CIVILS ATLAS / RESEARCH EDITION 18

December 2025

Understand the news.
Retain what matters.

44 study notes · 30 MCQs · Mains frameworks

UPSC × Andhra Pradesh APPSC · English
Research cut-off: 7 November 2026

Read the coverage contract

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

New notes separate reported facts from original static connections, analysis, cautions and Mains prompts. P1 = core; P2 = consolidation; P3 = selective factual recall. Broad AP relevance is not exact APPSC paper mapping. Read the research audit for omissions and unresolved claims.

Daily discovery is NOT activated: GitHub repository deployment or first scheduled execution is pending. Automation collects unreviewed source links, not researched study notes.

Source extracts are not whole-document reviews. November covers only 1–7 November. Review research/Research-Status.md before treating any month as complete.

How to study

Read P1 → consolidate P2 → recall P3. Review after 1, 7 and 30 days. Explain each caution unaided. Build answers with a dated fact, mechanism, limitation and conclusion.

Sources and access provenance appear in the appendix. Original analysis is not a sourced prediction of exam questions.

Polity & Governance

01 · Local governance

SabhaSaar and Gram Sabha record-keeping

CA-030 · P2 · 2025-12-29 · AP-linked

• MoPR’s review highlights an AI-enabled SabhaSaar tool for Gram Sabha record-keeping.

• The same review identifies Gram Manchitra as a GIS-based spatial planning platform.

PRELIMS CAUTION AI transcription support is not a substitute for statutory Gram Sabha procedures or accountable decisions.

MAINS PROMPT Design digital local governance with language access, human validation, privacy and public auditability.

Sources: [PRI]

Evidence access: First-edition source check; independent full-text provenance not retained

PESA capacity building: Telugu connection

CA-031 · P2 · 2025-12-29 · AP-linked

• MoPR review records that Andhra Pradesh and Telangana completed translation of all seven PESA training manuals into Telugu.

PRELIMS CAUTION Translation of manuals does not itself establish effective devolution or implementation of every PESA protection.

MAINS PROMPT Evaluate the gap between legal Gram Sabha powers and administrative practice in Scheduled Areas.

Sources: [PRI]

Evidence access: First-edition source check; independent full-text provenance not retained

01 · Statistical institutions

NSC review: statutory autonomy recommended, not granted

E7-2512-004 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The Finance Committee reviewed the statistical system.

• It recommended autonomous status with full statutory backing for NSC.

• Common standards and a statistical audit function were proposed.

• Unorganised-sector measurement was identified as a concern.

STATIC CONNECTION · ORIGINAL A parliamentary recommendation differs from an enacted change in institutional powers.

ANALYSIS · ORIGINAL GUIDANCE

• Transparent methods and revisions support trust more than suppressing inconvenient estimates.

• Separate NSC oversight from September’s proposed ISI institutional legislation.

PRELIMS CAUTION Do not say the report itself enacted a new NSC law or replaced every statistical agency.

MAINS PROMPT What institutional reforms would strengthen official-statistics credibility?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Administrative reform

Visakhapatnam e-governance declaration

CA-032 · P1 · 2025-12-12 · AP-linked

• DARPG year-end review records the 28th National e-Governance Conference in Visakhapatnam and adoption of the Visakhapatnam declaration.

PRELIMS CAUTION The review date is used for indexing; it is not asserted as the conference date.

MAINS PROMPT Use citizen-centric service delivery, interoperability, grievance resolution and accessibility as evaluation criteria.

Sources: [DARPG]

Evidence access: First-edition source check; independent full-text provenance not retained

02 · Land acquisition safeguards

LARR implementation report: consent and service-ready rehabilitation

E7-2512-013 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS The committee examined the 2013 Act’s implementation.

• It noted Gram Sabha consultation/consent being reduced to formality.

• It recommended broader mandatory Gram Sabha involvement.

• It sought functional rehabilitation sites before possession and alignment with PESA/FRA.

STATIC CONNECTION · ORIGINAL The report’s recommendations must not be presented as fresh amendments already enacted.

ANALYSIS · ORIGINAL GUIDANCE

• Meaningful participation requires understandable information and real rehabilitation readiness.

• AP irrigation/industrial projects need project-specific rights and acquisition-stage checks.

PRELIMS CAUTION Do not convert a committee proposal for all acquisitions into an existing universal statutory rule.

MAINS PROMPT How can acquisition deliver public infrastructure without hollowing out community safeguards?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

03 · Digital constitutionalism

Digital power: consent and proportionality beyond an app

E7-2512-027 · P1 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · National / other

WHY IN THE NEWS The magazine discusses the subsequently withdrawn pre-installation mandate. Magazine coverage month is an editorial index, not necessarily the event date.

• Its case context is Sanchar Saathi pre-installation, later withdrawn.

• The framework applies liberty, equality, privacy and accountability to digital power.

• State authority and platform power pose different legal questions.

STATIC CONNECTION · ORIGINAL The existence of a service does not prove every installation is mandatory, and withdrawal must be reflected in chronology.

ANALYSIS · ORIGINAL GUIDANCE

• Evaluate lawful purpose, necessity, alternatives and independent redress.

• Do not conflate withdrawal of mandatory installation with abolition of the service itself.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A withdrawn mandate is not an ongoing compulsory-installation rule.

MAINS PROMPT How should constitutional safeguards apply to digital public infrastructure?

Sources: [E7-V12-01]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

04 · PESA and community authority

PESA: Fifth Schedule modifications and legal harmonisation

E7-2512-028 · P1 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · AP-linked

WHY IN THE NEWS The December issue revisits the 1996 Act. Magazine coverage month is an editorial index, not necessarily the event date.

• PESA extends Part IX with modifications to Fifth Schedule Areas.

• It recognises customary/community governance and Gram Sabha roles.

• Consultation, recommendation and consent requirements need the exact provision.

STATIC CONNECTION · ORIGINAL Fifth Schedule PESA and Sixth Schedule autonomous councils are not interchangeable.

ANALYSIS · ORIGINAL GUIDANCE

• AP application needs state rules, actual devolution and alignment with land/mineral/forest law.

• 1996 to December 2025 is twenty-nine completed years; avoid a loose completed-thirty-years claim.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-031, E7-2512-035, E8-2601-028, E8-2601-031 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not apply PESA uniformly to all AP territory or replace every consultation duty with an identical absolute veto.

MAINS PROMPT What makes tribal self-governance effective beyond formal statutory recognition?

Sources: [E7-V12-05]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Economy

01 · Monetary policy

December MPC: 25-basis-point cut with neutral stance

E7-2512-001 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The December decision moved repo to 5.25%.

• Repo fell from 5.5% to 5.25%.

• SDF became 5%; MSF/bank rate became 5.5%.

• FY2025–26 growth was projected at 7.3%, up from 6.8%.

STATIC CONNECTION · ORIGINAL A forecast revision is not a statistical outturn; rate and stance convey different information.

ANALYSIS · ORIGINAL GUIDANCE

• Follow February, April, June, August and October before this next step.

• Transmission to actual loan rates depends on benchmarks, repricing and credit conditions.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe a 0.25 percentage-point move as a 25% cut or 7.3% as measured annual GDP growth.

MAINS PROMPT Why can rate easing coexist with a neutral stance?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · External accounts

Q2 current account: revised Q1 comparator matters

E7-2512-002 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The review reports the July–September balance.

• The deficit was USD 12.3 billion, 1.3% of GDP.

• The year-earlier deficit was USD 20.9 billion, 2.2%.

• The later Q1 comparator is USD 2.7 billion, 0.3%, versus September’s initial USD 2.4 billion, 0.2%.

