transfer were not independently inspected. [E18-2611-020]

NOV26-28. A Consecutive events and evolving assessments need named event, date and attribution. Murasu's early approximately ₹1,919 crore snapshots also differ slightly and remain preliminary. [E18-2611-021]

NOV26-29. B The district groups total 17, and ₹18+₹16+₹3=₹37 crore. State release, district expenditure and a subsequent central-assistance request are different stages. [E18-2611-022]

NOV26-30. C IANS's letter account and TNIE/PTI's review snapshot give different horticulture figures. Original surveys and final accounts remain unread; area, farmer counts, loss value and entitlements differ. [E18-2611-024]

Mains answer laboratory

Eight 150/250-word planning frameworks, not previous-year questions. This is a first-week selection, not full November coverage.

1. Official statistical modernisation must combine timeliness with credibility and privacy.

Study anchor: E18-2611-001 · VISTAR: a stronger statistical system needs trustworthy methods, not just more data

1. Anchor VISTAR’s ₹4,371.10 crore central-sector approval for 2026–31; distinguish a scheme from completed survey results or newly operative indices.

2. Explain the three components, planned 59 surveys, SSS 2.0 and 8th Economic Census of non-farm establishments; do not confuse it with the population Census.

3. Analyse representativeness, definitions, confidentiality, revisions, administrative/alternative data and transparent methodologies. AI can assist validation but also reproduce systematic errors.

4. For AP, connect trained district statistical teams, independent quality checks and interoperable records with usable local estimates and safeguarded respondent information.

5. Conclude with publication calendars, methodological disclosure, accessible datasets and measurable quality/timeliness, not only dashboards or survey counts.

2. Critical-mineral security requires processing capability as well as access to resources.

Study anchor: E18-2611-003 · Critical-mineral processing: support refining capability, not merely mine allocation

1. Anchor the ₹2,814 crore processing scheme, two lithium and two nickel plants, 30% eligible-capex support and mineral-specific ceilings.

2. Distinguish extraction, refining, precursors, cells, equipment and recycling; importing feedstock can coexist with domestic refining and residual dependencies.

3. Analyse technology, raw-material access, energy, water, waste, skills, offtake and supply concentration; least-support bidding must not displace credible delivery.

4. Propose milestone verification, transparent selection, lifecycle environmental oversight, diversified feedstock and research/industry partnerships.

5. For AP, identify transferable industrial-policy lessons without inventing a local selected beneficiary or treating future plants as commissioned capacity.

3. Storage support should procure useful flexibility rather than merely subsidise capacity headlines.

Study anchor: E18-2611-004 · Storage VGF: 92 GWh is supported future energy capacity, not power already available

1. Anchor ₹14,500 crore VGF and the prospective 92 GWh mix: 60 PSP, 30 BESS and 2 alternatives; distinguish ₹97,600 crore estimated investment.

2. Explain energy versus power, duration, efficiency, degradation, safety, water needs and actual services such as balancing/peak supply.

3. Analyse competitive tariff design, 40% BESS domestic-content verification, project risk, disposal/recycling and transparent public liabilities.

4. For AP DISCOMs, use demand/renewable profiles, available networks and credible availability obligations to choose projects and technology.

5. Conclude with useful delivered flexibility, lifecycle costs and safe operation; no inference that approved GWh are already commissioned or eliminate every supply constraint.

4. Special courts need both faster processes and a child-sensitive, fair justice system.

Study anchor: E18-2611-002 · Fast Track Special Courts: expand capacity without sacrificing fair process

1. Anchor the FTSC continuation through March 2031, ₹3,788.04 crore and expansion from 779 functional courts towards 850; distinguish exclusive POCSO courts.

2. Map investigation, forensics, prosecution, legal aid, judicial vacancies, witness support and vulnerable-witness spaces as a complete service chain.

3. Analyse why disposal speed alone can conceal poor investigation, distress, unfair procedure, unreliable evidence or repeated adjournments elsewhere.

4. Propose dedicated competent personnel, accessible legal/psychosocial support, reasoned decisions, coordinated scheduling and independent qualitative assessment.

5. For AP, allocate capacity by pendency and need rather than assuming a fixed uniform court entitlement for every district; preserve fair-trial and child-protection principles.

