CIVILS ATLAS / RESEARCH EDITION 19

October 2025

Understand the news.
Retain what matters.

33 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Hosted push run observed; first scheduled execution remains unverified. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

Subject guide

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Pay commission

Eighth Pay Commission: terms, not a pay award

E6-2510-003 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The Cabinet approved Terms of Reference.

• The commission examines central-government pay/pension matters.

• Recommendations and government acceptance are separate stages.

• Terms of Reference are not notified revised salaries.

STATIC CONNECTION · ORIGINAL A commission recommends; expenditure requires accepted decisions and implementation instruments.

ANALYSIS · ORIGINAL GUIDANCE

• Assess fiscal space and service quality as well as consumption effects.

• No fitment factor should be invented from speculative headlines.

PRELIMS CAUTION Approval is not proof salaries already rose or that a guessed factor is official.

MAINS PROMPT How can public-pay reform balance fairness and fiscal sustainability?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Prisons and undertrials

Prison Statistics 2023: publication year is not data year

E6-2510-019 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS The magazine examined the NCRB report. Magazine coverage is an editorial index, not necessarily the event date.

• The reference period is 2023.

• Undertrials and convicted prisoners are different legal categories.

• Occupancy reflects capacity and inmate counts at a dated point.

STATIC CONNECTION · ORIGINAL Custody is not a finding of guilt; overcrowding also affects health and legal access.

ANALYSIS · ORIGINAL GUIDANCE

• Bail, legal aid, case management and humane facilities need coordinated reform.

• A model prison law does not automatically replace every state statute.

PRELIMS CAUTION Do not label 2023 statistics as 2025 observations or undertrials as convicted offenders.

MAINS PROMPT How should prison reform protect liberty and public safety?

Sources: [E6-V10-01]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Economy

01 · Monetary policy

October MPC: hold with a neutral stance

E6-2510-001 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The policy review retained the repo rate.

• Repo remained 5.5%.

• The stance remained neutral.

• FY2025–26 growth was projected at 6.8%.

STATIC CONNECTION · ORIGINAL The policy rate, stance and forecast are distinct signals.

ANALYSIS · ORIGINAL GUIDANCE

• A neutral stance permits data-dependent choices, not a promise of the next move.

• Forecasts depend on assumptions and are not measured annual growth.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-002, E7-2511-001, E7-2512-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not confuse the projection with an NSO outturn or neutral with a permanent rate freeze.

MAINS PROMPT How should monetary policy weigh inflation and growth?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Inflation measurement

Q2 CPI: falling food prices, not general deflation

E6-2510-002 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS Quarterly inflation moderated.

• Average CPI inflation was 1.7%.

• Food inflation averaged −1.6%.

• These are quarterly aggregates, not identical monthly or household experiences.

STATIC CONNECTION · ORIGINAL Disinflation is slower positive inflation; deflation is a falling price index.

ANALYSIS · ORIGINAL GUIDANCE

• Food volatility can lower headline inflation without eliminating other pressures.

• Compare the same period and basket before drawing welfare conclusions.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E7-2511-001, E7-2512-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Negative food inflation does not establish negative overall CPI or lower prices for every household.

MAINS PROMPT What limits headline CPI as a measure of lived inflation?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

03 · Deposit protection

Risk-based deposit-insurance premium: draft approach

E6-2510-004 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS RBI consulted on differentiated premiums.

• The proposal links bank risk to premium treatment.

• Deposit insurance protects eligible deposits subject to law.

• Premium design and depositor coverage are different questions.

STATIC CONNECTION · ORIGINAL Deposit insurance is not protection against every investment loss or unlimited bank liabilities.

ANALYSIS · ORIGINAL GUIDANCE

• Risk pricing can reduce cross-subsidy but needs credible metrics and transition safeguards.

• Do not infer a changed coverage ceiling from a premium consultation.

PRELIMS CAUTION Draft premium reform does not automatically expand every depositor’s insured amount.

MAINS PROMPT How can deposit protection preserve confidence without weakening discipline?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

04 · Cross-border finance

Rupee lending to neighbours: permitted scope matters

E6-2510-005 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS RBI eased specified cross-border lending rules.

• The reviewed countries are Nepal, Bhutan and Sri Lanka.

• Authorised lender and transaction conditions still apply.

• Permission is not an automatic loan to every applicant.

STATIC CONNECTION · ORIGINAL Currency denomination, borrower eligibility and repayment risk are distinct.

ANALYSIS · ORIGINAL GUIDANCE

• Rupee finance can support regional links without guaranteeing currency-risk elimination.

• Keep notified permission separate from actual disbursement.

PRELIMS CAUTION Do not expand the measure to every country or describe loans as grants.

MAINS PROMPT How can regional rupee finance balance integration and prudence?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

05 · Capital-market consultation

Capital-market exposure and ECB reforms: proposals

E6-2510-006 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS RBI released draft changes.

• Capital-market exposure rules concern bank risk limits.

• External commercial borrowing has a separate regulatory framework.

• Consultation is not final implementation.

STATIC CONNECTION · ORIGINAL Bank exposure, foreign borrowing and equity flows are different channels.

ANALYSIS · ORIGINAL GUIDANCE

• Simplification needs safeguards against concentrated and currency-mismatched risk.

• Read final directions before applying proposed limits to transactions.

PRELIMS CAUTION A proposal is not an already effective permission; do not mix domestic bank limits and ECB conditions.

MAINS PROMPT What makes financial liberalisation prudentially credible?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

06 · Retirement and fund rules

NPS and mutual funds: distinguish consultations

E6-2510-007 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS Regulators considered changes to investment frameworks.

• NPS investment proposals concern retirement savings.

• Mutual-fund proposals concern a separate product framework.

• Final rules and individual product mandates still matter.

STATIC CONNECTION · ORIGINAL An investment ceiling is not a guaranteed return or a compulsory allocation.

ANALYSIS · ORIGINAL GUIDANCE

• Long horizons do not remove market, governance or liquidity risks.

• Historical review notes should not substitute for current scheme documents.