STATIC CONNECTION · ORIGINAL Revision vintage, reference quarter and publication month must be recorded separately.

ANALYSIS · ORIGINAL GUIDANCE

• Net services and transfers can cushion a goods deficit.

• Keep the September note as a historical release, explicitly cross-linked to this later revision rather than silently overwriting it.

READ ACROSS MONTHS · NOTE IDS FEB25-001, APR25-003, E5-2506-001, E5-2508-001, E5-2508-006, E6-2510-001, E6-2510-002, E7-2511-001 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A lower year-on-year Q2 deficit does not mean no goods deficit or that the initial Q1 estimate was the final figure.

MAINS PROMPT How should external-account resilience be assessed across statistical revisions?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

03 · Industrial output

IIP Q2: weighted production index, not GDP

E7-2512-003 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS Industrial production grew 4.3% in July–September.

• Manufacturing output grew 5.1%.

• Electricity grew 3.7%; mining declined 0.5%.

• Manufacturing has roughly 78% weight in the reviewed index.

STATIC CONNECTION · ORIGINAL IIP measures production volume in covered industries; GDP/GVA are value-added concepts.

ANALYSIS · ORIGINAL GUIDANCE

• Sector weights mean an aggregate need not mirror the weakest or strongest component.

• Compare survey period and revision status before linking monthly news with quarterly output.

PRELIMS CAUTION Do not call IIP growth GDP growth or infer every industrial sector expanded.

MAINS PROMPT What does industrial production reveal that a headline GDP figure may conceal?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

04 · Hydrocarbon rules

Petroleum Rules 2025: unified lease and environmental duties

E7-2512-007 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS New rules replaced the 1959 framework.

• State grants concern onshore resources; Centre grants concern offshore resources.

• A petroleum lease combines exploration/development/production rights.

• Emissions monitoring/reduction and authorised geological storage feature.

STATIC CONNECTION · ORIGINAL A petroleum lease does not itself substitute for every environmental or safety approval.

ANALYSIS · ORIGINAL GUIDANCE

• Shared infrastructure can lower costs but needs liability and access arrangements.

• AP’s onshore/offshore interests require the correct jurisdiction and project-level permissions.

PRELIMS CAUTION Do not generalise offshore authority to state governments or call carbon storage automatically authorised everywhere.

MAINS PROMPT How can upstream reform improve investment while preserving environmental accountability?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

05 · External sector

Exports: FY2024–25 source snapshot

CA-036 · P2 · 2025-12-10 · National / other

• Commerce review reports combined merchandise and services exports of US$825.25 billion in FY2024–25.

• Services exports: US$387.54 billion; merchandise exports: US$437.70 billion (rounding applies).

PRELIMS CAUTION Historical release figures may be revised; do not label them the latest FY2025–26 totals.

MAINS PROMPT Explain services-led export resilience and the need to widen manufacturing competitiveness.

Sources: [TRADE]

Evidence access: First-edition source check; independent full-text provenance not retained

05 · Insurance reform

Insurance Bill: 100% FDI ceiling is not universal insurance

E7-2512-014 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS Parliament passed amendments to insurance laws.

• The framework raises the foreign-equity ceiling from 74% to 100%.

• Foreign reinsurer net-owned-fund requirements fall from ₹5,000 crore to ₹1,000 crore.

• IRDAI receives additional oversight powers.

STATIC CONNECTION · ORIGINAL Foreign ownership permission, capital inflows, product availability and effective household coverage differ.

ANALYSIS · ORIGINAL GUIDANCE

• Competition needs sound solvency and accessible claims/complaint systems.

• Keep September’s individual-policy GST relief and AP hybrid cover proposals legally distinct.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say every insurer became foreign-owned or every household automatically insured.

MAINS PROMPT How can insurance liberalisation deepen protection rather than ownership change alone?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

06 · Securities Code proposal

Securities Markets Code: introduced and referred, not enacted

E7-2512-015 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The Bill seeks to consolidate three central statutes.

• It covers securities contracts, SEBI and depositories.

• Registration of intermediaries/market infrastructure remains central.

• It adds conflict-of-interest and grievance-redress proposals.

STATIC CONNECTION · ORIGINAL Consolidation can simplify a framework without resolving every regulatory-capacity problem.

ANALYSIS · ORIGINAL GUIDANCE

• Clear recusal standards and accessible redress matter alongside structural changes.

• Track committee scrutiny and final text instead of backdating enactment to introduction.

PRELIMS CAUTION Do not claim the three Acts had already been repealed merely because the Code was introduced.

MAINS PROMPT How should market-law consolidation protect investors and regulatory independence?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

07 · Demerit taxation

Tobacco excise and pan-masala cess: separate instruments

E7-2512-016 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS Parliament passed two relevant tax Bills.

• One increases central excise on specified tobacco categories.

• Another creates a production-based pan-masala cess.

• The cess uses machine/unit parameters rather than being simply the GST rate.

STATIC CONNECTION · ORIGINAL Excise, cess and GST have different legal bases and implementation instruments.

ANALYSIS · ORIGINAL GUIDANCE

• Follow September’s deferred tobacco transition rather than claim an identical rate began then.

• Check commencement and product-specific notifications for actual liability.

PRELIMS CAUTION Do not add headline percentages mechanically or backdate December legislation to all September supplies.

MAINS PROMPT How can demerit taxation balance health objectives, compliance and fiscal transition?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

08 · IBC scrutiny

IBC Select Committee: conflict management in liquidation

E7-2512-017 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The committee reported on the August amendment Bill.

• It recommended separating the resolution professional from the liquidator role.

• It sought clearer CoC supervision boundaries.

• It proposed lowering specified creditor initiation thresholds from 66% to 51%.

STATIC CONNECTION · ORIGINAL A committee recommendation is not an operative amendment; creditor roles and statutory adjudication differ.

ANALYSIS · ORIGINAL GUIDANCE

• Assess incentives to prefer liquidation for additional fees and guard commercial wisdom with due process.

• Avoid mixing this Select Committee with the separate general IBC performance report.

PRELIMS CAUTION Do not apply the suggested 51% threshold as already binding solely on this report.

MAINS PROMPT How should insolvency reform align professional incentives with value preservation?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

09 · Coal allocation

CoalSETU: end-use flexibility with exclusions

E7-2512-026 · P2 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS A new non-regulated-sector linkage window was introduced.

- Linkages may last up to fifteen years.
- Traders are excluded; coking coal is not offered.
- Existing specified end-use auctions continue alongside it.

STATIC CONNECTION · ORIGINAL A coal linkage is a supply arrangement, not an unrestricted mining lease or universal trading licence.

ANALYSIS · ORIGINAL GUIDANCE

- Flexible use needs transparent allocation and monitoring.
- Keep notified policy separate from the month’s MMDR and coal-exchange drafts.

PRELIMS CAUTION Do not extend the window to traders/coking coal or describe all coal regulation as abolished.

MAINS PROMPT How can resource allocation improve flexibility without losing accountability?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Society & Welfare

01 · Electricity delivery audit

Rural electrification audit: connection versus service quality

E7-2512-010 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS CAG reviewed DDUGJY and SAUBHAGYA.

• It identified gaps in field surveys and project planning.

• Actual expenditure differed from sanctioned amounts.

• Inspection delays and quality-assurance weaknesses featured.

STATIC CONNECTION · ORIGINAL Sanctioned expenditure, expenditure incurred, connections and reliable electricity service are separate measures.

ANALYSIS · ORIGINAL GUIDANCE

• Verify beneficiary lists before funding and inspect defects through closure.

• Do not turn audit-period outputs into a count of all presently unelectrified households.