5. Digital complaint handling should increase accessibility without substituting automation for remedies.

Study anchor: E18-2611-007 · Telecom grievance reform: 24-hour support is not 24 hours of human staffing

1. Anchor the 2 November telecom release; distinguish announced final amendments from separately uninspected commencement/exemption clauses.

2. Explain round-the-clock support with at least 16 hours of human help, multiple accessible channels and distinct 15-day filing/decision periods.

3. Analyse language, disability access, digital exclusion, AI errors, wrongful closures and the burden of shorter appeal windows.

4. Use feedback, quarterly oversight, consumer participation and audits to identify recurring defects; preserve human escalation and reasoned responses.

5. For AP, evaluate actual resolution, timeliness and vulnerable consumers’ experience rather than equating app downloads, closed tickets or raw satisfaction scores with success.

6. Conservation beyond protected areas must combine ecological outcomes and legitimate local governance.

Study anchor: E18-2611-014 · I-OECMs: conserve beyond protected areas without changing ownership

1. Anchor the 3 November I-OECM guideline event, reported on 4 November, and distinguish recognition from a protected-area notification or transfer of ownership.

2. Explain boundaries, non-overlap, institutions, review, sustained in-situ outcomes and monitoring; full primary guideline/project texts were not independently inspected.

3. Analyse local rights, existing uses, financing, consent, biodiversity significance and the danger of nominal or double-counted conservation.

4. For AP, connect the named Srisailam–Cumbum demonstration landscape, local biodiversity institutions, tanks and ecosystems without blanket parcel-level recognition claims.

5. Conclude with transparent decisions, accessible grievance routes and credible indicators, not only recognised-area totals or conservation labels.

7. Public-land monetisation should demonstrate public value beyond auction premiums.

Study anchor: E18-2611-020 · RINL land auction: successful bids are not independently verified settled receipts

1. Anchor RINL Phase II on 3 November: 114 parcels and ₹218 crore successful bids; preserve the distinction between bids, settlement and realised receipts.

2. Distinguish surplus-land monetisation from sale of the operating steel enterprise; note Phase I’s October date rather than counting it twice in November.

3. Analyse title, public uses, infrastructure, planning conditions, bidder access, market competition, benchmark valuation and distribution of benefits/costs.

4. Propose transparent surveys/terms, appropriate safeguards, audited settlement and disclosure of how proceeds support lawful public/enterprise purposes.

5. For Visakhapatnam, assess long-term urban and industrial implications; a premium over reserve is evidence of one comparison, not a conclusive welfare assessment.

8. Consecutive cyclones require integrated relief, lifeline restoration and trustworthy loss assessment.

Study anchor: E18-2611-021 · Murasu: distinguish confirmed coastal crossing from preliminary loss snapshots

1. Anchor Murasu’s 3 November reported crossing near Ongole after Arnab; separate forecasts, observed reports, preliminary loss snapshots and final assessments.

2. Map evacuation, shelters, health, food, drinking water, safe electricity, communications, roads and public warning as linked functions.

3. Distinguish ₹37 crore state emergency allocation, regular devolution, private insurance and requested central assistance; none automatically establishes final household receipt.

4. Compare source-specific crop/horticulture estimates and timestamped feeder/tower repair data; do not merge conflicting figures or treat an asset percentage as universal service recovery.

5. For AP, combine accessible verification/appeals and livelihood rehabilitation with resilient siting, drainage, ecosystems and transparent reconstruction expenditure.

Source register

Evidence access is recorded explicitly. Most non-PRS references were inspected as source extracts; primary full-text review remains open for them.

[NOV] PIB · Tax devolution, 5 November 2026

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333166&reg=3&lang=1

Complete unique primary release and state table read in opening chunk 0/3 on 7 November. No separate treasury settlement or final expenditure records inspected.

[E18-VISTAR] PIB · VISTAR statistical transformation

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332480&reg=3&lang=1

Complete unique release body read in opening chunk 0/4. ₹4,371.10 crore, central sector, 2026–31; 59 proposed surveys and 8th Economic Census. Full scheme guidelines and completed implementation not read.