PRELIMS CAUTION Do not merge draft NPS and mutual-fund rules or promise returns from a wider investment universe.

MAINS PROMPT How should pension flexibility protect retirement security?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

07 · Electricity reform

Draft Electricity Amendment: distribution and public duties

E6-2510-008 · P1 · 2025-10 (month-level index) · AP-linked

WHY IN THE NEWS The ministry consulted on proposed statutory changes.

• Distribution reform features in the draft.

• Tariffs, cost recovery and subsidy arrangements require separate scrutiny.

• Draft legislation is not an enacted replacement.

STATIC CONNECTION · ORIGINAL A subsidy promise, budgeted transfer and utility receipt are different financial stages.

ANALYSIS · ORIGINAL GUIDANCE

• Efficiency and contestability need universal-service and consumer safeguards.

• AP analysis should examine farm support, utility finances and actual state implementation.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not claim draft provisions already changed every consumer tariff.

MAINS PROMPT How can distribution reform reconcile viability and universal access?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

08 · Mineral value chains

Mining rules: extraction permissions and safeguards

E6-2510-015 · P2 · 2025-10 (month-level index) · AP-linked

WHY IN THE NEWS The review records changes to mineral regulation.

- Mining authorisation and environmental clearance remain distinct.
- Lease conditions and monitoring affect compliance.
- Processing and recycling are different value-chain activities.

STATIC CONNECTION · ORIGINAL Mineral access alone does not establish viable downstream capacity.

ANALYSIS · ORIGINAL GUIDANCE

- Connect critical-mineral incentives with traceability and local safeguards.
- Check the precise amended provision before applying it to an AP lease.

READ ACROSS MONTHS · NOTE IDS CA-013, JAN25-037, E5-2506-010, E5-2507-041, E5-2508-015, E6-2509-018, E7-2511-009, E8-2601-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not infer that a mining-rule amendment waives every forest/environment/community obligation.

MAINS PROMPT How can mineral security preserve accountable resource governance?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

09 · Industrial incentives

Specialty-steel PLI: thresholds are not payouts

E6-2510-016 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The review discusses revised eligibility parameters.

- Specified investment thresholds include ₹150 crore and ₹50 crore.
- Thresholds depend on the relevant category.
- Eligibility does not itself establish an incentive disbursement.

STATIC CONNECTION · ORIGINAL Investment commitments, production milestones and verified incentives differ.

ANALYSIS · ORIGINAL GUIDANCE

- Evaluate additional capacity, technology and fiscal cost rather than applications alone.
- Use the operative scheme schedule for category-specific figures.

PRELIMS CAUTION Do not treat a qualifying investment threshold as money paid to every producer.

MAINS PROMPT How should production incentives demonstrate additionality?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

10 · Factory statistics

ASI 2023–24: nominal GVA and reference period

E6-2510-021 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS The issue reviewed the Annual Survey of Industries. Magazine coverage is an editorial index, not necessarily the event date.

• The reported current-price GVA growth is 11.89%.

• The survey reference year is 2023–24.

• Registered factory-sector statistics do not equal the entire economy.

STATIC CONNECTION · ORIGINAL Nominal growth includes price effects; real output needs appropriate deflation.

ANALYSIS · ORIGINAL GUIDANCE

• Use employment, productivity and industry composition alongside aggregate GVA.

• Publication in 2025 does not turn these into 2025–26 observations.

PRELIMS CAUTION Do not describe current-price GVA growth as real GDP growth for all sectors.

MAINS PROMPT How should factory data inform industrial policy?

Sources: [E6-V10-18]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

11 · Nobel growth theory

Economic sciences: innovation and creative destruction

E6-2510-033 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The prize recognised explanations of innovation-led growth.

• Joel Mokyr was recognised for technological prerequisites of sustained growth.

• Philippe Aghion and Peter Howitt were recognised for creative destruction.

• Creative destruction links new technologies to displacement of old activities.

STATIC CONNECTION · ORIGINAL Innovation, diffusion, institutions and transition costs differ from a simple increase in spending.

ANALYSIS · ORIGINAL GUIDANCE

• Use skills, competition and social protection to connect growth theory with policy.

• A theory does not prove every disruptive firm improves social welfare.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E7-2511-023, E7-2511-024 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not attribute all three laureates to one identical contribution or ignore displaced workers.

MAINS PROMPT How can innovation policy support growth while managing adjustment costs?

Sources: [E6-NOBEL]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Agriculture

01 · Pulses mission

Pulses self-reliance: production and procurement linkages

E6-2510-009 · P1 · 2025-10 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved the mission.

• The outlay is ₹11,440 crore.

• The period is FY2025–26 to FY2030–31.

• Seed, productivity and procurement linkages support domestic supply.

STATIC CONNECTION · ORIGINAL Self-reliance is an objective; output, imports and farmer income need separate evidence.

ANALYSIS · ORIGINAL GUIDANCE

• Assured demand helps only with operational procurement, quality acceptance and payment.

• AP crop choices also depend on water, local prices and agronomy.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-010, E6-2510-011, E7-2511-016, E7-2511-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION An approved mission does not prove imports ended or every farmer received a universal cash amount.

MAINS PROMPT What makes pulses diversification viable for farmers?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Price support

Rabi MSP: marketing year and actual purchase differ

E6-2510-010 · P1 · 2025-10 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet announced MSPs for the coming marketing season.

• Wheat MSP is ₹2,585 per quintal.

• Gram is ₹5,875 and masur ₹7,000 per quintal.

• These are administered support prices, not guaranteed realised market prices everywhere.

STATIC CONNECTION · ORIGINAL MSP announcement, procurement eligibility and actual purchase are separate.

ANALYSIS · ORIGINAL GUIDANCE

• Market access and effective procurement determine benefits beyond headline increases.

• A quintal is 100 kg; use the notified crop and season.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-011, E7-2511-016, E7-2511-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not quote these as per-kilogram prices or assured payments to every grower.