PRELIMS CAUTION A connection count does not guarantee reliable, affordable supply or certify all legacy targets were met.

MAINS PROMPT How should electrification success be audited beyond infrastructure counts?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Rural employment guarantee

VB–G RAM G: household guarantee and fiscal redesign

E7-2512-011 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS Parliament passed the replacement rural-employment framework.

• The guarantee increases from 100 to 125 days per rural household.

• The reviewed ordinary-state funding ratio is 60:40; specified special states use 90:10.

• States bear expenditure beyond the Centre’s normative allocation.

STATIC CONNECTION · ORIGINAL A household guarantee is not an individual guaranteed salary; law, budgets, work demand and actual payments differ.

ANALYSIS · ORIGINAL GUIDANCE

• Compare expanded days with state fiscal exposure and enforceability.

• AP analysis should assess wage-payment capacity and demand responsiveness, not only the additional 25 days.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say 125 days were automatically worked/paid by every rural person immediately upon passage.

MAINS PROMPT How should an employment guarantee combine entitlement, fiscal sharing and timely delivery?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

03 · Rural work design

Rural employment: seasonal pause and digital safeguards

E7-2512-012 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS The new framework includes scheduling and monitoring provisions.

• A state may pause programme work for up to sixty days during peak agricultural seasons.

• The fifteen-day work-or-unemployment-allowance principle is retained in the review.

• Biometric/geospatial/app-based monitoring features.

STATIC CONNECTION · ORIGINAL A seasonal pause differs from reducing the annual entitlement by precisely sixty days in every case.

ANALYSIS · ORIGINAL GUIDANCE

• Scheduling should reflect local labour needs and protect vulnerable households.

• Digital monitoring needs correction channels and alternatives when authentication fails.

PRELIMS CAUTION Do not assume a mandatory identical nationwide pause or that technology eliminates payment exclusion.

MAINS PROMPT How can employment programmes support agriculture without weakening workers' fallback security?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

04 · Higher education Bill

VBSA: regulatory consolidation without grant allocation

E7-2512-018 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The Bill was introduced and referred to a Joint Committee.

• It proposes replacing UGC, AICTE and NCTE.

• Separate councils cover regulation, accreditation and standards.

• The apex body/councils do not receive institutional grant-allocation powers in the proposal.

STATIC CONNECTION · ORIGINAL Regulatory power and funding authority are different institutional tools.

ANALYSIS · ORIGINAL GUIDANCE

• Assess autonomy, accountability and coordination between funders/regulators.

• Introduction does not prove existing statutory bodies had already ceased operating.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the Bill enacted or assume every UGC function transfers unchanged to one new body.

MAINS PROMPT How can higher-education regulation improve quality while protecting institutional autonomy?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

05 · Education access review

Education-loan review: recommendations are not entitlements

E7-2512-019 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS The committee examined financial access to higher education.

• It recommended improved collateral-free access and repayment moratorium arrangements.

• It proposed broader institutional coverage and relief from credit-score barriers for specified families.

• The PM Vidyalakshmi framework still has eligibility conditions.

STATIC CONNECTION · ORIGINAL Loan sanction, interest subsidy, collateral rules and repayment moratorium are separate benefits.

ANALYSIS · ORIGINAL GUIDANCE

• Assess information access, processing delay and graduate earnings risk.

• Do not turn a proposed two-year moratorium into a universal already-operative bank rule.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION An education-loan committee report does not automatically waive debt or guarantee admission/funding.

MAINS PROMPT How can higher-education finance widen opportunity without unmanageable debt?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

06 · Labour-rule consultation

December Labour Code drafts: the next implementation stage

E7-2512-023 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS The government invited comments on central draft rules.

• The OSH draft specifies a forty-eight-hour working week.

• Wage calculations and floor-wage consultation have procedural detail.

• Industrial-relations drafts address unions, standing orders and notices.

STATIC CONNECTION · ORIGINAL Code commencement in November does not make every December draft clause final.

ANALYSIS · ORIGINAL GUIDANCE

• Compare parent-law protections with the mechanisms needed for enforcement.

• Final central/state rules and applicability must be checked for the relevant establishment.

READ ACROSS MONTHS · NOTE IDS E6-2509-008

PRELIMS CAUTION Do not describe a draft as nationwide operative detail or assume all daily hours were finalised uniformly.

MAINS PROMPT Why do labour reforms depend on rule design and enforcement after commencement?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

07 · Platform social protection

Gig-worker eligibility: draft thresholds versus paid benefits

E7-2512-024 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS Social-security draft rules propose eligibility conditions.

- The draft refers to ninety days with one aggregator.
- For multiple aggregators it refers to 120 days in the last financial year.
- Additional centrally specified conditions may apply.

STATIC CONNECTION · ORIGINAL Meeting a draft engagement threshold differs from enrolment in a functioning benefit scheme.

ANALYSIS · ORIGINAL GUIDANCE

- Portability needs credible platform records, accessible corrections and financing.
- Do not infer all gig workers already had PF/insurance paid from statutory recognition alone.

READ ACROSS MONTHS · NOTE IDS E5-2505-001, E5-2505-002, E5-2505-003, E5-2508-004, E6-2509-003, E6-2509-031, E6-2509-032, E7-2511-003 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The 90/120-day proposals are not proof of universal automatic benefits already delivered in December.

MAINS PROMPT How can platform-worker protection handle fragmented work histories?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

08 · Skilling audit

PMKVY audit: certification is not verified placement

E7-2512-025 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS CAG examined three phases launched between 2015 and 2022.

• The review reports 23 lakh placements out of 56 lakh certified in specified short-term/special-project components.

• Skill-gap planning and convergence were weak.

• Documentation and monitoring gaps were identified.

STATIC CONNECTION · ORIGINAL The denominator excludes some components; a placement ratio does not necessarily establish sustained employment or adequate pay.

ANALYSIS · ORIGINAL GUIDANCE

• Align training with district demand and verify retention, wages and employer feedback.

• Do not label this a current placement rate for every phase or every trained person.

READ ACROSS MONTHS · NOTE IDS E5-2507-009, E5-2507-010, E5-2508-028, E5-2507-020, E6-2509-023, E6-2510-027, E6-2510-033, E7-2511-023 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION The reported 41% is component- and audit-period-specific, not an all-time unemployment rate.

MAINS PROMPT How should public skilling programmes be judged beyond certificates?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

09 · Workplace redress

PoSH: the woman’s workplace committee and outsider harassment

E7-2512-029 · P1 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · AP-linked

WHY IN THE NEWS The issue reports the Sohail Malik judgment’s jurisdictional clarification. Magazine coverage month is an editorial index, not necessarily the event date.

• A complaint may be handled by the committee at the aggrieved woman’s workplace even when the respondent works elsewhere.

• Workplace protection includes more than only physical contact.

• Confidentiality and fair inquiry are separate safeguards.

STATIC CONNECTION · ORIGINAL Jurisdiction to inquire is not automatic proof of guilt or a waiver of the respondent’s due process.

ANALYSIS · ORIGINAL GUIDANCE

• Institutional access must work with coordination, confidentiality and effective remedy.

• The primary judgment was not independently read in this pass; use it for precise operative limits.

READ ACROSS MONTHS · NOTE IDS E5-2502-002, E5-2507-034, E7-2512-032, E8-2601-011, E8-2601-012, E8-2601-037, E9-2602-038, E10-2603-043 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not assume outsider harassment automatically falls outside all workplace committee jurisdiction.

MAINS PROMPT How can workplace redress remain accessible, confidential and procedurally fair?