[E18-FTSC] PIB · Fast Track Special Courts continuation

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332483&reg=3&lang=1

Complete unique release body and status table read in chunk 0/4. ₹3,788.04 crore; central/state ₹2,353.15/₹1,434.89 crore; target 850 versus 779 existing. Cabinet approval is not staffing/commissioning evidence.

[E18-MIN] PIB · Critical-mineral processing support

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332476&reg=3&lang=1

Complete unique body read in chunk 0/3. Two lithium and two nickel plants; 30% eligible capex, ceilings ₹500/₹900 crore; ₹2,814 crore five-year scheme. Selection and actual disbursement not independently verified.

[E18-ESS] PIB · Grid-scale storage VGF

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332474&reg=3&lang=1

Complete unique body read in chunk 0/3. ₹14,500 crore support for 92 GWh yet-to-be-commissioned storage: 60 PSP, 30 BESS, 2 other; ₹97,600 crore estimated investment; BESS DCR 40%. Guidelines/awards not inspected.

[E18-PAC] PIB · PAC conference resolution

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332530&reg=3&lang=1

Complete unique resolution read in chunk 0/3. Adopted 4 November; digital oversight, action-taken timelines, capacity and proposal to consider three sittings monthly. Resolution is not a uniform enacted legislative rule.

[E18-NET] PIB · Network Anubhav dashboard

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332534&reg=3&lang=1

Complete unique body read in chunk 0/3. 4 November launch; user tests and independent drive tests distinguished. P80/P90 described as exceedance values by the release, not assumed conventional lower-tail percentiles. Live platform not independently tested.

[E18-RED] PIB · Telecom complaint-redressal amendment

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2331704&reg=3&lang=1

Opening chunk 0/4 read through all listed salient features and summary. Release says final regulations issued 2 November; full regulation, commencement and every exemption not separately read. 24-hour support differs from at least 16 hours human help; filing/decision deadlines differ.

[E18-DIGI] PIB · International Digi Yatra trials

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2331200&reg=3&lang=1

Complete unique body read in chunk 0/3. 1 November release; November–December trials at seven airports for eligible Indian e-passport holders on selected Air India/IndiGo flights. Immigration/documents remain necessary.

[E18-FMD] PIB · VAJRA-SAT animal-health preparedness

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333487&reg=3&lang=1

Complete unique body read in chunk 0/3. Exercise held 4–5 November; release 6 November. Explicitly says FMD SAT-1 has not been reported in India. This is preparedness, not an announced Indian SAT-1 outbreak.

[E18-SUV] PIB · SUVIKALP mine repurposing

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2331966&reg=3&lang=1

Complete unique prose read in chunk 0/4. CCO platform, TOPSIS ranking, RECLAIM participation and PRISM implementation guidance. Actual site feasibility, adoption and completed remediation not inspected.

[E18-AGN] PIB · Agniveer second-engagement pathway

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332524&reg=3&lang=1

Complete unique body read in chunk 0/3. 4 November approval; 25% merit-based regular employment, remaining 75% offered two-year engagement if willing; later regular enrolment subject to willingness and selection. Detailed service orders not read.

[E18-COR] PIB · Eight corvette contracts

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2331418&reg=3&lang=1

Complete unique body read in chunk 0/3. 2 November signed contracts ₹53,866.50 crore: GRSE five/GSL three. Expected person-days are not permanent jobs; contract is not delivery/commissioning.

[E18-PRAL] PIB · Pralay user-evaluation test

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333276&reg=3&lang=1

Complete unique body read in chunk 0/3. 5 November test off Odisha; Research Centre Imarat/BDL roles. Release says induction imminent, not completed induction. No unsupported range/warhead details adopted.

[E18-OECM] PIB · India OECM designation guidelines

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332733&reg=3&lang=1

Complete unique body read in chunk 0/4. Event 3 November, release 4 November. Recognition does not alter ownership/protected-area status. Srisailam–Cumbum AP/Telangana demonstration landscape named. Full guidelines/project documents not read.