MAINS PROMPT How can price support improve income without distorting resource use?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

03 · Fertiliser support

Rabi P&K subsidy: nutrient support, not direct cash

E6-2510-011 · P1 · 2025-10 (month-level index) · AP-linked

WHY IN THE NEWS The Cabinet approved seasonal nutrient-based support.

• The approved requirement is ₹37,952 crore.

• The measure concerns phosphatic and potassic fertilisers.

• Subsidy parameters differ from farmers’ final retail bills.

STATIC CONNECTION · ORIGINAL Nutrient-based subsidy is distinct from a uniform transfer to every cultivator.

ANALYSIS · ORIGINAL GUIDANCE

• Balanced nutrition, availability and soil information matter with affordability.

• Keep urea’s separate policy treatment distinct.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E7-2511-016, E7-2511-027 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not divide the outlay into a promised individual payment or claim it covers all fertilisers identically.

MAINS PROMPT How can fertiliser support encourage balanced use?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Society & Welfare

01 · Consultation versus commencement

Labour and sports drafts: track legal stages

E6-2510-012 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The month’s policy review records consultation proposals.

• Draft subordinate rules differ from parent enactments.

• Institutional proposals need notification and operational capacity.

• Submission deadlines are not commencement dates.

STATIC CONNECTION · ORIGINAL Law-making, delegated rules and enforcement are separate parts of implementation.

ANALYSIS · ORIGINAL GUIDANCE

• Read each sector’s final instrument rather than infer automatic operation from a ministry draft.

• A sports governance proposal is not proof every body is already constituted.

PRELIMS CAUTION Do not combine unrelated draft rules into a claim that all reforms took effect together.

MAINS PROMPT Why is implementation capacity as important as statutory design?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Hunger measurement

GHI 2025: composite score, not a UN hunger census

E6-2510-025 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS The issue discussed the index and its limitations. Magazine coverage is an editorial index, not necessarily the event date.

• India ranked 102 of 123 with a score of 25.8, classified serious.

• Four indicators include undernourishment, child wasting, stunting and mortality.

• Inputs have different reference periods.

STATIC CONNECTION · ORIGINAL A composite index and a directly observed headcount are different measures.

ANALYSIS · ORIGINAL GUIDANCE

• Compare methodology and indicator changes, not rank alone.

• The index is not co-published by UN agencies merely because inputs use international datasets.

PRELIMS CAUTION Do not call 25.8 the percentage of all Indians hungry or assume rank changes establish causation.

MAINS PROMPT How should composite indices guide policy without replacing national evidence?

Sources: [E6-V10-29]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Environment

01 · Industrial carbon regulation

GHG intensity targets: relative does not mean absolute

E6-2510-017 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS Targets were notified for four industrial sectors.

• Compliance uses emissions intensity measures.

• Production levels affect total emissions.

• Facility applicability and monitoring rules matter.

STATIC CONNECTION · ORIGINAL Absolute emissions equal output multiplied by intensity on a consistent basis.

ANALYSIS · ORIGINAL GUIDANCE

• An intensity reduction can coexist with higher total emissions as output grows.

• Credible measurement and verification underpin a functioning compliance market.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call every intensity improvement an equal absolute emissions reduction.

MAINS PROMPT How can intensity targets support credible industrial decarbonisation?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Biosphere geography

Cold Desert: UNESCO’s designated geography

E6-2510-024 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS UNESCO’s profile records 2025 designation. Magazine coverage is an editorial index, not necessarily the event date.

• The site is in Himachal Pradesh’s Lahaul–Spiti.

• The profile gives 777,000 hectares and elevations of 3,300–6,600 metres.

• Pin Valley and Kibber/Chandratal protected areas feature.

STATIC CONNECTION · ORIGINAL A biosphere reserve’s zonation and designated boundary differ from an entire ecological region.

ANALYSIS · ORIGINAL GUIDANCE

• Use the official profile to correct overbroad Ladakh–Kinnaur descriptions.

• Recognition does not erase local livelihoods or automatically apply national-park rules everywhere.

PRELIMS CAUTION Do not relocate the designated reserve to Ladakh or equate a biosphere reserve with a single national park.

MAINS PROMPT How can biosphere governance reconcile conservation and livelihoods?

Sources: [E6-V10-26], [E6-COLD]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Science & Technology

01 · Synthetic media

Synthetic-content labelling: draft, not blanket ban

E6-2510-014 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS A separate consultation addressed AI-generated content.

• The proposal concerns identification/labelling obligations.

• Synthetic media includes legitimate as well as harmful uses.

• Final text and applicability need separate verification.

STATIC CONNECTION · ORIGINAL Provenance, authenticity and truthfulness are related but different.

ANALYSIS · ORIGINAL GUIDANCE

• Labels need reliability, accessibility and remedies against false attribution.

• Do not assume a label alone prevents fraud or an unlabelled item is genuine.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A labelling draft is not an enacted ban on every AI image.

MAINS PROMPT What safeguards make synthetic-media governance effective?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Nobel physics

Physics Nobel: quantum behaviour in electrical circuits

E6-2510-029 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The official 2025 award recognised macroscopic quantum effects.

• Laureates are John Clarke, Michel H. Devoret and John M. Martinis.

• The citation concerns macroscopic quantum mechanical tunnelling.

• Energy quantisation in an electric circuit is also recognised.

STATIC CONNECTION · ORIGINAL Quantum tunnelling is not classical passage over an energy barrier.

ANALYSIS · ORIGINAL GUIDANCE

• Connect circuit-scale quantum behaviour to technological possibilities without claiming a universal fault-tolerant computer was delivered.

• Recognition of foundational work differs from immediate commercial readiness.

READ ACROSS MONTHS · NOTE IDS VM2504-004, MY25-020, E5-2507-026, E5-2507-020, E5-2507-032, CA-038, E9-2602-018, E9-2602-026 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not swap the laureates with chemistry or claim the award certifies all quantum-computing promises.

MAINS PROMPT Why do foundational experiments matter for emerging technologies?

Sources: [E6-NOBEL]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

03 · Nobel chemistry

Chemistry Nobel: metal–organic frameworks

E6-2510-030 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The award recognised MOF development.