Sources: [E7-V12-06]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

10 · Digital work boundaries

Right to disconnect: proposal versus enforceable protection

E7-2512-032 · P2 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · National / other

WHY IN THE NEWS The issue discusses a private member’s Bill and comparative laws. Magazine coverage month is an editorial index, not necessarily the event date.

• The objective is protection from routine work contact outside working hours.

• Essential/on-call duties need clearly defined arrangements.

• The Indian proposal is not automatically enacted law.

STATIC CONNECTION · ORIGINAL Rest, dignity and unequal bargaining power inform the analysis; comparative law is not domestic entitlement.

ANALYSIS · ORIGINAL GUIDANCE

• Specify emergencies, compensation and remedies rather than a blanket operational impossibility.

• Do not use a single reported death as proof of a clinically established cause.

READ ACROSS MONTHS · NOTE IDS E5-2502-002, E5-2507-034, E7-2512-029, E8-2601-011, E8-2601-012, E8-2601-037, E9-2602-038, E10-2603-043 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A private member’s introduction does not create an immediately universal legal right.

MAINS PROMPT How can work-boundary protection accommodate essential services without normalising constant availability?

Sources: [E7-V12-37]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

11 · Children and social platforms

Australia’s under-sixteen rule: a comparative case, not Indian law

E7-2512-033 · P2 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · National / other

WHY IN THE NEWS The December issue reviews the enforced Australian age restriction. Magazine coverage month is an editorial index, not necessarily the event date.

• Covered platforms must take steps to prevent underage accounts.

• Age-assurance design raises privacy and exclusion questions.

• India’s child-data and online-safety rules are separate instruments.

STATIC CONNECTION · ORIGINAL A country’s platform age limit differs from a universal ban on all internet use by children.

ANALYSIS · ORIGINAL GUIDANCE

• Evaluate safety outcomes, evasion, data minimisation and access to support.

• Do not infer causation for every mental-health outcome from correlation with social-media use.

READ ACROSS MONTHS · NOTE IDS E5-2502-001, E5-2507-029, E5-2507-021, E5-2508-007, E5-2508-012, E6-2509-011, E6-2509-012, E6-2510-013 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the Australian rule an Indian under-sixteen ban or a ban on all online services.

MAINS PROMPT What makes child-online-safety policy effective and rights-respecting?

Sources: [E7-V12-36]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Environment

01 · Forests & biodiversity

Forest metrics: distinguish ISFR and FAO

CA-021 · P1 · 2025-12-31 · National / other

• MoEFCC review cites ISFR 2023 forest and tree cover at 25.17% of geographical area: forest 21.76%, tree 3.41%.

• FAO Global Forest Resources Assessment 2025 placed India ninth in total forest area and third in annual net forest gain.

PRELIMS CAUTION Report year, underlying data year and definitions differ; these are not interchangeable forest rankings.

MAINS PROMPT Evaluate green-cover gains using ecological quality, native species, fragmentation and community rights.

Sources: [ENV]

Evidence access: First-edition source check; independent full-text provenance not retained

Madhav Tiger Reserve and reserve counts

CA-024 · P1 · 2025-12-31 · National / other

• The 2025 environment review reported 58 tiger reserves and identified Madhav Tiger Reserve in Madhya Pradesh as a new reserve.

PRELIMS CAUTION 58 is the review’s dated snapshot, not a guaranteed current total.

MAINS PROMPT Link protected-area expansion to corridor continuity, relocation safeguards and coexistence.

Sources: [ENV]

Evidence access: First-edition source check; independent full-text provenance not retained

01 · Virtual renewable contracts

VPPA: financial settlement, not physical delivery between parties

E7-2512-008 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS CERC notified guidelines for virtual power purchase agreements.

• The agreement is between a renewable generator and designated consumer.

• Earmarked-capacity RECs transfer under the framework.

• Contracts last at least one year and are non-tradeable/non-transferable.

STATIC CONNECTION · ORIGINAL A VPPA financially settles price differences while electricity is sold through permitted routes; it is not a private wire supply.

ANALYSIS · ORIGINAL GUIDANCE

• Track renewable attributes to avoid double counting claims.

• The bilateral price does not make exposure disappear; contract allocation and settlement matter.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not say the two parties physically exchange the contracted electricity or can freely trade the VPPA.

MAINS PROMPT How can financial renewable contracts improve compliance without weakening credibility?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Solar ecosystem scrutiny

Solar review: upstream manufacturing and storage gaps

E7-2512-009 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The Energy Committee evaluated solar projects.

• It recommended storage R&D support.

• Dedicated support for polysilicon, ingots and wafers was proposed.

• Land/right-of-way coordination and scheme acceleration were highlighted.

STATIC CONNECTION · ORIGINAL Module assembly, upstream manufacturing and reliable delivered energy are distinct capabilities.

ANALYSIS · ORIGINAL GUIDANCE

• Installed capacity alone does not show domestic value addition or round-the-clock supply.

• Committee suggestions need later government decisions, budgets and implementation checks.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not treat a proposed PLI expansion as already notified or every nameplate MW as constant output.

MAINS PROMPT What complements solar-capacity addition in a resilient domestic ecosystem?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Wetlands

Ramsar sites: dated 2025 snapshot

CA-022 · P1 · 2025-12-31 · AP-linked

• MoEFCC’s 2025 review reported 96 Ramsar sites covering about 1.36 million hectares.

• It reported 11 additions during 2025.

PRELIMS CAUTION This is a 2025 year-end count, NOT a verified November 2026 count.

MAINS PROMPT Explain wise use, catchment management and community participation in wetland conservation.

Sources: [ENV]

Evidence access: First-edition source check; independent full-text provenance not retained

03 · Groundwater denominator

Groundwater 2025: national averages hide local stress

E7-2512-030 · P1 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · AP-linked

WHY IN THE NEWS The issue reviews CGWB/state assessment data. Magazine coverage month is an editorial index, not necessarily the event date.

- Annual recharge is reported as 448.52 BCM.
- Extractable resources are 407.75 BCM and extraction 247.22 BCM.
- The stage of extraction is 60.63%.

STATIC CONNECTION · ORIGINAL Stage of extraction uses annual extraction divided by annual extractable resources, not total recharge.

ANALYSIS · ORIGINAL GUIDANCE

- A national average below 100% does not establish every block is safe or water is uncontaminated.
- AP mandal-level assessment and crop/water-quality evidence should guide local action.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E6-2510-011, E7-2511-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not use total recharge as the ratio denominator or treat all assessed aquifers as equally sustainable.

MAINS PROMPT How should groundwater policy integrate quantity, quality and local demand?

Sources: [E7-V12-29]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

04 · Community risk reduction

Local DRR: integrate risk into Gram Panchayat planning

E7-2512-031 · P1 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · AP-linked

WHY IN THE NEWS A community-based project was approved in the magazine account. Magazine coverage month is an editorial index, not necessarily the event date.

- The outlay is ₹507.37 crore.
- MoPR and NDMA jointly implement the project.
- The described coverage is twenty states and eighty-one disaster-prone districts.

STATIC CONNECTION · ORIGINAL Community participation must include risk identification, planning and evaluation, not volunteer response alone.

ANALYSIS · ORIGINAL GUIDANCE

- Link GPDP budgets, accessible warnings and local vulnerability mapping.
- A national project announcement does not establish every AP panchayat is funded or trained.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-035, E8-2601-028, E8-2601-031 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call planned model panchayats already disaster-proof or coverage universal.

MAINS PROMPT How can local government make disaster-risk reduction part of routine development?

Sources: [E7-V12-31]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Science & Technology

01 · Nuclear legislation

SHANTI Bill passed: participation, liability and regulation

E7-2512-005 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS Parliament passed the nuclear-framework Bill in December.