[E18-CANCER] PIB · Revised anti-cancer medicine prices

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333949&reg=3&lang=1

Complete unique prose and table read in chunk 0/4. 7 November release: revised prices effective 9 November; 137 drugs versus 1,225 formulations/121 drugs reported; 30% permissible trade margin. Original October NPPA order not independently read; savings are projected.

[E18-SEMI] PIB · Semicon portal and ECMS approvals

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333716&reg=3&lang=1

Opening chunk 0/4 read through new approvals and beginning of cumulative tail, not complete later body. 6 November: portal pillars 2/3/4; 12 additional ECMS applications, ₹7,503 crore projected investment, seven listed states exclude AP. Approval is not production/jobs achieved.

[E18-AI] PIB · IndiaAI EKA-1 and Dhir models

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332315&reg=3&lang=1

Complete unique prose read in chunk 0/4. 3 November release; model cards, linked presentations, weights/licences and benchmark evaluations not independently inspected. Architecture/language claims attributed to ministry release, not our independent testing.

[E18-BIM] PIB · BIMSTEC maritime exercise conclusion

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333721&reg=3&lang=1

Complete unique body read in chunk 0/3. Event 30 October–3 November; release 6 November. Distinguish member-state delegations from listed participating ships; not seven countries necessarily each sending a ship.

[E18-TIGER] PIB · Tiger Triumph conclusion at Visakhapatnam

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333530&reg=3&lang=1

Complete unique body read in chunk 0/3. Fifth edition, 31 October–5 November; conclusion 5 November, release 6 November; STAFFEX/TTX HADR focus. Not proof of an actual combined cyclone rescue deployment.

[E18-RINL] PIB · RINL second land auction

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332381&reg=3&lang=1

Complete unique body and table read in chunk 0/4. Event 3 November, release 4 November. Phase II ₹218 crore successful bids/114 parcels; combined 264/₹584.33 crore. Narrative reserve ₹184.8 crore, table ₹184.81 crore; bid value not independently verified cash settlement.

[E18-APLOSS] TNIE/PTI · Murasu preliminary loss and restoration

https://www.newindianexpress.com/states/andhra-pradesh/2026/Nov/06/andhra-cm-pegs-murasu-cyclone-loss-at-nearly-rs-2000-crore

Complete unique report body in chunk 0/2 read. 6 November reporting of 5 November review. Preliminary loss/sector estimates and restoration snapshot, not final audited damage. Horticulture figures differ from later IANS account; do not merge. Final IMD report and original state release not read.

[E18-APREL] IANS/SocialNews · ₹37 crore immediate relief

https://www.socialnews.xyz/2026/11/02/andhra-releases-rs-37-crore-for-rescue-relief-as-cyclone-murasu-closes-in/

Complete one-chunk report read. 2 November release to 17 districts: six×₹3 crore + eight×₹2 crore + three×₹1 crore = ₹37 crore. Original treasury orders not inspected. Forecasts differ from later landfall observations; ₹4,600 crore paragraph concerns preceding Arnab damage, not settled Murasu loss.

[E18-APLETTER] IANS/SocialNews · Murasu interim-assistance request

https://www.socialnews.xyz/2026/11/06/cyclone-murasu-andhra-pradesh-cm-seeks-immediate-assistance-from-centre/

Complete one-chunk report read. 6 November letter, preliminary ₹1,919.59 crore; agriculture 1,43,122 hectares/1,86,063 farmers, horticulture 6,504.38 hectares/12,178 farmers. Different TNIE/PTI snapshot not combined. Original letter/GO, final losses and actual central sanction not read.

[E19-ASI] MoSPI · ASI 2024–25 publications and methodology

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332475&reg=3&lang=1

Chunks 0,1,2 of 5 inspected: complete unique release prose, tables 1–2 and methodological endnote through release ID; later material repeats the release. Underlying unit-level data and complete Volume I were not downloaded or independently analysed.

[E19-HORIZON] Science Ministry · India–EU Horizon Europe negotiations

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333903&reg=3&lang=1

Complete unique release body in chunk 0/3 read. Signature, ratification, entry into force and a concluded association instrument were not inspected; participation is not treated as already operational.