• Laureates are Susumu Kitagawa, Richard Robson and Omar M. Yaghi.

• MOFs combine metal-based nodes and organic linkers.

• Porous frameworks enable diverse adsorption/separation research.

STATIC CONNECTION · ORIGINAL Porosity and tunable chemistry do not make every material suitable for every gas or operating condition.

ANALYSIS · ORIGINAL GUIDANCE

• Assess stability, cost and regeneration energy before extrapolating a laboratory application.

• Applications include gas handling and water-harvesting research, not universal guaranteed deployment.

PRELIMS CAUTION Do not confuse MOFs with a single metal alloy or claim identical selectivity across all frameworks.

MAINS PROMPT How can porous-material research translate into useful environmental technology?

Sources: [E6-NOBEL]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

04 · Nobel medicine

Medicine Nobel: peripheral immune tolerance

E6-2510-031 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The award recognised mechanisms of immune restraint.

• Laureates are Mary E. Brunkow, Fred Ramsdell and Shimon Sakaguchi.

• Peripheral immune tolerance is the official theme.

• Regulatory T cells and FOXP3 provide key study connections.

STATIC CONNECTION · ORIGINAL Tolerance helps prevent harmful responses to self; it differs from general absence of immunity.

ANALYSIS · ORIGINAL GUIDANCE

• Immune regulation matters for autoimmunity and treatment design.

• Foundational discovery does not mean a universal cure has been approved.

PRELIMS CAUTION Do not confuse peripheral tolerance with every vaccine mechanism or promise a cure from an award citation.

MAINS PROMPT How does understanding immune regulation inform medicine?

Sources: [E6-NOBEL]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Security

01 · Takedown accountability

IT takedown procedure: reasons and identified content

E6-2510-013 · P1 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS Notified amendments changed procedural requirements.

• Reasoned orders and identification of URLs/content are relevant safeguards.

• Authorised decision-making differs from informal requests.

• Synthetic-content labelling was a separate draft.

STATIC CONNECTION · ORIGINAL A takedown order, platform response and court review are different stages.

ANALYSIS · ORIGINAL GUIDANCE

• Traceable reasons support accountability and meaningful challenge.

• Content restrictions still require lawful grounds and proportionality.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not conflate a notified procedural amendment with a separate AI-labelling consultation.

MAINS PROMPT How can takedown procedures protect both safety and expression?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Road safety governance

National Road Safety Board: expertise versus execution

E6-2510-018 · P2 · 2025-10 (month-level index) · AP-linked

WHY IN THE NEWS The review records institutional road-safety developments.

• A national expert body has a different role from local enforcement.

• Engineering, vehicles and emergency response all matter.

• Constitution/notification does not prove a measured fall in deaths.

STATIC CONNECTION · ORIGINAL Road safety is a systems problem rather than solely driver blame.

ANALYSIS · ORIGINAL GUIDANCE

• Track outcomes with exposure-aware indicators and reliable reporting.

• AP implementation needs road-owner, police and health coordination.

PRELIMS CAUTION Do not treat a board as replacing every state agency or announcing a proven casualty reduction.

MAINS PROMPT How can institutions turn safety advice into measurable prevention?

Sources: [E6-PRS10]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

03 · Cybercrime treaty

UN Cybercrime Convention: signing is not force

E6-2510-023 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS The convention opened for signature. Magazine coverage is an editorial index, not necessarily the event date.

• Entry into force requires forty ratifications and the stipulated ninety-day interval.

• Signature and ratification are separate acts.

• Cooperation must be read with safeguards and domestic law.

STATIC CONNECTION · ORIGINAL Treaty adoption, signature, ratification and entry into force are distinct milestones.

ANALYSIS · ORIGINAL GUIDANCE

• Cross-border evidence cooperation needs necessity, proportionality and rights protection.

• Do not imply an opening ceremony alone made all obligations operative.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the treaty was already in force merely because states signed it.

MAINS PROMPT How should cybercrime cooperation protect privacy and due process?

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

International Relations

01 · EFTA agreement

TEPA enters into force: targets are not realised flows

E6-2510-020 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS The agreement became effective on 1 October. Magazine coverage is an editorial index, not necessarily the event date.

• It was signed in March 2024.

• EFTA comprises Iceland, Liechtenstein, Norway and Switzerland.

• The USD 100 billion investment objective spans fifteen years.

STATIC CONNECTION · ORIGINAL A trade framework, investment target and measured capital inflow differ.

ANALYSIS · ORIGINAL GUIDANCE

• Assess tariff schedules, origin rules and institutional follow-through.

• EFTA is not the European Union.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-022, CA-035 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the target money already received or date the signature to October 2025.

MAINS PROMPT What determines whether trade agreements deliver investment linkages?

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Fisheries subsidies

WTO fisheries agreement: September entry, October review

E6-2510-022 · P1 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · AP-linked

WHY IN THE NEWS The agreement entered into force on 15 September. Magazine coverage is an editorial index, not necessarily the event date.

- It targets specified harmful fisheries subsidies.
- India had not ratified at the reviewed point.
- Entry into force and obligations for a particular member differ.

STATIC CONNECTION · ORIGINAL A multilateral agreement does not automatically bind every non-accepting member identically.

ANALYSIS · ORIGINAL GUIDANCE

- Balance sustainability, monitoring and developing-country livelihoods.
- Do not treat this text as a complete settlement of every overcapacity negotiation.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, CA-035 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION October magazine coverage is not the entry date; India’s non-ratification must not be omitted.

MAINS PROMPT How can fisheries rules reconcile sustainability and development?

Andhra Pradesh

01 · AI infrastructure

Google Vizag AI hub: announced future investment

E6-2510-027 · P1 · 2025-10-14 · AP-linked

WHY IN THE NEWS Google announced its first Indian AI hub on 14 October.

• The proposal is about USD 15 billion across 2026–30.

• It envisages gigawatt-scale infrastructure and a subsea gateway.

• AdaniConneX and Airtel feature in the issuer announcement.

STATIC CONNECTION · ORIGINAL Announced commitments, financial closure, construction and operation are separate milestones.