• It provides for licences to specified Indian private entities.

• Operator-liability tiers range from ₹100 crore to ₹3,000 crore by capacity.

• It grants statutory recognition to AERB.

STATIC CONNECTION · ORIGINAL Legislative passage, assent, commencement, licensing and plant commissioning are distinct milestones.

ANALYSIS · ORIGINAL GUIDANCE

• Investment mobilisation needs independent safety capacity and transparent compensation arrangements.

• This note records the reviewed passage-stage framework, not verification of every later operative rule.

READ ACROSS MONTHS · NOTE IDS MY25-009, MY25-016, E5-2506-013, E5-2507-024, E5-2508-014, E5-2508-027, E6-2509-013, E6-2509-014 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not describe unrestricted foreign operation or new private plants already commissioned from passage alone.

MAINS PROMPT How can nuclear expansion reconcile investment, safety and compensation?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Nuclear liability design

Nuclear recourse: supplier grounds and victim compensation differ

E7-2512-006 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The passed framework alters operator recourse.

• The prior law included defective equipment/materials as a recourse ground.

• The Bill removes that specified ground.

• Contractual recourse and deliberate-damage grounds remain relevant in the reviewed account.

STATIC CONNECTION · ORIGINAL Operator liability to victims and recovery from a supplier are different legal relationships.

ANALYSIS · ORIGINAL GUIDANCE

• Assess incentives for quality, insurability and speed of compensation separately.

• Removing one statutory ground is not proof every contract-based or other legal remedy disappears.

PRELIMS CAUTION Do not call the change an abolition of all operator liability or all possible supplier responsibility.

MAINS PROMPT What liability design balances victim protection and credible supplier incentives?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Security

02 · Defence economy

Defence production and exports: FY2024–25

CA-028 · P1 · 2025-12-31 · National / other

• MoD review reports defence production of approximately ₹1.51 lakh crore in FY2024–25.

• Defence exports reported at ₹23,622 crore for the same financial year.

PRELIMS CAUTION Production value and exports are different measures; financial year is not calendar year.

MAINS PROMPT Discuss strategic autonomy through R&D, private-sector participation, procurement reform and export compliance.

Sources: [DEF]

Evidence access: First-edition source check; independent full-text provenance not retained

International Relations

01 · Russia ties

India–Russia summit: agreements and implementation

E7-2512-020 · P1 · 2025-12 (month-level index) · National / other

WHY IN THE NEWS The Russian President visited India for bilateral talks.

• Cooperation covers nuclear, space, defence and maritime fields.

• A urea venture MoU and skilled-migration frameworks were signed.

• Customs and other sector cooperation also featured.

STATIC CONNECTION · ORIGINAL An MoU, investment decision, operating factory and actual worker placement are different milestones.

ANALYSIS · ORIGINAL GUIDANCE

• Strategic autonomy requires evaluating interests and constraints across partnerships.

• Do not treat a migration framework as unrestricted employment or signed cooperation as completed production.

PRELIMS CAUTION A bilateral summit does not prove all announced projects were implemented immediately.

MAINS PROMPT How can long-standing partnerships adapt to changing economic and strategic conditions?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Oman CEPA

Oman CEPA signed: tariff lines versus trade value

E7-2512-021 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS The countries signed the comprehensive agreement.

• Oman offers zero-duty access on over 98% of tariff lines.

• India’s concessions concern about 78% of lines, covering nearly 95% of import value.

• Services and investment also feature.

STATIC CONNECTION · ORIGINAL A tariff line is a product classification; its count is not the same as its share of actual trade value.

ANALYSIS · ORIGINAL GUIDANCE

• Benefits depend on entry into force, schedules, origin rules and non-tariff conditions.

• AP goods/services exporters must examine their own products rather than rely on aggregate percentages.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not equate 78% of lines with 78% of import value or signature with immediate universal duty-free trade.

MAINS PROMPT What determines effective use of a bilateral trade agreement?

Sources: [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

03 · New Zealand negotiations

India–NZ conclusion: correct date and coverage denominator

E7-2512-022 · P1 · 2025-12-22 · National / other

WHY IN THE NEWS The primary announcement is dated 22 December, not the PRS reference’s 18 December.

• Negotiations concluded; this is distinct from entry into force.

• India offered liberalisation in 70% of tariff lines covering about 95% of bilateral trade coverage stated in the announcement.

• The announced USD 20 billion investment facilitation spans fifteen years.

STATIC CONNECTION · ORIGINAL Conclusion, signature, ratification/commencement and realised trade are separate stages.

ANALYSIS · ORIGINAL GUIDANCE

• The primary release’s tariff-line share corrects the review’s imprecise 95% export phrasing.

• A 5,000-at-any-time professional pathway is not unlimited guaranteed migration or 5,000 automatic annual jobs.

READ ACROSS MONTHS · NOTE IDS MY25-002, CA-033, E5-2508-021, E5-2508-031, E6-2509-019, E6-2509-020, E6-2510-020, E6-2510-022 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not call the investment already received or all Indian sensitive products opened without exceptions.

MAINS PROMPT How should trade-negotiation outcomes be assessed beyond headline market-access claims?

Sources: [E7-NZ], [E7-PRS12]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Andhra Pradesh

01 · Administrative geography

AP district reorganisation: two additions, total twenty-eight

E7-2512-035 · P1 · 2025-12-31 · AP-linked

WHY IN THE NEWS The newspaper reports final notifications effective 31 December.

• Markapuram and Polavaram are the two new districts.

• Polavaram headquarters is Rampachodavaram; Markapuram headquarters is Markapuram.

• Madanapalle becomes Annamayya headquarters, not an automatically separate third addition.

STATIC CONNECTION · ORIGINAL A headquarters shift, new revenue division and new district are different administrative actions.

ANALYSIS · ORIGINAL GUIDANCE

• Distinguish November proposals from the final December account.

• Official gazette boundary schedules remain the authority for any mandal-specific exam or service question.

READ ACROSS MONTHS · NOTE IDS VM2502-002, E5-2507-030, E5-2508-044, E5-2508-045, E7-2512-028, E7-2512-031, E8-2601-028, E8-2601-031 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION Do not repeat the earlier three-new-districts/29-total proposal as the final arrangement.

MAINS PROMPT How should district reorganisation be judged by access and administrative capacity?

Sources: [E7-DIST]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

02 · Rayalaseema development requests

Rayalaseema horticulture package: request, not sanctioned grant

E7-2512-036 · P1 · 2025-12 (month-level index) · AP-linked

WHY IN THE NEWS The CM sought Central support in December.

• The reported request is a ₹41,000 crore horticulture-development package.

• The proposal links clusters, processing and regional development.

• Support for the Polavaram–Nallamala Sagar link was also sought.

STATIC CONNECTION · ORIGINAL A memorandum, budget allocation, project appraisal, clearance and completed irrigation are separate stages.

ANALYSIS · ORIGINAL GUIDANCE

• For Kadapa/Rayalaseema, examine water reliability, markets, cold chains and farmer risk.

• Do not turn requested funding or proposed diversion volumes into sanctioned spending or final interstate entitlement.

READ ACROSS MONTHS · NOTE IDS E5-2507-015, E5-2507-016, E5-2508-032, E5-2508-041, E6-2510-009, E6-2510-010, E6-2510-011, E7-2511-016 · Full sequences: Cross-Month Reading Journeys.

PRELIMS CAUTION A request to the Union Finance Minister is not proof the package was approved or all project clearances obtained.

MAINS PROMPT What complements public investment in a resilient horticulture strategy for Rayalaseema?