[E19-NSQ] Health Ministry · draft NSQ manufacturing-licence suspension amendments

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332796&reg=3&lang=1

Complete unique release body in chunk 0/4 read, including proposed parameters, root-cause analysis, CAPA and consultation timing. Linked session-bound e-Gazette request returned a runtime-error page; original draft notification and legal commencement were NOT verified.

[E19-BATCH] Health Ministry · proposed authorised drug-batch release personnel

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332192&reg=3&lang=1

Complete unique release body in chunk 0/3 read. Original draft Gazette and precise qualification schedule were not inspected; no final enactment or universal effective date claimed.

[E19-HEALTH] NHA · PM-JAY/ABDM national review, 5–6 November

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333617&reg=3&lang=1

Chunks 0 and 1/5 read through the end of the unique release: claims, NAFU, BODH, NHCX, data-quality, cybersecurity and doctor-reviewed voice-scribe demonstration. Products/models and state outcome data were not independently tested.

[E19-WATER] DoLR/NRAA/ICAR · draft watershed technical guidelines consultation

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332894&reg=3&lang=1

Chunks 0 and 1/4 read through the end of the unique release. Draft guidelines, World Bank legal agreement and final WDC-PMKSY 3.0 sanction were not independently inspected.

[E19-GRIEV] Rural Development · reported VB–G RAM G grievance rules

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2331390&reg=3&lang=1

Complete unique release body in chunk 0/4 read through notification summary and release ID. Original Rules, Schedule I appeal provisions and legal commencement not independently read. Timelines attributed to the ministry’s account.

[E19-MLFF] NHAI · four-lane-and-above free-flow toll-plaza design guidelines

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333654&reg=3&lang=1

Complete unique release body in chunk 0/3 read. Full policy circular, technical drawings, national rollout dates, enforcement standards and project contracts were not independently read.

[E19-SARAS] Rural Development · Vijayawada National SARAS Mela outcomes

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332675&reg=3&lang=1

Chunks 0 and 1/5 read through the end of the unique release. Sales/footfall/enterprise metrics are administrative claims, not independently audited outcomes. Compared with the separately read 3 November TOI report; event-duration/date descriptions are not silently reconciled.

[E19-FREIGHT] NITI Aayog · NDC-TIA II road-freight agreement

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2332576&reg=3&lang=1

Complete unique release body in chunk 0/3 read. Agreement signed 3 November, released 4 November. Signed instrument, budget, truck purchase commitments and quantified emissions reductions not independently inspected.

[E19-TRIFED] MSME–TRIFED · PM Vishwakarma tribal-artisan market access

https://www.pib.gov.in/PressReleaseDetail.aspx?PRID=2333311&reg=3&lang=1

Complete unique release body in chunk 0/3 read, including eligibility, consent and onboarding conditions. Signed MoU, seller contracts and achieved commercial orders not independently inspected.

[E19-EU] European Commission · India research-cooperation background

https://research-and-innovation.ec.europa.eu/strategy/strategy-research-and-innovation/europe-world/international-cooperation/bilateral-cooperation-science-and-technology-agreements-non-eu-countries/india_en

Opening chunk 0/3 read through bilateral science framework, 6 February exploratory talks, 15 July TTC and 17 July formal-negotiation distinction. Background page is not represented as the independently inspected 6 November conclusion announcement or signed agreement.

[E19-TNIE] The New Indian Express · Horizon Europe signature and funding conditions

https://www.newindianexpress.com/india/2026/Nov/06/ahead-of-pm-modis-visit-india-eu-conclude-negotiations-on-flagship-research-innovation-programme

Opening chunk 0/2 read through association conditions, expected January 2027, financial contribution and TTC background. End of wider digital-cooperation paragraph not read. Expected future timing is attributed reporting, not an independently verified entry-into-force instrument.

[E19-TOI] Times of India · Vijayawada SARAS Mela sales report, 3 November

https://timesofindia.indiatimes.com/city/vijayawada/saras-mela-clocks-rs-12-8-crore-sales-5-73-lakh-products-sold/articleshow/135472010.cms

Opening chunk 0/10 includes the complete unique local article through cultural-programme paragraph. ₹12.84 crore/5.73 lakh products/2 November conclusion are attributed reporting; dates and 11-day wording differ from the PIB inauguration chronology. Neither account independently audited.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