ANALYSIS · ORIGINAL GUIDANCE

• AP opportunities need reliable power/water, skills and resilient connectivity.

• Commissioned economic projections are not observed AP GDP gains or verified job outcomes.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-033, E7-2511-023, E7-2511-024 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the entire investment was spent or the hub commissioned in October 2025.

MAINS PROMPT How can AP convert digital investment into sustainable local value?

Sources: [E6-GOOGLE]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

02 · Coastal risk

Cyclone Montha: observed landfall-start versus forecasts

E6-2510-028 · P1 · 2025-10-28 · AP-linked

WHY IN THE NEWS An IMD-attributed report recorded landfall starting near Kakinada on 28 October.

• The account describes a severe cyclonic storm.

• The cited bulletin concerns the start of the crossing process.

• Final wind, track and loss totals require later authoritative reports.

STATIC CONNECTION · ORIGINAL Forecast intensity, observed conditions and audited impacts are different evidence types.

ANALYSIS · ORIGINAL GUIDANCE

• Connect risk finance with evacuation, warnings and resilient infrastructure.

• Do not turn a prior forecast wind range into an observed final maximum.

READ ACROSS MONTHS · NOTE IDS E5-2506-028, E5-2507-022, E5-2508-016, E5-2508-017, E5-2508-018, E6-2509-010, E6-2509-025, E7-2511-028 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION This source does not certify final damage totals or a completed crossing at its start time.

MAINS PROMPT What makes coastal preparedness effective before, during and after landfall?

Sources: [E6-MONTHA]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Culture & History

01 · Social reform linkages

Narayana Guru: dignity, education and organisation

E6-2510-026 · P2 · Magazine coverage: 2025-10 · web posted: 2025-11-12 · event date varies · National / other

WHY IN THE NEWS The magazine profiled the reformer. Magazine coverage is an editorial index, not necessarily the event date.

• He lived from 1856 to 1928.

• His reform tradition challenged caste exclusion.

• Education and social organisation are key analytical linkages.

STATIC CONNECTION · ORIGINAL A historical profile’s publication date does not establish an anniversary claim.

ANALYSIS · ORIGINAL GUIDANCE

• Compare Guru and Self-Respect reform without erasing their different settings.

• The claimed 2025 death centenary conflicts with his 1928 death and is not retained.

PRELIMS CAUTION Do not repeat an unsupported centenary or assume all reform traditions were identical.

MAINS PROMPT How did social reform connect dignity with institutional change?

Sources: [E6-V10-38]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

Awards & Sports

01 · Nobel humanities

Literature and Peace: distinguish the citations

E6-2510-032 · P2 · 2025-10 (month-level index) · National / other

WHY IN THE NEWS The official aggregate lists the 2025 recipients.

• Literature: László Krasznahorkai, for a visionary oeuvre and art’s power amid apocalyptic terror.

• Peace: Maria Corina Machado, for democratic rights and peaceful transition in Venezuela.

• The awards recognise different fields and institutions.

STATIC CONNECTION · ORIGINAL An award citation is not a judicial verdict on every political dispute.

ANALYSIS · ORIGINAL GUIDANCE

• For Prelims pair recipient, field and country/context; for Mains examine democratic participation and cultural expression.

• Avoid substituting a personal political judgment for the actual citation.

PRELIMS CAUTION Do not interchange the two recipients or call the Peace award a completed political transition.

MAINS PROMPT How can peaceful civic participation strengthen democratic legitimacy?

Sources: [E6-NOBEL]

Evidence access: Access scope recorded for each source; static links, analysis and exam guidance are original

October 2025 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

OCT-01. October MPC policy combined:

A. A guarantee the next decision would be a cut.

B. A 5.5% repo rate and neutral stance.

C. A 6.5% repo rate and permanent tightening.

D. An observed full-year growth rate of 6.8%.

OCT-02. Q2 food inflation of −1.6% implies:

A. Every household’s total cost fell 1.6%.

B. Every food item became cheaper.

C. The food index fell on that comparison, not necessarily overall CPI.

D. Overall CPI was necessarily negative.

OCT-03. Eighth Pay Commission Terms of Reference mean:

A. Every revised salary was already paid.

B. An officially accepted universal fitment factor.

C. Automatic state-government adoption.

D. A mandate for examination, not a final pay award.

OCT-04. Risk-based deposit-insurance premiums concern:

A. A guaranteed return on equity investments.

B. Unlimited insurance on every asset.

C. An automatic rise in every insured balance.

D. Risk differentiation in bank premiums, distinct from coverage ceilings.

OCT-05. The reviewed rupee-lending relaxation named:

A. Only all EU members.

B. Only EFTA countries.

C. Nepal, Bhutan and Sri Lanka.

D. Every country without conditions.

OCT-06. Draft ECB reform should be distinguished from:

A. Final operative borrowing permissions.

B. A subject requiring currency-risk analysis.

C. A consultation process.

D. An external-finance policy proposal.

OCT-07. A wider pension investment ceiling is:

A. Neither a guaranteed return nor necessarily compulsory allocation.

B. A guaranteed positive return every year.

C. A requirement every saver invest at the maximum.

D. Insurance against all market losses.

OCT-08. Electricity reform should track:

A. A draft as immediate national tariff replacement.

B. Draft, enactment, implementation and actual subsidy payments separately.

C. A subsidy promise as money already received.

D. Financial viability as unrelated to service quality.

OCT-09. The approved pulses mission spans:

A. A verified end to all imports at approval.

B. FY2025–26 to FY2030–31 with ₹11,440 crore outlay.

C. One month with a ₹11,440 payment to each farmer.

D. A universal change in every crop MSP.

OCT-10. The announced wheat MSP is:

A. ₹2,585 per kilogram.

B. An unconditional transfer regardless of sales.

C. A compulsory market price for every transaction.

D. ₹2,585 per quintal, not a guaranteed realised price everywhere.

OCT-11. The ₹37,952 crore P&K decision is:

A. Identical policy treatment for all fertilisers including urea.

B. An equal cash transfer to every farmer.

C. A verified fall in all retail prices by the same amount.

D. Seasonal nutrient-based subsidy support.

OCT-12. Takedown accountability is strengthened by:

A. Treating every AI-labelling draft as notified law.

B. Assuming all restrictions are automatically proportionate.

C. Unrecorded informal instructions alone.

D. Reasoned orders identifying the relevant content/URLs.

OCT-13. Synthetic-content labels are best regarded as:

A. A final blanket ban merely from a draft.

B. Proof every unlabelled item is genuine.

C. Proof every labelled claim is false.

D. A provenance tool with limitations, not an infallible truth test.

OCT-14. An industrial incentive’s investment threshold is:

A. Proof all planned capacity is commissioned.

B. A guarantee of project profitability.

C. The same as verified subsidy disbursement.

D. An eligibility condition, not the amount paid to every applicant.

OCT-15. When emissions intensity falls while output rises:

A. Absolute emissions must always fall equally.

B. All facilities necessarily become carbon-neutral.

C. Absolute emissions may still increase.

D. Output ceases to matter.

OCT-16. A national expert road-safety board:

A. Does not by itself establish a verified fall in deaths.

B. Automatically eliminates hazardous road design.

C. Replaces all state police powers.

D. Makes emergency response unnecessary.

OCT-17. Prison Statistics 2023 in a 2025 issue refers to:

A. Only convicted prisoners.

B. A 2023 data period rather than 2025 observations.

C. Proof custody establishes guilt.

D. A model law automatically enacted in every state.

OCT-18. Which TEPA pairing is correct?

A. EU; signature in October 2025.

B. ASEAN; a one-year investment guarantee.

C. EFTA; USD 100 billion already received in full.

D. EFTA; entry into force on 1 October 2025.

OCT-19. ASI’s 11.89% GVA growth is:

A. A measure covering every informal establishment.

B. Current-price growth for the referenced factory survey period.

C. Real GDP growth of the entire economy.

D. An observation for October alone.

OCT-20. The WTO fisheries agreement chronology is:

A. 15 September entry into force; India not ratified at the reviewed point.

B. A complete settlement of every fisheries negotiation.

C. October entry merely because of magazine date.

D. All WTO members automatically ratified.

OCT-21. UN Cybercrime Convention entry into force requires:

A. Forty ratifications and the stipulated ninety-day interval.

B. Only the first signature.

C. Only publication of a magazine article.

D. No ratification process.

OCT-22. UNESCO’s Cold Desert profile places it in:

A. The Thar Desert alone.

B. Ladakh alone.

C. Himachal Pradesh’s Lahaul–Spiti.

D. All Himalayan territory as one national park.

OCT-23. A GHI score of 25.8 is:

A. A direct nationwide hunger headcount percentage.

B. A measure based on a single current-year indicator.

C. A UN-agency joint publication merely because inputs use UN data.

D. A composite score, not the percentage of all Indians hungry.

OCT-24. A claimed 2025 Narayana Guru death centenary is unreliable because:

A. His death year is 1928.

B. He founded Self-Respect in 1925.

C. His birth year is 1928.

D. Publication date automatically determines an anniversary.

OCT-25. Google’s Vizag announcement describes:

A. The full USD 15 billion already spent in October.

B. Verified AP GDP gains already measured.

C. Proposed investment across 2026–30, not an October commissioned hub.

D. A project requiring no supporting infrastructure.

OCT-26. The cited Montha report establishes:

A. A completed crossing at the moment the process started.

B. Every forecast wind as an observed maximum.

C. Final verified damage totals.

D. Landfall-start near Kakinada, not audited final losses.

OCT-27. The Physics Nobel recognised:

A. Metal–organic frameworks.

B. Macroscopic quantum tunnelling and energy quantisation in an electric circuit.

C. Creative destruction alone.

D. Peripheral immune tolerance.

OCT-28. MOFs are associated with:

A. Guaranteed identical selectivity for every gas.

B. Only a single conventional metal alloy.

C. Metal-based nodes, organic linkers and porous frameworks.

D. The 2025 literature citation.

OCT-29. Peripheral immune tolerance is associated with:

A. Clarke, Devoret and Martinis.

B. Brunkow, Ramsdell and Sakaguchi.

C. Kitagawa, Robson and Yaghi.

D. Mokyr, Aghion and Howitt.

OCT-30. Creative destruction highlights:

A. A guarantee every disruptive firm improves welfare.

B. Growth with no institutional prerequisites.

C. A claim transition costs never matter.

D. Innovation-led growth alongside displacement of old activities.

Explained answer key

OCT-01. B The policy rate, stance and forecast are distinct signals. A neutral stance permits data-dependent choices, not a promise of the next move. Caution: Do not confuse the projection with an NSO outturn or neutral with a permanent rate freeze. [E6-2510-001]

OCT-02. C Disinflation is slower positive inflation; deflation is a falling price index. Food volatility can lower headline inflation without eliminating other pressures. Caution: Negative food inflation does not establish negative overall CPI or lower prices for every household. [E6-2510-002]

OCT-03. D A commission recommends; expenditure requires accepted decisions and implementation instruments. Assess fiscal space and service quality as well as consumption effects. Caution: Approval is not proof salaries already rose or that a guessed factor is official. [E6-2510-003]

OCT-04. D Deposit insurance is not protection against every investment loss or unlimited bank liabilities. Risk pricing can reduce cross-subsidy but needs credible metrics and transition safeguards. Caution: Draft premium reform does not automatically expand every depositor’s insured amount. [E6-2510-004]

OCT-05. C Currency denomination, borrower eligibility and repayment risk are distinct. Rupee finance can support regional links without guaranteeing currency-risk elimination. Caution: Do not expand the measure to every country or describe loans as grants. [E6-2510-005]

OCT-06. A Bank exposure, foreign borrowing and equity flows are different channels. Simplification needs safeguards against concentrated and currency-mismatched risk. Caution: A proposal is not an already effective permission; do not mix domestic bank limits and ECB conditions. [E6-2510-006]