Sources: [E7-HORT]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

Culture & History

01 · Living heritage

Deepavali: intangible heritage, not a World Heritage monument

E7-2512-034 · P2 · Magazine coverage: 2025-12 · web posted: 2026-01-28 · event date varies · National / other

WHY IN THE NEWS UNESCO’s official profile records the 2025 inscription. Magazine coverage month is an editorial index, not necessarily the event date.

• It is on the Representative List of the Intangible Cultural Heritage of Humanity.

• The practice is transmitted through families and communities.

• It involves diverse rituals, skills and social participation.

STATIC CONNECTION · ORIGINAL The 2003 living-heritage framework differs from the 1972 World Heritage sites convention.

ANALYSIS · ORIGINAL GUIDANCE

• Safeguarding supports communities and evolving practice rather than freezing one authorised form.

• Recognition is not an exemption from health, safety or environmental rules.

PRELIMS CAUTION Do not describe the inscription as a newly designated physical World Heritage site or ownership monopoly.

MAINS PROMPT How can living heritage be safeguarded while allowing community-led adaptation?

Sources: [E7-V12-45], [E7-ICH]

Evidence access: Actual access scope in source registry; static links, analysis and exam guidance are original

December 2025 recall laboratory

30 original questions, not previous-year questions. Answers follow all questions. Historical monthly snapshot only.

DEC-01. December’s move from 5.5% to 5.25% is:

A. A 2.5-percentage-point cut.

B. A 25-basis-point cut.

C. A 25% rate cut.

D. A measured full-year GDP outcome.

DEC-02. The later Q1 current-account comparator requires:

A. Preserving release vintages and identifying the revision.

B. Silently presenting both estimates as final simultaneously.

C. Treating publication month as the reference quarter.

D. Calling a deficit a merchandise surplus.

DEC-03. IIP differs from GDP because:

A. It measures all services directly.

B. It is identical to nominal GDP.

C. Its growth equals every sector’s growth.

D. It is a covered-industries production index, not whole-economy value added.

DEC-04. An NSC statutory-autonomy recommendation:

A. Does not itself enact statutory autonomy.

B. Automatically creates a new Act.

C. Abolishes the need for transparent methods.

D. Immediately replaces ISI.

DEC-05. SHANTI’s passage should be distinguished from:

A. A framework concerning safety regulation.

B. Licensing and commissioning actual private nuclear plants.

C. A framework concerning liability.

D. A legislative milestone.

DEC-06. Removal of one supplier-recourse ground means:

A. All nuclear safety obligations end.

B. Every contractual remedy is abolished.

C. Victims can never receive compensation.

D. Neither all operator liability nor all possible recourse necessarily disappears.

DEC-07. Under the reviewed Petroleum Rules:

A. Geological storage needs no authorisation.

B. Every offshore lease is issued by any state.

C. Onshore and offshore granting jurisdictions differ.

D. A lease waives every environmental approval.

DEC-08. A VPPA is principally:

A. A guarantee price risk disappears.

B. A private-wire electricity exchange by definition.

C. A freely transferable ordinary spot commodity.

D. A financial contract with renewable-attribute transfer, not physical supply between its parties.

DEC-09. Solar module assembly is not identical to:

A. A potential value-chain stage.

B. An industrial activity.

C. An area for policy evaluation.

D. Domestic upstream polysilicon, ingot and wafer capability.

DEC-10. Electrification audit success requires more than:

A. Counting connections without service-quality checks.

B. Inspection follow-through.

C. Verified beneficiary lists.

D. Sound field surveys.

DEC-11. The reviewed 125-day rural guarantee is:

A. Funded without any state role.

B. Already paid to everyone upon passage.

C. Per rural household, not an automatic individual salary.

D. Per person regardless of work demand.

DEC-12. A provision allowing a seasonal work pause means:

A. Automatic subtraction of sixty from every entitlement.

B. An obligatory identical calendar everywhere.

C. No need to consider vulnerable households.

D. A defined scheduling power, not necessarily an identical nationwide pause.

DEC-13. A committee proposal for broader Gram Sabha consent:

A. Immediately changes every acquisition statute.

B. Makes rehabilitation readiness irrelevant.

C. Must not be represented as an enacted universal amendment.

D. Abolishes all public-infrastructure acquisition.

DEC-14. A 100% insurance FDI ceiling means:

A. Universal automatic insurance.

B. Guaranteed lower claims rejection.

C. Permission, not proof every insurer is foreign-owned or every household covered.

D. Compulsory foreign takeover.

DEC-15. The Securities Markets Code’s December stage was:

A. A final court ruling.

B. Introduction and committee referral.

C. Completed implementation and repeal of all predecessor Acts.

D. Automatic removal of intermediary registration.

DEC-16. December tobacco excise and pan-masala cess changes:

A. Need separate legal and commencement checks from GST.

B. Abolish every other tax.

C. Were one identical GST rate from September.

D. Can be added mechanically without tax-base checks.

DEC-17. The suggested 51% IBC threshold was:

A. The same as every shareholder vote.

B. A Select Committee recommendation, not operative law merely from the report.

C. A monetary-policy threshold.

D. Already universal upon publication of the report.

DEC-18. The VBSA proposal separates:

A. Every function into one unchanged UGC office.

B. Funding and regulation as necessarily identical.

C. Higher-education regulation from institutional grant allocation.

D. Final enactment from no legislative process.

DEC-19. The education-loan report should not be treated as:

A. A committee recommendation.

B. An automatic universal debt waiver or operative moratorium change.

C. An access-to-finance discussion.

D. Evidence for further policy scrutiny.

DEC-20. A Russia urea-project MoU is:

A. Proof all fertiliser dependence ended.

B. A completed project by definition.

C. A cooperation milestone, not a factory already producing.

D. An unconditional worker-placement guarantee.

DEC-21. Tariff-line share differs from import-value share because:

A. They are always numerically identical.

B. Tariff lines measure only persons.

C. Product classifications and actual trade values have different denominators.

D. Import value is the number of chapters in a treaty.

DEC-22. The primary India–NZ conclusion announcement is dated:

A. 18 December solely because of the PRS reference label.

B. The date of automatic entry into force.

C. 22 December 2025.

D. 1 October 2025.

DEC-23. December Labour Code draft rules:

A. Prove the Codes never commenced.

B. Are final nationwide detail at consultation launch.

C. Remove the role of state applicability.

D. Do not become final merely because the parent Codes commenced in November.

DEC-24. Draft gig-worker thresholds establish:

A. Final implementation of every scheme.

B. No need for enrolment.

C. Universal PF payment to every platform user.

D. Proposed eligibility conditions, not proof benefits were paid.

DEC-25. The PMKVY placement ratio requires:

A. Applying it to every phase and every trainee automatically.

B. Assuming every placement was sustained high-paid work.

C. Its component and audit-period denominator.

D. Reading it as the national unemployment rate.

DEC-26. Withdrawal of mandatory app pre-installation:

A. Removes all privacy questions.

B. Makes the withdrawn mandate permanently operative.

C. Does not necessarily abolish the underlying service.

D. Proves every installation is compulsory.

DEC-27. PESA principally concerns:

A. Only Sixth Schedule councils.

B. An identical absolute veto in every consultation provision.

C. Fifth Schedule Areas with Part IX modifications.

D. Every square kilometre of AP uniformly.

DEC-28. Groundwater stage of extraction uses:

A. Extraction divided by annual extractable resources.

B. Extraction divided by total recharge in all cases.

C. Rainfall divided by population.

D. National average as proof every block is safe.

DEC-29. Deepavali’s UNESCO recognition is:

A. An exemption from environmental rules.

B. A physical World Heritage site by definition.

C. Ownership monopoly over every celebration.

D. Living heritage on the Representative List, not a new World Heritage monument.

DEC-30. The final reported AP arrangement adds:

A. Only a new revenue division with no districts.

B. Three districts taking the total to twenty-nine.

C. A separate third district solely from a headquarters shift.

D. Markapuram and Polavaram; Madanapalle becomes Annamayya headquarters.

Explained answer key

DEC-01. B A forecast revision is not a statistical outturn; rate and stance convey different information. Follow February, April, June, August and October before this next step. Caution: Do not describe a 0.25 percentage-point move as a 25% cut or 7.3% as measured annual GDP growth. [E7-2512-001]

DEC-02. A Revision vintage, reference quarter and publication month must be recorded separately. Net services and transfers can cushion a goods deficit. Caution: A lower year-on-year Q2 deficit does not mean no goods deficit or that the initial Q1 estimate was the final figure. [E7-2512-002]

DEC-03. D IIP measures production volume in covered industries; GDP/GVA are value-added concepts. Sector weights mean an aggregate need not mirror the weakest or strongest component. Caution: Do not call IIP growth GDP growth or infer every industrial sector expanded. [E7-2512-003]

DEC-04. A A parliamentary recommendation differs from an enacted change in institutional powers. Transparent methods and revisions support trust more than suppressing inconvenient estimates. Caution: Do not say the report itself enacted a new NSC law or replaced every statistical agency. [E7-2512-004]

DEC-05. B Legislative passage, assent, commencement, licensing and plant commissioning are distinct milestones. Investment mobilisation needs independent safety capacity and transparent compensation arrangements. Caution: Do not describe unrestricted foreign operation or new private plants already commissioned from passage alone. [E7-2512-005]

DEC-06. D Operator liability to victims and recovery from a supplier are different legal relationships. Assess incentives for quality, insurability and speed of compensation separately. Caution: Do not call the change an abolition of all operator liability or all possible supplier responsibility. [E7-2512-006]

DEC-07. C A petroleum lease does not itself substitute for every environmental or safety approval. Shared infrastructure can lower costs but needs liability and access arrangements. Caution: Do not generalise offshore authority to state governments or call carbon storage automatically authorised everywhere. [E7-2512-007]

DEC-08. D A VPPA financially settles price differences while electricity is sold through permitted routes; it is not a private wire supply. Track renewable attributes to avoid double counting claims. Caution: Do not say the two parties physically exchange the contracted electricity or can freely trade the VPPA. [E7-2512-008]

DEC-09. D Module assembly, upstream manufacturing and reliable delivered energy are distinct capabilities. Installed capacity alone does not show domestic value addition or round-the-clock supply. Caution: Do not treat a proposed PLI expansion as already notified or every nameplate MW as constant output. [E7-2512-009]

DEC-10. A Sanctioned expenditure, expenditure incurred, connections and reliable electricity service are separate measures. Verify beneficiary lists before funding and inspect defects through closure. Caution: A connection count does not guarantee reliable, affordable supply or certify all legacy targets were met. [E7-2512-010]

DEC-11. C A household guarantee is not an individual guaranteed salary; law, budgets, work demand and actual payments differ. Compare expanded days with state fiscal exposure and enforceability. Caution: Do not say 125 days were automatically worked/paid by every rural person immediately upon passage. [E7-2512-011]

DEC-12. D A seasonal pause differs from reducing the annual entitlement by precisely sixty days in every case. Scheduling should reflect local labour needs and protect vulnerable households. Caution: Do not assume a mandatory identical nationwide pause or that technology eliminates payment exclusion. [E7-2512-012]

DEC-13. C The report’s recommendations must not be presented as fresh amendments already enacted. Meaningful participation requires understandable information and real rehabilitation readiness. Caution: Do not convert a committee proposal for all acquisitions into an existing universal statutory rule. [E7-2512-013]

DEC-14. C Foreign ownership permission, capital inflows, product availability and effective household coverage differ. Competition needs sound solvency and accessible claims/complaint systems. Caution: Do not say every insurer became foreign-owned or every household automatically insured. [E7-2512-014]

DEC-15. B Consolidation can simplify a framework without resolving every regulatory-capacity problem. Clear recusal standards and accessible redress matter alongside structural changes. Caution: Do not claim the three Acts had already been repealed merely because the Code was introduced. [E7-2512-015]

DEC-16. A Excise, cess and GST have different legal bases and implementation instruments. Follow September's deferred tobacco transition rather than claim an identical rate began then. Caution: Do not add headline percentages mechanically or backdate December legislation to all September supplies. [E7-2512-016]

DEC-17. B A committee recommendation is not an operative amendment; creditor roles and statutory adjudication differ. Assess incentives to prefer liquidation for additional fees and guard commercial wisdom with due process. Caution: Do not apply the suggested 51% threshold as already binding solely on this report. [E7-2512-017]

DEC-18. C Regulatory power and funding authority are different institutional tools. Assess autonomy, accountability and coordination between funders/regulators. Caution: Do not call the Bill enacted or assume every UGC function transfers unchanged to one new body. [E7-2512-018]

DEC-19. B Loan sanction, interest subsidy, collateral rules and repayment moratorium are separate benefits. Assess information access, processing delay and graduate earnings risk. Caution: An education-loan committee report does not automatically waive debt or guarantee admission/funding. [E7-2512-019]

DEC-20. C An MoU, investment decision, operating factory and actual worker placement are different milestones. Strategic autonomy requires evaluating interests and constraints across partnerships. Caution: A bilateral summit does not prove all announced projects were implemented immediately. [E7-2512-020]

DEC-21. C A tariff line is a product classification; its count is not the same as its share of actual trade value. Benefits depend on entry into force, schedules, origin rules and non-tariff conditions. Caution: Do not equate 78% of lines with 78% of import value or signature with immediate universal duty-free trade. [E7-2512-021]

DEC-22. C Conclusion, signature, ratification/commencement and realised trade are separate stages. The primary release's tariff-line share corrects the review's imprecise 95% export phrasing. Caution: Do not call the investment already received or all Indian sensitive products opened without exceptions. [E7-2512-022]

DEC-23. D Code commencement in November does not make every December draft clause final. Compare parent-law protections with the mechanisms needed for enforcement. Caution: Do not describe a draft as nationwide operative detail or assume all daily hours were finalised uniformly. [E7-2512-023]

DEC-24. D Meeting a draft engagement threshold differs from enrolment in a functioning benefit scheme. Portability needs credible platform records, accessible corrections and financing. Caution: The 90/120-day proposals are not proof of universal automatic benefits already delivered in December. [E7-2512-024]

DEC-25. C The denominator excludes some components; a placement ratio does not necessarily establish sustained employment or adequate pay. Align training with district demand and verify retention, wages and employer feedback. Caution: The reported 41% is component- and audit-period-specific, not an all-time unemployment rate. [E7-2512-025]

DEC-26. C The existence of a service does not prove every installation is mandatory, and withdrawal must be reflected in chronology. Evaluate lawful purpose, necessity, alternatives and independent redress. Caution: A withdrawn mandate is not an ongoing compulsory-installation rule. [E7-2512-027]

DEC-27. C Fifth Schedule PESA and Sixth Schedule autonomous councils are not interchangeable. AP application needs state rules, actual devolution and alignment with land/mineral/forest law. Caution: Do not apply PESA uniformly to all AP territory or replace every consultation duty with an identical absolute veto. [E7-2512-028]

DEC-28. A Stage of extraction uses annual extraction divided by annual extractable resources, not total recharge. A national average below 100% does not establish every block is safe or water is uncontaminated. Caution: Do not use total recharge as the ratio denominator or treat all assessed aquifers as equally sustainable. [E7-2512-030]

DEC-29. D The 2003 living-heritage framework differs from the 1972 World Heritage sites convention. Safeguarding supports communities and evolving practice rather than freezing one authorised form. Caution: Do not describe the inscription as a newly designated physical World Heritage site or ownership monopoly. [E7-2512-034]

DEC-30. D A headquarters shift, new revenue division and new district are different administrative actions. Distinguish November proposals from the final December account. Caution: Do not repeat the earlier three-new-districts/29-total proposal as the final arrangement. [E7-2512-035]

Mains answer laboratory

Original planning aids, not official answers or predicted questions. Evidence is dated; recommendations below are analytical guidance.