OCT-07. A An investment ceiling is not a guaranteed return or a compulsory allocation. Long horizons do not remove market, governance or liquidity risks. Caution: Do not merge draft NPS and mutual-fund rules or promise returns from a wider investment universe. [E6-2510-007]

OCT-08. B A subsidy promise, budgeted transfer and utility receipt are different financial stages. Efficiency and contestability need universal-service and consumer safeguards. Caution: Do not claim draft provisions already changed every consumer tariff. [E6-2510-008]

OCT-09. B Self-reliance is an objective; output, imports and farmer income need separate evidence. Assured demand helps only with operational procurement, quality acceptance and payment. Caution: An approved mission does not prove imports ended or every farmer received a universal cash amount. [E6-2510-009]

OCT-10. D MSP announcement, procurement eligibility and actual purchase are separate. Market access and effective procurement determine benefits beyond headline increases. Caution: Do not quote these as per-kilogram prices or assured payments to every grower. [E6-2510-010]

OCT-11. D Nutrient-based subsidy is distinct from a uniform transfer to every cultivator. Balanced nutrition, availability and soil information matter with affordability. Caution: Do not divide the outlay into a promised individual payment or claim it covers all fertilisers identically. [E6-2510-011]

OCT-12. D A takedown order, platform response and court review are different stages. Traceable reasons support accountability and meaningful challenge. Caution: Do not conflate a notified procedural amendment with a separate AI-labelling consultation. [E6-2510-013]

OCT-13. D Provenance, authenticity and truthfulness are related but different. Labels need reliability, accessibility and remedies against false attribution. Caution: A labelling draft is not an enacted ban on every AI image. [E6-2510-014]

OCT-14. D Investment commitments, production milestones and verified incentives differ. Evaluate additional capacity, technology and fiscal cost rather than applications alone. Caution: Do not treat a qualifying investment threshold as money paid to every producer. [E6-2510-016]

OCT-15. C Absolute emissions equal output multiplied by intensity on a consistent basis. An intensity reduction can coexist with higher total emissions as output grows. Caution: Do not call every intensity

improvement an equal absolute emissions reduction. [E6-2510-017]

OCT-16. A Road safety is a systems problem rather than solely driver blame. Track outcomes with exposure-aware indicators and reliable reporting. Caution: Do not treat a board as replacing every state agency or announcing a proven casualty reduction. [E6-2510-018]

OCT-17. B Custody is not a finding of guilt; overcrowding also affects health and legal access. Bail, legal aid, case management and humane facilities need coordinated reform. Caution: Do not label 2023 statistics as 2025 observations or undertrials as convicted offenders. [E6-2510-019]

OCT-18. D A trade framework, investment target and measured capital inflow differ. Assess tariff schedules, origin rules and institutional follow-through. Caution: Do not call the target money already received or date the signature to October 2025. [E6-2510-020]

OCT-19. B Nominal growth includes price effects; real output needs appropriate deflation. Use employment, productivity and industry composition alongside aggregate GVA. Caution: Do not describe current-price GVA growth as real GDP growth for all sectors. [E6-2510-021]

OCT-20. A A multilateral agreement does not automatically bind every non-accepting member identically. Balance sustainability, monitoring and developing-country livelihoods. Caution: October magazine coverage is not the entry date; India’s non-ratification must not be omitted. [E6-2510-022]

OCT-21. A Treaty adoption, signature, ratification and entry into force are distinct milestones. Cross-border evidence cooperation needs necessity, proportionality and rights protection. Caution: Do not say the treaty was already in force merely because states signed it. [E6-2510-023]

OCT-22. C A biosphere reserve’s zonation and designated boundary differ from an entire ecological region. Use the official profile to correct overbroad Ladakh–Kinnaur descriptions. Caution: Do not relocate the designated reserve to Ladakh or equate a biosphere reserve with a single national park. [E6-2510-024]

OCT-23. D A composite index and a directly observed headcount are different measures. Compare methodology and indicator changes, not rank alone. Caution: Do not call 25.8 the percentage of all Indians hungry or assume rank changes establish causation. [E6-2510-025]

OCT-24. A A historical profile’s publication date does not establish an anniversary claim. Compare Guru and Self-Respect reform without erasing their different settings. Caution: Do not repeat an unsupported centenary or assume all reform traditions were identical. [E6-2510-026]

OCT-25. C Announced commitments, financial closure, construction and operation are separate milestones. AP opportunities need reliable power/water, skills and resilient connectivity. Caution: Do not say the entire investment was spent or the hub commissioned in October 2025. [E6-2510-027]

OCT-26. D Forecast intensity, observed conditions and audited impacts are different evidence types. Connect risk finance with evacuation, warnings and resilient infrastructure. Caution: This source does not certify final damage totals or a completed crossing at its start time. [E6-2510-028]

OCT-27. B Quantum tunnelling is not classical passage over an energy barrier. Connect circuit-scale quantum behaviour to technological possibilities without claiming a universal fault-tolerant computer was delivered. Caution: Do not swap the laureates with chemistry or claim the award certifies all quantum-computing promises. [E6-2510-029]

OCT-28. C Porosity and tunable chemistry do not make every material suitable for every gas or operating condition. Assess stability, cost and regeneration energy before extrapolating a laboratory application. Caution: Do not confuse MOFs with a single metal alloy or claim identical selectivity across all frameworks. [E6-2510-030]

OCT-29. B Tolerance helps prevent harmful responses to self; it differs from general absence of immunity. Immune regulation matters for autoimmunity and treatment design. Caution: Do not confuse peripheral tolerance with every vaccine mechanism or promise a cure from an award citation. [E6-2510-031]

OCT-30. D Innovation, diffusion, institutions and transition costs differ from a simple increase in spending. Use skills, competition and social protection to connect growth theory with policy. Caution: Do not attribute

all three laureates to one identical contribution or ignore displaced workers. [E6-2510-033]

Mains answer laboratory

Eight answer plans; not model predictions or official marking schemes. Separate sourced facts from original analysis. Historical snapshots require current legal/status checks.

How can distribution reform reconcile viability and universal access?

Study reference: E6-2510-008

Opening: A subsidy promise, budgeted transfer and utility receipt are different financial stages.

Dated evidence: Distribution reform features in the draft. Tariffs, cost recovery and subsidy arrangements require separate scrutiny.

Core argument: Efficiency and contestability need universal-service and consumer safeguards.

Counterpoint / evidence limit: Do not claim draft provisions already changed every consumer tariff.

Implementation lens: AP analysis should examine farm support, utility finances and actual state implementation.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

What makes pulses diversification viable for farmers?

Study reference: E6-2510-009

Opening: Self-reliance is an objective; output, imports and farmer income need separate evidence.

Dated evidence: The outlay is ₹11,440 crore. The period is FY2025–26 to FY2030–31.

Core argument: Assured demand helps only with operational procurement, quality acceptance and payment.

Counterpoint / evidence limit: An approved mission does not prove imports ended or every farmer received a universal cash amount.

Implementation lens: AP crop choices also depend on water, local prices and agronomy.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

How can takedown procedures protect both safety and expression?

Study reference: E6-2510-013

Opening: A takedown order, platform response and court review are different stages.

Dated evidence: Reasoned orders and identification of URLs/content are relevant safeguards. Authorised decision-making differs from informal requests.

Core argument: Traceable reasons support accountability and meaningful challenge.

Counterpoint / evidence limit: Do not conflate a notified procedural amendment with a separate AI-labelling consultation.

Implementation lens: Content restrictions still require lawful grounds and proportionality.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

How can intensity targets support credible industrial decarbonisation?

Study reference: E6-2510-017

Opening: Absolute emissions equal output multiplied by intensity on a consistent basis.

Dated evidence: Compliance uses emissions intensity measures. Production levels affect total emissions.

Core argument: An intensity reduction can coexist with higher total emissions as output grows.

Counterpoint / evidence limit: Do not call every intensity improvement an equal absolute emissions reduction.

Implementation lens: Credible measurement and verification underpin a functioning compliance market.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

How should prison reform protect liberty and public safety?

Study reference: E6-2510-019

Opening: Custody is not a finding of guilt; overcrowding also affects health and legal access.

Dated evidence: The reference period is 2023. Undertrials and convicted prisoners are different legal categories.

Core argument: Bail, legal aid, case management and humane facilities need coordinated reform.

Counterpoint / evidence limit: Do not label 2023 statistics as 2025 observations or undertrials as convicted offenders.

Implementation lens: A model prison law does not automatically replace every state statute.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

What determines whether trade agreements deliver investment linkages?

Study reference: E6-2510-020

Opening: A trade framework, investment target and measured capital inflow differ.

Dated evidence: It was signed in March 2024. EFTA comprises Iceland, Liechtenstein, Norway and Switzerland.

Core argument: Assess tariff schedules, origin rules and institutional follow-through.

Counterpoint / evidence limit: Do not call the target money already received or date the signature to October 2025.

Implementation lens: EFTA is not the European Union.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

How can AP convert digital investment into sustainable local value?

Study reference: E6-2510-027

Opening: Announced commitments, financial closure, construction and operation are separate milestones.

Dated evidence: The proposal is about USD 15 billion across 2026–30. It envisages gigawatt-scale infrastructure and a subsea gateway.

Core argument: AP opportunities need reliable power/water, skills and resilient connectivity.

Counterpoint / evidence limit: Do not say the entire investment was spent or the hub commissioned in October 2025.

Implementation lens: Commissioned economic projections are not observed AP GDP gains or verified job outcomes.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

How can innovation policy support growth while managing adjustment costs?

Study reference: E6-2510-033

Opening: Innovation, diffusion, institutions and transition costs differ from a simple increase in spending.

Dated evidence: Joel Mokyr was recognised for technological prerequisites of sustained growth. Philippe Aghion and Peter Howitt were recognised for creative destruction.

Core argument: Use skills, competition and social protection to connect growth theory with policy.

Counterpoint / evidence limit: Do not attribute all three laureates to one identical contribution or ignore displaced workers.

Implementation lens: A theory does not prove every disruptive firm improves social welfare.

Answer structure: Define the mechanism; use the dated evidence; distinguish formal approval from delivery; examine one distributional and one administrative constraint; propose accountable implementation with measurable outcomes.

Conclusion: Assess success through verified outcomes and accessible remedies, not announcements alone. State what additional evidence would change the assessment.

https://visionias.in/current-affairs/monthly-magazine/2025-11-12/economy/annual-survey-of-industries-asi-for-2023-24

Selected lead/substantive passages inspected; not full issue, shorts/maps or primary-text review

[E6-V10-19] Vision IAS · 2025-10 · wto agreement on fisheries subsidies

https://visionias.in/current-affairs/monthly-magazine/2025-11-12/economy/wto-agreement-on-fisheries-subsidies

Selected lead/substantive passages inspected; not full issue, shorts/maps or primary-text review

[E6-V10-23] Vision IAS · 2025-10 · united nations convention against cybercrime

https://visionias.in/current-affairs/monthly-magazine/2025-11-12/security/united-nations-convention-against-cybercrime

Selected lead/substantive passages inspected; not full issue, shorts/maps or primary-text review

[E6-V10-26] Vision IAS · 2025-10 · cold desert biosphere reserve

https://visionias.in/current-affairs/monthly-magazine/2025-11-12/environment/cold-desert-biosphere-reserve

Selected lead/substantive passages inspected; not full issue, shorts/maps or primary-text review

[E6-V10-29] Vision IAS · 2025-10 · global hunger index 1

https://visionias.in/current-affairs/monthly-magazine/2025-11-12/society/global-hunger-index-1

Selected lead/substantive passages inspected; not full issue, shorts/maps or primary-text review

[E6-V10-38] Vision IAS · 2025-10 · sree narayana guru

https://visionias.in/current-affairs/monthly-magazine/2025-11-12/history/sree-narayana-guru

Selected lead/substantive passages inspected; not full issue, shorts/maps or primary-text review

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