How can nuclear expansion reconcile investment, safety and compensation?

Study reference: E7-2512-005

Opening distinction: Legislative passage, assent, commencement, licensing and plant commissioning are distinct milestones.

Dated anchor: It provides for licences to specified Indian private entities. Operator-liability tiers range from ₹100 crore to ₹3,000 crore by capacity.

Argument: Investment mobilisation needs independent safety capacity and transparent compensation arrangements.

Counterargument / limit: Do not describe unrestricted foreign operation or new private plants already commissioned from passage alone.

Implementation priorities: Independent safety capability, licensing capacity and transparent compensation.

Evaluation: Operational safety, emergency readiness and timely victim compensation.

AP / linkage angle: This note records the reviewed passage-stage framework, not verification of every later operative rule.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How should an employment guarantee combine entitlement, fiscal sharing and timely delivery?

Study reference: E7-2512-011

Opening distinction: A household guarantee is not an individual guaranteed salary; law, budgets, work demand and actual payments differ.

Dated anchor: The guarantee increases from 100 to 125 days per rural household. The reviewed ordinary-state funding ratio is 60:40; specified special states use 90:10.

Argument: Compare expanded days with state fiscal exposure and enforceability.

Counterargument / limit: Do not say 125 days were automatically worked/paid by every rural person immediately upon passage.

Implementation priorities: Demand capture, fiscal sharing, wage payments and state contingency planning.

Evaluation: Timely work/payment and enforceable unemployment allowance.

AP / linkage angle: AP analysis should assess wage-payment capacity and demand responsiveness, not only the additional 25 days.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How can acquisition deliver public infrastructure without hollowing out community safeguards?

Study reference: E7-2512-013

Opening distinction: The report’s recommendations must not be presented as fresh amendments already enacted.

Dated anchor: It noted Gram Sabha consultation/consent being reduced to formality. It recommended broader mandatory Gram Sabha involvement.

Argument: Meaningful participation requires understandable information and real rehabilitation readiness.

Counterargument / limit: Do not convert a committee proposal for all acquisitions into an existing universal statutory rule.

Implementation priorities: Understandable consultation and service-ready rehabilitation before possession.

Evaluation: Restored livelihoods, tenure security and functioning local services.

AP / linkage angle: AP irrigation/industrial projects need project-specific rights and acquisition-stage checks.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How can insurance liberalisation deepen protection rather than ownership change alone?

Study reference: E7-2512-014

Opening distinction: Foreign ownership permission, capital inflows, product availability and effective household coverage differ.

Dated anchor: The framework raises the foreign-equity ceiling from 74% to 100%. Foreign reinsurer net-owned-fund requirements fall from ₹5,000 crore to ₹1,000 crore.

Argument: Competition needs sound solvency and accessible claims/complaint systems.

Counterargument / limit: Do not say every insurer became foreign-owned or every household automatically insured.

Implementation priorities: Capital and competition with solvency, claims and consumer protection.

Evaluation: Coverage depth and claim resolution rather than ownership alone.

AP / linkage angle: Keep September’s individual-policy GST relief and AP hybrid cover proposals legally distinct.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How can higher-education regulation improve quality while protecting institutional autonomy?

Study reference: E7-2512-018

Opening distinction: Regulatory power and funding authority are different institutional tools.

Dated anchor: It proposes replacing UGC, AICTE and NCTE. Separate councils cover regulation, accreditation and standards.

Argument: Assess autonomy, accountability and coordination between funders/regulators.

Counterargument / limit: Do not call the Bill enacted or assume every UGC function transfers unchanged to one new body.

Implementation priorities: Clear regulator/funder boundaries and fair institutional due process.

Evaluation: Quality, access and autonomy, not only compliance filings.

AP / linkage angle: Introduction does not prove existing statutory bodies had already ceased operating.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How should public skilling programmes be judged beyond certificates?

Study reference: E7-2512-025

Opening distinction: The denominator excludes some components; a placement ratio does not necessarily establish sustained employment or adequate pay.

Dated anchor: The review reports 23 lakh placements out of 56 lakh certified in specified short-term/special-project components. Skill-gap planning and convergence were weak.

Argument: Align training with district demand and verify retention, wages and employer feedback.

Counterargument / limit: The reported 41% is component- and audit-period-specific, not an all-time unemployment rate.

Implementation priorities: District skill-demand studies, credible assessment and employer feedback.

Evaluation: Retention and earnings after placement, independently sampled.

AP / linkage angle: Do not label this a current placement rate for every phase or every trained person.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How should groundwater policy integrate quantity, quality and local demand?

Study reference: E7-2512-030

Opening distinction: Stage of extraction uses annual extraction divided by annual extractable resources, not total recharge.

Dated anchor: Annual recharge is reported as 448.52 BCM. Extractable resources are 407.75 BCM and extraction 247.22 BCM.

Argument: A national average below 100% does not establish every block is safe or water is uncontaminated.

Counterargument / limit: Do not use total recharge as the ratio denominator or treat all assessed aquifers as equally sustainable.

Implementation priorities: Aquifer/mandal water budgets, recharge and demand-side crop choices.

Evaluation: Seasonal levels and quality alongside transparent extractable-resource estimates.

AP / linkage angle: AP mandal-level assessment and crop/water-quality evidence should guide local action.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

How should district reorganisation be judged by access and administrative capacity?

Study reference: E7-2512-035

Opening distinction: A headquarters shift, new revenue division and new district are different administrative actions.

Dated anchor: Markapuram and Polavaram are the two new districts. Polavaram headquarters is Rampachodavaram; Markapuram headquarters is Markapuram.

Argument: Distinguish November proposals from the final December account.

Counterargument / limit: Do not repeat the earlier three-new-districts/29-total proposal as the final arrangement.

Implementation priorities: Gazette-verified boundaries, transition staffing and citizen-facing service continuity.

Evaluation: Travel/access time, workload and grievance resolution rather than district count.

AP / linkage angle: Official gazette boundary schedules remain the authority for any mandal-specific exam or service question.

Suggested 150–250-word structure: Define the mechanism in two sentences; cite the dated anchor; develop two benefits and two constraints; propose the priorities above with a responsible institution; conclude using the evaluation criterion rather than another announcement.

Unfinished research

Not exhaustive. Expanded monthly volumes are selected research batches; the rest of the requested archive remains incomplete. No month has passed a complete daily source audit. Full-text and source-extract evidence are distinguished. Historical notes do not certify current law, implementation or latest statistics.

Daily-source reconciliation remains open for every month. Further periods remain unfinished. The monthly inventory and daily/monthly ledgers record work required, not additional completed coverage.

The automation files collect links only after deployment and enabling. No hidden researcher will fill the remaining months after this response.

Read research/Research-Status.md for corrections, exclusions, evidence caveats and close-out tasks.
